

Flood Control Dams in Oklahoma House District No. 65

Oklahoma has 2,107 flood control dams in 61 counties. These dams have been constructed through conservation districts with financial and technical assistance from the USDA Natural Resources Conservation Service (NRCS) authorized through Public Law 78-534 (Washita River Watershed) and Public Law 83-566 Watershed Protection and Flood Prevention Program.

The primary purpose of flood control dams is to reduce flooding. The secondary benefits of the dams address a myriad of public needs such as water supply, water quality, soil health, water management, wetland enhancement, fish and wildlife habitat, and recreation. Flood control dams improve public safety, contribute to a healthy economy and support a strong nation.

Watershed projects also include the installation of natural resource conservation practices such as terraces, waterways, ponds, gully repair, and pasture and rangeland plantings. These conservation practices improve water quality and soil health and reduce sedimentation into the lakes formed by the dams.

Operation and Maintenance of Dams

The annual operation and maintenance of dams is the responsibility of project sponsors (local units of governments such as conservation districts).

Operation and maintenance of dams can be expensive and labor intensive, but is necessary to ensure the dams function as designed and remain safe.

Maintenance work includes removing trees from dams and spillways, repairing erosion damage, repairing damage to the spillway and dams after heavy rainstorms, and keeping the principal spillway inlet towers cleared of debris.

Operation and Maintenance Needs

An estimated \$6 million per year is needed to meet the operations and maintenance needs of the 2,107 flood control dams.

Annual Benefits

The 2,107 flood control dams and conservation practices in watershed projects provide \$85 million in annual benefits. Listed on the back page are the average annual benefits from watershed projects in House District No. 65.

Rehabilitation and Dam Safety

Some dams will need rehabilitation to remain safe and protect the people that live or work downstream.

There are 249 high hazard dams with 63 that meet current dam safety criteria either through original design or rehabilitation. It is estimated that \$653 million will be required to rehabilitate the remaining 186 high hazard dams to comply with federal and state dam safety laws.

More dams will become high hazard as long as residential and business development is allowed downstream of the dam in the breach flood area.

NRCS can provide 65 percent of the rehabilitation costs and technical assistance to rehabilitate high hazard dams. Local project sponsors provide 35 percent of the cost and obtain any needed additional land rights.

As of January 2015 thirty-four dams in the state have been rehabilitated to meet state and federal mandated dam safety regulations and 18 dams are in various stages of planning, design or construction.

Average Annual Watershed Benefits (Entire Watershed)

Watershed Name	Dams in Watershed	Dams in District 65	Monetary Benefits	Farms/Ranches Benefited	Bridges Benefited	Wetlands Enhanced/Created (acres)	Reduced Sedimentation (tons of soil)
Cow Creek	29	2	\$830,151	106	10	434	63,513
Delaware Creek	2	1	\$41,875	23	2	5	974
Roaring Creek	40	3	\$1,004,906	199	12	290	59,373
Rush Creek	55	6	\$2,819,293	570	9	778	181,337
Tonkawa Creek	13	6	\$503,615	55	6	143	20,805
Little Washita River	45	23	\$1,327,736	492	69	748	171,836
Total	184	41	\$6,527,576	1,445	108	2,398	497,838

Conservation Contacts for Oklahoma House District 65

Conservation Districts are a primary sponsor of most watershed projects in Oklahoma. The USDA Natural Resources Conservation Service (NRCS) is the federal agency that administers the watershed program and provides technical and financial assistance to the local project sponsors.

Listed below are conservation districts located in House District 65 that have watershed projects and other conservation agencies that can be contacted for more information about the watershed program.

Grady County Conservation District

828 W. Choctaw Ave.
Chickasha, OK
405/224-0523
gradycdd@conservation.ok.gov

South Caddo Conservation District

1001 Petree Road, Suite A
Anadarko, OK
405/247-3747
scaddocd@conservation.ok.gov

Stephens County Conservation District

3901 West Beech
Duncan, OK
580/255-5798
stephensccd@conservation.ok.gov

Oklahoma Conservation Commission

2800 N. Lincoln Blvd. Suite 160
Oklahoma City, OK 73105-4210
(405) 521-2384
