Basic Electricity for the Petroleum Industry		2nd		Petroleum Extension Service (PETEX)	1977	electricity; petroleum industry	621.3		PETB			Reference	Book	Covers electrical flow; electrical power; magnetism and electricity; electrical generation; electric motors; transformers; auxiliary equipment; motor controls; and measurement of voltage, current, and other variables. Review questions follow each chapter. Accompanying workbook is available.			Basic Electricity for the Petroleum Industry
Basic Electronics for the Petroleum Industry		3rd		Petroleum Extension Service (PETEX)	1980	Electronics; study lessons; PETEX; electricity; simple, series, parallel circuits; Ohm's law; magnetism; electromagnetism and magnetic circuits; alternating current; inductance; reactance; impedance; magnetic devices; electronic components; semiconductor	621		0.381	PET		Reference	Book	This series consists of 5 units of study lessons intended to carry the student from elementary concepts of electricity and magnetism to a good understanding of fundamental solid-state electronics. Each unit contains review questions; answers are included at the back of the book. Unit 1 covers the nature of electricity; simple, series, and parallel circuits and application of Ohm's Law. Unit 2 covers magnetism; electromagnetism and magnetic circuits; alternating current, inductance, reactance, and impedance; and magnetic devices. Unit 3 covers types of electronic components; semiconductor diodes and transistors, and power sources. Unit 4 covers binary number system and digital logic, sequential logic and memory devices, linear circuits, and integrated circuits. Unit 5 covers test instruments and troubleshooting. Improved Recovery		vi; 123 p.	Oil and Gas Production Series	Petroleum Extension Service (PETEX)	1983	petroleum reservoirs; enhanced recovery; improved recovery; water flooding; chemical flooding; carbon dioxide flooding; thermal recovery; gas injection	622	338 2	CON		General	Book	Describes the role in U. S. oil production of improved recovery—the production of oil not recoverable by conventional primary production methods. Introduces four improved recovery methods—waterflooding, gas injection, chemical flooding, and thermal recovery. Provides a nontechnical description of the subsurface processes by which these methods displace oil, and evaluates their development and use. Each chapter contains a self-test. Includes a glossary.
