Description of Amendment:

a. This is to incorporate the following:

Q&A Section Update

1. What is the total budget limitation of this RFP?

Response: A firm budget has not been established for this project and suppliers should strive to be as competitive as possible for all specified options.

2. Please confirm about the start and end dates of this project?

Response: The timeline referenced within the solicitation is specific to the solicitation process. It will be the responsibility of the vendor to present a detailed timeline with milestones and justify the time needed to complete the project.

3. Is it possible to provide the required services via remote or offsite mode?

Response: It is technically possible, however not preferable, considering the projected volume of data that would be going through the system that is destined for the individual DA's server combined with the fact that there will be large amounts of PII data flowing through the connections that ultimately will be the DAs' responsibility to safeguard once it leaves the Law Enforcement Agency's control.

4. Is there any technology preference?

Response: The solution should run on a modern Windows OS server, MSSQL based SQL.
