

Governor to Unveil New State Web Site Design at Capitol

Oklahoma's Official Web site (www.OK.gov) to Premiere at Capitol Press Conference

www.OK.gov is the new address and brand for the official Web portal for the State of Oklahoma. The new Web site provides equal access to government services and focuses on "self service," enabling users to easily locate government information and services with little or no knowledge of agency functions. OK.gov's custom-designed eGovernment applications, coupled with a payment engine, allow individuals and businesses to interact with their government in a way that makes sense for their needs – no more long lines, inconveniences or mail-related delays.

A few of the current eGovernment services available through OK.gov include:

- Professional license renewal and verification
- Unclaimed property searches
- Campaign finance reporting and disclosure
- State agency and Oklahoma business directories

WHAT: Governor's Press Conference to unveil www.OK.gov, a new address and brand for the official Web portal. A reception will follow in the Capitol Rotunda with live demonstrations and refreshments.

About OK.gov

OK.gov built and manages the official Web site for the state of Oklahoma (www.OK.gov) and partners with state agencies to bring new government services online. Ok.gov is managed by eGovernment firm NIC.

About NIC

NIC manages more eGovernment services than any provider in the world. The company helps government communicate more effectively with citizens and businesses by putting essential services online. NIC provides eGovernment solutions for 1,500 state and local agencies that serve more than 51 million people in the United States. Additional information is available at www.nicusa.com.
