Combative Pistol 1 is an extensive over-view of the essential skills involved in self defense with a handgun. Topics covered include presentation from the concealed carry holster; accurate shooting at high speed; fast, reliable reloading techniques; one handed shooting; malfunction remedies; and much more. Students will fire approximately 1000 rounds in this course.

Advanced Pistol Skills is a one day course designed to build on and hone the skills covered in CP1. High speed shooting; precision shooting at mid-ranges; and movement drills are all covered in depth. Expect to fire 600 rounds of ammunition in a fast paced, rewarding day of training. Entry is limited to those who take CP1 on the two prior days, or who have taken it previously.

Defensive Shotgun is a full day of training on the most effective, but most misunderstood weapon in the Good Guy's arsenal. Students will learn to select and modify the shotgun for maximum utility; select the right ammo for the job; use proper handling and reloading techniques to keep the gun in the fight; and hit with the shotgun reliably, at speed. Students will fire about 100 rounds of birdshot, 50 rounds of buckshot, and 15 slugs in this class.
