To: All Law Enforcement
From: Kevin Behrens, Director
Re: Oklahoma Blood Specimen Collection Kits

Many of you are familiar with the State of Oklahoma Blood Specimen Collection Kit used for the collection of blood samples for the purpose of chemical testing. For many years OSBI produced a kit containing four blood tubes. However, for the last two years, only kits containing three tubes have been produced. At this time, all of the four tube kits are expired. With regard to three vial kits, Lot# 12644 expired on May 31, 2014, and Lot# 13601 expired on December 31, 2014. Additionally, Lot#16091 will expire on March 31, 2015.

BOT Action 07-03, dealing with the effect of expiration dates on Blood Specimen Collection Kits has not been rescinded, and is still applicable. A copy of this Action is attached for your convenience. Nevertheless, to avoid unnecessary complications in the prosecution of cases involving the collection and testing of blood samples, it is recommended that you obtain current three tube Blood Specimen Collection Kits from the OSBI. The new Blood Specimen Collection Kits may be obtained at no cost by contacting Linda Cain with the OSBI at 405-715-9513. Any expired kits may be brought to the Board of Tests for use in training, or you may call the office to arrange for us to pick them up.

Thank you for your attention to this matter. Should any questions or concerns arise, please do not hesitate to contact the Board of Tests for Alcohol and Drug Influence.
