

Watershed Dams In Coal County

Oklahoma has 129 USDA Natural Resources Conservation Service (NRCS) assisted watershed projects in 64 counties. Over 2,100 watershed dams have been built in the state with financial and technical assistance from NRCS authorized through Public Law 78-534, Flood Control Act of 1944 (Washita River Watershed) and Public Law 83-566 Watershed Protection and Flood Prevention Program.

Watershed projects address a myriad of natural resource issues such as flooding, soil erosion, water quality, animal waste management, irrigation water management, water supply, wetland development or enhancement, fish and wildlife habitat and recreation. Many of these watershed projects also include conservation practices such as terraces, waterways, ponds, gully control, and pasture and rangeland plantings.

Operation and Maintenance of Watershed Projects

The annual operation and maintenance of dams and their components is a major responsibility for project sponsors (local units of governments, usually conservation districts, conservancy districts, or city or county governments).

Operation and maintenance of watershed dams can be expensive and labor intensive, but is necessary to ensure the dams function as designed and remain safe. Maintenance work includes clearing trees from dams and spillway, repairing soil erosion damage, repairing damage to the spillway and dams after heavy rainstorms, and keeping the inlet towers cleared of debris.

Operation and Maintenance Needs

\$11.7 million is needed to meet operation and maintenance needs on all watershed dams in the state for fiscal years 2009-2012.

Rehabilitation of Aging Dams

Oklahoma has 321 watershed dams that will exceed their 50-year design life by 2009 and that number will increase to 806 by 2013. Coal county has 15 dams that will exceed the 50-year design life by 2012 and that number increases to 38 by 2019.

Some Oklahoma dams will need rehabilitation to remain safe and protect the people that live or work downstream. It is estimated that \$30 million will be needed to rehabilitate the highest priority of these dams during the next five years. Oklahoma currently has several rehabilitation projects in various stages of planning, design, or construction.

NRCS assistance is available to rehabilitate aging watershed dams with 65 percent federal cost-share. Local project sponsors provide 35 percent of the rehabilitation costs.

Annual Watershed Benefits (Entire Watershed)

Watershed Name	Dams in Watershed	Dams in Coal Co.	*Monetary Benefits	Farms / Ranches Benefited	Bridges Benefited	Wetlands Enhanced/Created (acres)	Reduced Sedimentation (tons of soil)
Caney Coon Ck.	3	3	\$304,371	53	2	183	32,652
Delaware Creek	13	2	\$621,262	109	5	299	61,885
Leader-Mid. Clr, Boggy	33	24	\$771,794	167	7	490	66,662
Lower Clear Boggy	22	1	\$486,807	312	2	690	114,349
Upper Clear Boggy	49	20	\$1,031,470	394	20	1,033	167,410
Upper Muddy Boggy	24	3	\$403,251	334	9	369	63,298
Total	144	53	\$3,618,955	1,369	45	3,064	506,256

*Monetary benefits include reduction in flood damages and may include other benefits such as soil erosion control, recreational areas, irrigation water, municipal and industrial water supply, and wildlife habitat. (Price Base 2007). December 2008
