

You Can Have Fun With.....

Curb Marking

A Blue Thumb Feature
Presentation

What is curb marking?

Placement of the
NO DUMPING
Keep Our Water Clean

message
at storm drains.

Why mark Curbs?

Teach people
how NOT to
pollute.

Safety is
important.

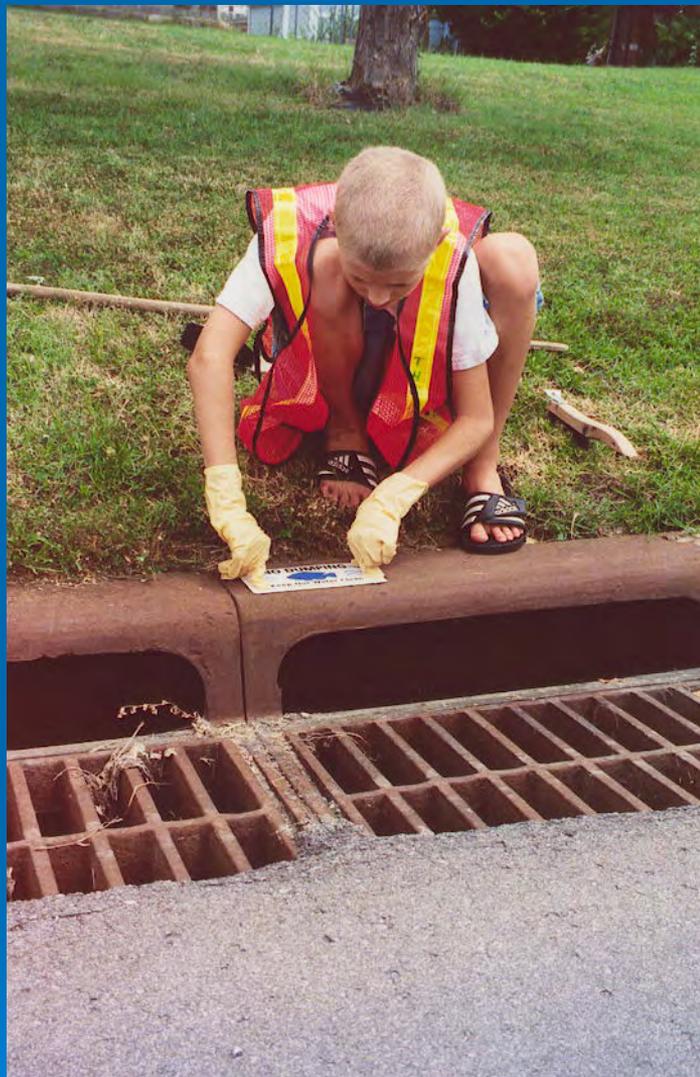

Scrub & dust

Use just the “right” amount of glue.

Placement of the curb marker is important.

Sometimes the glue
likes to stick to
fingers.

Providing information
to the innocent
neighbor who would
never pollute
intentionally is
VERY important!

Curb marking volunteers should TALK to people!
They should understand how individuals can
protect water.

Curb marking
volunteers receive
training.

Volunteers can answer questions about runoff while they mark curbs.

Help volunteers feel motivated!

Help volunteers
& urbanites
understand
the connection.

We can all play a part in keeping water
CLEAN!

The End.
