ABLE Tech

Read & Write Gold Literacy Support Training and Awareness

- **Tier 1 Training:** OSU Oklahoma ABLE Tech is interested in customizing a training class for various academic support service centers with faculty, staff, and tutors. We believe that a first-in-line basic training for OSU support services will provide you with a comfort level of Read & Write Gold, what the benefits are, how to use the key features, and then comfortably point your students to trying RWG. After a basic training, you will be able to demonstrate the key tools in a short period of time and will begin to immediately think of students who could benefit from one or multiple features of Read & Write Gold software.
- **We would like to coordinate basic RWG training sessions with:** LASSO, Athletic Academic Services, Writing Centers, and other college and division support services, and students.
- **Credentials:** OSU Oklahoma ABLE Tech Staff are certified to train on Read & Write Gold. We have trained teachers, students, and parents in both K-12 and higher education. We promise it is easy to use.
- **Time, duration, location:** ABLE Staff will plan a convenient time with flexible duration to fit your staff needs (one hour to several hours). Think of: existing staff meetings, student/tutor hours, orientation classes, special events or meetings throughout the semester, beginning of semester orientations. We can train from your computer lab or can reserve a computer lab through IT.
- **Tier 2 Training for Students:** Basic RWG training will be available for your students. We believe you will have the best ideas of how, when, and where to coordinate a student training. We can train from most any computer lab or we can reserve a lab. Students will need to register either through you or through ABLE Tech.
- **OSU Student Incentive:** OSU Oklahoma ABLE Tech will sponsor an iPad giveaway at the end of each semester. Students who attend a Read & Write Gold training will be entered in the drawing by name and email. Toward the end of each semester, a student will be randomly selected. The winner will receive an iPad (iPad model is selected by ABLE Tech). RWG offers apps for the iPad and iPhone which is a good integration of technology to meet the needs of today's OSU students.
