EGID OMES ADMINISTRATION MEMBERS:

- Frank Wilson, Administrator
- Scott Boughton, Legal Counsel
- Dr. Frank Lawler, Chief Medical Officer
- Teresa South, Director of Provider Relations
- Dana Dale, Senior Insurance Auditor
- Diana O'Neal, Deputy Administrator of Finance
- Paul King, Director of Industry Practice and Compliance
- Joe McCoy, Director of Internal Audit
- Bo Reese, Deputy Administrator of Administration
- Carol Bowman, TPA Liaison

ALSO PRESENT:

- Donna Kinzer, Berkeley Research
- JoAnna Younts, Berkeley Research

AUDIENCE MEMBERS PRESENT:

- Melissa Gonzales, HPES
- Christine Brown, Oklahoma Spine Hospital
- Randy Ison, Integris Health
- Rick Snyder, Oklahoma Hospital Association
- Rejeana Allford, Norman Regional Health System
- Jane Bolton, DOC
- Dr. Miller, DOC
- Lisa Coleman, HPI
- Liz Lindsey, HPI

Presentation in Reference to Injectables	7
Presentation in Reference to Dialysis.	14
Reporter's Certificate	24

1 (Hearing commenced at 8:30 a.m.)

2 MR. BOUGHTON: Good morning, everybody.

3 I think it's time to start. Thank you for coming. My
4 name is Scott Boughton, legal counsel for the Employee
5 Group Insurance Division of the Office of Enterprise and
6 Management Services. We go by the acronym OMES EGID or
7 sometimes just EGID. Prior to recent legislative
8 changes the organization used to be called the Oklahoma
9 State and Education Employees Group Insurance Board. We
10 are that group.

11 We are here to discuss proposed changes
12 to reimbursement methodologies for provider's contract
13 with EGID. OMES EGID is here to listen to your views
14 and concerns. This is not an official meeting under the
15 Open Meeting Act with the State of Oklahoma.

16 This is a hearing called pursuant to
17 Title 74 Oklahoma statute, Section 1325 which provides,
18 "The Office of Management and Enterprises Services shall
19 schedule a hearing 30 days prior to adopting any major
20 change in the reimbursement rates or methodology. The
21 office shall notify healthcare providers who provide
22 services pursuant to a contract with the office at least
23 15 days prior to the hearing. The notice shall include
24 proposed changes to the reimbursement rates or
25 methodology. The office shall also inform such

1 healthcare providers at the hearing of any proposed
2 changes to the reimbursement rates or methodology. At
3 the hearing the office shall provide an open forum for
4 such healthcare providers to comment on proposed
5 changes."

6 This meeting is being recorded and will
7 be transcribed. The transcript of this hearing, along
8 with any of the EGID's responses to the comments raised
9 today will be posted on EGID's website during the week
10 of October 22nd. There are signup sheets in the back.
11 If you want your presence reflected in the transcript of
12 this hearing please be sure to sign in.

13 At this hearing the EGID is going to
14 provide information on injectables and dialysis. Our
15 medical director, Dr. Frank Lawler will give a
16 PowerPoint presentation on injectables followed by
17 public comments. After that is all completed he will
18 give a separate PowerPoint presentation on dialysis,
19 which will also be followed by public comment. Both of
20 these PowerPoints are available on our website at
21 www.ok.gov/sib/providers, under the Network News section
22 of our website under the link Public Hearings.

23 Any person who wishes to speak or comment
24 after Dr. Lawler's presentation, after you are
25 recognized please come to the center podium and speak

1 into the microphone clearly. Please give us your name
2 and any organization you may represent. We hope to
3 conclude the meeting by 10:30 a.m., hopefully sooner.

4 At this time I would like to introduce
5 Frank Wilson, our administrator of OMES EGID.

6 MR. WILSON: Thank you, Scott.

7 Good morning. I'm Frank Wilson, the
8 administrator here at the Oklahoma Employees Group
9 Insurance Division. And what we'd like to do first is
10 kind of just go through some introductions of our staff
11 this morning who have been involved with this project,
12 along with our consultants from Berkeley Research.

13 As you know, to the far right is Scott
14 Boughton, our legal counsel. To my right is Dr. Frank
15 Lawler, our chief medical officer. And to my left is
16 Ms. Donna Kinzer with Berkeley Research. To her left is
17 JoAnna Younts with Berkeley Research. Teresa South, our
18 director of provider relations; and Dana Dale, our
19 senior insurance auditor at Employee's Group Insurance.

20 Over to the bottom row to the right is
21 Ms. Diana O'Neal. She's deputy administrator of
22 Finance. And Mr. Paul King, who is our director of
23 Industry Practice and Compliance. And Joe McCoy,
24 director of Internal Audit. Bo Reese, deputy
25 administrator of Administration. And Ms. Carol Bowman,

1 our TPA liaison and I think a much longer title than I'm
2 prepared to say at this time.

3 Again, welcome. Thank you for coming
4 this morning. We're here today to look at some changes
5 in our reimbursement methodology. Most of you know the
6 plan that we're talking about here today is the
7 HealthChoice plans. Health Choice plans, as we all
8 know, are the self-funded plans for the public
9 employees, most public employees in the State of
10 Oklahoma.

11 The changes we're talking about today are
12 a result of several months of research and analysis of
13 our own claim data. And I want to say thanks to all the
14 providers for participating in the task force. Several
15 task force meetings that we had provided lots of good
16 feedback, and I hope you will see some of those things
17 that are incorporated into the proposed changes that
18 you'll see presented this morning.

19 With that, I will turn it over to
20 Dr. Lawler to kind of walk us through the proposed
21 changes in reimbursement.

22 DR. LAWLER: There are three ways you can
23 look at this at least. There's a handout at the back.
24 We're going to project it on the screen. And if you
25 have an iPad or iPhone with those capabilities you can

1 go to our website and follow along. Some of the slides
2 are challenging in some respects to see. Again, I would
3 urge you to get a handout so you can follow along. I
4 will probably refer to the handout myself. So, anyway,
5 we have plenty of handouts at the back.

6 I'm not too fussy, but you might set your
7 phone to stun or put it on airplane mode, if you would.

8 So let me walk you through the
9 presentation on facility reimbursement for injectable
10 drugs. Our current reimbursement was instituted on
11 April 1st. HealthChoice, now known as EGID, implemented
12 an outpatient fee schedule with an urban/rural
13 distinction. The hierarchy for establishing injectable
14 outpatient fees is 150 percent or 175 percent depending
15 on urban/rural distinction of the Medicare Ambulatory
16 Payment Classification known as APC. There are four
17 HCPCS codes at 225 percent or 250 percent for
18 urban/rural.

19 The second approach is 160 percent/175
20 percent for urban/rural for Medicare Part B drugs. 160
21 percent/175 percent for urban/rural of Average Sales
22 Price, and 135 percent/150 percent of urban/rural for
23 Average Wholesale Price. Drugs for which none of the
24 above is available are billed out at 60 percent of
25 billed charges. Medicare's rate is ASP plus 6 percent

1 for codes that do not have an APC rate.

2 Our objective was to determine whether
3 our reimbursement for injectables is in line with common
4 industry practices. The steps that were taken were to
5 obtain external consulting service, the BRG Consultants,
6 to assist the data analysis and to identify options for
7 reimbursement approaches that are consistent with
8 industry practices.

9 We wanted to review our current
10 injectable reimbursement levels and explore historical
11 cost trends per our data analytics. The per member per
12 month for injectables increased 38 percent from 2009 to
13 2010 and increased 58 percent from 2010 to 2011.

14 So our goal is to compare our current
15 reimbursement rates to billed charges, compare them to
16 Medicare rates and to compare them to commercial payer
17 ranges.

18 So HealthChoice has developed proposed
19 rates based on data analysis and on consultant
20 recommendations. A really big part of this was to
21 establish a provider task force to obtain feedback on
22 analysis and recommendations. We identified the task
23 force members by reviewing utilization, so our top
24 utilizers and specific parties with a known interest
25 were invited.

1 Next one is for APC rates and ASP drugs.
2 The recommendation of proposed rate was 120 percent of
3 Average Sales Price, or ASP, for urban facilities, and
4 130 percent of ASP for rural facilities. The
5 considerations behind this recommendation were that the
6 Icore Trend Report, which is based on a national survey
7 of payers, found that the most prevalent markup over ASP
8 is 10 percent. The Journal of Managed Care Pharmacy
9 reports that increasing use of ASP-based approaches with
10 mark-ups averaging 9.4 over ASP for non-oncology drugs
11 and 10.3 percent for oncology drugs.

12 The recommendation for non-ASP priced
13 drugs, EGID proposes 100 percent of average wholesale
14 price for both urban and rural facilities. The
15 consideration behind this recommendation are the typical
16 payer industry practice for non-ASP drugs is to
17 establish reimbursement rates at average wholesale price
18 minus a percentage, for example AWP minus 15 percent, to
19 establish a fee schedule based on average wholesale
20 price.

21 If there is no ASP nor AWP, published
22 rates specific to CPT or HCPCS code that is submitted,
23 HealthChoice proposes that claims above a threshold of
24 \$500 be evaluated manually. Again, the rationale is,
25 for claims that are less than \$500, the current practice

1 of 60 percent for urban and 70 percent for rural
2 facilities billed charges will be continued.

3 For claims above the threshold, providers
4 will be required to submit the drug name, the generic
5 name, the NDC, or National Drug Code, strength, dosage
6 and route of administration in order to price using AWP.

7 Additional considerations taken into
8 account, comments from the task force is that national
9 payers were used and the analysis failed to determine if
10 proposed reimbursement rates were commensurate or
11 comparable to Oklahoma commercial payers.

12 HealthChoice response is that national
13 pricing trends are an appropriate indicator of drug
14 costs, because acquisition costs are not necessarily
15 determined locally. Secondly, based on an analysis
16 of coordination of benefits for professional services
17 where other commercial payer were primary and we were
18 secondary, a large majority of codes reviewed showed 120
19 percent of ASP for the billed prices -- reimbursed
20 prices. Excuse me.

21 Another task force comment was that the
22 proposed rates were below acquisition costs.

23 HealthChoice response is that disproportionate share
24 data, DSD, shows that 37 Oklahoma hospitals qualify to
25 acquire drugs under the 340B program, which may enable

1 them to offer high quality cost effective programs in
2 the outpatient setting. Purchase prices under any --
3 under the 340B program are well below average sales
4 price.

5 In addition, for any particular drug in
6 which a provider's cost significantly exceed the
7 reimbursement, the provider should contact EGID Provider
8 Relations to seek an exception process based upon
9 supporting documentation of costs. Certainly, we don't
10 want people to take a loss by serving our members.

11 Another task force comment was that the
12 increased cost suggest the members are being diagnosed
13 at a higher rate of illnesses treated by the injectables
14 and utilization should be addressed first.

15 HealthChoice response is that utilization
16 is a factor determined between the provider and the
17 member. However, HealthChoice welcomes the opportunity
18 to work with providers who are willing to identify
19 utilization issues that we can better manage based on
20 objective outcome measures and the standard of care.

21 Another task force comment was that
22 reductions in reimbursement should be offset with
23 increases in other rates such as administration codes.

24 HealthChoice response is that
25 administration codes 963 and 964 series, facilities

1 receive 175 percent or 200 percent of Medicare based on
2 urban/rural distinction. This is projected to be
3 adequate reimbursement for administration codes and will
4 not change at this time for facilities.

5 Another task force comment was that due
6 to the significant financial impact of this change
7 please consider a two-year phase-in period.

8 HealthChoice response is that we will
9 implement the rates over a two-year phase-in period.
10 For APC and ASP-priced drugs for 2013 the urban facility
11 percentages will be 135 percent and then 120 percent for
12 2014. Four codes will be at 175 percent for 2013. For
13 2013 the rural percentages will be 155 percent and then
14 130 percent for 2014. Four codes for the rural
15 facilities will be at 190 percent for 2013.

16 So in conclusion, these reimbursement
17 levels fall within the common commercial level payment
18 range and are significantly above Medicare rates. The
19 proposed rates will provide relative parity for
20 injectable drugs between facilities and professional
21 offices.

22 The next slide, which is probably
23 unreadable from just about anybody in the room, shows
24 the top 20 codes and the various reimbursements and fees
25 and the proposed fees. And so I would encourage you to

1 refer to your handout for that.

2 So let me turn it back over to
3 Mr. Boughton for consideration of comments.

4 MR. BOUGHTON: If anybody would like to
5 comment, like I said earlier, please come up to the
6 podium and speak into the microphone clearly and tell us
7 who you are and who you represent. We would like to
8 hear from you.

9 (No response.)

10 MR. BOUGHTON: If there is no comments I
11 guess we will go on to the next portion of our program.
12 And Dr. Lawler will go ahead and do his presentation on
13 dialysis.

14 DR. LAWLER: And I do want to thank the
15 task force members for their hard work and input.
16 Hopefully we have been able to address the major
17 concerns. Again, some of these are hard to read and I
18 would urge you to get a handout if you need one.

19 So let's talk about dialysis
20 reimbursement. On the second slide, which is where we
21 are at here, dialysis providers are currently reimbursed
22 under the outpatient portion of the EGID's facility
23 contract. Network providers receive the higher
24 reimbursement -- rural reimbursement. So whether you're
25 urban or not, if you're network you get the higher

1 reimbursement rate. Non-network providers receive the
2 lower urban reimbursement rates.

3 Most payments are made based on a fee
4 schedule for each dialysis unit based on CPT or HCPCS
5 codes. Drugs and laboratory tests are reimbursed
6 separately by CPT or HCPCS code. Codes for which no fee
7 has been established are reimbursed as a percentage of
8 billed charges. The highest utilized code, 90999, which
9 is an unlisted dialysis procedure, is currently
10 reimbursed as a percentage of billed charges.

11 Our objective in the analysis was to
12 determine whether HealthChoice reimbursement was in line
13 with common industry practices. The analytical steps
14 that we used were to obtain external consulting services
15 to assist in data analysis and to identify options for
16 reimbursement. Again, we wanted to be consistent with
17 standard industry practices as much as possible.

18 Also, we plan to review the current
19 dialysis reimbursement levels and historical cost
20 trends. According to our data analytical approach the
21 average charge per unit for 90999 has substantially
22 increased over the last three years. And our final goal
23 was to compare reimbursement levels to billed charges,
24 to Medicare rates, and to commercial payer ranges.

25 Health Choice has developed proposed

1 rates based on the data analysis and upon consultant
2 recommendations. We've also established a provider task
3 force to obtain feedback on the analysis and
4 recommendations. Again, task force members were
5 identified by reviewing utilization. And, again, I do
6 wish to express my appreciation for the efforts of the
7 task force members.

8 So where did this get us? Proposed
9 Rates. HealthChoice proposes to accept only CPT 90999
10 for billing of dialysis treatments. And CPT codes
11 90935, 90945 and 90947 should be non-covered. The
12 considerations here are that Medicare requires that
13 90999 be used exclusively to bill for dialysis
14 treatment. A common industry practice is to use 90999
15 for the facility dialysis treatment, and 90935, 90945
16 and 90947 for physician evaluation services.

17 HealthChoice proposes a fee allowable for
18 90999 of 225 percent of the current Medicare bundle rate
19 for network providers based on the 2012 Medicare rate of
20 \$234.52. The 2012 network -- that should probably be
21 the 2013 network rate should be \$527.67.

22 The rationale behind this is that
23 HealthChoice has not established a fee for 90999.
24 Medicare's 2012 bundle payment is equal to \$234.52,
25 includes a visit code as well as drugs, labs and other

1 services.

2 HealthChoice's rate would apply only to
3 the dialysis visit. And drugs and lab would not be
4 bundled and will continue to be reimbursed separately.
5 This rate would fall within the typical commercial
6 payment per visit.

7 Next is that under the proposed rates we
8 would propose that 90989 and 90993, which are training
9 codes, will be non-covered. The rationale behind this
10 is that Medicare bundles these codes and then includes a
11 training add-on in its bundled rate. There is virtually
12 no utilization of these codes in our billing history.

13 Another recommendation is that
14 HealthChoice proposes to continue to reimburse CPT
15 90940, which is a hemodialysis access flow study at the
16 current percentage of charges. The rationale is that
17 Medicare does not reimburse separately, but it is
18 acceptable to us to have it billed separately.

19 Another recommendation of HealthChoice
20 proposes a fee allowable for A4657, which is a syringe
21 with or without needle, of \$2.50. We believe this
22 better reflects actual cost of the supply kit. The
23 EGID's current allowable -- average allowable, because
24 this is based on billed charges, is 37.30.

25 So our rationale is that \$2.50 is much

1 closer to the actual cost for the supply kit, but
2 remains well above the Medicare level. Medicare does
3 reimburse separately, but caps payment at 50 cents.

4 Another recommendation is that
5 HealthChoice proposes to continue to reimburse for drugs
6 separately according to our fee schedule. The rates
7 recommended for consideration for all injectable drugs,
8 including dialysis drugs, are for network dialysis
9 facilities, as we talked about in our last presentation,
10 155 percent of average sales price for 2013, 130 percent
11 of average sales price for 2014.

12 For non-network facilities it will be 135
13 percent of average sales price for 2013 and 120 percent
14 of average sales price for 2014. The rationale or
15 consideration behind this are that although most drugs,
16 including the most commonly used dialysis drugs,
17 especially epoetin alfa, are included in the Medicare
18 bundled rate. A number of commercial payers continue to
19 reimburse separately for the cost of drugs. And, again,
20 I would refer you to our previous presentation regarding
21 the injectable drugs under facility reimbursement.

22 Another consideration is that EGID
23 proposes to continue to reimburse for laboratory tests
24 according to the fee schedule. The rationale is that
25 many commercial payers continue to reimburse separately

1 for lab tests, although there are some payers, such as
2 Medicare, who now pay a bundled rate and include labs
3 tests in the bundle.

4 Another consideration is that we got task
5 force recommendations. And from the task force the
6 comment was that accepting only 90999 is not an accurate
7 reflection of dialysis modalities and billing
8 regulations. CMS reimbursement methodology for
9 peritoneal dialysis is different from that for
10 hemodialysis.

11 The response is that the unit of payment
12 used by Medicare as a single dialysis treatment. And
13 although different equipment, supplies and labor are
14 needed for hemodialysis and peritoneal dialysis, the
15 payment system that began in 2011 does not differentiate
16 payment based on dialysis method for adults. And there
17 is a reference there from the Medicare Payment Advisory
18 Commission.

19 An additional consideration is that most
20 dialysis services are billed using the CPT code 90999.
21 Both hemodialysis and peritoneal dialysis are paid the
22 same unit -- same per visit under the CMS bundled care
23 system. There is a difference in revenue codes, but CMS
24 requires CPT 90999 to appear on all claims with a billed
25 type of 072X, which is a hospital-based freestanding

1 dialysis clinic.

2 For continuous treatments performed at
3 home, such CAPD, which is the peritoneal dialysis, and
4 the cycling peritoneal dialysis, which is CCPD, Medicare
5 pays for three visits per week. For 2013 HealthChoice
6 will pay the established rate per visit. Beginning in
7 2014 we will cap the payment for CAPD and CCPD.

8 Additional task force comments. Using
9 Medicare rates as a basis for commercial product
10 reimbursement is not common industry practice. Another
11 comment was that negotiating a mutually agreed
12 contracted rate is the common preferred method for
13 contracting for a commercial population. Another
14 comment was that the proposed rate is less than the
15 large commercial payer. And there is a consideration
16 HealthChoice members might have reduced access to care
17 as a result.

18 The response to these concerns is that
19 HealthChoice currently allows a percentage of billed
20 charges for 90999. We'd also seek to set a fee
21 allowable that is comparable to other commercial payers.

22 The information available indicates that
23 the range for other commercial payers is from 250, which
24 is after Medicare, to 525 for some commercial payers.

25 Commercial payment rates are typically

1 expressed as a percentage of current Medicare rates
2 across many types of services, mainly to provide a
3 comparison, not meant to separate the two, but provide
4 an easy comparison.

5 HealthChoice desires to stay competitive
6 with other commercial payers in the market and we want
7 to provide the best value for our members' premium
8 dollars.

9 Another task force comment was that 90993
10 should be used for the training aspect of all dialysis
11 modalities. Training is very intensive, it's one-on-one
12 between a nurse, patient and caregiver. The use of home
13 dialysis treatments is increasing.

14 Our response is that Medicare bundles the
15 training codes, but allows a training add-on in its
16 bundled rate. HealthChoice's volume for training codes
17 has historically been very low. And if use of training
18 increases HealthChoice will review the need for covering
19 that service and set an appropriate allowable. We want
20 to hear from our provider community.

21 So, in conclusion, the proposed
22 reimbursement level falls within the common commercial
23 level payment range. And establishing a fee for the
24 principal dialysis code of 90999 represents a reduction
25 from the current payment levels that are based on the

1 percentage of billed charges.

2 And, again, there is an appendix that has
3 the current fee structure and the proposed fee
4 structure. And I'll turn it back to Mr. Boughton for
5 comments.

6 MR. BOUGHTON: Would one anyone like to
7 come forward and comment about the dialysis presentation
8 just given by Dr. Lawler?

9 (No response.)

10 MR. BOUGHTON: Back to you, Mr. Wilson.

11 MR. WILSON: Thank you again. I would
12 just close by saying that the goal, of course, of this
13 project was to ensure that the reimbursement for the
14 HealthChoice plans are in line with industry. These
15 decisions that we make in this area, of course, are
16 never easy. We take them very seriously.

17 And the treatments and medicines that
18 we're talking about here today save lives, they change
19 lives, they allow our public employees to keep doing
20 what they do. In light of that, it's very difficult
21 sometimes from this perspective to put a price on that.
22 It always amazes me how complex this process can be in
23 terms of reimbursement for a health plan. But it is a
24 very critical process and a very important
25 responsibility of this agency.

1 Again, thank you. Thanks in particular
2 to Rick Snyder and the Hospital Association. We very
3 much value the relationship that we have with our
4 hospitals across the state. That relationship is
5 critical in allowing this plan to continue to provide
6 quality healthcare for all of our public employees
7 across the state. So, again, thank you very much.

8 With that, I guess we're done.

9 (Hearing concluded at 9:00 a.m.)
