**Much more than a text reader...
Integrated Literacy Solution for Struggling Learners**

Kurzweil 3000 for Windows

All the Tools for Independent Learning

Kurzweil 3000® is an integrated reading, writing, and study skill support software that enables struggling readers in **ALL GRADES and SUBJECTS** to learn from the same content as their peers.

Many students have difficulty reading for a variety of reasons. Their inability to read fluently at grade level means they are unable to learn from class and curriculum content. For these students, *Kurzweil 3000* can be life changing.

Kurzweil 3000 provides multi-sensory access to virtually any text or curriculum, including print, electronic, and web-based material—so students learn from grade appropriate content, develop valuable study skills, and become independent learners.

Unlike other programs that work only with preformatted material, *Kurzweil 3000* allows teachers and students the freedom to work with content from any publisher across content areas. In addition, *Kurzweil 3000* supports the principles of Universal Design for Learning (UDL), enabling multiple means for students of all abilities to engage with digital text. Moreover, *Kurzweil 3000* is used at all tier levels within Response to Intervention (RTI) programs to prevent students' academic performance from slipping.
