

As most of you know, the AgrAbility Project strives to provide education, direct assistance and networking services in an effort to support Oklahoma farmers, ranchers, and their families who have experienced injury, illness or disabling conditions.

### ***Focus on the Farmer***

We have cool programs for farmers, who need added technology supports due to injury or illness to keep them successfully farming and supporting their families, so we spend quite a bit of time on the farm or ranch working together to reduce obstacles.

### ***Service Learning Opportunities***

We are proud to announce a new initiative with Oklahoma youth and are coordinating opportunities for them to participate in our "Connecting Youth, Agriculture, and Accommodations" series.

The first component of the series is to set a date for your club or group to meet a farm family and help them out for a couple of hours with a few tasks around the farm or ranch. We'll learn about injuries, obstacles, work together to reduce barriers, try new ways of doing old things with common accommodations, and experience what a career in agriculture is really like.

### ***Contact Us***

We are excited to work with each County Extension Educator and look forward to "Connecting Youth, Agriculture, and Accommodations" in an effort to prepare today's youth for a bright and successful future!

Contact us, and let's get started.
