

Adapted Puzzle

The logo for ABLE Tech, featuring the text 'ABLE Tech' in a stylized, handwritten font inside a white speech bubble shape with a black outline.

Adding knobs to puzzle pieces provides an easy grip allowing the child to play with the puzzle independently.

Materials:

- Bag of wooden knobs purchased in a hobby, art, or hardware store
- Hot glue gun and glue sticks
- Wooden or heavy cardboard puzzle with large pieces

Directions for attaching puzzle knobs with hot glue gun (good for one puzzle):

1. Choose location for the knobs that will avoid covering the puzzle pictures.
 2. Place hot glue on the puzzle location.
 3. Attach the knob to the hot glue using a twisting motion.
 4. Allow drying overnight before your child plays with the new puzzle.
