OKLAHOMA CITY, OKLAHOMA 73105

GIVE YOUR CAR A WINTER CHECK

Get your car winter-ready with a winter safety check!

Is your vehicle ready for winter?

Cold weather sneaks up on you. So why not get a jump start with our service winter check?

Of all the seasons, winter requires the most care and preparation to ensure your safety on the road.

Because there are enough things for you to worry about in life, we want to help ensure that your vehicles condition isn't one of them.

Our staff's #1 priority is to take care of your vehicle's service needs.

A multi-point inspection at our OMES Fleet Management service location includes*:

- **TIRES**
We check the overall condition of your tires, including tread depth and pressure.
- **BATTERY**
A battery test is performed to ensure proper charging performance.
- **COOLANT/ANTI-FREEZE**
We check the fluid strength and level.
- **WIPERS**
Wipers are inspected for splits or damage, and we check wiper fluid level.
- **HEATER, A/C, DEFROST**
Heater and A/C unit are inspected, and defroster is tested for proper function.
