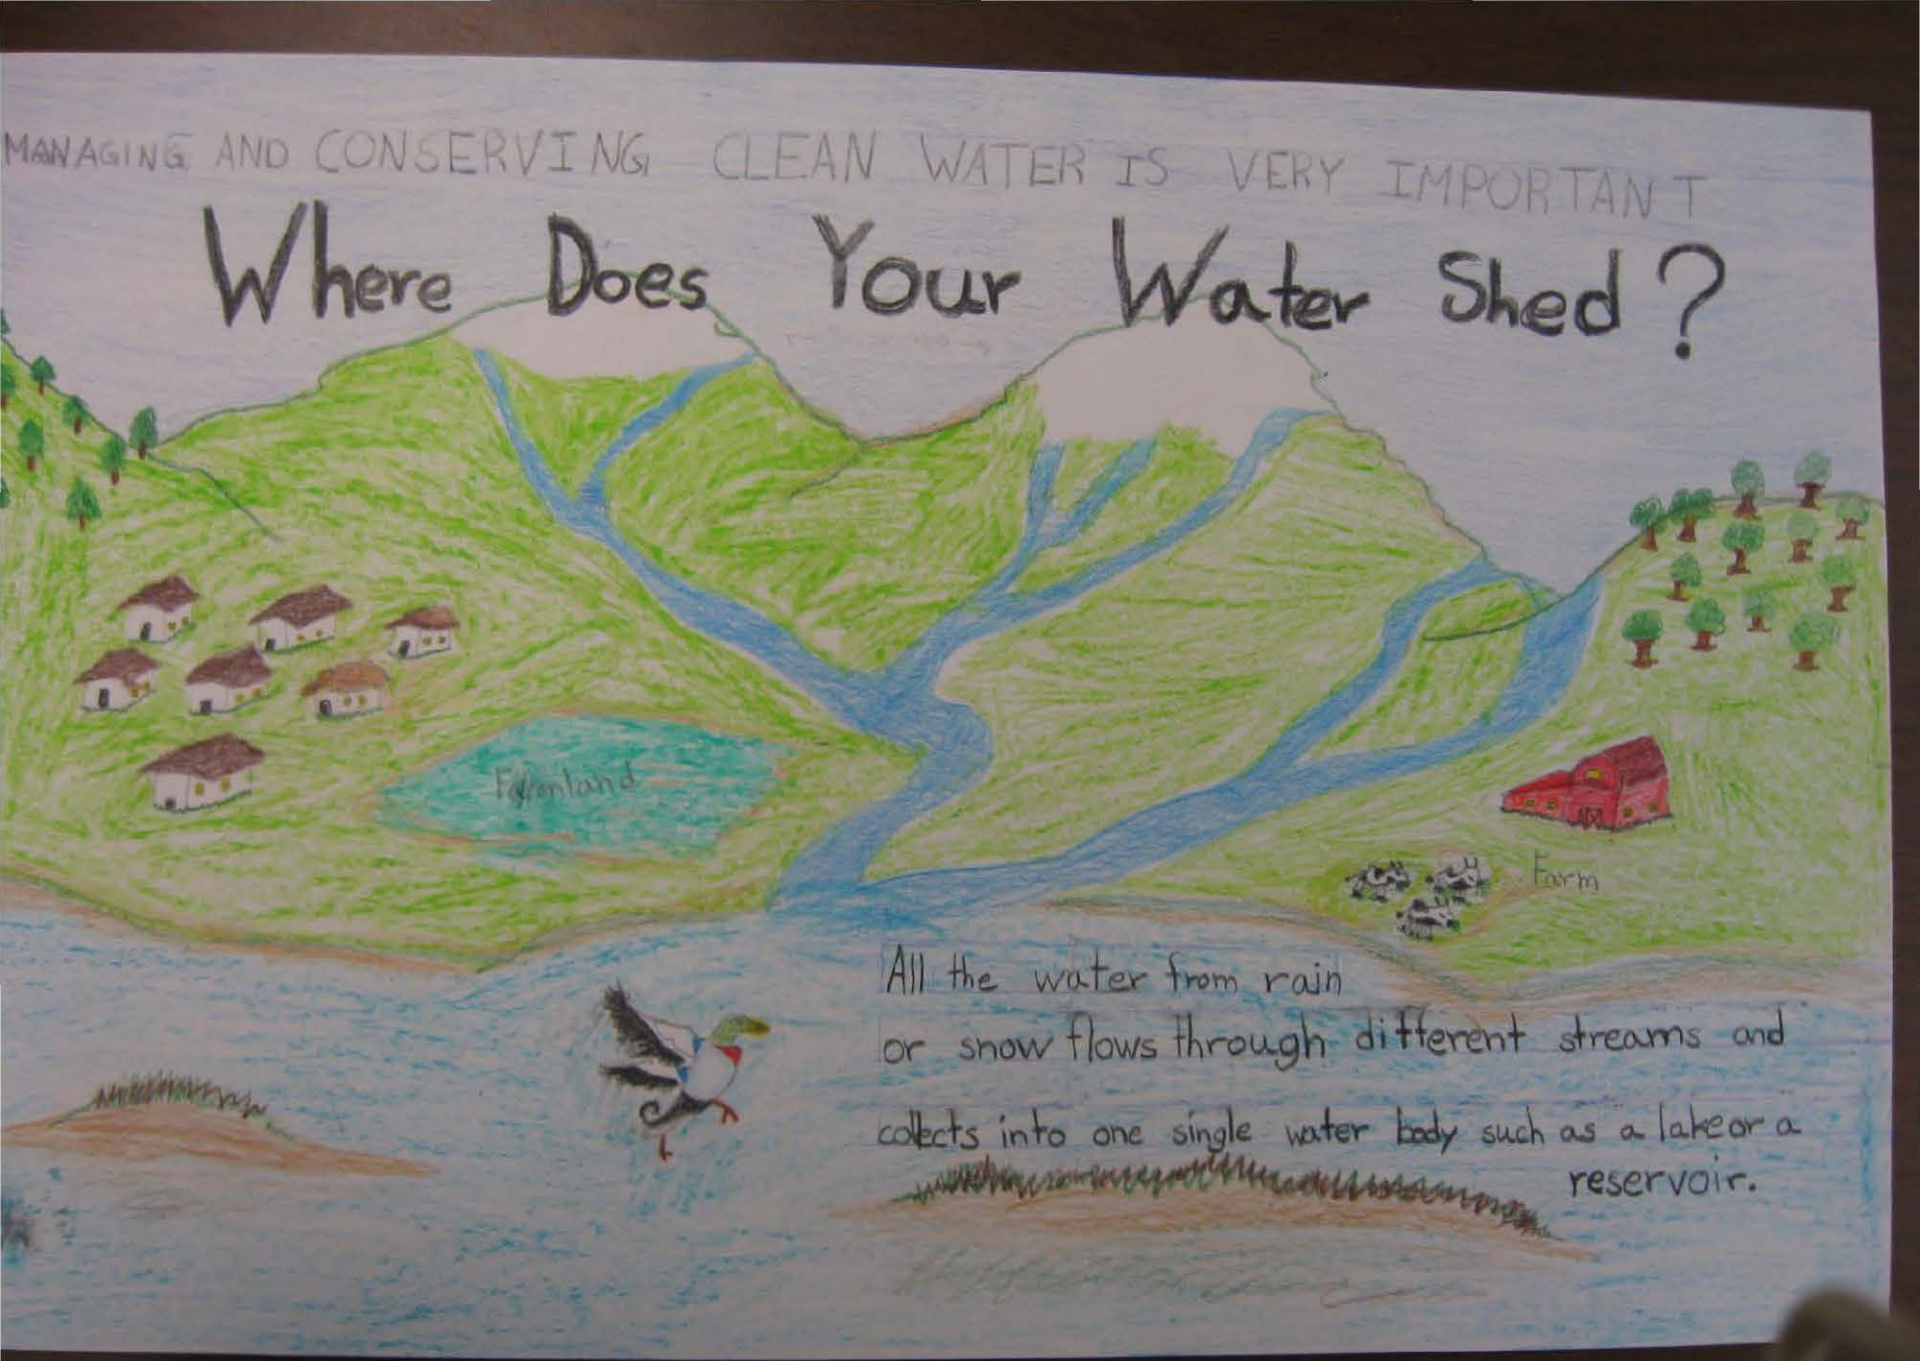
Trash on our
playground means trash i
WATER!
Chips

Where Does Your Water Shed?

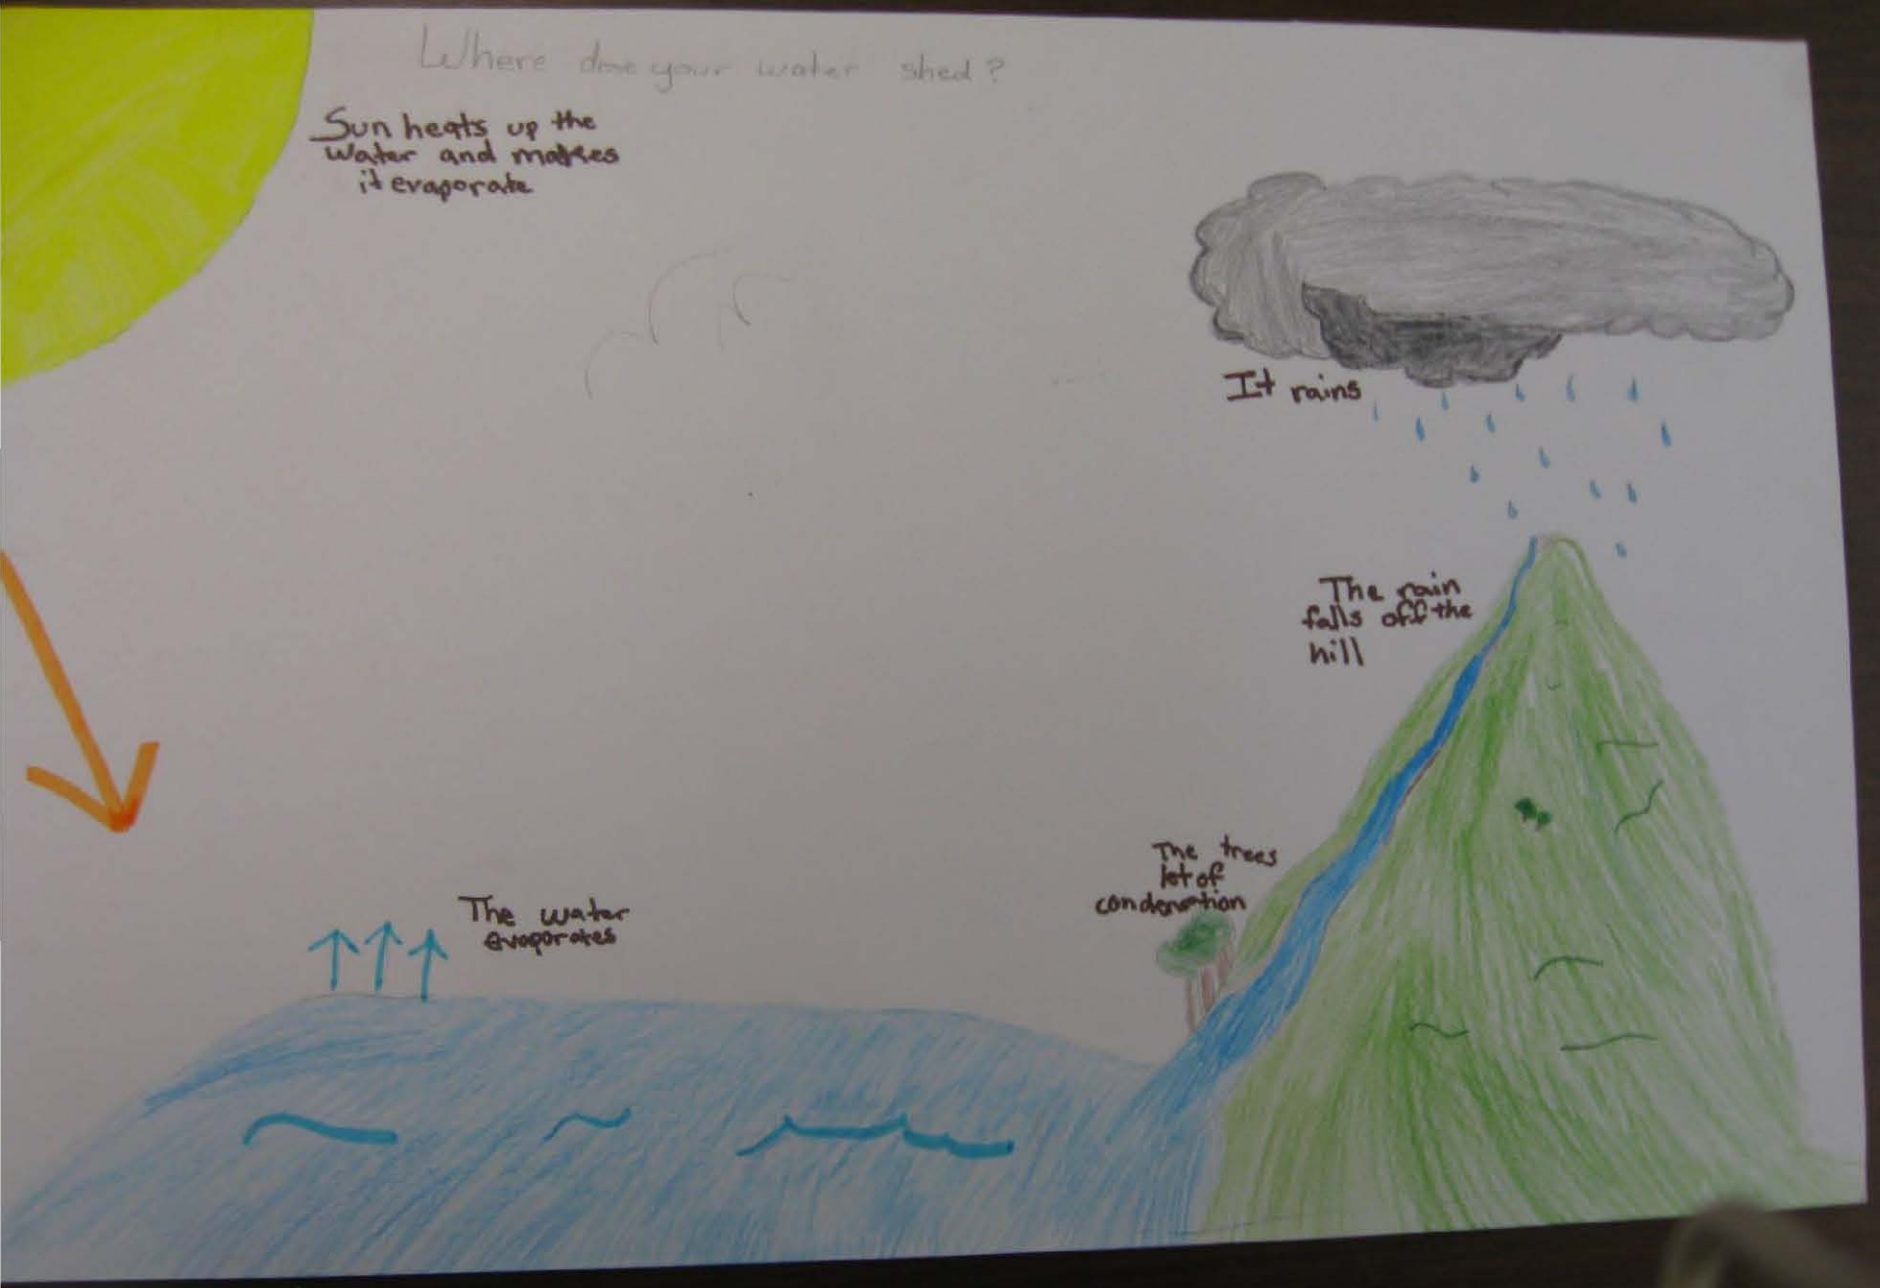
No-till Wheat
Where Does Your Water Shed?
Grass Buffer
Clean River
Dirty River
Riparian Buffer
Conventional Wheat

MANAGING AND CONSERVING CLEAN WATER IS VERY IMPORTANT

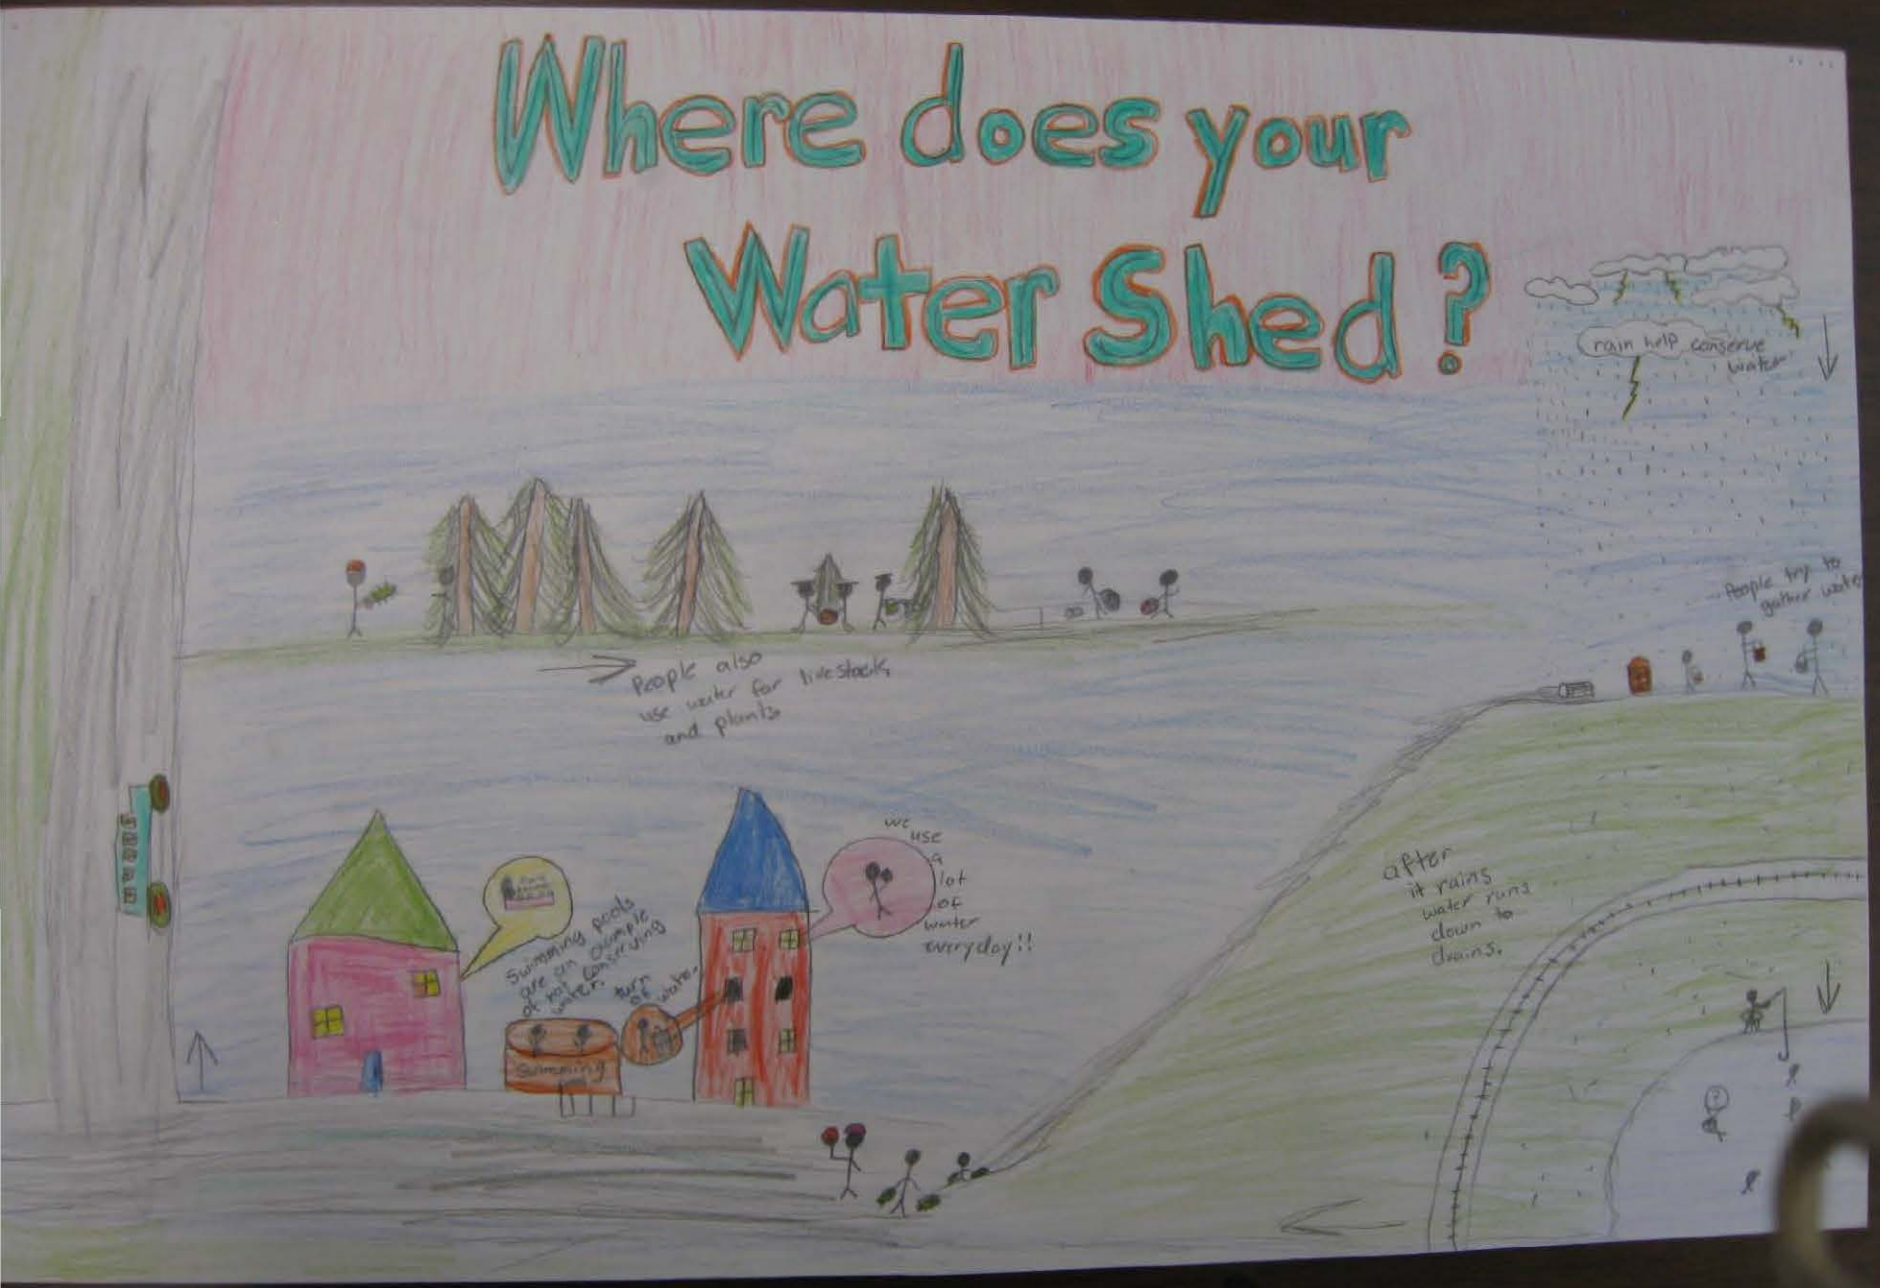
Where Does Your Water Shed?



All the water from rain or snow flows through different streams and collects into one single water body such as a lake or a reservoir.



Where does your water shed?
Sun heats up the water and makes it evaporate
It rains
The rain falls off the hill
The trees let of condensation
The water evaporates



Where does your Water Shed?
rain help conserve water
People also use water for livestocks and plants
People try to gather water
we use a lot of water everyday!!
Swimming pools are not conserving water.
turn off water.
after it rains water runs down to drains.
