## Adapted Book Project

Adding “page fluffers” to the pages of a book provides an easy way for children with or without disabilities to turn pages.

### Materials:

- 1 – 3-Ring Binder
- 5 mil lamination film or Kinko's for lamination
- 1 - book of your choice
- Rubber weather stripping

### Directions:

1. Number the pages in the book; cut the book apart to separate each page.
2. Laminate each page of the story.
3. Three-hole punch the pages and put them in the binder in order.
4. Cut the weather stripping into 1/2” chunks. Peel the backing of each piece and place three pieces on each page (front and back): one at the top, one at the bottom and one in the middle near the outside edge.
5. Slide the cover of the book into the front of the binder and make a spine label.

Oklahoma ABLE Tech, the statewide Assistive Technology Act Program, is funded through the Administration for Community Living of the U.S. Department of Health and Human Services, and maintains coordination and collaboration efforts with partners throughout the State of Oklahoma.
