State of Oklahoma Emergency Operations Plan (EOP)

LETTER OF PROMULGATION

STATE EMERGENCY OPERATIONS PLAN

The State Emergency Operations Plan (EOP) assigns responsibilities to designated State departments, agencies, commissions, boards and volunteer organizations in the event of a disaster.

The plan directs State departments and agencies to provide guidance, relief and assistance to local communities and people in Oklahoma to mitigate, prepare for, respond to, and recover from the effects of a disaster. The plan is written expressly for the welfare and safety of the people of Oklahoma. It will provide them with the opportunity to be better prepared for and to quickly recover from disaster.

Pursuant to the authority contained in the Oklahoma Emergency Management Act of 2003, O.S. 63, Section 683 through 683.24, the head of each designated department and agency shall take the necessary actions to implement the EOP by developing written internal procedures that detail support required by the plan and shall be prepared to put the plan into action.

The Director of the Department of Emergency Management is responsible for assisting the Governor in coordinating State emergency operations in the event of disasters that require implementation of this plan.

State of Oklahoma Emergency Operations Plan (EOP)

BLANK PAGE

State of Oklahoma Emergency Operations Plan (EOP)

FOREWORD

When a disaster threatens or occurs, it is the responsibility of local government authorities to respond to the scene to minimize suffering and protect life and property.

When additional assistance is required and requested by local government authorities, the Governor will execute the State of Oklahoma Emergency Operations Plan that directs designated state agencies and volunteer service organizations to provide resources and services needed to minimize the effects of disaster.

When the situation is beyond the state's capability, the Governor may request assistance from the federal government to supplement state and local relief efforts by requesting that the President of the United States declare a "Major" Disaster or an "Emergency" in accordance with Public Law 93-288.

This plan, when properly implemented, will bring to bear the full resources of the State of Oklahoma as required to meet the needs of local and state disaster operations.

In keeping with current doctrine, integrated emergency management's all-hazard strategy is concerned with all types of emergency situations that may develop. It also provides for the seamless application of emergency activities before, during and after emergency incidents.

The cooperation of each agency involved with preparation, coordination and implementation of this plan is gratefully acknowledged.

Questions or recommended changes to this plan should be directed to the Director, Department of Emergency Management, P.O. Box 53365, Oklahoma City, Oklahoma 73152, or phone (405) 521-2481.

State of Oklahoma Emergency Operations Plan (EOP)

BASIC PLAN

I. PURPOSE.

The purpose of the Emergency Operations Plan for the State of Oklahoma is to provide, in cooperation with local and federal government and volunteer service organizations, a system to mitigate against, prepare for, respond to, and recover from the effects of national security incidents and, natural and technological hazards affecting the State (See Appendix 1, Hazard Analysis). Additional objectives include:

- A. Assign responsibility to identified state agencies/departments and volunteer service organizations.
- B. Define the roles of local, state and federal government entities in providing disaster relief and assistance.
- C. Accept guidance from the Department of Homeland Security/Emergency Preparedness and Response/Federal Emergency Management Agency (DHS/EPR/FEMA), Region VI, Denton, Texas.

As a result of the September 11, 2001 terrorist attacks, the United States of American has taken significant steps to better prepare for future acts of terrorism. These steps include the establishment of the Department of Homeland Security and the Oklahoma Office of Homeland Security to better coordinate all efforts to prevent, respond to and recovery from acts of terrorism.

Homeland Security Presidential Directive (HSPD) - 5 established the National Incident Management System (NIMS) which provides a consistent doctrinal framework for incident management at all jurisdictional levels. HSPD – 5 also directed the development of the National Response Plan (NRP) to align Federal coordination structures, capabilities, and resources into a unified, all-discipline, and all-hazards approach to domestic incident management. The NRP supersedes the Federal Response Plan that was developed by the Federal Emergency Management Agency.

The NRP directs that State, Local and Tribal Governments and Nongovernmental Organizations utilize NRP established incident reporting protocols, modify existing plans to ensure alignment with the NRP, and notify the Secretary of Homeland Security of any substantial conflicts between the NRP and State or tribal government laws or regulation. The State government coordinates with the Homeland Security Operations Center regarding procedures for establishing connectivity for domestic incident management purposes.

Many of the responsibilities and requirements of the Department of Homeland Security have not yet been fully developed; however, the State of Oklahoma must continue to be prepared for any and all hazards that may affect the State. This plan attempts to do just that.

II. SITUATION AND ASSUMPTIONS.

State of Oklahoma Emergency Operations Plan (EOP)

A. Situation.

1. All levels of government have the responsibility to provide for the health, welfare and safety of the citizens of Oklahoma and their property.
2. Upon the occurrence of a disaster, each level of government must commit all available resources, including resources belonging to mutual aid partners, prior to requesting additional assistance from the next higher level of government.
3. Some disasters provide ample time for reaction and response while others occur suddenly with little time for warning or preparation. This plan attempts to establish procedures by which communities can be given better warning so they may be better prepared to face a possible disaster situation and react to provide needed assistance within a minimum amount of time.
4. There are many federal departments, state agencies and volunteer service organizations in this state that have emergency management responsibilities.

B. Assumptions.

1. Personnel to staff the State Emergency Operations Center will be available as required by this plan.
2. Local, state and federal government agencies and volunteer service organizations will utilize resources and commit assets as required by this plan.
3. Direction, control and coordination will be exercised by appropriate authorities at each level of government, as the type of emergency requires.
4. Resources normally available for day-to-day use will be immediately available for support of any emergency disaster situation.

III. CONCEPT OF OPERATIONS.

A. General.

The Director, Department of Emergency Management, acting on behalf of the Governor of Oklahoma, will direct, control or coordinate all interagency and volunteer service organization operations during disaster Mitigation, Preparedness, Response and Recovery operations and will be the Governor's Authorized Representative (GAR) for coordination with Department of Homeland Security/Emergency Preparedness and Response/Federal Emergency Management Agency (DHS/EPR/FEMA) for all federal assistance requirements.

It is desirable (and will always be attempted) to maintain organizational continuity

State of Oklahoma Emergency Operations Plan (EOP)

and to assign familiar tasks to personnel. In large-scale disasters, however, it may be necessary to draw on peoples' basic capabilities and use them in areas of greatest need. Day-to-day functions that do not contribute directly to the emergency operation may be suspended allowing manpower and resources to be redirected to accomplish emergency tasks by the agency concerned.

B. Phases of Management.

1. Mitigation.

Mitigation activities are those designed to either prevent the occurrence of an emergency or long-term activities directed toward minimizing the potentially adverse affects of an emergency or disaster.

2. Preparedness.

Preparedness activities are those programs and systems that exist prior to an emergency and are used to support and enhance response to an emergency or disaster. Planning, training and exercising are among the activities conducted under this phase.

3. Response.

Response activities and programs are designed to address the immediate and short-term effects of an emergency or disaster. They help to reduce casualties and damage as well as speed recovery. Response activities include direction and control, warning, evacuation and other similar operations.

4. Recovery.

Recovery is the phase that involves restoring systems to normal. Short-term recovery operations/actions are taken to assess damage and return vital life-support systems to minimum operating standards. Long-term recovery actions may take many years based on the type of disaster.

IV. ORGANIZATION AND ASSIGNMENT OF RESPONSIBILITIES.

A. General.

For emergency management planning purposes, this plan addresses the use of management of resources of local, State, federal government and volunteer service organizations. Specific responsibilities and task assignments are defined in separate tabs and annexes. Each tab and annex addresses specific emergency support functions related to disaster planning, training and support activities.

In accordance with the HSPD - 5, all agencies, departments and organizations having

State of Oklahoma Emergency Operations Plan (EOP)

responsibilities delineated in this EOP will use the National Incident Management System (NIMS). This system will allow proper coordination between state, local and federal organizations.

The Incident Command System (ICS), as a part of NIMS, is a standard, on-scene, all-hazard incident management concept and shall be used during all incidents in the State of Oklahoma.

B. Organization.

The organization for emergency management and operations in Oklahoma is directed by the Governor. The Governor appoints, or the people elect, key officials to carry out emergency management and operations functions.

Key elected or appointed officials at each level of government and heads of volunteer service organizations coordinate the use of resources to insure that immediate short-term and long-term assistance is available during disaster operations. The organizations active in emergencies are shown in Appendix 2 to the Basic Plan, State Emergency Support Function Assignment Matrix.

C. Assignment of Responsibilities.

Tasks for each state agency, department or volunteer service organization, which support the emergency management program of the State of Oklahoma, are identified in separate annexes of this plan.

To facilitate and coordinate these emergency tasks at the State level, each identified agency or organization shall provide a minimum of three (3) liaison officers to the State Emergency Operations Center (EOC) as required by the Director of the Department of Emergency Management (OEM) acting on behalf of the Governor of Oklahoma. Each agency or organization will ensure that it has sufficient trained liaison personnel, with routine decision making authority, to provide a 24-hour capability for extended periods.

All liaison personnel are required to display a photo identification card provided by their agency or organization before they are allowed to enter the EOC. Personnel without agency or organization identification cards must make prior arrangements with OEM for admission to the EOC.

Semi-annually all agencies and organizations are required to provide the OEM Emergency Operations Center Manager a validated list showing names, phone numbers (office and home), cell phone numbers, e-mail addresses and pager numbers for its Director, Deputy Director and three liaison officers. Lists shall be submitted no later than January 1st and July 1st of each year.

Per State Statute (63 O.S. 2001, Section 683.2 D), each state agency, board, commission, department or other state entity shall have written plans and procedures in place

State of Oklahoma Emergency Operations Plan (EOP)

to support their responsibilities in the State Emergency Operations Plan.

V. CONTINUITY OF GOVERNMENT.

A. Succession of Leadership.

1. The following line of succession is hereby established for the State of Oklahoma.
 - a. Governor.
 - b. Lieutenant Governor.
 - c. President Pro-Tempore, State Senate.
 - d. Speaker, House of Representatives.
 - e. State Auditor and Inspector.
 - f. Attorney General.
 - g. State Treasurer.
 - h. Superintendent of Public Instruction.
 - i. Commissioner of Labor.
 - j. Corporation Commission Chairperson.
 - k. Corporation Commission Vice Chairperson.
 - l. Corporation Commission Commissioner.

2. All state departments, agencies, commissions, boards and volunteer organizations shall establish internal rules of succession to insure continuity of government (COG) and continuity of operations (COOP) during times of disaster.

3. All state departments, agencies, commissions, boards and volunteer organizations shall identify necessary resources and alternate locations to continue emergency operations should their primary facilities become untenable due to the effects of a disaster.

B. Preservation of Records.

1. State or local records in the following categories are essential records that shall be preserved pursuant to Title 67, Oklahoma Statutes:

CATEGORY A Records containing information necessary to the operations of government in an emergency created by any disaster.

CATEGORY B Records not in Category A but containing information necessary to protect the rights and interests of persons or to establish and affirm the powers and duties of governments in the resumption of operations after a disaster.

2. It is the responsibility of each agency to insure recognition and preservation of essential records as defined under Category A and B. For advice and assistance, the State

State of Oklahoma Emergency Operations Plan (EOP)

Librarian may assist in establishment of records preservation programs.

VI. ADMINISTRATION AND LOGISTICS.

A. Agreements and Understandings.

Letters of agreement or understanding between the Department of Emergency Management and local support groups will be prepared as required and will cite as their authority the State of Oklahoma Management Act of 2003.

B. Records and Reports.

1. The Records Management Act stated in Title 67, Oklahoma Statutes shall apply.

2. It will be the responsibility of the Director, Department of Emergency Management to request records and reports from support agencies, as required, to provide for continuity of operations as well as for the administration of this plan.

3. During emergency operations, each agency/department will maintain a log or record identifying the personnel, the hours worked (including overtime), and other costs and expenses (including direct costs) in the administration of disaster related responsibilities. This information may be used to determine total state costs for possible use by the Governor to request a State or Federal disaster declaration.

Note: Nothing in the process of coordination and support should be interpreted as relieving agency heads of their responsibility for emergency planning and response for their agency under state law.

VII. PLAN DEVELOPMENT AND MAINTENANCE.

The Director, Department of Emergency Management is responsible for updating and maintaining this plan and annexes.

MATRIX

APPENDIX 3 - DEFINITIONS

APPENDIX 4 - LIST OF ACRONYMS

APPENDIX 5 - AUTHORITIES AND REFERENCES

State of Oklahoma Emergency Operations Plan (EOP)

APPENDIX 1 TO BASIC PLAN HAZARD ANALYSIS

The Department of Emergency Management and the State of Oklahoma, through numerous declared disasters, have responded to and recovered from almost every potential disaster listed below. As these disasters occur, each community becomes better prepared for the next incident. Emergency Managers throughout the state continually assess their communities for new hazards.

Experience has shown that natural disasters associated with severe thunderstorms (Tornadoes, Floods, Hail, Strong Winds) have the greatest damage potential with the highest probability of occurrence. Other identified hazards but not limited to the following are:

- Highway hazardous materials incidents
- Rail hazardous materials incidents
- Severe winter storms
- Urban fires
- Stationary hazardous materials incidents
- Power failures
- Pipeline hazardous materials incidents
- Dam failures
- Wildfires
- Urban droughts
- Air transportation incidents
- Droughts
- Civil disorders
- River hazardous materials incidents
- Subsidences/Sink holes
- Gas well blowouts
- Foreign Animal Diseases
- Medical emergency/epidemics
- Acts of terrorism
- Earthquakes
- Radioactive fallout

Oklahoma continues to experience disasters in the form of tornadoes, ice storms, floods and wildfires. Man-made incidents such as hazardous material spills and chemical releases occur frequently but with less impact on the communities in Oklahoma.

The risk of a terrorist incident in Oklahoma is assumed to be low but the effects would be high and of national significance. The proven ability of the state to respond to natural disasters will significantly strengthen the response and recovery from potential acts of terrorism.

State of Oklahoma Emergency Operations Plan (EOP)

BLANK PAGE

State of Oklahoma Emergency Operations Plan (EOP)

APPENDIX 3 TO BASIC PLAN DEFINITIONS

AGENCY LIAISON OFFICER (ALO): Persons appointed by Director of designated state agencies who, during emergency periods, coordinate an agency's actions for providing effective relief and assistance in accordance with this plan and Public Law 93-288.

COMMUNITY EMERGENCY RESPONSE TEAM (CERT) : A program that helps train people to be better prepared to respond to emergency situations in their communities. CERT members give critical support to first responders in emergencies, provide immediate assistance to victims, organize spontaneous volunteers at a disaster site, and collect disaster intelligence to support first responder efforts.

DISASTER: A dangerous event that causes significant human and economic loss and demands a crisis response beyond the scope of any single agency or service, such as the fire or police department. Disasters are distinguished from emergencies by the greater level of response required. Disaster requires resources beyond those available locally.

DISASTER - MAN-MADE: A disaster caused by acts of man including, but not limited to, an act of war, terrorism, chemical spill or release, or power shortages that require assistance from outside the local political subdivision.

DISASTER – NATURAL: Any natural catastrophe, including, but not limited to, a tornado, severe storm, high water, flood waters, wind-driven water, earthquake, landslide, mudslide, snowstorm, or drought which causes damage of sufficient severity and magnitude to warrant hazard mitigation or the use of resources of the federal government, or the state and political subdivisions thereof to alleviate the damage, loss, hardship or suffering caused thereby.

DEFENSE COORDINATING OFFICER (DCO): Supported and provided by the Department of Defense to serve in the field as the point of contact to the Federal Coordinating Officer and the Emergency Support Functions regarding requests for military assistance.

EMERGENCY: While an emergency may have been devastating, it is a dangerous event that may not result in a request for State or Federal assistance.

"EMERGENCY" AS PROCLAIMED BY THE GOVERNOR: Whenever, in the opinion of the Governor, the safety of Oklahoma and its citizens requires the exercise of extreme measures due to an impending or actual disaster, he may declare an emergency to exist in the state, or any part of the state, in order to aid individuals and local government.

ELECTROMAGNETIC PULSE (EMP): A phenomenon of a nuclear detonation that disrupts electrical transmission and radio sets in a similar manner to a direct hit by lightning.

State of Oklahoma Emergency Operations Plan (EOP)

APPENDIX 3 TO BASIC PLAN (CONT) DEFINITIONS

EMERGENCY OPERATIONS CENTER (EOC): A centralized facility to be utilized by the governments for direction, control and coordination in an emergency or disaster.

EMERGENCY PERIOD: The period of time immediately before, and/or immediately after the impact of a catastrophe when severe threats exist to human life, animals, other private and public property and/or the environment.

EMERGENCY SUPPORT FUNCTION (ESF): A functional area of response activity established to facilitate the delivery of Federal and State assistance required during the immediate response phase of a disaster to save lives, protect property and public health, and to maintain public safety.

EMERGENCY RESPONSE TEAM (ERT): Teams of federal personnel formed by the Director, Federal Emergency Management Agency, Region VI, and deployed in a declared major disaster area to assist the federal coordinating officer in carrying out his responsibilities.

FEDERAL COORDINATING OFFICER (FCO): The person appointed by the President of the United States to operate under the Director, Region VI Federal Emergency Management Agency to coordinate federal assistance in a declared major disaster area under the provisions of Public Law 93-288.

GOVERNOR'S AUTHORIZED REPRESENTATIVE (GAR): The person appointed by the Governor of Oklahoma in the Federal/State Disaster Assistance Agreement as his authorized representative to act in cooperation with the Federal Coordinating Officer.

JOINT FIELD OFFICE (JFO): The office established in or near the designated area to support Federal and State response and recovery operations. The JFO houses the FCO and the Emergency Response Team (ERT), and where possible, the State Coordinating Officer (SCO) and support staff.

JOINT INFORMATION CENTER (JIC): The primary field location for the coordination of Federal, State and local media relations, located in or near the JFO.

LOCAL GOVERNMENT: Any county, city or incorporated town in the State of Oklahoma.

LOCAL MASS CARE CENTER: A place selected locally by the private volunteer groups to provide care for individuals dislocated during the emergency period. Services provided are lodging, feeding, registration, first aid and other social services.

MAJOR DISASTER: Any hurricane, tornado, storm, flood, high water, wind-driven water, earthquake, volcanic eruption, landslide, snow storm, explosion, or other catastrophe in any part of the United States that, in the determination of the United States, causes damage of sufficient severity and magnitude as to warrant major disaster assistance under Public Law 93-288 above and beyond

State of Oklahoma Emergency Operations Plan (EOP)

APPENDIX 3 TO BASIC PLAN (CONT) DEFINITIONS

emergency services by the federal government, to supplement the efforts and available resources of the state, local governments and disaster relief organizations in alleviation of the damage, loss, hardship, or suffering caused thereby.

NATIONAL WARNING SYSTEM (NAWAS): A protected full-time voice communications system that provides warning information throughout the nation.

OKLAHOMA DEPARTMENT OF EMERGENCY MANAGEMENT (OEM): The agency responsible for preparation and execution of emergency functions to prevent, minimize and repair injury and damage resulting from hostile actions or natural disasters as stated in the Oklahoma Emergency Management Act of 2003.

OKLAHOMA OFFICE OF HOMELAND SECURITY (OKOHS): The office responsible for the homeland security effort for the State of Oklahoma to prevent, reduce vulnerability and prepare to respond and recover from any terrorist attacks.

PUBLIC FACILITY: Any flood control, navigation, irrigation, reclamation, public power, sewage treatment and collection, water supply and distribution, watershed development, or airport facility, any non-federal aid street, road or highway and any other public building, structure or system.

RECOVERY PERIOD: That period of time subsequent to an emergency when economic recovery from disaster damage takes place, including the use of any available local, state, federal government and private resources.

RESPONSE: Activities to address the immediate and short-term effects of an emergency or disaster.

SIGNIFICANT EVENTS: All hazardous material releases of any size and type, earthquakes, fires involving large buildings or facilities and large grass or wild fires, explosions, bomb threats, terrorist/civil disturbance, aircraft crash, natural disaster, utility disruption, dam breach, technological/man-made incident, search and rescue, structural collapse, and any other incident that poses significant consequences to the jurisdiction.

STATE COORDINATING AGENCY: The State department or agency assigned primary responsibility to facilitate and coordinate a specific ESF.

STATE COORDINATING OFFICER: The representative of the Governor who coordinates State response and recovery activities with those of the Federal Government.

SUPPORT AGENCY: A state or volunteer agency designated to assist a specific state coordinating agency with available resources, capabilities, or expertise in support of ESF response operations.

STATE AND REGIONAL DISASTER AIRLIFT (SARDA) PLAN: Plan to provide the Governor

State of Oklahoma Emergency Operations Plan (EOP)

APPENDIX 3 TO BASIC PLAN (CONT) DEFINITIONS

and the Oklahoma Department of Emergency Management Agency with a means to access and utilize general aviation resources within the State, when needed to support emergency operations.

TERRORISM: Defined by the Federal Bureau of Investigation (FBI) as the unlawful use of force or violence against persons or property to intimidate or coerce a government, the civilian population, or any segment thereof, in furtherance of political or social objectives.

TERRORISM INCIDENT: Defined as the act associated with Terrorism. Categories include Chemical (including explosive devices), Biological (including infectious and noninfectious organisms), Nuclear (including contamination and weapons) and Electronic (including interference with telephone systems, computers, etc.).

VOLUNTEER SERVICE ORGANIZATION: Any organization which is non-government, nonprofit whose primary mission is to provide humanitarian support in times of need using public donated funds and volunteer personnel resources with or without a formal declaration of an emergency. (i.e.: American Red Cross, The Salvation Army, etc.).

State of Oklahoma Emergency Operations Plan (EOP)

ESF #1 TRANSPORTATION ANNEX

STATE COORDINATING AGENCY: Department of Transportation

SUPPORT AGENCIES: Chief Medical Examiner
Civil Air Patrol
Department of Agriculture
Department of Education
Department of Emergency Management
Department of Environmental Quality
Department of Health
Department of Public Safety
Department of Wildlife Conservation
Oklahoma Military Department
Oklahoma Office of Homeland Security
Oklahoma State Bureau of Investigation
Oklahoma Turnpike Authority
Water Resources Board

I. PURPOSE.

The purpose of this annex is to establish procedures for using state transportation resources and for response to and recovery from an emergency or disaster, including the transportation of evacuees and equipment. The Department of Transportation will coordinate with the federal government for assistance provided with the National Response Plan's (NRP) Emergency Support Function (ESF) #1 in such areas as allocation of civil transportation capacity, processing of transportation requests, control of air and marine traffic, directing, managing, and controlling SARDA operations, funding of emergency highway repair, hazardous material actions, and damage assessment.

II. CONCEPT OF OPERATIONS.

Phases of Management.

A. Mitigation.

Review and update disaster procedures.

B. Preparedness.

1. Prepare and maintain current list of personnel, equipment and their locations needed to carry out their respective responsibilities.

2. Develop contingency plans for the personnel of their departments to insure their safety and continuity of the functions of the department.

State of Oklahoma Emergency Operations Plan (EOP)

3. Plan for personnel of the departments to report their location and availability for duty.

4. Plan for the resumption of the department's functions with a minimum of disruption, including relocation of the department if required.

5. Ensure that administrative and accounting procedures are in place to document actions taken and all costs incurred during emergency operations.

C. Response.

1. Provide emergency transportation service, as required, in, to, or from disaster-affected areas by utilizing the department vehicles for movement of victims, survivors, essential food, medical supplies, and other supplies and equipment.

2. Provide information on respective situations and any problems when assistance is needed to carry out their responsibility.

3. Coordinate with Federal Department of Transportation and other agencies in support of Emergency Support Functions #1 and #3 of the National and Regional Response Plans.

D. Recovery.

1. Continue to provide transportation assistance as required.

2. Participate in compiling after-action reports and critiques.

3. Revise emergency plans using lessons learned.

III. ORGANIZATION AND ASSIGNMENT OF RESPONSIBILITIES.

A. General.

State agencies with primary or secondary emergency functions connected with transportation will assign appropriate personnel to carry out these functions.

B. Organization.

State departments will each organize their departments to effectively conduct emergency operations.

C. Assignment of Responsibilities.

1. The Department of Transportation has primary responsibility for

State of Oklahoma Emergency Operations Plan (EOP)

providing/assigning emergency transportation to requesting organizations and coordinating transportation requirements with the Department of Education, Military Department and Civil Air Patrol.

2. The Department of Education shall assist the Department of Transportation, when requested, by coordinating with school boards in local jurisdictions for provision of necessary support (e.g., school buses and drivers) required to transport or evacuate victims of a disaster to centers for emergency shelter and feeding.

3. The Military Department shall assist the Department of Transportation, when requested, by providing the necessary transportation equipment (to include trucks, tractors and flatbeds, and aircraft) and personnel to perform the functions of evacuation, hauling of equipment and supplies in, to, or from the disaster areas.

4. The Department of Public Safety and Highway Patrol will provide law enforcement resources and support as required.

5. The Oklahoma Turnpike Authority will provide support to the transportation effort as required.

6. The Department of Agriculture will provide support to the transportation effort as required.

7. The Civil Air Patrol (CAP) shall assist the Department of Transportation, when requested, by providing the necessary transportation equipment (to include vans and aircraft) and personnel to perform the functions of executive airlift or ground transport, hauling of time sensitive parts, equipment, and supplies in, to, or from the disaster areas. The CAP shall assist the SARDA Director in planning, organizing, directing, manning, equipping, managing, and controlling SARDA operations by the State SARDA Director, through the Oklahoma SARDA Plan when activated by the Governor, provide support to the transportation effort as required.

8. The Chief Medical Examiner will provide support to the transportation effort as required.

9. The Department of Environmental Quality will provide support to the transportation effort as required.

10. The Department of Health will provide support to the transportation effort as required.

11. The Department of Wildlife Conservation will provide support to the transportation effort as required.

12. The Oklahoma State Bureau of Investigation will provide support to the transportation effort as required.

State of Oklahoma Emergency Operations Plan (EOP)

13. The Water Resources Board will provide support to the transportation effort as required including various-sized watercraft equipped with GPS equipment.

14. The Department of Emergency Management will provide support as required and manage the State Emergency Operations Center.

15. The Oklahoma Office of Homeland Security will provide support as required.

IV. DIRECTION AND CONTROL.

A. The Director of the Department of Transportation shall be responsible for directing primary activities of the department in connection with emergency transportation.

B. The Adjutant General shall be responsible for directing the secondary activities of emergency transportation by the military department.

C. The SARDA Director shall be responsible for accessing, utilizing and directing the general aviation resources within the state when needed for emergency transportation through the Oklahoma SARDA Plan.

D. Direction and control for any disaster operation will be centralized. The designated operating official is to work in the State Emergency Operations Center and act as coordinator for use of his department's assets and interface of assets of other departments.

V. CONTINUITY OF GOVERNMENT.

Lines of succession to each department head are according to the SOPs established by each department with a primary or secondary transportation responsibility.

APPENDICE

APPENDIX 1 - EVACUATION

State of Oklahoma Emergency Operations Plan (EOP)

APPENDIX 1 TO ESF #1 EVACUATION

I. PURPOSE.

To provide for orderly and expeditious evacuation of any part of the population of the State of Oklahoma should such action be required. Each local jurisdiction is responsible for developing its own evacuation plan and, if an evacuation situation arises, implementing their plan. The Oklahoma Department of Emergency Management will provide available support as requested by the local jurisdiction. This appendix provides a planning base for any type of evacuation.

Much information crucial to evacuation operations, such as warning, communications, direction and control, and sheltering, are covered in separate annexes.

II. SITUATION AND ASSUMPTIONS.

A. Situation.

Several emergency situations may arise which would require evacuation of parts of the State of Oklahoma. Evacuation operations can be accomplished more rapidly and effectively if plans are developed and tested before they are needed.

B. Assumption.

The public will act in its own interest and evacuate dangerous areas when advised to do so by proper authorities.

III. CONCEPT OF OPERATIONS.

A. General.

1. Evacuation may be the only practical means of protecting people from the effects of some emergencies. Evacuation is the movement of people from a place of possible danger to a place of relative safety.

2. The magnitude of evacuation operations will vary from isolated individuals in limited areas to preplanned evacuation of the entire population of jurisdictions in affected areas. These operations will differ because the areas threatened, relatively safe areas, and evacuation routes will differ from hazard to hazard.

3. Jurisdictional interrelationships are a matter of great concern in an evacuation situation and must be addressed in mutual support agreements, operational plans and SOP's.

4. Evacuation operations should begin at the earliest perception of threat and be carried out by the jurisdiction nearest to the affected site that has sufficient control to manage all required operations.

State of Oklahoma Emergency Operations Plan (EOP)

B. Phases of Management.

1. Mitigation.

Encourage local government passage of codes limiting development in flood plains.

2. Preparedness.

a. Plan support for evacuations.

b. Train for implementation of evacuation operations in accordance with this appendix.

c. Encourage local government development of detailed evacuation plans.

d. Ensure that administrative and accounting procedures are in place to document actions taken and all costs incurred during emergency operations.

3. Response.

a. Activate State EOC.

b. Coordinate requests for resources from local governments.

4. Recovery.

Assist in efforts to return evacuated population to home locations when it is safe.

IV. ORGANIZATION AND ASSIGNMENT OF RESPONSIBILITIES.

A. General.

Jurisdictional and organizational relationships in evacuation operations vary depending on the scale of the operations.

B. Assignment of Responsibilities.

The Director, Department of Emergency Management, will designate personnel to staff the state EOC during evacuation operations.

V. DIRECTION AND CONTROL.

Direction and control is covered in the ESF #5 annex. Emergency Management of evacuation operations will normally be carried on by the jurisdiction nearest to the affected site that

State of Oklahoma Emergency Operations Plan (EOP)

has sufficient control to manage all required operations.

VI. ADMINISTRATION AND LOGISTICS.

General policies are as follows:

A. Local resources will be committed before requesting assistance from higher levels of government.

B. Consistent with law, no administrative process will be permitted to interfere with operations essential to preventing injury, loss of life, and significant property damage.

State of Oklahoma Emergency Operations Plan (EOP)

BLANK PAGE

State of Oklahoma Emergency Operations Plan (EOP)

ESF #2 COMMUNICATIONS ANNEX

STATE COORDINATING AGENCY: Department of Emergency Management

SUPPORT AGENCIES: Chief Medical Examiner
Civil Air Patrol
Department of Agriculture
Department of Environmental Quality
Department of Health
Department of Public Safety
Department of Transportation
Department of Wildlife Conservation
Oklahoma Military Department
Oklahoma Office of Homeland Security
Oklahoma State Bureau of Investigation
Oklahoma Turnpike Authority
The Salvation Army
U.S. Army Corps of Engineers

I. PURPOSE.

The purpose of this annex is to ensure maximum utilization of available resources to meet statewide communications requirements during all phases of disasters.

II. SITUATION AND ASSUMPTIONS.

A. Situation.

1. All hazards may from time to time disrupt normal communications within and between local, state, and federal agencies and jurisdictions.
2. The availability of emergency and backup communications is essential to all phases of emergency management.
3. To avoid duplication of effort and to ensure proper utilization of state resources, a centralized communications center is necessary for message handling and coordination functions.

B. Assumptions.

1. All communications systems in the State are operational except within the disaster area where only limited or no communications exist.
2. All communications links between the State Emergency Operations Center and the Federal Government and State agencies are operational.

State of Oklahoma Emergency Operations Plan (EOP)

3. Communications to and within the disaster area require re-establishment or augmentation to provide communications for the State and Federal disaster relief operations.

III. CONCEPT OF OPERATIONS.

A. Federal, state, and local governments; private sector organizations; amateur radio operators; and voluntary disaster response and recovery organizations operate a number of communications systems on a routine basis. This capability includes such components as the National Warning System (NAWAS), HF, VHF, UHF, and 800 MHz Radio Systems, public switch telephone network systems, cellular telephone, paging, data transmission, local cable television override systems, NOAA Weather Radio, NOAA Weather Wire Services, satellite up-link and down-link capabilities, and the Oklahoma Law Enforcement Teletype System (OLETS). Through voluntary cooperation, commercial broadcast outlets participate in the Emergency Alert System. As the scope or impact of a potential or actual disaster/emergency changes, these communication resources shall be integrated into the total emergency management communications system. The focus for such integration and coordination shall be the State EOC.

B. Emergency Support Function (ESF) #2 of the National Response Plan is designed to assure the provision of Federal telecommunications support to response efforts following a Presidentially declared major emergency or disaster. Support includes government furnished and commercially leased telecommunications under authority of Federal law and regulations.

C. In the event of either a partial or total systems failure of State EOC communications, responsibility for this function will be transferred to an Alternate State EOC (see ESF #5).

D. Private sector telecommunications providers will operate in accordance with the National Telecommunications Support Plan (NTSP) during major emergencies and disasters.

E. At disaster sites, the Incident Commander shall have primary responsibility for site selection and parking control. State agency communication vans/vehicles should be parked in close proximity to each other to enhance cooperation and coordination in exchanging information and resolving disaster assistance problems.

IV. ORGANIZATION AND ASSIGNMENT OF RESPONSIBILITIES.

A. General.

The State communications system includes all communications resources under the direction and control of the Governor. Normally, these resources are applied to the missions of specific State agencies. During emergency situations, the Department of Emergency Management will coordinate the use of these systems to support emergency management functions. Overall responsibility for State EOC communications rests with the Department of Emergency Management with secondary support provided by other State agencies, and volunteer organizations.

B. Assignment of Responsibilities.

State of Oklahoma Emergency Operations Plan (EOP)

1. Department of Public Safety.

The DPS shall operate NAWAS, OLETS and appropriate law enforcement radio networks on a 24-hour basis. In addition, the DPS has transmission capability on the National Weather Service's NOAA Weather Wire service.

2. Department of Emergency Management.

The Department of Emergency Management (OEM) shall coordinate and manage communications capabilities within the State EOC. Specific tasks include:

a. Coordinate with state agencies and cooperative organizations to determine equipment and personnel capabilities and requirements for EOC operations.

b. Develop procedures relating to EOC communications, operations, verification of reports, and message handling.

c. Coordinate with local emergency management, FEMA Region VI, and adjacent states on procedures for establishing emergency communications on a local, regional or national basis.

d. Coordinate with the National Communications System and other Federal agencies in support of Emergency Support Function #2 of National and Regional Response Plans.

e. Assist in the establishment of on-site communications capabilities.

f. Provide for the maintenance/repair of agency owned systems located in the State EOC.

g. Review and update this annex and associated documents as needed or at least on an annual basis.

3. The State EOC Manager (OEM).

The State EOC Manager will be responsible for establishing and staffing the communications within the State EOC, provide operators for all available equipment, coordinating their activities with other agencies having radio capability within the state government and related local or private agencies.

He is responsible for coordinating with the Oklahoma Highway Patrol to see that all counties have been warned of possible terrorism incidents or other man-made incidents and, when possible, of impending or actual natural disasters such as tornadoes, fires and floods that would cause extreme damage.

State of Oklahoma Emergency Operations Plan (EOP)

4. Other agencies and organizations.

Additional State support agencies and cooperative organizations with two-way radio capabilities shall support emergency communication operations to the extent possible. These agencies shall:

- a. Provide communications equipment to interface with and support State EOC operations.
- b. Provide trained personnel to maintain this equipment in a constant state of readiness.
- c. As needed, assign to the State EOC enough trained operators to provide 24-hour a day capability over an extended period of time.
- d. Ensure mobile units assigned to the disaster scene establish communications with the Incident Commander.
- e. Maintain and repair their equipment located in or linked with the State EOC.

5. The Salvation Army.

- a. Utilizing amateur radio volunteers, The Salvation Army will assist by providing health and welfare inquiries for the public and relief officials via high frequency and other communication devices operated by its volunteers.
- b. Assist in facilitating communications between The Salvation Army and other volunteer organizations providing overall coordination of amateur Radio communications in cooperation with the Amateur Radio Relay League and local and state amateur radio groups.

State of Oklahoma Emergency Operations Plan (EOP)

ESF #3

PUBLIC WORKS AND ENGINEERING ANNEX

STATE COORDINATING AGENCY: Department of Transportation

SUPPORT AGENCIES: Civil Air Patrol
Department of Agriculture
Department of Corrections
Department of Emergency Management
Department of Environmental Quality
Department of Health
Department of Public Safety
Fire Marshal
Oklahoma Military Department
Oklahoma Office of Homeland Security
Oklahoma Turnpike Authority
Oklahoma Volunteer Organizations Active
In Disasters (OKVOAD)
U.S. Army Corps of Engineers
Water Resources Board

I. PURPOSE.

A. The purpose of this annex is to establish procedures for using state resources for response to and recovery from an emergency, including debris removal and disposal, engineering and construction and utilities restoration. The Department of Transportation will also be the state coordinating agency with the federal government for assistance provided with the National Response Plan's (NRP) Emergency Support Function (ESF) #3 Public Works and Engineering.

B. This federal support includes technical advice and evaluations, engineering services, construction management and inspection, emergency contracting, emergency repair of waste-water and solid waste facilities, emergency power supply, temporary housing, supply of ice and water, debris removal, and other missions relating to life saving or life protection humanitarian support.

II. CONCEPT OF OPERATIONS.

Phases of Management.

A. Mitigation.

1. Review and update emergency procedures.
2. Maintain utilities and public works maps as appropriate.

B. Preparedness.

State of Oklahoma Emergency Operations Plan (EOP)

1. Train personnel in emergency procedures.
2. Organize and train damage survey teams.
3. Insure that barrier, roadblock materials, light sets, mobile signs and other necessary equipment is available.
4. Keep debris removal equipment in good repair.
5. Participate in emergency preparedness exercises.
6. Ensure that administrative and accounting procedures are in place to document actions taken and all costs incurred during emergency operations.

C. Response.

1. Survey disaster areas and evaluate in terms of engineering estimates.
2. Repair EOC facilities and equipment as necessary.
3. Assess damage.
4. Clear roads, construct temporary bridge repairs and/or channel crossings, coordinate and provide technical assistance for restoring water supply systems and sewage systems.
5. Barricade damaged areas as directed.
6. Determine ability to adequately respond and/or the need to request federal assistance.

D. Recovery.

1. Repair roads and coordinate repair of utilities as necessary.
2. Coordinate private and volunteer repairs to utilities.
3. Assist in providing potable water and sanitary facilities, as needed.
4. Participate in compiling after-action reports and critiques.
5. Make necessary changes and improvements to emergency operations plans.

III. ORGANIZATION AND ASSIGNMENT OF RESPONSIBILITIES.

A. General.

State of Oklahoma Emergency Operations Plan (EOP)

State agencies with primary or secondary emergency functions connected with public works will assign appropriate personnel to carry out these functions.

B. Organization.

State agency heads will each organize their agency to effectively conduct emergency operations.

C. Assignment of Responsibilities.

1. Debris removal and disposal.

a. The Oklahoma Department of Transportation (ODOT) has primary responsibility to remove debris and wreckage caused by a disaster only when requested by local government and/or when debris clearance is immediately essential to eliminate threats to the public health, safety, and property. Debris or wreckage shall be moved to temporary storage areas, or moved directly to disposal sites, as approved by the Department of Environmental Quality (DEQ). Disposal methods (fire, burial, etc.) shall be determined by the DEQ. The ODOT shall work with Oklahoma Water Resources Board (OWRB) to insure the integrity of the ground water by locating wellheads utilizing GPS/GIS technology. In the event additional help is needed, assistance may be obtained from the Agriculture Department, the Department of Health, Oklahoma Military Department, the Oklahoma Chapter of Voluntary Organizations Active in Disasters (VOAD), and local government.

b. The DEQ has primary responsibility to provide ODOT and other debris removal agents with locations of approved disposal sites and methods to be used for disposal (i.e., burying, burning, etc.). This department will likewise coordinate removal and disposal of debris that could constitute a health hazard.

c. The Agriculture Department shall inform the Department of Health of the exact locations of areas where there are extensive dead livestock and/or other agricultural debris problems.

d. The Oklahoma Military Department shall assist the ODOT with its equipment and personnel, when requested, to remove debris and wreckage in disaster areas that are essential to the health, safety and welfare of the public.

e. The state may request federal assistance when a major disaster overwhelms the state's ability to adequately respond. This federal assistance may be requested through FEMA via the U.S. Army Corps of Engineers and other federal agencies.

2. Engineering and construction.

State of Oklahoma Emergency Operations Plan (EOP)

a. The ODOT has primary responsibility to make emergency repairs or replacements to damaged roads and bridges to provide for their continued operation that is necessary for the immediate protection, welfare and preservation of life and property.

b. The Oklahoma Military Department has a secondary mission to utilize its forces to assist the ODOT, when requested, to make emergency repairs to roads, bridges, public buildings, or other public facilities in disaster areas, which are essential to the health, safety and welfare of the public.

c. The ODOT shall report downed or damaged gas, electric and telephone utilities and dangerous eminent threats resulting from this damage to the State EOC.

3. Water and Sanitation.

a. DEQ will have primary responsibility for the state emergency water and sanitation mission to:

(1) Provide to local communities that have suffered damage to their water supply and sewage systems, the technical assistance necessary for emergency repair of their facilities.

(2) Inspect and take samples of water in disaster areas to determine if it is safe for human consumption.

(3) Assist local authorities in obtaining a potable water supply for those disaster communities whose water supply has been knocked out or contaminated.

(4) Assist local authorities in applying emergency sanitation measures for those disaster communities that have suffered damage to their sanitation systems or which are inoperative.

(5) Provide, upon request, an agency engineer to perform required initial (windshield) surveys for assessment of damage to water and sanitation systems in the affected area.

b. The Water Resources Board will have a secondary responsibility for the state emergency water and sanitation mission to:

(1) Assist DEQ in finding possible backup emergency water supply for affected communities.

(2) Advise DEQ on the relationship between providing a community emergency water and sanitation and the possible effects on overall water sources of the state.

State of Oklahoma Emergency Operations Plan (EOP)

(3) Assist DEQ in selecting new sites for water or sanitation systems, if needed.

(4) Provide, upon request, an agency engineer to perform and/or accompany a federal engineer on required surveys for assessment of damage to dams and waterways in the affected area.

c. The Oklahoma Military Department will assist DEQ and provide, upon request, water trailers that shall be utilized to provide local governments suffering damage to their water systems with emergency potable water and, if available, appropriate generators for water pumps during electrical outages.

d. The Oklahoma Department of Emergency Management can also provide a limited number of potable water trailers.

4. Damage Assessment.

The Civil Air Patrol has primary responsibility to provide ODOT a damage assessment capability by performing required initial (windshield) surveys, follow on assessment surveys or air video reconnaissance survey through airborne video transmitting or on the ground assessment with video equipment.

5. Other support as required.

a. Other support as required will be provided by the support agencies and federal agencies.

b. The U.S. Corps of Engineers, Tulsa District, stands ready to assist OEM by participation in exercises and disaster scenarios and can provide the following types of assistance to local and State of Oklahoma authorities in the event of an emergency that may not ultimately result in a Federal Disaster Declaration:

- (1) Damage Assessment teams or support to state teams.
- (2) Flood fighting assistance and materials (primarily sandbags and pumps).
- (3) Levee and Flood Control Works technical assistance (any location)
- (4) Levee and Flood Control Works rehabilitation (if active under Corps of Engineers Public Law 84-99 levee program) if damaged by flood events.
- (5) Engineering support and other expertise, including but not limited to Civil, Structural, and Geotechnical Engineering; Hazardous, Toxic, and Radiological Materials; Real Estate assistance; Floodplain Management, and various other Federal Regulatory Program Assistance.

c. In the event the State of Oklahoma receives a Federal Disaster Declaration resulting in the activation of ESF #3, the U.S. Army Corps of Engineers, through the

State of Oklahoma Emergency Operations Plan (EOP)

Tulsa District, can provide the following assistance. These following efforts have been coordinated with FEMA and pre-scripted Mission Assignments exist for many of the following items, expediting activation of these efforts:

- (1) Provide Damage Assessment teams or assistance to State/Federal teams.
- (2) Assist with and provide Urban Search and Rescue team's provision of bottled drinking water for basic human needs.
- (3) Provision of bagged ice.
- (4) Provision of emergency generator(s) to provide electrical power to critical facilities including but not limited to hospitals and clinics, law enforcement facilities, water and sewage treatment plants and facilities (including lift/pump stations), etc.
- (5) Debris removal and reduction.
- (6) Temporary roofing and material supplies and installation.
- (7) Construction or installation of temporary housing units either on individual properties or in a community setting with all utility support.
- (8) Actively participate with Hazard Mitigation Team efforts.

IV. DIRECTION AND CONTROL.

A. The Director of the ODOT shall be responsible for directing primary activities of the ODOT and in coordinating the activities of supporting agencies in connection with debris removal and disposal and engineering and construction and secondary activities in connection with utilities restoration.

B. The Executive Director of the Department of Environmental Quality shall direct all primary activities in connection with debris removal and disposal and technical assistance as needed in providing potable water and sanitary facilities.

C. The administrative heads of the Department of Agriculture and the Oklahoma Military Department shall direct all secondary activities in connection with debris removal disposal. The Oklahoma Military Department shall be directed by the Adjutant General in connection with secondary activities of engineering and construction and water and sanitation.

V. CONTINUITY OF GOVERNMENT.

Lines of succession to each department head are according to the SOPs established by each department with a primary or secondary public works mission.

State of Oklahoma Emergency Operations Plan (EOP)

ESF #4 FIREFIGHTING ANNEX

STATE COORDINATING AGENCY: Department of Agriculture

SUPPORT AGENCIES:

- Chief Medical Examiner
- Civil Air Patrol
- Department of Corrections
- Department of Emergency Management
- Department of Public Safety
- Department of Transportation
- Department of Tourism & Recreation
- Department of Wildlife Conservation
- Fire Marshal
- Oklahoma Corporation Commission
- Oklahoma Military Department
- Oklahoma Office of Homeland Security
- Oklahoma State Bureau of Investigation
- Oklahoma Turnpike Authority

I. PURPOSE.

The purpose of this annex is to establish an effective system for the coordinated response to fire suppression during emergency or disaster situations. The Department of Agriculture will also be the state coordinating agency with the federal government for assistance provided with the National Response Plan's (NRP) Emergency Support Function (ESF) #4, Firefighting, in such areas as detecting and suppressing wildland, rural and urban fires resulting from, or occurring coincidentally with, a catastrophic earthquake, significant natural disaster or other event requiring Federal response assistance.

II. SITUATION AND ASSUMPTIONS.

A. Situation.

Both natural and technological emergencies may result in the need for large-scale fire suppression. When extreme burning conditions occur, it is likely that wildfire incidents will be widespread and all fire protection forces may be committed very quickly, and for extended periods of time. State response to a wildfire emergency must be rapid to be effective.

B. Assumptions.

1. Most fire suppressions operations can be effectively handled by local emergency service agencies or through local mutual aid agreements. In the designated fire protection area in eastern Oklahoma, Forestry Services firefighters suppress all uncontrolled wildland fires.

State of Oklahoma Emergency Operations Plan (EOP)

2. During major or widespread emergencies, suppression requirements may exceed normal capabilities and require a coordinated response on a statewide basis.

III. CONCEPT OF OPERATIONS.

Within the limit of their capabilities and jurisdictions, local emergency service agencies will perform basic fire suppression services. If requirements exceed local capabilities, require cross-jurisdictional action, or impact resources under State control, the appropriate State agencies or volunteer organizations should become involved. In some cases, State agencies may need to obtain local assistance for fire/rescue operations where initial responsibility rests with the State and the scope of the operations exceeds available State resources.

IV. ORGANIZATION AND ASSIGNMENT OF RESPONSIBILITIES.

A. General.

1. The Department of Agriculture provides protection from forest fires in Oklahoma through detection, prevention, and suppression activities. Therefore, it has primary responsibility for State level operations involving wildland fire suppression.

2. In designated fire protection areas, Forestry Services concentrates firefighting forces to suppress all uncontrolled wildland fires, and works in close coordination with local fire departments as appropriate. Outside the designated fire protection area, Forestry Services firefighters will provide fire suppression assistance in support of local fire departments as requested and as fire conditions and available resources permit. Forestry Services will coordinate its response outside the protection area with its Rural Fire Coordinators statewide as appropriate.

B. Assignment of Responsibilities.

1. Department of Agriculture:

a. Provide the necessary manpower, equipment, and materials to suppress fires on public or private forests or grasslands where the potential or actual destruction would be considered a major disaster.

b. Request assistance, in accordance with department procedures, from the USDA Forest Service. Requests for additional State resources from agencies with secondary responsibility should be coordinated through the Director, Department of Emergency Management.

c. Advise the State EOC of the development of any major fire, either forest or grassland. The EOC should also be advised if arson and/or state-owned property are involved.

State of Oklahoma Emergency Operations Plan (EOP)

d. Advise the State EOC of rural homes and businesses that require emergency assistance.

e. Coordinate with the U.S. Department of Agriculture and other Federal agencies in support of Emergency Support Function #4 of the National Response Plan.

2. Fire Marshal:

a. In coordination with the Department of Agriculture, investigate and determine the cause of fires where the cause may be other than by natural means.

b. Upon request, assist the Chief Medical Examiner in the investigation of deaths caused by fire in a natural disaster.

c. Provide code enforcement.

d. Assist local governments with inspection of structures after disasters to prevent fire hazards.

3. Department of Transportation:

a. As requested, provide manpower, equipment and other appropriate resources in support of operations.

b. Assist law enforcement officials in maintaining traffic flow into and away from the disaster area as well as provide advice on the best routes for rescue or evacuation activities.

4. Other State Agencies.

a. The Department of Corrections, Military Department, Tourism and Recreation Department, Department of Emergency Management, Oklahoma Office of Homeland Security, Transportation, Oklahoma State Bureau Investigation, Department of Public Safety, and the Department of Wildlife Conservation should:

b. As requested, provide manpower, equipment, and other appropriate resources in support of fire suppression activities.

c. Assist the Department of Agriculture in notifying persons in the path of fires of the impending danger.

d. The Oklahoma Corporation Commission shall coordinate the disconnection electric power and natural gas lines when a natural disaster causes the rupture of natural gas lines and the ignition by sparking electric lines for potential fires and/or explosions.

State of Oklahoma Emergency Operations Plan (EOP)

5. Cooperative organizations.

The Oklahoma Wing of the Civil Air Patrol, upon request, may provide aircraft and aircrews for aerial missions to aid in the location of fires, victims, radio air relay, damage assessment or executive airlift. It will also provide aerial support to search and rescue operations as requested by the State EOC or DPS, if available.

V. DIRECTION AND CONTROL.

A. Direction and control of fire suppression operations in wildland areas will be conducted by the Department of Agriculture. If the State EOC is operational, requests for assistance should be coordinated by the Department through the EOC. If the EOC is not operational, requests for assistance should be made to the Department of Agriculture and the EOC advised of the situation as soon as it is activated.

B. No administrative process will be permitted to interfere with operations essential to suppressing wildfires and thereby preventing injury, loss of life and significant property damage. During wildfire emergency, the process to access supplemental state resources shall be simplified to expedite their use in a timely manner and prescribed in a Standard Operating Procedure (SOP).

VI. LOGISTICS.

For fire suppression, additional resources may be available from nearby public and private fire fighting companies. Local emergency service agencies also represent a resource for search and rescue operations.

State of Oklahoma Emergency Operations Plan (EOP)

ESF #5 EMERGENCY MANAGEMENT ANNEX

STATE COORDINATING AGENCY: Department of Emergency Management

SUPPORT AGENCIES: All state Agencies, Boards, Commissions and Voluntary organizations.

I. PURPOSE.

The purpose of this annex is to identify an Emergency Operations Center (EOC) location and establish procedures for collecting, processing and disseminating information about potential or actual natural or manmade disasters or emergencies. The EOC will facilitate the overall activities of the state and local governments in providing response assistance to an affected area. Using the EOC the Department of Emergency Management (OEM) will coordinate with the federal government for assistance provided with the National Response Plan's (NRP) Emergency Support Function (ESF) #5, Emergency Management.

II. SITUATIONS AND ASSUMPTIONS.

A. Situation.

1. During a period of increased readiness or extreme emergency in which loss of life or property damage has occurred or appears imminent, the State Emergency Operations Center (EOC) will be activated to the level dictated by the gravity of the situation.

2. All governmental agencies having emergency responsibilities will be advised when the EOC is activated.

3. All emergency operations will be conducted under the authority of the laws of Oklahoma and/or executive orders or authorities delegated by law to the elected or appointed officials of the State of Oklahoma.

B. Assumptions.

1. Most emergency situations are handled routinely by local and state government agencies and volunteer service organizations.

2. In large-scale disaster situations beyond the capabilities of the city or county emergency management organizations, the State EOC shall provide centralized direction, control and assistance.

III. CONCEPT OF OPERATIONS.

A. General.

State of Oklahoma Emergency Operations Plan (EOP)

1. The EOC and staff may be activated by the Governor of Oklahoma, or anyone designated by the Governor, when it appears the State of Oklahoma is or may be in great danger of loss of lives or great property damage.

2. Based on the needs of the situation, department heads or designated representatives may be requested to report to the EOC to coordinate that agency's activities when the EOC is activated. When it appears the United States is involved in a national security emergency, all agencies will have their representative report immediately.

3. The Director, Department of Emergency Management or his designee, will activate its alert procedures in accordance with department standard operating procedures.

4. The EOC is entered from the tunnel between the Sequoyah and Will Rogers Buildings in Oklahoma City, (405) 521-2481, and alternate EOCs are located as follows: Stillwater EOC, (405) 742-8380, Stillwater City Hall Basement located at 723 South Lewis, Stillwater, Oklahoma; Ardmore EOC, (580) 223-4453, located in the basement of the City Hall at 23 South Washington, Ardmore, Oklahoma; and the Tulsa EOC, (918) 596-9890, located in room E24, 200 Civic Center, Tulsa, Oklahoma.

B. Phases of Management.

1. Mitigation.

- a. Maintain high readiness posture of EOC.
- b. Provide for adequate communications capabilities.
- c. Assign EOC staff positions to qualified personnel.

2. Preparedness.

- a. The Director, Department of Emergency Management, will insure that the EOC staff organization with names, addresses and telephone numbers is maintained at all times.
- b. Inform officials of EOC operations.
- c. Maintain/obtain supplies and food for emergencies.
- d. Prepare and review all plans and conduct exercises.

3. Response.

- a. Activate the EOC, as required.
- b. Respond to the emergency.

State of Oklahoma Emergency Operations Plan (EOP)

- c. Coordinate all emergency operations.
- d. Coordinate with DHS/EPR/FEMA and other Federal agencies in support of Emergency Support Function #5 of the National and Regional Response Plans.
- e. Collate and consolidate the incoming situation reports pertinent to the respective department, agency or organization.
- f. Maintain a situation status account.
- g. Brief the Governor and the Department of Emergency Management Director on the respective situations.
- h. Provide information on respective situations and any problems when assistance is needed to carry out their responsibility.
- i. Ensure that administrative and accounting procedures are in place to document actions taken and all costs incurred during emergency operations.

4. Recovery.

- a. Continue long-term response and coordination of resources.
- b. Plan for release of operations personnel.
- c. Provide required briefings and submit reports.

IV. ORGANIZATION AND ASSIGNMENT OF RESPONSIBILITIES.

A. General.

In the event of a disaster, the State EOC or alternate EOC will exercise overall and general supervision of all assets.

B. Organization.

1. Executive group.

- a. Governor.
 - (1) Press Secretary.
 - (2) Secretary.
- b. Lieutenant Governor.
- c. President Pro-Tempore of the Senate.
- d. Speaker of the House.
- e. Secretary of State.

State of Oklahoma Emergency Operations Plan (EOP)

f. Attorney General.

2. Operations.

- a. Director, Department of Emergency Management.
- b. Deputy Director, Department of Emergency Management.
- c. EOC Manager, Department of Emergency Management, and assigned personnel.
- d. Public Information Officer, Department of Emergency Management.
- e. Commissioner, Department of Public Safety.
- f. Director, Oklahoma Office of Homeland Security
- g. State Fire Marshal.
- h. Director, Department of Human Services.
- i. Adjutant General.
- j. Commissioner, State Department of Agriculture.
- k. Director, Forestry Division.
- l. Director, Employment Security Commission.
- m. Commissioner, Department of Health.
- n. Director, Wildlife Conservation Commission.
- o. Director, Department of Transportation.
- p. Director, Oklahoma SARDA Plan, ODOT when activated.
- q. Other State Agencies.

3. Communications Group.

- a. EOC Manager, Department of Emergency Management.
- b. One communications officer, each shift (3) from the following state agencies:
 - (1) Oklahoma Highway Patrol.
 - (2) Department of Transportation.
 - (3) Civil Air Patrol.
 - (4) Oklahoma Military Department.
 - (5) American Red Cross.
 - (6) Department of Wildlife Conservation.
 - (7) The Salvation Army

4. Liaison Group.

- a. Oklahoma Military Department.
- b. Oklahoma Highway Patrol.
- c. The Salvation Army.
- d. Civil Air Patrol.
- e. American Red Cross.
- f. Wildlife Conservation Commission.
- g. Volunteer Organizations Assisting in Disasters.

State of Oklahoma Emergency Operations Plan (EOP)

5. EOC Support.

- a. Department of Emergency Management Staff (8).
- b. Secretaries and Clerks (4).
- c. Support personnel (8).

C. Assignment of Responsibilities.

1. The Governor of Oklahoma is responsible for the lives and protection of property within the boundaries of the State of Oklahoma.

2. The Director, Oklahoma Department of Emergency Management (OEM), under the supervision of the Governor of Oklahoma, will be responsible for the implementation of plans and emergency operations for the protection of citizens of Oklahoma. This will include interagency or departmental coordination as well as coordination with volunteer service organizations.

3. The Emergency Operations Center Manager will be responsible for the State EOC personnel, coordination and operation procedures.

4. The Chief, Field Services Division will be responsible for deploying the Division's Area Coordinators to the disaster scene(s) consistent with personnel safety considerations.

5. The damage assessment team, under direction of the Chief of Field Services Division, will be responsible for the collection and collation of reports of physical damage, loss of lives, and the coordination to establish relief centers to alleviate suffering and aid in recovery.

6. The Emergency Operations Center Manager is responsible for supplies and equipment including dispensary and sanitary supplies, feeding and housekeeping within the EOC during the period it is being operated.

V. DIRECTION AND CONTROL.

A. Emergency Operations requires centralized control and management. The officials designated to work in the State EOC will coordinate the use of resources and interface with other agencies, in support of the primary agency.

B. The Director, OEM will develop the criteria for transfer of control from the Primary to the alternate EOC(s) and will develop appropriate procedures for staffing and operating the alternate EOC consistent with plans to continue operations.

VI. CONTINUITY OF GOVERNMENT.

State of Oklahoma Emergency Operations Plan (EOP)

Succession of Leadership.

For the overall supervision of the EOC, the line of succession will be the Director, Department of Emergency Management, Deputy Director, and EOC Manager.

VII. ADMINISTRATION AND LOGISTICS.

Agreements and Understandings.

The Director, Department of Emergency Management, will enter into any agreements or understandings between this office and local groups or organizations as necessary for implementation of this plan.

State of Oklahoma Emergency Operations Plan (EOP)

ESF #6

MASS CARE, HOUSING AND HUMAN SERVICES ANNEX

STATE COORDINATING AGENCY: Department of Emergency Management

SUPPORT AGENCIES: Department of Education
Department of Health
Department of Mental Health and Substance Abuse Services
Oklahoma Office of Homeland Security
Oklahoma State Bureau of Investigation
Oklahoma Military Department
Oklahoma Volunteer Organizations Active
In Disasters (OKVOAD)
The American Red Cross
The Salvation Army

I. PURPOSE.

The purpose of this annex is to establish a procedure for providing sheltering, feeding, emergency first aid, bulk distribution and victim registration to meet the immediate needs of the victims during and after the occurrence of a disaster or emergency. The Department of Emergency Management will coordinate with the federal government for assistance provided in the National Response Plan's (NRP) Emergency Support Function (ESF) #6, Mass Care, Housing and Human Services.

II. SITUATION AND ASSUMPTIONS.

A. Situation.

Certain agencies provide daily services or assistance to needy citizens. There are occasions when similar services are needed during emergency situations. The coordination of feeding, congregate sheltering, emergency first aid, family reunification and bulk distribution of relief supplies as are essential during emergency conditions.

B. Assumptions.

1. The Department of Emergency Management (OEM) will coordinate Mass Care and emergency individual assistance with assistance from OKVOAD. In most situations, ARC will manage and operate shelters.

2. OKVOAD agencies will provide for emergency mass feeding, mass sheltering, emergency first aid, disaster welfare inquiry, and bulk distribution of disaster relief supplies for disaster displaced citizens.

3. Mutual support agreements with volunteer service organizations and other support groups will be obtained as needed and their services utilized to the maximum.

State of Oklahoma Emergency Operations Plan (EOP)

III. CONCEPT OF OPERATIONS.

A. General.

1. OEM and OKVOAD will coordinate and provide support to the mass care efforts, as well as provide support during the emergency and continue long-term support to the victims during the recovery process.

2. The OKVOAD will fully participate in planning for feeding, sheltering, emergency first aid, disaster welfare inquiry, and recovery assistance to meet emergency disaster needs of disaster victims.

B. Phases of Management – Department of Emergency Management

1. Preparedness.

a. Coordinate plans for sheltering and feeding services with OKVOAD and local Emergency Management, Department of Education, DHS, and other support organizations and groups to meet the needs of disaster victims.

b. OEM and OKVOAD will review and update emergency services disaster plans to include written agreements when necessary.

c. Coordinate with OKVOAD and local Emergency Management to ensure that an inventory of emergency shelters has been made and copies are provided to all agencies impacted by shelter activation.

d. Ensure adequate written agreements are in place with the Department of Human Services (DHS) and other support organizations to provide food commodities to support shelter and mass feeding plans. Notify and assist DHS in obtaining Federal Declaration for use of U.S. DA Commodities and Food Stamps.

e. Actively coordinate OKVOAD responsibilities with those of other agencies and organizations to ensure disaster caused needs be met.

f. Plan for a coordinated public information effort that respects and works with the existing public relations plans of all voluntary agencies.

g. Ensure that administrative and accounting procedures are in place to document actions taken and all costs incurred during emergency operations.

3. Response.

a. Coordinate the activation, staffing and management of shelter and feeding sites as needed. Coordinate the provision of food, shelter, disaster welfare inquiry, and bulk distribution of relief supplies.

State of Oklahoma Emergency Operations Plan (EOP)

b. Coordinate the identification, staffing and management of disaster Family Service Centers to provide information regarding emergency financial assistance based on disaster caused needs.

c. Coordinate the notification to the public of all information on locations and hours of operation on emergency shelters, service centers, and bulk distribution sites.

d. Coordinate with OKVOAD, ARC and The Salvation Army to assign staff to the State Emergency Operations Center (EOC) when requested. Staff members will act as liaisons between the decision-making ARC Disaster Operational Team, other voluntary organizations involved and the Agency representatives at the EOC.

4. Recovery.

a. Publish information on emergency services, locations and hours of operation in cooperation with all service providers.

b. Coordinate with other agencies and organizations to provide assistance to meet disaster caused needs.

c. Coordinate with OKVOAD to provide assistance in the form of staff for the Disaster Recovery Centers in cooperation with voluntary agencies.

IV. ASSIGNMENT OF RESPONSIBILITIES.

Assignment of Responsibilities.

A. Department of Emergency Management.

1. Provide support to all mass care providers by coordinating and facilitating actions as the primary state coordinating agency.

2. When applicable, and agreed upon, assist in administering the Individual and Households Program (IHP) for the State following Presidentially declared disasters in accordance with the most recent IHP State Administrative Plan (SAP).

3. Coordinate with all emergency welfare service groups, local and state government, and local emergency operations centers.

4. Coordinate the development and maintenance of emergency aid agreements with agencies, organizations and groups active in disaster as needed to meet the situation.

5. Ensure adequate resources are identified to support the disaster mission.

State of Oklahoma Emergency Operations Plan (EOP)

6. Coordinate with the OKVOAD agencies to maintain adequately trained staff to support the disaster operation.

B. Oklahoma Volunteer Organizations Active in Disaster (OKVOAD)

1. Provide immediate response to meet the needs of disaster victims. As stated in PL 93-288, the ARC will provide mass care in cooperation with all OKVOAD agencies.

2. Provide damage assessment summaries for the State EOC, state and local officials and other agencies as requested. Information will be limited to type, location and extent of damage, and with the permission of the agency doing the on site assessment(s).

3. Provide a liaison representative to the State EOC. Work stations will be provided in the EOC for OKVOAD, ARC and The Salvation Army liaisons.

4. Coordinate with local, state and federal authorities (Joint Information Centers) on all public affairs information, and cooperate with all existing OKVOAD agency public information plans.

C. Department of Human Services.

Manage bulk food resources and Food Stamps provided by the U.S. Department of Agriculture and provide support as required and available through Federal Declaration.

D. Department of Health.

Perform food inspections and coordinate Emergency Medical Service providers as needed.

E. Department of Education.

Provide support as required in the areas of facilities, transportation and communications.

F. Department of Mental Health and Substance Abuse Services

Provide support as required in the areas of mental health and counseling; and write and oversee Crisis Counseling (immediate and regular service) grants as coordinated with OEM.

G. Oklahoma Office of Homeland Security

State of Oklahoma Emergency Operations Plan (EOP)

Provide support as required.

H. Oklahoma State Bureau of Investigation

Provide identification services related to Housing as required.

1. Provide staff and portable electronic or manual identification equipment to housing sites as needed, to assist in the identification of fugitives, registered sex offenders and other problem subjects attempting to conceal themselves among the victims in violation of state or federal law.

2. Establish appropriate communications with the FBI to facilitate timely identifications and notify appropriate law enforcement personnel responsible for site security as required.

I. Oklahoma Military Department

Provide support as required for sheltering of victims.

State of Oklahoma Emergency Operations Plan (EOP)

State of Oklahoma Emergency Operations Plan (EOP)

ESF #7 RESOURCES SUPPORT ANNEX

STATE COORDINATING AGENCY: Department of Emergency Management

SUPPORT AGENCIES: Alcoholic Beverage Law Enforcement Commission
 Civil Air Patrol
 Corporation Commission
 Department of Central Services
 Department of Commerce
 Department of Corrections
 Department of Education
 Department of Environmental Quality
 Department of Health
 Department of Labor
 Department of Public Safety
 Department of Tourism and Recreation
 Department of Transportation
 Department of Wildlife Conservation
 Oklahoma Military Department
 Oklahoma Office of Homeland Security
 Oklahoma State Bureau of Investigation
 Oklahoma Turnpike Authority
 U.S. Army Corps of Engineers
 Water Resources Board

I. PURPOSE.

The purpose of this annex is to establish effective procedures to coordinate support response and/or resources of state departments and agencies, and preserve the continuity of their respective departmental and agency functions. It also provides for the resumption of such functions with a minimum of interruption in the event of natural or man-made emergency. The Department of Emergency Management will coordinate with the federal government for assistance provided with the National Response Plan's (NRP) Emergency Support Function (ESF) #7, Resource Support.

II. SITUATION AND ASSUMPTIONS.

A. Situation.

During the period of a natural or man-made emergency in which great damage may occur within the State of Oklahoma a condition may exist in which emergency supplies and resources may be limited.

B. Assumptions.

1. Existing resources will provide adequate support for short-term emergency

State of Oklahoma Emergency Operations Plan (EOP)

operations.

2. For long-term emergency support operations, additional resources will be made available.

III. CONCEPT OF OPERATIONS.

A. General.

The principle executive or representative of the individual member Agencies, Boards, Commissions or organizations designated as members of the resources group will report to the State Emergency Operations Center on its activation or when requested as dictated by the emergency.

B. Phases of Management.

1. Preparedness.

a. Prepare and maintain current list of personnel, materials and their locations needed to accomplish their assigned responsibilities.

b. Develop contingency plans for the personnel of their department, agency or organization to insure their safety and the continuity of the functions of the department, agency or organization.

c. Develop plans for personnel of the department, agency or organization to report their location and availability for duty.

d. Develop plans for the resumption of the departmental or organizational functions with a minimum of disruption, including relocation of the department, agency or organization, if required.

e. Ensure that administrative and accounting procedures are in place to document actions taken and all costs incurred during emergency operations.

3. Response.

Coordinate with the Federal General Service Administration and other Federal agencies in support of Emergency Support Functions #7 and 12 of the National Response Plan.

IV. ORGANIZATION AND ASSIGNMENT OF RESPONSIBILITIES.

A. Organization.

State of Oklahoma Emergency Operations Plan (EOP)

The resources group may be composed of the following:

1. Group Chief
2. Assistant Chief
3. Three Corporation Commissioners
4. Director, Department of Central Services
5. Director, Tourism and Recreation Department
6. Superintendent, State Department of Education
7. Commissioner, State Banking Department
8. Director, Oklahoma Water Resources Board
9. Director of State Finance
10. State Treasurer
11. President, Oklahoma Association of General Contractors of America
12. President, State Funeral Directors Association

B. Assignment of Responsibilities.

The responsibilities of the members of the resources group will be in accordance to the respective individual member departments, agencies and other organizations. All agencies will provide support as required.

V. CONTINUITY OF GOVERNMENT.

Succession of Leadership.

Lines of succession will be in accordance with Standing Operating Procedure established by each department, agency or organization.

PUBLIC HEALTH AND MEDICAL SERVICES ANNEX

STATE COORDINATING AGENCY: Department of Health

SUPPORT AGENCIES: American Red Cross
Chief Medical Examiner
Department of Agriculture
Department of Emergency Management
Department of Environmental Quality
Department of Human Services
Department of Mental Health and Substance Abuse Services
Department of Public Safety
Oklahoma Military Department
Oklahoma Office of Homeland Security

I. PURPOSE.

To establish procedures for response to the environmental, health, and medical needs of the State of Oklahoma in the event of man-made or natural emergency. The Department of Health will coordinate with the federal government for assistance provided in the National Response Plan's (NRP) Emergency Support Function (ESF) #8, Public Health and Medical Services.

In accordance with the Oklahoma Catastrophic Health Emergency Powers Act (O.S. 63:6101), the Oklahoma Catastrophic Health Emergency Plan was developed as an addendum to ESF #8. Its purpose is to prepare for acts of terrorism, resurgent infectious diseases and mass casualty incidents. Copies of the plan are maintained by the Health Department and support agencies.

II. SITUATION AND ASSUMPTIONS.

A. Situation.

1. Natural or man-made emergencies could occur within the boundaries of the State of Oklahoma and would require coordinated use of all health and medical resources available.

2. Adequate resources are available within the boundaries of the State of Oklahoma to meet most foreseeable short-term emergencies.

B. Assumptions.

1. The Commissioner of Health will be responsible for coordination of all state health and medical services in response to man-made or natural emergencies.

State of Oklahoma Emergency Operations Plan (EOP)

2. All Department of Health personnel will remain under direction and control of the Commissioner of Health during any activation of this plan.

3. Local resources will be fully employed before committing state assets.

III. CONCEPT OF OPERATIONS.

A. General.

1. The Commissioner of Health will keep the Governor, the Director of the Department of Emergency Management and the Director of the Oklahoma Office of Homeland Security informed of the status of medical and health services during emergency operations.

2. The scope of medical and health services will be adjusted to the size and type of disaster.

B. Phases of Management.

1. Mitigation.

a. Develop and maintain contingency plans for the Health Department to insure the continuity of functions.

b. Develop and maintain plans for providing health and medical services.

2. Preparedness.

a. Identify available medical facilities and medical supplies.

b. Conduct training sessions and exercises.

c. Ensure that administrative and accounting procedures are in place to document actions taken and all costs incurred during emergency operations.

3. Response.

a. Locate and alert personnel.

b. As requested, send a representative to the state emergency operations center to perform the following functions.

(1) Consolidate the incoming health and medical reports, and maintain the situation report.

(2) Brief the Governor and the Director of the Department of Emergency

State of Oklahoma Emergency Operations Plan (EOP)

Management.

(3) Provide information and recommendations.

(4) Coordinate the need and distribution of medical supplies and services.

(5) Ensure health needs are met in congregate shelters and other disaster related facilities, in coordination with the American Red Cross.

c. Provide a communication system or personnel to the disaster coordination center at the scene to assist in the coordination of requests for assistance.

4. Recovery.

a. Provide advice and support for decontamination measures.

b. Inspect food supplies.

c. Institute vector control and quarantines to reduce the threat of epidemics.

d. Restore medical care and treatment facilities and services.

e. Institute immunization programs as required.

f. Continue to ensure health needs are met in congregate shelters and other disaster related facilities, in coordination with the American Red Cross.

IV. ORGANIZATION AND ASSIGNMENT OF RESPONSIBILITIES.

A. General.

All Department of Health personnel will remain under the direction and control of the Commissioner of Health.

B. Organization.

In so far as possible, there will be no changes to existing organization.

C. Assignment of Responsibilities.

1. Health and Medical Services.

a. Emergency medical support.

b. Distribution of medical supplies and services.

State of Oklahoma Emergency Operations Plan (EOP)

- c. Immunization.
- d. Mortuary services.

2. Public Health Environmental Services.

- a. Vector control.
- b. Inspection of food supplies.
- c. General sanitation measures.
- d. Activities necessary to resume normal public health community services.

3. Department of Agriculture.

With assistance by the Veterinary Services and when medical facilities are unavailable, permit use of veterinary facilities and equipment for temporary human medical care during extreme emergencies involving mass casualties.

4. Support Agencies.

Provide support as required.

V. CONTINUITY OF GOVERNMENT.

Agency line of succession will be in accordance with internal standing operating procedures.

VI. ADMINISTRATION AND LOGISTICS.

A. Health Statistics.

- 1. The Department of Health will continue to collect and report vital statistics.
- 2. Disease statistics will be collected and reported to appropriate state and federal officials.

B. Testing and Inspections.

All testing, inspections, and surveys will follow normal procedures but will be conducted more frequently.

VII. PLAN DEVELOPMENT AND MAINTENANCE.

The Commissioner of Health will make necessary plans and mutual support agreements to fulfill responsibilities outlined by law and this annex.

State of Oklahoma Emergency Operations Plan (EOP)

State of Oklahoma Emergency Operations Plan (EOP)

BLANK PAGE

State of Oklahoma Emergency Operations Plan (EOP)

ESF #9

URBAN SEARCH AND RESCUE ANNEX

STATE COORDINATING AGENCY: Department of Public Safety and Highway Patrol

SUPPORT AGENCIES: Alcoholic Beverage Law Enforcement Commission
 Civil Air Patrol
 Chief Medical Examiner
 Department of Agriculture
 Department of Emergency Management
 Department of Wildlife Conservation
 Fire Marshal
 Oklahoma Military Department
 Oklahoma Office of Homeland Security
 Oklahoma State Bureau of Investigation

I. PURPOSE

A. Urban search and rescue is the responsibility of county, city and town fire departments and law enforcement departments. They will prepare and respond in accordance to their emergency operations plans and standard operating procedures (SOPs). This annex establishes primary and support responsibilities for rural search and rescue operations. Responsible agencies will prepare appropriate internal plans and SOPs to cover all phases of emergency management.

B. The Department of Emergency Management will coordinate with the federal government for assistance provided with the National Response Plan's (NRP) Emergency Support Function (ESF) #9, Urban Search and Rescue and the National Search and Rescue Plan, and the State of Oklahoma Agreement with the Air Force Rescue Coordination Center, Langley A.F.B., Virginia.

II. SITUATION AND ASSUMPTIONS

A. Situation

Search and rescue (SAR) missions may be required when an Emergency Locating Transmitter (ELT) signals and/or FAA reports of overdue aircraft is received; a request is made by local government officials for assistance in locating a missing person; and to locate survivors of natural or man-made emergencies.

B. Assumptions

1. The Oklahoma Highway Patrol (OHP) has primary responsibility for coordinating search and rescue efforts involving more than one state agency. In searches initiated by OEM, Langley A.F.B., Fort McPhearson, the County Sheriff or the local Police Chief and the OHP is on the scene, the senior OHP officer will become the Incident Commander (IC). In searches where there is no OHP presence, the County Sheriff (on unincorporated land) or the Chief of Police (within city/town limits) will become the IC. In searches established by

State of Oklahoma Emergency Operations Plan (EOP)

competent authority and there is no law enforcement presence, where the Civil Air Patrol is executing their Federal role, the CAP will be the Incident Commander. This responsibility will pass to the first Law Enforcement Officer on the scene.

2. Assistance from other agencies and the Civil Air Patrol (CAP) will be available upon request.

III. CONCEPT OF THE OPERATION

A. The most frequent search and rescue mission is initiated by an ELT. When an ELT is received the Air Force Rescue Coordination Center (AFRCC), Langley A.F.B., Virginia will activate a mission number after other methods of search have failed. The CAP begins a search after receiving this mission number from the AFRCC. Most ELT transmissions result from rough landings and maintenance, not plane crashes. Planes are usually located in hangars or at airports after the pilot has completed his flight. In these cases, once the plane containing the transmitting ELT is found, the mission will be closed.

B. Requests for assistance from local government officials in locating a missing person may go to the CAP or the OHP. Either CAP or OHP may respond and provide aerial and/or ground search assistance. Whenever more than one state agency provides assistance, the OHP will assume incident command. The Department of Emergency Management will coordinate resource requirements for CAP and State agencies. Attempts to locate survivors of emergencies will be led by the senior OHP official and resources will be coordinated by the Department of Emergency Management.

IV. ORGANIZATION AND ASSIGNMENT OF RESPONSIBILITIES

A. General

For emergency management planning, this annex incorporates the resources of all agencies that have the capabilities to provide direction and/or support for a search and rescue operation.

B. Organization

The organization for providing search and rescue support services for emergency operations are the following:

1. Department of Public Safety (OHP)
2. Civil Air Patrol (CAP)
3. Oklahoma Military Department (OMD)
4. Department of Emergency Management (OEM)

State of Oklahoma Emergency Operations Plan (EOP)

5. Department of Agriculture

C. Assignment of Responsibilities

1. Department of Public Safety (OHP):

- a. Exercise coordination and/or supervision of all rural search and rescue operations.
- b. Prepare search and rescue plans.
- c. Maintain alert procedures to insure immediate response.
- d. Develop standard operating procedures for reference by all agencies operating within the SAR system.

2. Civil Air Patrol (CAP):

- a. In accordance with it's Memorandum of Understanding with OEM, provide personnel and equipment, search vans and planes with direction finding capability as requested by OHP.
- b. Maintain SAR plans and procedures to be implemented during emergency operations.
- c. Provide liaison personnel to coordinate with OHP and other agencies involved in SAR operations.
- d. Provide CAP Incident Commander or liaison officer and staff, communications links to AFRCC, down link information from nation satellite system, and other standard products that CAP produce to OHP and other search agencies.
- e. Provide training for key OHP and OMD personnel regarding National SAR techniques used by the CAP.
- f. Maintain current alert procedures to insure rapid response during SAR operations.
- g. Include OHP and OMD in Air Force and Oklahoma SAR exercises conducted with the state.

3. Oklahoma Military Department (OMD):

- a. Provide personnel and equipment as requested by OHP.

State of Oklahoma Emergency Operations Plan (EOP)

- b. Maintain SAR plans and procedures to be implemented during emergency operations.
- c. Provide liaison personnel to coordinate with OHP and other agencies involved in SAR operations.
- d. Provide training for key OMD personnel regarding SAR operations.
- e. Maintain current alert procedures to insure rapid response during SAR operations.

4. Department of Emergency Management (OEM):

- a. Develop and maintain this annex to the State EOP.
- b. Provide training to agency personnel regarding SAR operations.
- c. Coordinate state resources during a SAR mission.
- d. Maintain current alert procedures to insure rapid response during SAR operations.

5. Department of Agriculture:

- a. Provide personnel and resources as requested by OHP.
- b. Coordinate procedures for SAR operations with the Department of Emergency Management.

6. Other Support

The Department of Wildlife Conservation, Fire Marshal, Chief Medical Examiner, Oklahoma Office of Homeland Security, Oklahoma State Bureau of Investigation, and the Alcohol Beverage Law Enforcement (ABLE) Commission should provide support as required.

V. DIRECTION AND CONTROL

A. The Chief of the Oklahoma Highway Patrol, or his designee, shall be responsible for all Rural Search and Rescue Operations involving any State agency. The Senior OHP Officer shall be Incident Commander in charge of all operations, both aerial and ground searches. The CAP, when involved in SAR operations, shall designate one person to act as liaison officer for the aerial search and ground search. This liaison officer shall coordinate CAP activities with the Incident Commander. Every agency involved with the SAR shall designate one liaison officer to be responsible for that agency's resources. That officer will coordinate all activities with the Incident Commander.

State of Oklahoma Emergency Operations Plan (EOP)

B. When SAR operations extend beyond a normal day, each liaisons officer and the Incident Commander shall designate his/her replacement and will brief that individual prior to departing the EOC or Incident Command Post.

VI. LOGISTICS

For search and rescue operations, additional resources may be available locally. Local governments may provide resources, including manpower, and communications equipment to augment state capabilities. Volunteers, both pilots and ground searchers are often available in large numbers.

State of Oklahoma Emergency Operations Plan (EOP)

BLANK PAGE

State of Oklahoma Emergency Operations Plan (EOP)

ESF #10

OIL AND HAZARDOUS MATERIALS ANNEX

STATE COORDINATING AGENCY: Department of Environmental Quality

SUPPORT AGENCIES:

- Chief Medical Examiner
- Civil Air Patrol
- Corporation Commission
- Department of Agriculture
- Department of Emergency Management
- Department of Labor
- Department of Public Safety
- Department of Transportation
- Department of Wildlife Conservation
- Fire Marshal
- LP Gas Administration
- Oklahoma Military Department
- Oklahoma Office of Homeland Security
- Oklahoma State Bureau of Investigation

I. PURPOSE.

The purpose of this annex is to insure that a coordinated and effective effort is made to remove or reduce the threat to public health and safety that may result from an incident involving hazardous materials. The Department of Environmental Quality will coordinate with the federal government for assistance provided with the National Response Plan's (NRP) Emergency Support Function (ESF) #10, Oil and Hazardous Materials Response.

II. SITUATIONS AND ASSUMPTIONS.

A. Situation.

1. Hazardous materials are produced, transported, used and stored throughout the state.
2. Accidents or incidents involving hazardous materials are one of the most common emergencies within the state.
3. Hazardous material releases require swift and decisive action by emergency personnel.

B. Assumptions.

1. Emergencies involving hazardous materials are usually confined to a localized area.

State of Oklahoma Emergency Operations Plan (EOP)

2. Emergency personnel will respond in their normal area of operation.

III. CONCEPT OF OPERATIONS.

A. General.

1. For hazardous material incidents within corporate municipal limits, local government officials will, to the extent of available resources and capabilities, isolate and restore the area to normal, relying on the owner, supplier, vendor, shipping agent, carrier or other appropriate individual to remove the hazard if feasible. On private property outside of corporate limits, the initial contact point is the closest municipal fire department or law enforcement agency. Outside corporate limits on federal/state highways, public property, county roads, or railways, the incident commander shall be the Oklahoma Highway Patrol (OHP). While primary response is at the local or OHP level, all incidents may require additional action at the state level as indicated in the task assignments that follow.

2. In most incidents, state level involvement is usually limited until the scope of the disaster exceeds local government capabilities. However, state level involvement may occur at any time since the state has certain jurisdictional responsibilities, complex federal and state statutes to enforce, and technical expertise that may not be available at the local level. Moreover, several state agencies are routinely involved in the mitigation of the impact of hazardous materials incidents on a day-to-day basis.

3. In compliance with the Superfund Amendments and Reauthorization Act of 1986 (SARA), the Governor of Oklahoma has appointed the Oklahoma Hazardous Materials Emergency Response Commission to oversee the preparation of hazardous material emergency planning within the State. Responsibilities of this commission include:

a. Establishment of local emergency planning committee (LEPC) districts (which in Oklahoma are designated to correspond to the county boundaries with the exception of Oklahoma, Tulsa and Washington Counties). Separate districts are authorized within the cities of Oklahoma City and Tulsa. The Washington County District includes portions of Osage County to incorporate the entire Phillips Petroleum facility within one district. Tinker Air Force Base, Altus Air Force Base and Ft. Sill are separate planning districts.

b. Appointment of LEPCs within each district that are responsible for:

(1) Providing information to the public on the nature, amount and location of hazardous materials within the district.

(2) Developing a comprehensive emergency response plan to respond to accidental releases or spills of hazardous materials within the districts. Such plans shall be incorporated into the county's Emergency Operations Plan (EOP).

State of Oklahoma Emergency Operations Plan (EOP)

(3) Overseeing the reporting of the presence of hazardous materials within the district by those persons or firms using or storing the material.

(4) Obtaining site-specific information from facilities subject to emergency planning to protect the public in the event of accidental release of hazardous materials allowed by law. This planning information will be incorporated into the district's plan as appropriate.

c. Review and accept the hazardous material emergency plan for each district to include the facility specific information.

d. Provide information to the public as requested on the nature and location of hazardous materials within Oklahoma covered under the law.

4. Oklahoma has adopted the provisions of U.S. Federal Regulation, Title 49 covering all facets of hazardous material transportation within the state.

5. The Oklahoma Department of Emergency Management facilitates training courses to qualify first responders and LEPC members in Hazardous material awareness and planning requirements. The agency also identifies and coordinates the mobilization of resources to be used in the event of a hazardous material accident that exceeds the resources of local government.

B. Phases of Management.

1. Mitigation.

Assist local communities with the establishment of transportation routes, zoning, and codes for hazardous materials.

2. Preparedness.

a. Public education/orientation.

b. Train and exercise emergency response personnel.

c. Develop plans and procedures for response to incidents.

d. Identify sources of equipment and supplies.

e. Ensure that administrative and accounting procedures are in place to document actions taken and all costs incurred during emergency operations.

3. Response.

State of Oklahoma Emergency Operations Plan (EOP)

a. Upon request of local officials, State agencies will provide resources needed to protect life, property and the environment not readily available to local government.

b. Provide technical expertise needed to confine, control and neutralize hazardous material releases.

4. Recovery.

a. Monitor and survey release site to determine continued threat to the public, when required.

b. Provide legal counsel to:

(1) Determine liability.

(2) Determine ability to recover damages.

(3) Determine means of resolving disputes.

c. Aid in clean-up operations. Establish standards to be met to insure public safety in coordination with Federal authorities.

IV. TASK ORGANIZATION.

A. Task Assignments and Responsibilities.

The tasks and responsibilities that are noted below pertain only to this plan and do not include the full scope of activities carried out by agencies in the enforcement of environmental statutes.

1. State Agencies.

When activated by the EOC and while operating under the State EOP, the following state agencies will perform the listed functions as necessary. This list of participating agencies is not all inclusive and other agencies may be activated under the authority of the EOP.

a. Department of Emergency Management.

(1) Maintain an up-to-date list of local emergency response phone numbers for hazardous materials incidents or disasters.

(2) Serve as one of two primary notification points for local emergency management agencies and OHP to report incidents (1-800-800-2481).

State of Oklahoma Emergency Operations Plan (EOP)

(3) Notify all DEQ, Corporation Commission and EPA (NRC 1-800-424-8802) as necessary.

(4) Coordinate support as requested by on-scene local emergency management director(s) or incident commander(s).

(5) Activate the State EOC as necessary.

b. Department of Environmental Quality.

(1) Maintains a 24 hour telephone number (1-800-522-0206) for citizens and public officials to report spills or releases.

(2) Provide technical advice and assistance on potential pollution caused by hazardous materials spills and the proper means to be employed to minimize short term and avoid long-term environmental damage.

(3) Provide state representation to the EPA regional response team.

(4) Provide technical advice and assistance regarding the following:

(a) Contamination via municipal and domestic wastes.

(b) Radiological exposure.

(c) Air pollution control.

(d) Solid waste disposal.

(e) Potable water supply and wastewater treatment.

(f) Control/containment of hazardous wastes.

(g) Laboratory testing necessary for resumption of community environmental services.

(h) Cleanup activities necessary to resume normal community services related to environmental quality.

(5) Serve as the primary source of expertise on industrial and commercial wastes.

(6) Coordinate with the U.S. Environmental Protection Agency and other federal agencies in support of Emergency Support Function #10 of the National and regional response plans.

State of Oklahoma Emergency Operations Plan (EOP)

e. Corporation Commission

(1) Provide technical advice and assistance on potential pollution caused by spills of oil and hazardous materials from oil and gas drilling, production, and pipeline operations and the proper means to be employed to minimize short-term and avoid long-term environmental damage.

(2) Provide technical advice and assistance regarding the following:

a. Contamination by wastes associated with oil and gas drilling, production, and pipeline operations, and the control, containment and disposal of such wastes.

b. Control of oil and gas well blowouts.

c. Prevention and mitigation of damage to oil and gas drilling, production and pipeline facilities from wildfires.

(3) Serve as the primary source of expertise on oil and gas drilling, production and pipeline operations

d. Oklahoma Military Department (OMD).

OMD's 63rd Weapons of Mass Destruction-Civil Support Team (CST) has the capability to detect and identify most biological, chemical and nuclear agents. This is a very limited asset for the state and may be unavailable due to national tasking. Requests for assistance will be coordinated by the Oklahoma Department of Emergency Management.

e. Other State Agencies.

Provide support as required.

d. Attorney General.

Provide legal counsel to the Department of Environmental Quality and other responsible agencies to determine liability for damages incurred by the hazardous material incident and reimbursement of cost associated with its clean up.

V. RADIOLOGICAL INCIDENT OPERATIONS

State of Oklahoma Emergency Operations Plan (EOP)

A. PURPOSE.

This section provides actions to be taken by all response personnel in the event of an accident or incident involving radioactive materials. It also establishes a framework to guide response activities that will meet the needs of any accident victims, provide security to the incident site, and reduce danger to the public while limiting the exposure of responding personnel to a level which is the lowest reasonably achievable.

B. SITUATION AND ASSUMPTIONS.

1. Situation.

The widespread use of radioactive materials in our society creates the potential for accidents. These incidents include transportation accidents involving radioactive materials as well as the mishandling of source material at industrial sites and the exposure to radiological materials used in the medical community. In each case, first responders' tasks are complicated by the presence of radioactive material.

2. Assumptions.

Emergency response organizations will have access to radiation detection instruments.

C. CONCEPT OF OPERATIONS.

1. Identification.

At industrial or medical locations, site employees must identify the location(s) of radiation sources. Package labels and/or yellow storage containers may also indicate the presence of radioactive materials.

2. Reporting Instructions.

An accident involving the release/spilling of radiological materials should be reported to the County Department of Environmental Quality and the Oklahoma Department of Environmental Quality, at 1-800-522-0206. Be prepared to provide the following information:

- a. Incident location.
- b. Number and type of injuries, if any.
- c. Name of carrier for transportation accidents.
- d. Type of radioactive material present, if available. (From shipping papers, package labels, or employees.)

State of Oklahoma Emergency Operations Plan (EOP)

- e. Amount of radioactivity in curies, if known.
- f. Physical form of the material (liquid, solid, or gas).

3. Operational Procedures.

The procedures on the appropriate guide page in the Emergency Response Guidebook (available on the internet at <http://hazmat.dot.gov/gydebook.htm>) should guide operations **upon identification of a radiological hazard.**

D. DIRECTION AND CONTROL.

The incident commander is tasked with maintaining control of the accident site until Oklahoma DEQ personnel have assumed responsibility for the site, or the radioactive material has been removed.

VI. DIRECTION AND CONTROL.

Primary responsibility rests with the senior local government official (per the local emergency operations plan) or the senior OHP official, as appropriate, at the location. As in all local incidents, representatives from other organizations serve only in an advisory or support role.

State of Oklahoma Emergency Operations Plan (EOP)

ESF #11

AGRICULTURE AND NATURAL RESOURCES ANNEX

STATE COORDINATING AGENCY: Department of Agriculture, Food and Forestry (ODAFF)

SUPPORTING AGENCIES:

United States Department of Agriculture/Animal Plant Health Inspection Services/Veterinary Services (USDA/APHIS/VS)

- a. Veterinary Services- Area Office
- b. Wildlife Services

Department of Health

Veterinary Medical Association (OVMA)

Department of Wildlife Conservation

Department of Emergency Management

Department of Transportation

Department of Environmental Quality (DEQ)

American Red Cross

Department of Public Safety and Oklahoma Highway Patrol

Oklahoma Military Department

Oklahoma Office of Homeland Security

ASSISTING AGENCIES: American Zoo and Aquarium Association (AZA) Accredited Zoos

Oklahoma State University-College of Veterinary Medicine (OSU-CVM) & Oklahoma Animal Disease Diagnostic Laboratory (OADDL)

I. PURPOSE.

A. The purpose of this Emergency Support Function (ESF), #11 Annex is to coordinate state and other government agencies and volunteer organizations to provide all animals affected by a man made or natural emergency with emergency medical care; temporary confinement, shelter, food and water; identification and tracking for return to the owner; and, ultimate disposition of dead or unclaimed animals. Coordination will also involve identification and prevention of diseases of public health significance in conjunction with this plan's ESF, #8 Public Health and Medical Annex.

The ODAFF will coordinate with the federal government for assistance provided with the National Response Plan's (NRP) Emergency Support Function (ESF) #11, Agriculture and Natural Resources. Specific Foreign Animal Diseases (FAD) will require an integrated Federal, State, local and tribal response using the NRP, ESF #11 and are addressed in a FAD standard operating procedures document maintained by ODAFF.

The U.S. Department of Agriculture's (USDA) Food and Nutrition Service (FNS), Animal and Plant Disease and Pest Response (APHIS), and Food Safety and Security Supply (FSIS), provides nationwide support in major areas of food supplies, plant disease and infestation, and inspection and verification.

State of Oklahoma Emergency Operations Plan (EOP)

II. SITUATIONS AND ASSUMPTIONS.

A. Situation.

1. Natural or man made emergencies could occur within the boundaries of the State of Oklahoma that could require the coordinated use of all veterinary resources available.
2. Adequate resources are available within the boundaries of the State of Oklahoma to meet most foreseeable short term emergencies.
3. Foreign Animal Diseases, as well as certain zoonotic diseases, as incidents of national significance, activate ESF #11 of the NRP.

B. Assumptions.

1. All emergencies involving veterinary services and animal care will be managed in accordance with the National Incident Management System (NIMS).
2. The ODAFF represents animal health concerns of the state and maintains close liaison with USDA/APHIS/VS, OVMA, the Department of Health and other departments and or agencies representing veterinary medicine, public health, agriculture, native and non-native wildlife, humane societies, and animal control agencies.
3. The Incident Command System organization will be a unified command consisting, of a minimum, the Veterinary Emergency Triad (VET). VET will consist of the Oklahoma State Veterinarian or designee, the USDA/APHIS/VS Area Veterinarian in Charge or designee, and a designated representative of the OVMA. In the event of an FAD or a zoonotic disease, the third member of the VET will be the State Public Health Veterinarian or designee, rather than an OVMA representative.
4. VET is responsible for the coordination of all state animal and veterinary public health related concerns associated with man made or natural emergencies.
5. VET will develop Memoranda of Understanding with agencies and/or groups as needed for supplemental emergency resources.

III. CONCEPT OF OPERATIONS.

A. General.

1. VET will coordinate and maintain communication with the Oklahoma Department of Emergency Management (OEM) during all emergency operations. VET shall determine the scope and duration of ESF #11 according to the type and size of emergency.

State of Oklahoma Emergency Operations Plan (EOP)

B. Phases of Management.

1. Mitigation.

a. Develop plans, procedures, and organizational structure needed to ensure that domestic animals and native and non-native wildlife are effectively controlled and cared for in the event of an emergency.

b. Develop a network of state and local government offices, non-government organizations and volunteers to assist in the preparation and operational phases of emergency veterinary services and animal care.

2. Preparedness.

a. Identify and maintain a network of available state, county, and local resources.

b. Participate in training sessions and exercises.

c. Assist local groups in development of emergency and disaster preparedness plans.

d. Provide (in cooperation with USDA/APHIS/VS) veterinary and public education regarding surveillance and notification of suspected foreign animal diseases.

e. Ensure that administrative and accounting procedures are in place to document actions taken and all costs incurred during emergency operations.

3. Response.

a. Following notification of an emergency by OEM of any type of emergency potentially involving animals, VET will perform the following functions:

(1) Select and contact appropriate animal care personnel.

(2) Designate personnel authorized to enter disaster area and provide this information to OEM.

(3) As requested, provide a representative to the State of Oklahoma Emergency Operations Center.

(4) Consolidate incoming animal management reports and maintain situation reports.

(5) Coordinate with other governmental authorities in establishment

State of Oklahoma Emergency Operations Plan (EOP)

of emergency aid stations and staging of emergency relief.

(6) Coordinate with other governmental authorities in matters of evacuation.

(7) Cooperate with other governmental authorities in matters of equipment use and provision of transportation.

(8) Cooperate with mutual aid operatives

(9) Coordinate with law enforcement personnel in maintenance of security of veterinary medical facilities and supplies.

(10) Coordinate with public information operations to communicate alert status, volunteer mobilization, and casualty and damage information.

(11) Temporarily arrange for or provide food, water, shelter, and medical care for all affected animals.

(12) Recommend methods of proper disposal of dead animals in coordination with appropriate support agencies.

(13) When medical facilities are unavailable, permit the use of veterinary facilities and equipment for temporary human medical care by appropriately credentialed individuals during extreme emergencies involving mass casualties.

(14) Coordinate initial identification and rescue efforts to facilitate recovery of lost animals by their owners.

(15) Coordinate distribution of donated resources (such as pet food and veterinary supplies).

b. Additionally, if the emergency incident is a FAD or zoonotic disease, VET will also perform the following functions:

(1.) Provide recommendations and supervise prevention and control of the disease.

(2.) Institute and supervise bio-containment and bio-security methods appropriate to the emergency situation.

(3.) Coordinate with law enforcement personnel in maintenance of animal or vehicle movement restrictions.

4. Recovery.

State of Oklahoma Emergency Operations Plan (EOP)

- a. Coordinate and organize long term care options for unclaimed and displaced animals.
- b. Continue to assist in the return of animals to their owners.
- c. Provide documentation on injuries and /or deaths of animals and events resulting from the emergency.
- d. Coordinate the distribution of any remaining supplies received solely for the purpose of the emergency event.
- e. Assist in identification of owners for animals destroyed during disease eradication activities.
- f. Comply with national and international movement restrictions for purposes of removing trade embargos.

IV. ORGANIZATION AND ASSIGNMENT OF RESPONSIBILITIES.

A. General.

This plan makes use of the organizational structure approved by the Commissioner of Agriculture establishing Veterinary Emergency Triad (VET) as the lead authority in all animal related emergency operations.

B. Organization.

VET will coordinate the agencies/organizations/individuals responsible for providing the related support services. These shall include, but not be limited to:

1. State and Federal Veterinarians and Animal Health Technicians
2. Volunteer and Humane Organizations
3. OVMA District and Alternate District Veterinarians
4. OSU-CVM & OADDL
5. Local (Field) Veterinarians
6. AZA Accredited Personnel
7. Wildlife Control Personnel
8. Certified Veterinary Technicians
9. Licensed Animal Control Officers
10. Local Animal Shelters
11. Animal Care Providers

C. Assignment of Responsibilities.

1. In emergencies that are not defined as Incidents of National Significance, the

State of Oklahoma Emergency Operations Plan (EOP)

Oklahoma Department of Agriculture, Food and Forestry (ODAFF) shall be the lead coordinating agency. ODAFF shall provide a representative to VET, coordinate local, intrastate, and interstate agencies and provide a designated media contact person.

2. ESF #11 of the NRP prescribes that USDA coordinate this function in an emergency that activates the NRP. The USDA will provide a representative to VET and supply personnel who will act as designated agents of the ODAFF. Additionally, USDA will act as liaison with all other federal agencies.

3. The Oklahoma Veterinary Medical Association (OVMA) shall provide a representative to VET in the event of an emergency that is not a foreign animal disease or zoonotic disease. This representative will contact and coordinate OVMA District and Alternate District veterinarians' response. OVMA will coordinate veterinary relief services and serve as the liaison to the American Veterinary Medical Association. Primary responsibility for coordination of donations shall be with OVMA.

4. The Oklahoma Department of Health will provide a representative to VET in the event of an emergency that is a FAD or zoonotic disease. This representative will contact and coordinate the veterinary public health response. The Department of Health will assist in epidemiological support and communication to the public about the health and significance of the disease.

5. The Oklahoma State University-College of Veterinary Medicine (OSU-CVM) shall provide support and services. The Oklahoma Animal Disease Diagnostic Laboratory (OADDL) shall, with prior financial approval, provide laboratory services, support and testing.

6. OVMA District, Alternate District and local veterinarians will be involved in the immediate response at the local level. For larger scale disasters they will be integrated into the ODAFF response, recognizing that they will be critical in coordinating with local volunteer/humane groups, local animal control officers and animal shelters.

7. All other agencies and organizations will supply available assistance as needed and requested by VET.

V. DIRECTION AND CONTROL.

The initial point of contact is the ODAFF VET member, who will contact the USDA/APHIS/VS VET member and the OVMA or Department of Health VET member.

VI. CONTINUITY OF GOVERNMENT.

During emergencies, designees of each agency comprising VET (ODAFF, USDA/APHIS/VS, and OVMA or the Department of Health) shall insure the line of succession of authority is maintained.

State of Oklahoma Emergency Operations Plan (EOP)

VII. ADMINISTRATION AND LOGISTICS.

To enhance preparedness, VET will serve with the staff of the Oklahoma Department of Emergency Management in mock and actual disasters.

VIII. PLAN DEVELOPMENT AND MAINTENANCE.

1. VET members shall meet at least once annually to review this Annex to the State EOP.
2. VET members shall ensure that necessary updates and revisions to this Annex are prepared and implemented, based on deficiencies identified in exercises and emergencies.
3. Changes to this Annex shall be coordinated with OEM and distributed to all holders of the State Emergency Operations Plan (EOP).

State of Oklahoma Emergency Operations Plan (EOP)

BLANK PAGE

State of Oklahoma Emergency Operations Plan (EOP)

ESF #12 ENERGY ANNEX

STATE COORDINATING AGENCY: Corporation Commission

SUPPORT AGENCIES: American Red Cross
Department of Emergency Management
Department of Environmental Quality
Department of Health
Department of Human Services
Department of Public Safety
Department of Transportation
LP Gas Administration
Oklahoma Military Department
Oklahoma Office of Homeland Security
Oklahoma State Bureau of Investigation
Oklahoma Water Resources Board

SUPPORT GROUPS: Oklahoma Association of Electric Cooperatives
Oklahoma Telephone Association
Municipal Electric Systems of Oklahoma
Regulated Investor-owned Utilities

I. PURPOSE.

This annex establishes responsibilities for restoring state energy systems during and after an emergency or a disaster. A sudden and catastrophic event may sever major energy lifelines to the effected area and most likely affect adjacent areas. Key to responding to the event will be the gathering of intelligence to determine the extent of the damage, and then to coordinate available resources and mutual aid agreements. Federal assistance includes technical advice and support in all aspects of energy including production, refining, transportation, generating, transmitting, conserving, building and maintaining energy systems and system components.

II. CONCEPT OF OPERATIONS.

A. General.

The Corporation Commission is the State coordinating agency for this ESF and will also be the state coordinating agency with the federal government for assistance provided with the National Response Plan's (NRP) Emergency Support Function (ESF) #12 Energy. However, due to the many different aspects, sources and statewide needs of various types of energy there are shared responsibilities necessary to insure the public needs are met. During emergency incidents involving Liquefied Petroleum Gas (also known as Propane), the LP Gas Administration will become the lead agency.

State of Oklahoma Emergency Operations Plan (EOP)

B. Phases of Management.

1. Mitigation.

- a. Develop/review and update emergency energy plans and procedures.
- b. Maintain/update energy transportation pipeline maps as appropriate.
- c. Establish and maintain directory of energy suppliers emergency liaison personnel.
- d. Maintain restoration of service plans for regulated electric, natural gas, telephone (landline and wireless), and water.

2. Preparedness.

- a. Organize and train personnel into emergency response teams to move and work at the State Emergency Operations Center and incident locations.
- b. Train personnel designated to report to incident locations in emergency procedures.
- c. Participate in state and local emergency preparedness exercises.
- d. Ensure that administrative and accounting procedures are in place to document actions taken and all costs incurred during emergency operations.

3. Response.

- a. Establish contact with disaster scene and have designated personnel report to the State EOC and incident location.
- b. Survey disaster area and evaluate the situation and submit report (SITREP) to State EOC in terms of damage to immediate and long-term energy needs.
- c. Coordinate private and public utility companies to determine if repair efforts will be adequate or if additional assistance from state or federal resources will be required for damaged facilities.
- d. Initiate necessary actions to request any state or federal assistance if required.
- e. Submit SITREPS to State EOC as requested/required.

4. Recovery.

- a. Coordinate public, private and volunteer activities for the repairs to area utility activities.

State of Oklahoma Emergency Operations Plan (EOP)

- b. Determine long term energy requirements for the affected area and initiate long-term recovery plan.
- c. Participate in compiling after-action reports and critiques.
- d. Make necessary changes and improvements to emergency operations plans.

III. ORGANIZATION AND ASSIGNMENT OF RESPONSIBILITIES.

A. General.

For planning, this annex incorporates the assets of all agencies and activities that would normally have the capability to assist in the mitigation, preparedness, response, and recovery of energy related emergency operational functions.

B. Organization.

State agency heads with primary or secondary emergency functions will organize, assign, train, and exercise the key personnel in their respective agencies to effectively conduct emergency operations that are associated with energy and public utilities.

C. Assignment of Responsibilities.

1. The Oklahoma Corporation Commission (OCC) will have the primary responsibility (except for those incidents involving LP Gas and Propane) to:

(a) Upon request, provide an agency representative (agency coordination officer) to the State EOC, who will assess and coordinate the repair of damaged utilities and the redistribution of energy assets.

(b) Request unaffected telephone, gas, and electric companies to provide emergency repair crews and equipment to assist affected utility companies in restoring service as quickly as possible.

(c) Keep a record of reports on damaged utilities, requests for damage repair assistance, repairs completed, and any other events or activities deemed necessary for the record. Document the incidents with photographs, video's, and the Global Positioning System when possible. Copies of the reports will be provided to the State EOC.

(d) Additional responsibilities include safety inspections of rail crossings, investigation of derailments of trains carrying hazardous materials, pipeline safety for natural gas as well as hazardous materials, providing technical assistance and inspections of petroleum pollution; safety inspections of above and underground fuel storage tanks.

State of Oklahoma Emergency Operations Plan (EOP)

(e) A series of organizational assignments with the regulated utilities for electric, natural gas and local exchange carriers (telephone) have been developed for reports of damage assessments. The agency coordinator will contact area utility companies for damage reports. If additional assistance is required by the utilities, the coordinator will work through the supporting groups for additional information and requirements.

Each type of utility will review their damaged areas and determine if outside resources are necessary.

(1) Electric Utilities. Fall into three major categories: generation, transmission and distribution. The OCC regulates a limited number of electric utility distribution systems carrying electricity to its consumers. Municipal electric systems are not regulated by OCC.

(a.) Electric distribution systems fall into three categories: municipal, cooperative and investor-owned. Each category has established its own mutual aid assistance program for service restoration.

(b.) Currently 64 cities offer retail electric utility services in Oklahoma. The support group is the Municipal Electric Systems of Oklahoma (MESO), located in Oklahoma City, (405) 528-7564 or (800) 636-6376.

(c.) Mutual aid assistance for electric utility cooperatives is arranged through the Oklahoma Association of Electric Cooperatives (OAEC), (405) 478-1455.

(d.) Investor-owned electric utilities have developed their own mutual aid assistance agreements with other regional investor-owned electric utilities.

(2) Local exchange carriers. Mutual assistance with the Oklahoma Telephone Association (OTA), (405) 840-1800, fax (405) 840-2377.

(3) Natural gas companies. Have own mutual aid agreements and may provide assistance to municipal-owned gas systems.

(4) LP Gas. Emergency incidents shall be directed to the Liquefied Petroleum Gas Board, (405) 521-2458.

2. The Department of Emergency Management will operate the State EOC, coordinate and manage communications capabilities within the State EOC, and provide other assistance as requested.

State of Oklahoma Emergency Operations Plan (EOP)

3. The Department of Environmental Quality (DEQ) has primary responsibility to provide guidance and support to the response to and recovery from hazardous material incidents (except as provided by the OCC) in accordance with state and federal regulations.

4. In the event of emergency incidents involving LP Gas (known as Propane), the **LP Gas Administration will become the lead agency** for this annex and will perform those responsibilities. In addition, the LP Gas Administration will assist with rerouting and redistribution of LP gas resources as required.

5. The Oklahoma Military Department, when requested, has a secondary mission to utilize its forces to assist the ODOT to make emergency repairs to roads, bridges, public buildings or other public facilities in disaster areas, which are essential to the health, safety and welfare of the public and the transportation of energy related materials.

6. The Water Resources Board will gather information on damage to dams and associated power generation plants throughout the affected area. The Board will also gather information on damage to structures that are within the regulatory floodplains in the affected areas.

7. Department of Health will provide damage assessment assistance to state, county, and local jurisdictions with respect to health care facilities and their energy needs.

8. Department of Human Services will provide support as necessary to ARC, and other voluntary organizations for immediate needs of victims (i.e., those on life support systems) and continue long-term support of victims during recovery efforts.

9. Department of Public Safety will provide support as required.

10. Department of Transportation will provide support as required.

11. Oklahoma Office of Homeland Security will provide support as required.

12. Oklahoma State Bureau of Investigation will provide support as requested.

13. American Red Cross will provide support as necessary to victims during response and recovery phases.

14. Advisory Groups: The following groups will provide advice and counsel within their areas of expertise as requested.

a. Secretary of Energy

b. Grand River Dam Authority

c. Committee on Alternative Fuels Technician Examiners

State of Oklahoma Emergency Operations Plan (EOP)

- d. Energy Council
- e. Geological Survey
- f. Oklahoma Energy Resources Board
- g. Interstate Oil and Gas Compact Committee
- h. Commission on Marginally Producing Oil and Gas Wells
- i. Commission on Natural Gas Policy
- j. Liquefied Petroleum Gas Board
- k. Southern States Energy Board and Southern States Energy Compact
- l. Oklahoma Corporation Commission (OCC)

IV. DIRECTION AND CONTROL.

A. The Appointing Authority for the Oklahoma Corporation Commission (OCC) is responsible for directing the primary activities of the Commission associated with coordinating local, state and federal resources required for redistribution and restoration of utilities and energy supplies, except in situations involving LP Gas and Propane activities. OCC does not have jurisdiction over municipally owned electric utilities; however, it can assist as a liaison between the effected community and the State EOC.

B. The Executive Director of the Department of Environmental Quality will direct all primary activities in connection with hazardous material incident containment and material removal relating the energy.

C. The administrative heads of supporting departments listed in this annex will direct all activities within their respective areas in connection with utility and energy restoration.

V. CONTINUITY OF GOVERNMENT.

Lines of succession within each department are in accordance with the SOP's established by each department.

ESF #13 PUBLIC SAFETY AND SECURITY ANNEX

STATE COORDINATING AGENCY: Department of Public Safety and Highway Patrol

SUPPORT AGENCIES: Alcoholic Beverage Laws Enforcement Commission

State of Oklahoma Emergency Operations Plan (EOP)

Chief Medical Examiner
Department of Agriculture
Department of Corrections
Department of Emergency Management
Department of Wildlife Conservation
Department of Tourism and Recreation
Fire Marshal
Oklahoma Corporation Commission
Oklahoma Department of Human Services,
Oklahoma Bureau of Narcotics
Oklahoma Military Department
Oklahoma Office of Homeland Security
Oklahoma State Bureau of Investigation

ASSISTING AGENCIES: Office of the Attorney General
Office of Inspector General

I. PURPOSE.

A. This annex establishes responsibility for public safety and security during periods of natural or man-made emergencies. Responsible agencies will prepare appropriate internal plans and Standard Operating Procedures (SOPs) to cover all phases of emergency management. The Department of Public Safety and Highway Patrol is the State coordinating agency for this ESF and will also be the state coordinating agency with the federal government for assistance provided with the National Response Plan's (NRP) Emergency Support Function (ESF) #13, Public Safety and Security.

B. The Oklahoma State Bureau of Investigation (OSBI) will be the primary State Coordinating Agency with the Federal Bureau of Investigation (FBI) to coordinate assistance as needed during a terrorist incident.

C. The Oklahoma Office of Homeland Security (OKOHS) is the primary point of contact for homeland security related issues at the state and local levels and has developed State Regional Weapons of Mass Destruction (WMD) and Hazardous Material Response Teams.

D. Each department and agency with responsibilities concerning national, state and/or community infrastructure should identify such infrastructure and take actions to mitigate the results of a possible act of terrorism on those capabilities.

E. Mitigation actions may take the form of arranging for backup services, alternate means of communication, additional facility security, alternate highway routes, protection of facilities/stations with barriers/blockades, backup power, safety glass for windows or basic employee awareness of possible threats just to list a few. Understanding the importance of and identifying the locations of critical infrastructure is very important to being prepared to protect or replace them as necessary.

II. SITUATION AND ASSUMPTIONS.

State of Oklahoma Emergency Operations Plan (EOP)

A. Situation.

During periods of emergency there will be an increased demand upon law enforcement and other support agencies to maintain civil order. Actions will be required in order to save lives, protect property, enforce laws, control traffic, and reduce public anxiety.

B. Assumptions.

1. The Oklahoma Department of Public Safety will have the primary responsibility for coordination of law enforcement efforts within the boundaries of the State of Oklahoma.

2. Assistance from other state agencies, such as Oklahoma State Bureau of Investigation (OSBI), Oklahoma Bureau of Narcotics (OBN), Department of Wildlife Conservation, Office of the State Attorney General, Alcoholic Beverage Law Enforcement Commission, Department of Agriculture, Oklahoma Tourism and Recreation Department, Department of Corrections, Fire Marshal, Oklahoma Department of Human Services (Office of Inspector General) and Oklahoma Military Department will be made available when requested through proper channels.

3. The Oklahoma Office of Homeland Security will coordinate homeland security efforts for the State of Oklahoma including initiatives to prevent, reduce our vulnerability and prepare to respond and recover from any terrorist attacks.

III. CONCEPT OF OPERATIONS.

A. General.

When emergencies require implementation of this plan, the Chief of the Oklahoma Highway Patrol is responsible for maintenance of law and order, protection of lives and property, and control of traffic and search and rescue operations. He will serve as coordinator for all law enforcement agencies that provide assistance.

B. Phase of emergency management.

1. Preparedness.

a. Prepare mutual support agreements with other agencies and service organizations required to respond during times of emergencies.

b. Evaluate state installations and public utilities and determine which will require protection. Develop security plans accordingly.

c. Develop an alert plan to ensure notification of off duty personnel.

d. Develop and coordinate traffic control plans for emergencies in the state

State of Oklahoma Emergency Operations Plan (EOP)

with Director, Department of Emergency Management.

2. Response.

- a. Send representative to the State Emergency Operations Center.
- b. Activate appropriate alert plans.
- c. Activate appropriate traffic control, security and search and rescue operations plans.
- d. Activate mutual support agreements as required.

3. Recovery.

Return to normal operations as dictated by the situation.

IV. ORGANIZATION AND ASSIGNMENT OF RESPONSIBILITIES.

A. General.

For planning, this annex incorporates the assets of all agencies that would normally have the capability to provide for law enforcement search and rescue, traffic or crowd control and public safety.

B. Organization.

The organizations responsible for providing law enforcement and related support services for emergency operations are:

1. Department of Public Safety (Oklahoma Highway Patrol).
2. Office of the State Attorney General.
3. Oklahoma State Bureau of Investigation.
4. Alcoholic Beverage Laws Enforcement Commission.
5. Oklahoma Military Department.
6. Department of Agriculture.
7. Oklahoma Tourism and Recreation Department.
8. Wildlife Conservation Commission.

State of Oklahoma Emergency Operations Plan (EOP)

9. Department of Corrections.
10. Fire Marshal.
11. Oklahoma Bureau of Narcotics.
12. Oklahoma Department of Human Services, Office of Inspector General.
13. Chief Medical Examiner.
14. Department of Emergency Management.
15. Oklahoma Office of Homeland Security.

C. Assignment of Responsibilities.

1. Department of Public Safety (OHP).

- a. Exercise coordination and/or supervision of all traffic control, search and rescue operations, security operations, riot control operations and other law enforcement requirements within the limits of Oklahoma.
- b. Prepare law enforcement plans such as traffic control, crowd control, and area and installation security.
- c. Designate key personnel to operate from the State Emergency Operations Center.
- d. Prepare mutual support agreements with other agencies or departments who may render or request assistance.
- e. Maintain SOP's to ensure immediate response.
- f. Provide for the security of the capitol complex, including the EOC, with the Capital police.

2. State Attorney General.

- a. Provide a legal representative to the State Emergency Operations Center as requested.
- b. Provide legal advice to the Governor and/or Department of Emergency Management Staff on the legality or interpretation of laws and regulations relative to disaster remedial or relief actions taken or to be taken.

3. Oklahoma State Bureau of Investigation.

State of Oklahoma Emergency Operations Plan (EOP)

- a. Plan for support missions to include assistance to the Department of Public Safety (OHP), Office of the Chief Medical Examiner and other agencies requiring law enforcement assistance.
- b. Provide for a representative to operate from the State Emergency Operations Center as required.
- c. Maintain a current SOP for use during emergency operations.
- d. Submit reports as required by the Director, Department of Emergency Management, Department of Public Safety or own local SOP's.
- e. Act as primary coordinating agency with the FBI for terrorist incidents.
- f. Provide Forensic Laboratory services/supplies as needed.
- g. Provide fingerprint or other identification services of unidentified (deceased) disaster victims and/or displaced victims to be housed to ensure their safety and security from fugitives or registered sex offenders among the group in violation of state or federal laws.
- h. Provide communications linkages with the FBI and other states to share biometric information for rapid scene identifications of victims.

4. Alcoholic Beverage Laws Enforcement Commission.

- a. Plan for support missions to include assistance to the Department of Public Safety (OHP), Office of the Chief Medical Examiner and other agencies requiring law enforcement assistance.
- b. Provide for a representative to operate from the State Emergency Operations Center as required.
- c. Maintain a current SOP for use during emergency operations.
- d. Submit reports as required by the Director, Department of Emergency Management, Department

5. Oklahoma Military Department.

- a. Provide personnel and equipment as required to support traffic control, casualty assessment, search and rescue and communications operations.
- b. Maintain SOP's for use during emergency operations.

State of Oklahoma Emergency Operations Plan (EOP)

c. Provide military liaison personnel to operate from the State Emergency Operations Center.

d. The 63rd WMD Civil Support Team, available through the Military Department, is capable of detecting and identifying most biological, chemical and nuclear agents.

e. The OKNG will retain an NGRF (National Guard Reaction Force), consisting of a Quick Reaction Force (QRF) which will on orders, Alert, Assemble, and Deploy within 4 hours and a Follow on Force (FOF), which will on orders, Alert, Assemble, and Deploy within 24 hours in order to prevent or respond to natural disasters, terrorist attacks or incidents in support of civil authorities within the borders of Oklahoma and/or the United States.

f. Submit reports as required by the Director, Department of Emergency Management, Department of Public Safety and own local SOP's.

6. Department of Agriculture.

a. Coordinate with Chief, Oklahoma Highway Patrol in providing personnel and equipment for search and rescue operations.

b. Designate a representative to function in the State Emergency Operations Center as required.

c. Submit reports as required by Director, Department of Emergency Management, Department of Public Safety and own local SOP's.

7. Oklahoma Tourism and Recreation Department.

a. Plan for assisting in the protection and security of personnel and property, law enforcement and traffic and crowd control.

b. Plan for search and rescue operations in coordination with other law enforcement agencies.

c. Provide a representative to operate in the State Emergency Operations Center.

d. Maintain current SOP to be used in emergency operations.

e. Submit reports as required by Director, Department of Emergency Management, Department of Public Safety and own local SOP's.

8. Wildlife Conservation Commission.

State of Oklahoma Emergency Operations Plan (EOP)

a. Provide personnel and equipment in support of law enforcement efforts for the security of personnel and property, installation security and search and rescue operations.

b. Designate one representative to operate from the State Emergency Operations Center.

c. Maintain current SOP to be used in emergency operations.

d. Submit reports as required by Director, Department of Emergency Management, Department of Public Safety and own local SOPs.

9. Department of Corrections

a. Has the primary responsibility for incidents occurring at correctional facilities.

b. Develop, test, and implement SOPs for riots, escapes, and other incidents that may affect institutional security.

c. Designate one representative to operate from the State Emergency Operations Center.

d. Maintain current SOP to be used in emergency operations.

e. Submit reports as required by Director, Department of Emergency Management, Department of Public Safety, and own SOPs.

10. Fire Marshal.

Provide support as required.

11. Oklahoma Bureau of Narcotics.

a. Plan for support mission to include assistance to the Department of Public Safety/OHP, Office of the Chief Medical Examiner and other agencies requiring law enforcement assistance. Agents certified or trained in the following areas:

- Rappelling techniques (building and aircraft); certified Rappel Masters
- Open-water diving (SCUBA)
- Night vision equipment
- Thermography techniques
- Zodiac boats, boat mechanics, river navigation
- Explosive entry, certified explosives handlers
- First aid, First Responder, CPR
- GPS (Global Positioning Systems)

State of Oklahoma Emergency Operations Plan (EOP)

- Land navigation
- Extensive knowledge of rural Oklahoma

b. Provide a representative to operate from the State Emergency Operations Center as required.

c. Maintain a current SOP for use during emergency operations.

d. Submit reports as required by the Director, Department of Emergency Management, Chief of Oklahoma Highway Patrol or own local SOP's.

12. Oklahoma Department of Human Services, Office of Inspector General (DHS-OIG).

a. Provide personnel and equipment for general law enforcement missions to protect and secure personnel and/or property, provide installation security, traffic and crowd control, or assist in search and rescue operations. Specific agents are expert in forensic computer examination, spoken Spanish, audio/video surveillance operations, and fraud investigation.

b. Provide a representative to operate from the State Emergency Operations Center as required.

c. Maintain a current SOP to be used in emergency operations.

d. Submit reports as required by the Director, Department of Emergency Management (OEM), Department of Public Safety, and own local SOPs.

e. Provide a supplemental security force for the EOC, OEM personnel, and conduct mission specific assignments for OEM and DPS as required.

13. Chief Medical Examiner.

Provide support as required.

14. Oklahoma Department of Emergency Management.

Manage the State Emergency Operations Center.

15. Oklahoma Office of Homeland Security.

Provide support as required.

16. Oklahoma Corporation Commission.

a. Provide oil field inspectors to disasters relating to fossil fuels and

State of Oklahoma Emergency Operations Plan (EOP)

determine types of assistance to resolve the problems.

b. Maintain communications with telecommunications, electric and natural gas providers when there is a loss of service. This is especially important for safety and security issues, when communications is lost during natural or man-made disasters.

c. The agency can provide its own security from its CLEET certified enforcement officers that are authorized to carry side arms in the performance of their duties for the agency.

d. The agency will provide inspectors to ascertain damages to petroleum storage tanks and their repair.

c. Key agency personnel shall contact and remain in contact with the State Emergency Operations Center during initial disasters and restoration of service by the regulated service providers.

V. DIRECTION AND CONTROL.

Centralized direction and control of all field operations dealing with public safety, law enforcement, traffic and mob control and search and rescue operations will remain with the Chief, Oklahoma Highway Patrol. Standing Operating Procedures and channels of communications during emergency operations will insure continuity of operations from the field to State Emergency Operations Center.

VI. CONTINUITY OF OPERATIONS.

Succession of Leadership.

The Department of Public Safety in coordination with all law enforcement agencies and law enforcement support agencies identified in Paragraph IV B, above will develop succession of leadership plans in support of emergency operations.

State of Oklahoma Emergency Operations Plan (EOP)

ESF #14

LONG TERM COMMUNITY RECOVERY AND MITIGATION ANNEX

STATE COORDINATING AGENCY: Oklahoma Department of Emergency Management

SUPPORT AGENCIES:

- Governor's Office
- American Red Cross
- Corporation Commission
- Department of Agriculture
- Department of Central Services
- Department of Commerce
- Department of Education
- Department of Environmental Quality
- Department of Human Services
- Department of Mental Health and Substance Abuse Services
- Department of Tourism & Recreation
- Department of Transportation
- Fire Marshal
- Health Department
- Insurance Commission
- Oklahoma Employment Security Commission
- Oklahoma Office of Homeland Security
- The Salvation Army
- Water Resources Board
- State Planning Districts
- OKVOAD

I. INTRODUCTION.

A. This ESF is structured in two parts - Assistance Programs and Recovery and Reconstruction.

B. Purpose.

1. To provide for the delivery of state and federal recovery assistance to victims in areas of the state affected by a disaster.

2. To assist local communities with the development of long-range recovery and redevelopment plans following a disaster.

C. Scope.

The primary focus of this ESF is:

1. The establishment and location of Disaster Recovery Centers (DRCs).

State of Oklahoma Emergency Operations Plan (EOP)

2. The collocation of all state agencies with roles in delivering disaster assistance or assisting victims with disaster assistance problems at a single site.
3. The collocation of all federal agencies with roles in delivering disaster assistance or assisting victims with disaster assistance problems at a single site jointly with state relief agencies.
4. The provision of assistance to state and local agencies for compiling damage and expense reports for submission to FEMA for reimbursement under the public assistance provisions of PL 93-288.
5. The declaration of a state of emergency by the Governor. All information relative to this subject is contained in a separate document on file at the State EOC.
6. The request by the Governor to the President of the United States for an Emergency or a Major Disaster declaration as defined by PL 93-288.
7. The assessment of long-term economic impact of the disaster on the economy of the disaster area(s), and the subsequent development of plans for the restoration of the economic infrastructure therein.

II. POLICIES.

The Oklahoma Department of Emergency Management (OEM), acting under the authority of the Governor, will do everything in its power to insure rapid delivery of disaster assistance programs to the victims in impacted areas.

III. SITUATION AND ASSUMPTIONS.

A. Situation.

1. Many disasters have the potential to create extensive damage, both in terms of physical structures and bodily injuries and in terms of the economic impact on the affected area.
2. The state must follow specific guidelines for requesting federal assistance in the aftermath of a major disaster. These guidelines are spelled out in PL 93-288, and various FEMA administrative regulations. Recovery operations generally fall into one of three broad categories: Public Assistance, Individual Assistance and Mitigation. The specifics of these programs are contained in the State Strategic Natural Hazard Mitigation Plan (Enhanced) and separate administrative plan on file at the State EOC.
3. State and federal assistance programs are available to assist individual victims, businesses, and state and local governments and certain private non-profit organizations in dealing with the financial ramifications associated with major disasters.

State of Oklahoma Emergency Operations Plan (EOP)

4. In many communities across the state even a small tornado can create sufficient damage to preclude any possibility of economic recovery without assistance from outside sources. Even large urban communities will have trouble managing the potential economic effects of a major disaster.

5. The State of Oklahoma has several agencies that have expertise in locating grants and low-interest loans. Additionally, several agencies have the ability and/or expertise to assist local communities in developing budgetary strategies that can alleviate some of the negative consequences of many disasters.

B. Assumptions.

1. There will continue to be small, non-Presidentially declared disasters that will create an economic hardship on the local communities affected.

2. Grants and low interest loans will be available to assist local communities with recovery and reconstruction issues following a disaster in Oklahoma.

3. The State of Oklahoma Public Assistance Program will, in some cases, provide funds to help local jurisdictions when damages are not severe or wide spread enough to warrant a Presidential Declaration.

IV. CONCEPT OF OPERATIONS.

A. Assistance Programs.

1. Following a disaster, many victims will require assistance in addition to or in lieu of the assistance provided by their insurance carriers. The Federal government, and to a lesser extent the State government, has a wide variety of assistance programs to assist individual victims of the disaster, as well as the various public and private entities that responded to or suffered damage as a result of the disaster.

2. OEM, as a result of its damage assessment activities and consultation with other agencies, will make a determination as to whether a particular event is severe or wide spread enough to warrant requesting a State Emergency Declaration or the declaration of a major disaster from the President of the United States. These findings will be passed to the Governor, who in turn submits a request through the FEMA regional office to the President for the declaration. The Governor must certify that the event exceeds the capabilities of the State to respond and assistance is needed. That assistance must be clearly defined.

3. The Federal Emergency Management Agency Director, as the President's appointed representative, appoints the Federal Coordinating Officer (FCO) for Federal coordination with the State of Oklahoma. The OEM Director is designated as the Governor's Authorized Representative (GAR). The GAR appoints a State Coordinating Officer (SCO). Together, the FCO and the SCO share the responsibility for coordinating the State/Federal response to the disaster. All requests for federal assistance are channeled through the FCO

State of Oklahoma Emergency Operations Plan (EOP)

to the appropriate ESF as provided in the National Response Plan.

4. FEMA will deploy a group of representatives from the activated ESFs to the designated Joint Field Office (JFO). The JFO is the coordination point for the federal response. The JFO may be relocated if necessary to a point closer to the disaster site at the discretion of the FCO and SCO. The JFO remains active until such time as it is no longer needed.

5. FCO and SCO will coordinate the locations for the establishment of Disaster Recovery Centers (DRCs). These facilities provide a central location where disaster victims can obtain assistance as it pertains to their particular situation. The DRC provides a single location from which all state, federal, and private sector relief agencies to provide information and assistance to victims. DRCs are strategically located throughout the affected area to insure that all victims can be reached. The DRC will remain active for as long as necessary following a disaster (as determined by the FCO and SCO).

6. Organization and Responsibilities.

a. Oklahoma Department of Emergency Management.

(1) Compile damage assessment information and provide recommendations to the Governor concerning requests for federal assistance.

(2) Locate potential sites for DRCs in areas affected by the disaster in cooperation with local jurisdictions.

(3) Manage the Individual and Public Assistance functions associated with PL 93-288.

(4) Coordinate damage assessment activities at the federal, state and local levels.

(5) Arrange for use of buildings, facilities, equipment and supplies for DRCs and JFOs, and other needed sites during disaster recovery operations.

(6) Working with OKVOAD to coordinate the establishment of Long Term Recovery Committees.

(7) Compile financial records associated with the State government response to the disaster for use in Federal reimbursement programs.

b. Governor's Office.

(1) Submit request to the President of the United States (through the FEMA Regional Director) for the declaration of a major disaster, as defined by PL 93-288.

State of Oklahoma Emergency Operations Plan (EOP)

(2) Appoint a State Coordinating Officer (SCO), and the Governor's Authorized Representative (GAR) for coordinating state and federal disaster assistance programs.

c. Department of Human Services.

(1) Administer and manage the USDA Emergency Food Stamp Program.

(2) Assist with Human Services Recovery Programs as needed.

d. Oklahoma Employment Security Commission.

(1) Manage the U.S. Department of Labor Emergency Unemployment Benefits program.

(2) Administer the State Unemployment Compensation programs.

e. Insurance Commission. Monitor the performance of insurance carriers licensed to operate in the state.

f. Department of Commerce. Administer the State's Consumer Protection programs.

g. Fire Marshal. Provide technical assistance to state and local governments concerning mitigation strategies with respect to building codes, etc.

h. Department of Agriculture. Provide damage assessment assistance to owners of rural properties within the state. Provide such other assistance to local governments in dealing with problems generated by the disaster.

i. Department of Transportation.

(1) Provide damage assessment for state highways and bridges, and assist local jurisdictions with damage assessment activities related to local roads and bridges.

(2) Provide inspectors to work with FEMA and local jurisdictions on Preliminary Damage Assessments and the writing of Project Worksheets.

(3) Provide funds to meet a portion of the State share of local jurisdiction's projects in Categories "A" and "C" identified in the community briefings.

j. Department of Education.

State of Oklahoma Emergency Operations Plan (EOP)

(1) Provide damage assessment for state educational facilities, and providing damage assessment assistance to local jurisdictions with regard to public school facilities.

(2) Manage disaster assistance programs for educational facilities as administered by the U.S. Department of Education.

k. Department of Central Services. Provide damage assessment assistance regarding state-owned buildings, facilities, and other assets.

l. Department of Environmental Quality - Division of Water Pollution Control.

(1) Provide damage assessment assistance to local jurisdictions with respect to wastewater treatment facilities.

(2) Provide damage assessment assistance to local jurisdictions with respect to potable water delivery systems (i.e., tanks, reservoirs, pipes, etc.).

(3) Provide damage assessment assistance to local jurisdictions with respect to sanitary landfills and other solid waste disposal mechanisms.

m. Department of Health. Provide damage assessment assistance to state health care facilities. Providing damage assessment assistance to local jurisdictions with respect to local health care facilities.

n. Association of Electric Cooperatives and Oklahoma Rural Water Association. Assist with damage assessment information collection concerning local utility systems.

o. Water Resources Board. Provide technical advice on dams and water sheds. Conduct damage assessment of dams, dikes and other water control facilities. Provide technical assistance to local floodplain officials regarding reconstruction efforts for damaged structures in the regulatory floodplain. OWRB will also assist the FEMA and OEM personnel as needed regarding response and recovery efforts relating to mitigation opportunities.

p. Department of Mental Health and Substance Abuse Services. Develop and submit applications for immediate services and regular services crisis counseling grants and other applicable grants as appropriate and as needed; operate/over-see crisis counseling programs; coordinate mental health, substance abuse, and domestic violence services to victims of the disaster, first responders, and others as needed; provide consultation and support to the Governor's office, Department of Emergency Management, and other agencies as needed regarding necessary mental health, substance abuse, and domestic violence services after a disaster; develop, coordinate

State of Oklahoma Emergency Operations Plan (EOP)

and/or provide relevant training curriculum to persons providing services to disaster victims, first responders, and others.

q. OKVOAD. Provide disaster assistance services to disaster victims and relief workers.

r. Oklahoma Office of Homeland Security. Provide assistance as required.

B. Recovery and Reconstruction.

1. In the aftermath of a disaster affecting an Oklahoma community, the local county and/or municipal chief elected official (CEO) is responsible for making a determination as to how that event will affect the jurisdiction's economy. Local CEOs can be assisted by various state agencies.

2. Local communities will develop a plan of action relative to economic impacts.

3. Local communities should appoint a task force to oversee the implementation of the recovery plan of action.

4. Assistance may be secured from any number of State or Federal sources, including Community Block Development Grants (CBDG) or other economic development grants/loans.

5. Organization and Responsibilities.

a. Oklahoma Department of Emergency Management.

(1) Responsible for appointing a State Hazard Mitigation Officer.

(2) Responsible for coordinating the development and implementation of the State Strategic Natural Hazard Mitigation Plan (Enhanced).

b. Governor's Office.

Responsible for providing leadership and political support in implementing the recommendations of the State Hazard Mitigation Team.

c. Department of Commerce.

(1) Responsible for administering the CBDG program and other grant/loan programs.

(2) Responsible for developing economic projections for disaster-affected communities.

State of Oklahoma Emergency Operations Plan (EOP)

(3) Responsible for providing assistance to local communities with redevelopment issues.

d. Oklahoma Water Resources Board.

Responsible for implementing the floodplain management policies associated with the National Flood Insurance Program at the state level.

e. Department of Tourism and Recreation.

(1) Responsible for providing assistance to local communities in redeveloping tourism-based industries.

(2) Responsible for developing products for media outlets concerning the availability of tourist destinations in areas affected by disasters.

f. State Planning Districts.

(1) Provide assistance to local governments in dealing with problems generated by disaster.

(2) Assist in obtaining and administering CDBG Programs and other loan/grant programs.

V. ASSISTANCE PROGRAM ACTIVITIES.

A. All Tasked Agencies.

1. Develop plans and procedures for coordinating and providing respective disaster assistance activities (i.e., the administration of disaster assistance programs offered through the state or federal government, providing assistance to state or local agencies with respect to damage assessment activities, etc.).

2. Develop policies and procedures for compiling damage assessment information concerning agency-owned/managed.

3. Develop procedures and policies concerning the assignment of personnel to DRCs when requested by OEM.

B. Oklahoma Department of Emergency Management.

1. Work with local jurisdictions to pre-identify potential sites for DRCs.

2. Develop State Administrative Plan for Individual and Household Programs and Public Assistance.

State of Oklahoma Emergency Operations Plan (EOP)

3. Develop procedures and forms for damage assessment activities (see ESF-5).

4. Develop State Hazard Mitigation Plans. Comprised of two separate plans – State Strategic Natural Hazard Mitigation Plan (Enhanced) and the Hazard Mitigation Administrative Plan.

C. Department of Commerce.

Develop procedures and policies for coordinating with local officials the incorporation of mitigation strategies into new construction following a disaster.

VI. RECONSTRUCTION ACTIVITIES.

A. All Tasked Agencies.

1. Provide liaison to the State Hazard Mitigation Team and attend meetings as appropriate.

2. Collectively work towards the development of a strategy for dealing with the potential effects of disasters upon local communities in Oklahoma.

3. Identify agencies/organizations in the private and public sector that could provide technical or financial assistance to the affected local communities.

4. Develop policies and procedures for responding to the requests for assistance from local governments.

B. Oklahoma Department of Emergency Management.

1. Appoint a State Hazard Mitigation Officer and develop and maintain the Oklahoma State Strategic Natural Hazard Mitigation Plan (Enhanced).

2. Coordinate the development and implementation of the State Hazard Mitigation Team.

3. Assist local communities in the establishment of local recovery and reconstruction task forces.

C. Water Resources Board. Implement the requirements of the National Flood Insurance Program.

VII. RESPONSE AND RECOVERY ACTIONS.

A. All Tasked Agencies.

State of Oklahoma Emergency Operations Plan (EOP)

1. Attend briefings, coordinate activities with other participant organizations.
2. Set up work area(s), report needs to the State EOC Manager, and initiate response/recovery activities as dictated by the situation.
3. Maintain logs of activities, messages, etc.
4. Initiate internal notification/recall actions as appropriate.
5. Perform the following actions upon notification that a Disaster Recovery Center is being activated:
 - a. Deploy personnel and equipment necessary to staff DRC as provided in respective agency plans.
 - b. Attend briefings held at DRC concerning disaster assistance activities necessary in affected areas, potential scope of activities, etc.
 - c. Advise DRC Manager of needs in terms of space, equipment, supplies, etc.
 - d. Provide disaster assistance programs through pre-establish mechanisms, policies, etc.
 - e. Maintain records concerning disaster assistance offered to victims.
6. Deploy personnel and activate procedures for collecting and processing damage assessment information.
7. Activate procedures for providing technical and regulatory assistance to state and local jurisdictions with respect to damage assessment, hazard mitigation, response, recovery, and reconstruction activities as dictated by disaster situation.

B. Oklahoma Department of Emergency Management.

1. Compile damage assessment and intelligence information and submit to the Governor for declaration consideration.
2. Prepare necessary submission materials for the Governor to sign and forward to FEMA Region VI.
3. Provide individual(s) to act as the GAR and the SCO for coordination with Federal officials.
4. Activate Disaster Recovery Centers as appropriate.

State of Oklahoma Emergency Operations Plan (EOP)

5. Notify State relief agencies of DRC activation status, location, nature of disaster, etc., and task needed agencies to deploy appropriate personnel.
6. Assist state and local jurisdictions with damage assessment activities (See ESF 5).
7. Compile damage assessment reports, reports of expenditures, and all other documentation necessary for submission of claims to FEMA for reimbursement and coordination of federal disaster assistance programs.
8. Implement the State Administrative Plan for Individual and Household Programs, Public Assistance and the Hazard Mitigation Plan.
9. Provide follow-up on all disaster assistance programs through closure.
10. In coordination with the primary agency, keep Governor advised of status of disaster relief actions and disaster assistance programs.
11. In coordination with the primary agency, provide public information services to news media and government officials throughout the state.

C. Governor's Office.

1. Receive briefings and situation reports from the OEM Director regarding scope of disaster; review preliminary damage assessment intelligence; and, make decisions regarding any declarations necessary with respect to the disaster.
2. Submit request to FEMA Region VI for Presidential disaster declaration.
3. Appoint the State Coordinating Officer, and alternate, to coordinate state response activities with the Federal government.
4. Appoint the Governor's Authorized Representative (GAR), and alternate, for coordination of disaster assistance programs.

D. OKVOAD.

1. Activate plans for each organization's individual and family assistance programs.
2. Coordinate disaster assistance programs for individuals and families offered by OKVOAD, and all other non-governmental voluntary and charitable organizations through the DRC(s).

State of Oklahoma Emergency Operations Plan (EOP)

APPENDIX 1 TO ESF #14 DISASTER RECOVERY CENTERS

I. PURPOSE.

The purpose of the Disaster Recover Center (DRC) is to provide individual disaster victims one-stop access to disaster assistance as quickly and conveniently as possible.

II. SITUATION.

In the event of a major disaster declaration, the provisions of PL 93-288, as amended, becomes effective. This authorizes the establishment of DRCs to provide information to disaster victims and receive applications for assistance. A DRC will house all Federal, State, local and private sector disaster agencies.

III. CONCEPT OF OPERATIONS.

A. After a major disaster declaration has been requested by the Governor and declared by the President, FEMA is responsible for administering and coordinating federal disaster assistance programs in the affected area(s). Federal assistance is designed to supplement the efforts of state and local governments.

B. To provide assistance quickly and conveniently to disaster victims, FEMA may establish DRCs in several locations throughout the affected area(s). The magnitude of the disaster and the number of victims will determine the number of centers to be established.

C. OEM and local State and Local Assistant (SLA) Directors will pre-identify potential DRC sites for use during emergencies affecting the individual counties, taking into account population densities and the specific hazards that might affect the jurisdiction.

IV. ORGANIZATION AND RESPONSIBILITIES.

A. Federal.

1. The Federal Coordinating Officer (FCO) is responsible for the coordination of all federal disaster assistance efforts in the affected areas. The FCO works closely with the State Coordinating Officer (SCO) to ensure effective implementation of assistance programs. The FCO and his staff are usually located in the JFO established to serve as the central management point for all Federal disaster operations in the affected areas(s).

2. The Individual Assistance Officer (IAO) is the principal officer on the FCO's staff for all matters pertaining to individual assistance programs, including the establishment, location, and operation of the DRCs and mobile teams.

3. The Public Assistance Officer (PAO) is the principal officer on the FCO's staff responsible for all matters pertaining to the administration of public assistance to the state

State of Oklahoma Emergency Operations Plan (EOP)

and local government and nonprofit organizations in the area(s) affected by the disaster.

4. The Mitigation Officer is the principal officer on the FCO's staff responsible for coordinating all mitigation matters relative to the disaster.

5. The DRC Manager is the FEMA representative in the operation of the DRC; appointed by, and working for the IAO.

6. DRC agency representatives may include federal personnel from the following:

a. Department of Housing and Urban Development.

(1) Temporary housing assistance

(2) Mortgage and rental assistance

b. Small Business Administration. Disaster loans for the rebuilding, repair, or refinancing of damaged real and personal property which are not fully covered by private insurance.

c. Farm Service Agency. Financial assistance to farmers who perform emergency conservation measures on farmlands damaged by a natural disaster.

d. Internal Revenue Service. Tax assistance in computing tax credits based on disaster losses.

e. Department of Veteran's Affairs. VA assistance, including VA death benefits, pensions, insurance settlements, and adjustments to VA-insured home mortgages.

f. Social Security Administration. Social Security assistance for recipients in expediting delivery of checks delayed by the disaster, and assistance in applying for disability, death, and survivor benefits.

g. Department of Justice. Provide legal services to individuals who are otherwise unable to secure such services.

B. State.

1. The State Coordinating Officer (SCO) works closely with the FCO to ensure effective implementation of disaster assistance programs.

2. Individual Assistance Officer (IAO) is the principal staff officer for the SCO for all matters pertaining to individual assistance, including the establishment, location, and operation of the DRCs.

State of Oklahoma Emergency Operations Plan (EOP)

3. The DRC Assistance Manager is appointed by the IAO to assist the Federal DRC Manager with the state components of the operation.

4. The following state agencies may have representatives at the DRC:

a. Department of Human Services. Distribution of food coupons (USDA programs) to eligible victims. Coordinate services to the elderly.

b. Department of Employment Security. Disaster unemployment assistance and job placement assistance for those who lost jobs due to the disaster.

c. Department of Mental Health and Substance Abuse Services. Referrals to appropriate mental health agencies to relieve mental health problems related to the disaster.

d. Young Lawyer's Conference, Oklahoma. Legal services to low income individuals who are otherwise unable to secure such services.

e. Insurance Commission. Insurance claims counseling to disaster victims requiring such assistance.

f. Department of Commerce. Assistance to disaster victims with problems associated with unfair consumer practices.

5. OEM will arrange for and coordinate, as required, DRC facility space and/or equipment in the event that support requirements exceed local government capabilities.

C. Private Relief Agencies.

American Red Cross/Salvation Army. Provide representatives in the DRC to assist victims and will refer victims to respective service centers or other appropriate facility as dictated by the situation.

V. SELECTION OF DRC SITES.

Local government is responsible for the selection of potential DRC sites, subject to the approval of the FCO and SCO. OEM will assist local governments in this task if requested.

Potential sites should include a large open floor space on a ground floor, should include restrooms, utilities, and sizable parking facilities, and should be handicapped accessible. FEMA will provide signs for the DRC.

The Chief, Recovery and Mitigation Division, OEM, maintains the specific requirements that are needed when establishing a DRC.

VI. PROCEDURES.

State of Oklahoma Emergency Operations Plan (EOP)

A. When a disaster victim reports to the DRC and is greeted by a receptionist. The receptionist provides the victim with a registration form and insures that the form is understood by the victim.

B. The victim is then directed to a registrar and interviewed using the registration form. Once the registrar determines the victim's problems and needs, the victim will be directed to the appropriate assistance provider(s).

C. Once the victim has completed the circuit through the agencies, the victim will receive an exit interview to insure that he/she has seen the proper agencies, that he/she is satisfied with the assistance being offered, and that he/she understands the next steps to take.

State of Oklahoma Emergency Operations Plan (EOP)

ESF #15 EXTERNAL AFFAIRS ANNEX

STATE COORDINATING AGENCY: Department of Emergency Management

SUPPORT AGENCIES: All state Agencies, Boards, Commissions and Voluntary organizations.

I. PURPOSE

A. The purpose of this annex is to provide and maintain operational consistency throughout the regions of the State of Oklahoma in the area of emergency information and public affairs. With one shared philosophy and mission, Public Information Officers (PIO's) for State, County and Municipal entities will be able to provide information to our citizens in a responsive, well-managed manner during emergencies and disasters.

B. For the purpose of this annex, PIO's will represent their own agency and speak about their agency's involvement in response and recovery operations in an event driven environment. The Governor's Press Secretary, through the Joint Information System (JIS), using the Oklahoma Department of Emergency Management (OEM) PIO as the central point of contact for the JIS, shall be kept informed about all participating agency news and information releases throughout response and recovery operations.

C. This annex provides for public information, education, and media relations functions incorporating a Joint Information System (JIS) as the information source and Joint Information Center (JIC) operations, either from the State Emergency Operations Center (EOC), at a media center set up at the site of the incident, or a Joint Field Office, as the contact point for information delivery.

D. In addition to the JIS and JIC, information may be provided to or from one or more disaster sites for information, education and media and public education through one or more of the following resources, cable channels and/or satellite uplink operations, special publications, radio feeds, special projects such as teleconferencing, as well as interagency photo and video documentation utilized as shared resources with agencies of government, and the media. The merits of each and/or all of these information gathering and delivery sources will be evaluated, based on need, and procedures to acquire and use each or all sources, used as applicable and necessary.

E. Resource requirements, including staffing, equipment, office supplies, and office facilities required will be tailored to the type and magnitude of each specific disaster and full, or partial activation of this plan will be addressed on a case-by-case basis. JIC logistics, job descriptions and training requirements for each function are outlined in a separate document "Oklahoma Emergency Information and Public Affairs Joint Information Center Standard Operating Procedures (SOP)". It is recommended that all Public Affairs elements be integrated into the JIS and JIC as soon after a disaster occurrence as possible.

II. SITUATION AND ASSUMPTIONS.

State of Oklahoma Emergency Operations Plan (EOP)

A. Situation.

During emergencies and disasters the public needs detailed information regarding protective actions which need to be taken to minimize the loss of life and property. Every effort should be made to provide emergency information through conventional news media sources. As well as a community outreach program of public education for responding to, recovering from and mitigating hazards that pose a threat to a community to ensure necessary protective measures can be employed.

B. Assumptions.

An effective public information program which combines both education and emergency information will significantly reduce disaster casualties and property damage. It is recognized, however, that people are generally unconcerned about hazards until affected, despite educational programs. Thus, special emphasis must be placed on the effectiveness of the emergency information program at the policy-making level of government.

III. CONCEPT OF OPERATIONS.

A. During state-wide emergency operations, OEM has the primary responsibility for providing emergency public information and general situation information. To accomplish this responsibility, the Director of the OEM will appoint or designate a State Emergency Information Officer. It is her/his responsibility to prepare and release emergency information as provided by the OEM Director and/or the Governor.

B. The state emergency information officer will prepare a broad scope of information for use by the news media. He or she will prepare pertinent information and situation reports with the OEM Director's approval for the Governor, the Emergency Alert System or other news media as appropriate. With close coordination with the Press Secretary and involved agency PIO's, this group will approve, coordinate, and release all emergency information from state agencies and serve as the focal point for all inquiries by the media.

C. It is the State Emergency Information Officer's responsibility to provide the public, via the news media, accurate and timely information about emergency and disaster response and recovery operations. This will reduce or eliminate negative information that may arise and ensure emergency and disaster information is delivered to the citizens of the State of Oklahoma.

D. The PIO must be present at any and every event that might attract media attention or that would serve as an opportunity to get information to disaster victims and to publicize the Local and State emergency or disaster message. The early activation and deployment of a PIO along with other key response personnel as part of emergency operations field deployments, or as part of the preliminary damage assessment team and other pre-declaration activities is a must to effectively alleviate concerns about Local and State Government responsiveness and to provide disaster victims with accurate information during every step of the process.

E. If a Presidential Declaration has been made, the JIC will be expanded to include Federal

State of Oklahoma Emergency Operations Plan (EOP)

resources such as the Corps of Engineers, who may be a part of a JIC during a flood emergency, operating on their own authority. With an expanded JIC established, field PIO's must continue their visibility in the affected communities, especially where Disaster Service Centers have been set up, for easy accessibility to the news media. The JIC then becomes the central point for media access to the latest developments and emergency information for all participating agencies. The JIC supports field PIO operations by providing updated information about current policies and issues regarding response and recovery operations.

F. PIO's in the JIC work closely with Elected Officials, Response Agencies and Emergency Managers. JIC PIO's are responsible for setting-up daily news briefings for key disaster officials, writing and disseminating news releases to appropriate media outlets, monitoring and analyzing TV, radio, and newspaper disaster-news coverage and providing this information to the JIS, and providing multi-lingual media support operations for the disaster, as appropriate to the community need.

IV. ORGANIZATION OF PIO FUNCTIONS.

A. Initial Actions for the OEM PIO following the notification of an incident will be notification of the Governor's Press Secretary to discuss involvement of PIO's from concerned agencies and through mutual agreement determine their level of involvement in JIS-JIC operations. During this phase, the OEM PIO and all concerned agency PIO's will jointly craft news releases and determine input and release procedures for the JIS according to the needs of the emergency or disaster situation. As a part of this communication process, the JIS will function to serve communities identified as the affected audiences and establish contact with media outlets necessary to reach those audiences.

B. The information collection and dissemination process, will conform to the following phases of management.

1. Mitigation.
 - a. Conduct awareness programs.
 - b. Coordinate with media.
2. Preparedness.
 - a. Conduct education programs.
 - b. Prepare information for release during emergencies.
3. Response.
 - a. Release public information.
 - b. Coordinate rumor control.
 - c. Schedule news conferences.
4. Recovery.

State of Oklahoma Emergency Operations Plan (EOP)

- a. Provide public information.
- b. Compile record of events.
- c. Assess effectiveness of information and educational programs.

V. RESOURCE REQUIREMENTS.

A. Personnel/staffing will be tailored to the needs of the situation and “news cycle”. A functional organization will be established with responsibilities for ongoing activities. Participating PIO's may have duties assigned to fulfill the needs of the information collection and dissemination process. Assignments will be in addition to performing duties for their own agencies. PIO's participating in the JIC may perform additional functions as outlined in the JIC-SOP.

B. Office space, equipment and supplies, as appropriate to support the effort will be provided, either at the State EOC, a site near the Incident Command Center, or at a Joint Field Office, as appropriate to the situation.

VI. DIRECTION AND CONTROL.

A. The Director of OEM is responsible for all education and informational programs conducted to exercise this plan. He will appoint an OEM PIO to direct these activities.

B. The heads of all state support agencies, boards, commissions and volunteer organizations agencies are responsible for appointment of PIO's. These officers will be responsible for coordinating releases with the OEM PIO.

C. Lines of succession to the PIO for each agency tasked with an emergency public information mission will be in accordance with departmental SOP's.

State of Oklahoma Emergency Operations Plan (EOP)

VOLUNTEER AND DONATIONS MANAGEMENT SUPPORT ANNEX

STATE COORDINATING AGENCY: Department of Emergency Management

SUPPORT AGENCIES: American Red Cross
Civil Air Patrol
Department of Agriculture
Department of Corrections
Department of Health
Department of Public Safety
Department of Transportation
Department of Human Services
Oklahoma Military Department
Oklahoma Office of Homeland Security
Oklahoma Volunteer Organizations Active
in Disaster (VOAD)
The Salvation Army

I. PURPOSE.

A. The purpose of this annex is to define the organization, operational concept, responsibilities, and procedures to accomplish state emergency donations management requirements.

B. Donations management includes all undesignated in-kind donations, volunteers, donated services, contributions and funding. This annex provides procedures for the coordination, acceptance, control, receipt, storage, distribution and disposal of donation management responsibilities.

C. This annex is applicable to all agencies, organizations, and personnel with donations management support function responsibilities.

D. This annex outlines a donation management coordination program for Oklahoma which can be implemented once it is determined that the emergency situation or disaster is of such magnitude, or is receiving high media attention, that donations management at the State level is needed. Additionally, the donation management program will be available in any local, state or federal disaster situation.

II. SITUATION AND ASSUMPTIONS.

A. Situation.

Certain agencies have established systems of accepting, warehousing and distributing donated goods, funds and use of volunteer management systems. There are occasions when similar services are needed during emergency situations. The coordination of donated goods, funds and use of volunteer management systems are essential to responding to the emergency as well as recovering from the emergency to provide feeding, congregate

State of Oklahoma Emergency Operations Plan (EOP)

sheltering, emergency first aid, coordinating emergency volunteer response and other recovery operations during emergency conditions.

B. Assumptions.

1. Lack of an organized management system for donations and volunteers will result in chaos and detract from an otherwise effective disaster response. Without controls, large amounts of unsolicited, unusable donations and volunteers will be sent to the disaster area.

2. The OEM will be the lead state agency for donation management and coordination of State resources. OEM will work with applicable government support and volunteer agencies (VOAD) who will form the Donations Coordination Teams (DCTs).

3. That the DCT will coordinate with the OEM Public Information Officer for the timely release of information regarding the needs of victims, agencies involved in disaster relief, acceptable donations, volunteers and readily available points of contact to ensure appropriate and essential donations management.

4. The donation of money is the most desirable form of assistance. Monetary donations require little manpower to process. They can be used directly to relieve suffering, buy needed disaster items and assist the recovery of the affected economy.

5. This management system applies to those undesignated donations, financial donations, in-kind goods and volunteers that are offered due to the declared local, state or federal emergencies and disasters.

III. CONCEPT OF OPERATIONS.

A. General.

1. Providing the expedient, effective delivery of donated goods, services and volunteers to meet the needs of the affected area is of primary importance for all response and recovery operations. In all probability, the outpour of goods and services will exceed the needs of local agencies and government. Due to this inequity, a state DCT comprised of voluntary agencies (VOAD) and state agencies, will be activated to facilitate the delivery of donations based on assessed needs.

2. The distribution of volunteers and donations will necessitate cooperation with other emergency support operations. Close coordination between relief center(s), staging areas, local Emergency Operation Centers and federal and volunteer organizations and agencies will be essential for the Donation Coordination Team.

3. OEM and OKVOAD will establish and staff with volunteers a 1-800 hotline and phone bank to receive calls of all donations of goods, services and volunteers. These calls will be distributed through the Donations Coordination Team to ensure proper and expedient use of donations and volunteers.

State of Oklahoma Emergency Operations Plan (EOP)

4. Recovery activities will be the primary focus of most volunteer agencies. The team leader must assure close coordination between all groups within the Donations Coordination Team. The Coordination Group's role will be critical in matching goods, services and volunteers to needs.

B. Donations Coordination Team Development.

1. Team development requires the involvement of as many volunteer groups and social services agencies as possible. Volunteer Agencies Active in Disaster (VOADs) with national affiliations will be primary contact groups. The FEMA/OEM Volunteer Agency Coordinator and the FEMA/OEM Donations Coordinator will be included in the planning and organizational efforts in order to lend expertise and assure interface with the Federal relief programs and the Federal Response Plan. Regular meetings during an activation period and specific tasking of a variety of agencies will assure continuity and active participation. Membership of this team will include a representative from the following agencies:

- a. Adventist Community Service.
- b. American Red Cross.
- c. The Salvation Army.
- d. OKVOAD Agencies that are involved in distribution of donations.
- e. FEMA/OEM Donations Coordinator.
- f. FEMA/OEM VOLAG Coordinator.
- g. Food Bank (America's Second Harvest).
- h. Governor's Office.

2. The Donation Coordination Team will activate upon direction of the policy group within the Emergency Operations Center (EOC) or at the direction of the OEM State Director.

3. The Donation Coordination Team will participate in the identification of the roles and responsibilities of the members and other participating agencies. The team may consist of five components: Team Leader, Donations Group, Needs Group, Coordination Group, and Support Group.

4. OEM will coordinate the establishment and staffing of a 1-800-Hotline and phone bank to receive calls of all donations of goods and services. Adequate personnel, phones, and space will be established.

State of Oklahoma Emergency Operations Plan (EOP)

5. OEM will establish of standard operational policy regarding donations issues. Agencies involved in donations issues should participate in evaluation and monitoring of the policies. As cash donations are preferred, all agencies should agree on how solicitation of donations will be managed.

6. Establishment of a system to manage unsolicited goods and services.

7. Establishment of a computer database to track the donations from offer to acknowledgement of donation.

8. Establishment of a coordination system with the Public Information Officers from all involved agencies and the Public Information Officer of OEM to ensure timely and appropriate dissemination of public information. Media statements must be coordinated and be non-conflicting.

9. Identify statewide warehouse spaces available for donated goods. Secure agreements, if necessary, to use this space during disasters.

10. Identify staging areas (reception centers) for collection of donations in key areas Statewide. Identify staffing and management of these centers.

11. Identify ports of entry into the State for checkpoints, if needed. Provide for staffing of checkpoints for clearance off shipments entering the state. Develop policy and procedures for approval of shipments, delivery, and distribution.

12. Use the FEMA Donation Management course to train all volunteers and paid staff on the Donations Coordination Team. Training will include EOC operations, policies, and procedures relating to the volunteer service and donations program. Recognizing that members of the DCT will come in contact with thousands of citizens and private and government agencies, it is extremely important that team members be knowledgeable and competent.

13. Require an information update annually from all participating agencies to maintain essential information for the State plan. Such updates might be in the form of an agreement between each VOAD agency and the state, identifying their role and responsibilities in the DCT.

VI. DONATION MANAGEMENT PROCESS.

A. Roles and Responsibilities.

1. Donation Coordination Team Leader.

a. The team leader will be the OEM-Volunteer Coordinator and will serve as the liaison to the EOC from the Donations Coordination Team. During the activation of the EOC, the team leader will serve as the liaison to the EOC from the Donations

State of Oklahoma Emergency Operations Plan (EOP)

Coordination Team. Following EOC deactivation, the team leader will continue to coordinate the Donations Coordination Team.

b. The team leader will have a clear understanding of Federal and State individual and public assistance programs to ensure an appropriate interface with private resources.

2. Donation Coordination Team.

a. The DCT will be concerned with the Hotline, Donations, Services, and Financial Donations.

b. The Needs Group must obtain an active needs survey coordinated through the EOC in all stricken areas and identify as well as coordinate the multiple agencies in those areas to ensure that all needs are identified.

DONATION MANAGEMENT PROCESS

c. Care will be taken to ensure that donated goods do not undermine local economies seeking to recover.

d. The DCT will prepare an after-action report identifying strengths and weaknesses in the team's performance. This report should reflect not only items of

State of Oklahoma Emergency Operations Plan (EOP)

concern to team members but also issues concerning the EOC and the JFO.

e. On-going training will be provided to all team members and associated agencies in order to continually address changes in the plan, lessons learned, and other issues relating to updates, orientation, and organizational structure adjustments.

3. Support Group.

a. The Support Group will be members of the DCT and will provide or coordinate all logistic, technical, administrative and security assistance for the DCT, for the staging areas, for the distribution centers, and for the ports of entry.

4. Additional Roles and Responsibilities.

The following lists the roles and responsibilities of other functionaries in the donations management system, in addition to the roles and responsibilities of the DCT. These functionaries include:

a. Donor - The extent to which the donor role is understood by the donor is a measure of how successfully emergency management disseminates public awareness information to the public.

b. Volunteer Agency - VOADs bringing in donated goods or accepting donations are responsible for accepting only donations needed; off-loading, sorting repackaging, storing, and distributing any donations accepted by the VOAD; sorting and packaging of the donated goods; securing warehouses and distribution centers; participate in the DCT.

c. Local Government - Local government's role, based on available resources, is to assist the VOADs in reporting the needs to the DCT; assist with security at local distribution centers; communicate with community-level initiatives; and inform DCT of donations problems in the field.
