

**John S. Richard**  
Director

**Mary Fallin**  
Governor

**STATE OF OKLAHOMA**  
**DEPARTMENT OF CENTRAL SERVICES**

As of August 1, 2011 the State of Oklahoma Property Insurance Program has a new Engineering Services provider. Our previous provider, Allianz Engineering, assisted in the perpetuation and advancement of our loss prevention efforts for several years and will be missed. However, the new provider, XL Global Asset Protection Services, will be providing us with the same services as the previous engineering group while including additional services that were not available to us in the past.

We will be utilizing the following services provided by XL:

1. Property Risk Survey Reports (these reports allow us to identify hazards and implement short and long term mitigation practices)
2. Building Plan Review (this process may be accomplished electronically with a 10 day turnaround)
3. Human Element Program development and support including:
  - Hot work permit tags (supplied by XL through this office)
  - Fire Protection Impairment tags (supplied by XL through this office)
  - Fire Protection Impairment monitoring service (utilization of this service should begin immediately by all State agencies and institutions)
  - On line training complete with certificates of completion (currently available for hot work and impairment only – training on other topics may be available at a later date)

If you have questions or comments concerning these services and/or written program requirements, please contact Jack Roberts or Toni Blue at Risk Management.
