The State of Oklahoma has a long history of caring for its veterans dating back to the dawn of statehood. The Oklahoma Department of Veterans Affairs has grown into an agency that provides over 1400 long-term care beds for veterans in seven veterans centers across the state. The agency has invested in new and updated facilities and up-to-date information and medical technologies.

The ODVA is actively recruiting physicians, physician assistants, and nurse practitioners to join us in our commitment to providing war veterans the highest quality care. We offer providers the opportunity to practice in modern facilities located in bustling, metropolitan areas and scenic, rural areas of the state. Regardless of the lifestyle you are looking for, we probably have a location that is perfect for you.

Providers in our centers are able to concentrate on their patients without many of the distractions of the current healthcare environment. Our providers work predictable 40 hour weeks with limited on-call periods and enjoy paid holidays and vacation time. Each center has a dedicated staff that takes care of all billing and administrative tasks. Additionally, malpractice insurance is not required as our providers are covered at no cost when working within the scope of employment through the State of Oklahoma Risk Management Division.

We offer competitive salaries and excellent benefits including health, dental and life insurance, a retirement plan, and deferred compensation plans. If you would like to learn more about employment opportunities at ODVA, please contact your preferred location directly. Click on the links to the left for more information about each center.

Patient Wing - Sulphur

X-Ray - Lawton

Physical Therapy - Norman

Lab - Lawton

Lobby - Lawton Veterans Center
