Environmental Contract General Requirements

6. ENVIRONMENT PROTECTION: For the purpose of this specification, environmental pollution is defined as the presence of chemical, physical, or biological elements or agents which adversely affect human health or welfare; unfavorably alter ecological balances of importance to human life; affect other species of importance to man; or degrade the utility of the environment for aesthetic and recreational purposes. The control of environmental pollution requires consideration of air, water, land, and involves noise, solid waste management and management of radiant energy and radioactive materials, as well as other pollutants.

6.1 Applicable Regulation: In order to prevent, and to provide for abatement and control of, any environmental pollution arising from the activities of the contractor and his sub-contractors in the performance of this contract, they shall comply with all applicable Federal, State, and Local laws and regulations concerning environmental pollution control and abatement.

6.2 Environmental Management System (eMS): The contractor shall perform work under this contract consistent with the relevant policy and objectives established by the Oklahoma Army National Guard (OKARNG) eMS as applicable for your contract. eMS is the management system the OKARNG uses to implement the Adjutant General's Environmental Policy and is conformant with the ISO 14001, an industry best practices standard. All employees and contractors must know the contents of the Adjutants General Environmental Policy, have that policy readily available, and have had awareness training before conducting site work. The Environmental Policy and eMS Awareness Training are both available for public viewing at www.ok.ngb.army.mil. In addition, the contractor shall ensure their employees are aware of the roles and responsibilities identified by the current OKARNG Adjutant General environmental policy statement and how these requirements affect their work performed under this contract. Furthermore, if an employee or contractor manages an activity that could have a significant environmental impact, that person must also know how to properly manage that activity. The contractor shall perform work in a manner that conforms to all appropriate Environmental Management Programs and Operational Controls identified by the OKARNG eMS, and provide monitoring and measurement information as necessary for the organization to address environmental performance relative to the environmental, energy, and transportation management goals as provided in Executive Order 13423.

In the event an environmental nonconformance or non compliance associated with the contracted services is identified, the contractor shall take corrective and/or preventative actions. In the case of a noncompliance, the contractor shall respond and take corrective action immediately. In the case of a nonconformance, the contractor shall respond and take corrective action based on the time schedule established by the OKARNG eMS Management Representative or their designee.

6.3 Protection of Land Resources: It is intended that the land resources within the project boundaries and outside the limits of permanent work performed under this contract be preserved in their present condition or be restored to a condition after completion of construction that will appear to be natural and not detract from the appearance of the project. Insofar as possible, the

contractor shall confine his construction activities to areas defined by the plans or specification, to the areas to be cleared for other operations, or to quarry, borrow or waste areas indicated on the plans. At the onset of borrow excavation, topsoil shall be saved, leveled or trimmed to regular lines and shaped to provide a neat appearance. In all instances the restored area shall be well drained, so as to prevent the accumulation of stagnant water. Except in areas marked on the plans to be cleared, the contractor shall not deface, injure, or destroy trees or shrubs, nor remove or cut them without written approval.

6.3.1 Restoration of Landscape Damage: Any trees or other landscape feature scarred or damaged by the contractor's equipment or operations shall be restored as nearly as possible to its original condition at the contractor's expense. The Oklahoma Army National Guard Directorate of Engineering (NGOK-ENG) will decide what method of restoration shall be used, and whether damaged trees shall be treated and healed or removed and replaced.

6.4.1 General: The contractor shall not pollute streams, lakes or reservoirs with any adulterant or harmful materials. It is the responsibility of the contractor to investigate and comply with all applicable Federal, State, County and Municipal laws concerning pollution of rivers and streams. All work under this contract shall be performed in such a manner that objectionable conditions will not be created in streams through or adjacent to the project areas.

6.4.2 Erosion Control: Surface drainage from cuts and fills within the construction limits, whether or not completed, and from borrow and waste disposal areas shall, if turbidity producing materials are present, be held in suitable sedimentation ponds or the areas(s) shall be graded to control erosion within acceptable limits. Temporary erosion and sediment control measures such as berms, dikes, drains, or sedimentation basins, if required to meet the preceding standards, shall be provided and maintained until permanent drainage and erosion control facilities are completed and operative. The area of bare soil exposed at any one time by construction operations shall be limited to control runoff; and in areas of frequent crossings, temporary culverts or bridge structures shall be removed upon completion of the project. Fills and waste areas shall be constructed by selective placement to eliminate silts or clays on the surface that will erode and contaminate adjacent streams.

6.4.2.1 General Permit for Storm Water Discharges for Construction Activities: Any contractor performing a construction activity, including clearing, grading, and excavating, which results in the disturbance of one or more acre of land, requires submission of a Notice of Intent (NOI) to apply for coverage under the Oklahoma Department of Environmental Quality (ODEQ) current [General Permit for Storm Water Discharges for Construction Activities within the State of Oklahoma, and subsequently submit a Notice of Termination \(NOT when the activities are complete\)](#). Construction projects subject to coverage through the permit are required to have a Storm Water Pollution Prevention Plan (SWP3). SWP3s will be developed in accordance with (IAW) the National Pollutant Discharge Elimination System (NPDES) Permit and IAW the Oklahoma Pollutant Discharge Elimination System (OPDES) requirements. The intent of the SWP3 is to identify potential sources of pollution at a facility and to identify the Best Management Practices (BMPs) that will reduce contaminants in storm water runoff

discharging to state waters. The plan must be updated when any significant change occurs at the facility that would potentially affect the quality of storm water runoff. The SWP3s shall be prepared IAW good engineering practices and IAW the factors outlined in the activity's permit. The contractor will maintain copies of the SWP3 at each applicable facility and will make it available to regulators upon request. Detailed content requirements of construction activity SWP3s are identified in current General Permit for Storm Water Discharges for Construction Activities within the State of Oklahoma and include:

- (1) Site description
- (2) Controls
- (3) Maintenance
- (4) Inspections
- (5) Non-storm water discharges

6.4.3 Spillages: At all times of the year, special caution shall be taken to prevent chemicals, fuels, oils, greases, bituminous materials, waste washings, herbicides and insecticides, and cement and surface drainage from entering surface or ground waters.

6.4.4 Disposal: Disposal of any materials, wastes, effluents, trash, garbage, oil, grease, chemicals, etc., in areas adjacent to streams or other bodies of water is prohibited. If any waste material is dumped in unauthorized areas, the contractor shall remove the material and restore the area to the condition of the adjacent undisturbed area. As necessary, any soils contaminated, either directly or indirectly, by the actions of the contractor shall be excavated, disposed of as directed by NGOK-ENG, and replaced with suitable fill material, compacted and finished with topsoil all at the expense of the contractor.

6.4.4.1 Hazardous Waste Disposal: All hazardous wastes will be managed in compliance with all federal, state and local laws, rules and regulations. These wastes must be managed and protected to prevent release to the environment. All hazardous wastes generated on site will be reported to Oklahoma Army National Guard Environmental Office (NGOK-ENG-ENV). The reporting shall include waste type(s), volumes and/or weights, and location of final disposal. Copies of all manifests and receipt notifications will be provided to NGOK-ENG-ENV no later than seven (7) calendar days after the documents are generated. Prior to disposal of hazardous wastes, the contractor will notify the contracting officer who will notify NGOK-ENG-ENV. The contractor will provide the contracting officer a copy of the hazardous waste management and disposal plan prior to beginning work.

6.5 Protection of Cultural Resources

Cultural resources are defined as historic properties as defined by the National Historic Preservation Act (NHPA); cultural items as defined by Native American Graves Protection and Repatriation Act (NAGPRA), archeological resources as defined by Archaeological Resources Protection Act (ARPA), sites and sacred objects to which access is afforded under American Indian Religious Freedom Act (AIRFA) and collections and associated records as defined in 36 CFR 79.

6.5.2 Inadvertent Discoveries: In the event of an inadvertent discovery, the contractor shall immediately take the following steps: Cease ground-disturbing activity when possible Native American historical artifacts, human remains, or burials are observed or encountered, report any observations or discoveries of Native American historical artifacts, human remains, burials, or features immediately to the Unit Commander or Facility Manager at the site and the Contracting Officer, do not resume ground-disturbing activity at the discovery location until directed by the Unit Commander , Facility Manager, and the Contracting officer . Contractor must comply with orders from Unit Commander or Facility Manager to secure the discovery location(s).

6.6 Protection of Fish and Wildlife: The Contractor shall at all times perform all work and take such steps as required to prevent any interference or disturbance to fish and wildlife. The contractor will not be permitted to alter water flow or otherwise disturb native habitat adjacent to the project area which, in the opinion of the Contracting Officer, is critical to fish or wildlife. The contractor shall not foul or pollute the land, air, or water. Critical Habitat will be identified by NGOK-ENG-ENV, once identified the contractor will make every effort to protect critical habitat.

6.7 Disposal of Removed Material: Unless otherwise specified in other sections of these specifications or unless reusable under the terms of this contract, all removed material shall be disposed of off-site. This disposal shall be in accordance with all applicable Federal, State, County and Municipal laws. The contractor will provide NGOK-ENG-ENV with a report of quantity of solid waste generated by contractor activities in either pounds or cubic yards no later than seven (7) calendar days after disposal. . As such, the contractor will be required to maintain all excavations, embankments, stockpiles, haul roads and permanent access roads (unpaved or dust-laden paved roads), plant sites, waste areas, borrow areas, and all other work areas within or without the project boundaries free from dust which would cause a hazard or nuisance to others. An approved immediate measure is to reduce vehicle speeds. Approved temporary methods of stabilization consisting of sprinkling, chemical treatment, light bituminous treatment or similar methods will be permitted to control dust. Sprinkling, to be approved, must be repeated at such intervals as to keep all parts of the disturbed area at least damp at all times, and the contractor must have sufficient competent equipment on the job to accomplish this if sprinkling is used. Dust control shall be performed as the work proceeds and whenever a dust nuisance or hazard occurs. Occupied areas within buildings shall be protected by temporary partitions or dust barriers during demolition and construction process.

6.8.2 Open Burning Restriction: The open burning of refuse and combustible materials is prohibited unless conducted in strict accordance with the conditions and requirements contained in OAC 252:100-13-7 and OAC 252:100-13-9. Under no circumstances shall the open burning of tires be allowed.
