

SoonerStart & ABLE Tech Collaboration

February 2015

Weekly Reporting Form

If you haven't started using it already, you may want to consider it! Teams are significantly increasing the number of demonstrations reported every month by passing around the new reporting form in weekly staffings. Take a minute or two as a group to think of the most commonly used assistive technology items that you all demonstrate and record them at the top of the form.

Inventory
Checks Are
Complete!

Thank you, Teams, for checking your inventories!

Based on the results of the inventory checks, a list of broken and missing items has been created. The Oklahoma State Department of Education (OSDE) is in the process of purchasing replacement items for those that were missing/lost/stolen. In the meantime, please continue to look for these items and pursue getting them back from families if you have left them with kiddos.

Remember: Families can borrow assistive technology from Oklahoma ABLE Tech for free for 6 weeks. [Click here to fill out an online form to borrow equipment.](#)

For those teams who have items that are broken or simply not working, please mail them to:

Allyson Robinson
1514 W Hall of Fame
Stillwater, OK 74078

Once these items have been received, OSDE will be notified, and your item(s) will be placed on the replacement list.

Assistive Technology Tip – Pinterest!

This month's tip was inspired by my own personal interest in the web and mobile application called Pinterest! Even if you have not signed up for this free tool, you may be interested in knowing that many assistive technology tips, tricks, and videos are posted here! If you are already signed up, you may want to start following Oklahoma ABLE Tech's boards at

<https://www.pinterest.com/okabletech/>.

Here you'll find weekly AT highlights, lists of popular apps, and many resources!

After that it just takes a few moments to log your assistive technology demonstrations for the week. Remember: a demonstration is the first time you show a piece of technology to a kiddo to help him/her and the family make a decision about what will help.

AT Highlight

The iPad Clamp and pivoting, articulating stand can provide access to kiddos with physical impairments. This iPad Clamp is one of ABLE Tech's newest assistive technology devices available for trial through our short-term loan program. Our inventory offers a wide range of AT for communication, computer access, hearing, vision, daily living, environmental adaptations, learning/development, health, safety, and recreation.
