Re: Solicitation #: 0900000202

To Whom It May Concern:

DataBank is submitted pricing for inclusion on the OMES website. The pricing that we are submitted has not been changed from the original pricing that was submitted with the DataBank proposal response to the Document Lifecycle Management RFO Solicitation#: 0900000202.

Please feel free to contact the undersigned if you have any questions.

Very Truly Yours,

/s/

Paul Gorman  
Senior Solutions Consultant

|--------|--------------------------------|--|-------------|-----|------------|
| CTIPW2 | Workstation Client (101 - 200) | Provides retrieval, viewing, printing, and management of documents. The OnBase Web Client cannot use this license.   | \$600.00    | 15% | \$510.00   |
| CTIPW3 | Workstation Client (200+)      | Provides retrieval, viewing, printing, and management of documents. The OnBase Web Client cannot use this license.   | \$500.00    | 15% | \$425.00   |
| CTIPN1 | Named User Client (1 - 100)    | Provides retrieval, viewing, printing, and management of documents for a single named user. Either the OnBase Client or OnBase Web Client can use this license.  | \$700.00    | 15% | \$595.00   |
| CTIPN2 | Named User Client (101 - 200)  | Provides retrieval, viewing, printing, and management of documents for a single named user. Either the OnBase Client or OnBase Web Client can use this license.  | \$600.00    | 15% | \$510.00   |
| CTIPN3 | Named User Client (201+)       | Provides retrieval, viewing, printing, and management of documents for a single named user. Either the OnBase Client or OnBase Web Client can use this license.  | \$500.00    | 15% | \$425.00   |
| UNIP11 | Unity Client Server            | Desktop client built on .NET and WPF that provides a customizable user experience to the desktop.  | \$10,000.00 | 15% | \$8,500.00 |
| UBIPW1 | Unity Briefcase (1 - 100)      | Provides offline access to documents and processes for disconnected, field workforces.   | \$400.00    | 15% | \$340.00   |
| UBIPW2 | Unity Briefcase (101 - 200)    | Provides offline access to documents and processes for disconnected, field workforces.   | \$350.00    | 15% | \$297.50   |
| UBIPW3 | Unity Briefcase (201+)         | Provides offline access to documents and processes for disconnected, field workforces.   | \$300.00    | 15% | \$255.00   |
| WTIPW1 | Web Server                     | Provides an ActiveX or HTML browser interface to access documents stored in an OnBase database via the Internet, Extranet or corporate Intranet. Each physical Web Server connecting to an OnBase database requires a separate Web Server license. StatusView will not be automatically included with the Web Server. If StatusView functionality is desired for a solution, please include a line item on any order with the code STIP11 as a 'No Charge' item. | \$10,000.00 | 15% | \$8,500.00 |

|              |                                 |  |            |     |            |
|--------------|---------------------------------|--|------------|-----|------------|
| EACIPI1      | External Access Client          | Allows an organization to create an external-facing Web portal that provides access to OnBase content and processes to users outside the organization. External Access Client provides three different levels of functionality: Read Only, Contribute and Full Access. The configuration-based functionality level determines the StatusView portlets available: 1) Read Only: Custom Query, Folders, Envelopes, External Links, HTML; 2) Contribute: DKT, E-Forms, File Upload; 3) Full Access: Workflow, Workflow Dashboard, Workflow Process Statistics, Workflow Queue Activity, Workflow Queue Filer, WorkView Filter and WorkView Summary. Each successive level inherits the functionality of the prior level. In addition to this server license, External Access Client requires a monthly Active-User fee for all users accessing the portal within a given month, according to the following schedule: 1) Read Only: \$2.00/Active-User/month; 2) Contribute: \$4.00/Active-User/month; 3) Full Access: \$8.00/Active-User/month. A built-in reporting mechanism will relay monthly usage data to Hyland for translation into a monthly billing amount according to the schedule provided here. | \$2,000.00 | 15% | \$1,700.00 |
| OMIPW1-IPAD  | Mobile Access for iPad          | Provides the ability to access pending work in Workflow Queues, view the document, view keywords, execute ad-hoc tasks and view, modify and create notes from an iPad  | \$5,000.00 | 15% | \$4,250.00 |
| OMIPI1-IPHN  | Mobile Access for iPhone        | Provides the ability to access pending work in Workflow Queues, view the document, view keywords, execute ad-hoc tasks and view, modify and create notes from an iPhone.   | \$5,000.00 | 15% | \$4,250.00 |
| OMIPI1-ANDPH | Mobile Access for Android       | Provides the ability to access pending work in Workflow Queues, view the document, view keywords, execute ad-hoc tasks and view, modify and create notes from an Android device.   | \$5,000.00 | 15% | \$4,250.00 |
| OMIPI1-WINDO | Mobile Access for Windows       | Provides the ability to access pending work in Workflow Queues, view the document, view keywords, execute ad-hoc tasks and view, modify and create notes from a Windows tablet.  | \$5,000.00 | 15% | \$4,250.00 |
| OMIPI1-WINPH | Mobile Access for Windows Phone | Provides the ability to access pending work in Workflow Queues, view the document, view keywords, execute ad-hoc tasks and view, modify and create notes from a Windows phone.   | \$5,000.00 | 15% | \$4,250.00 |

|             |  |   |             |     |             |
|-------------|--|---|-------------|-----|-------------|
| OMIPI1-BBPH | Mobile Access for Blackberry Phone     | Provides the ability to access pending work in Workflow Queues, view the document, view keywords, execute ad-hoc tasks and view, modify and create notes from a Blackberry phone.   | \$5,000.00  | 15% | \$4,250.00  |
| OLIPI1-13   | Integration for Microsoft Outlook 2013 | Allows a Microsoft Outlook user to interact with an OnBase system through the familiar Outlook client. Provides users the ability to save e-mails and/or any associated attachments by simply dragging the e-mail to the "OnBase" folder. Users can also retrieve documents from the interface. | \$5,000.00  | 15% | \$4,250.00  |
| OLIPI1-10   | Integration for Microsoft Outlook 2010 | Allows a Microsoft Outlook user to interact with an OnBase system through the familiar Outlook client. Provides users the ability to save e-mails and/or any associated attachments by simply dragging the e-mail to the "OnBase" folder. Users can also retrieve documents from the interface. | \$5,000.00  | 15% | \$4,250.00  |
| OLIPI1-07   | Integration for Microsoft Outlook 2007 | Allows a Microsoft Outlook user to interact with an OnBase system through the familiar Outlook client. Provides users the ability to save e-mails and/or any associated attachments by simply dragging the e-mail to the "OnBase" folder. Users can also retrieve documents from the interface. | \$5,000.00  | 15% | \$4,250.00  |
| GRIP11      | Integration for Novell GroupWise       | Allows a Novell GroupWise user to interact with an OnBase system through the familiar GroupWise client. Provides users the ability to save e-mails and/or any associated attachments directly into OnBase. Users can also retrieve documents from the interface.                                | \$5,000.00  | 15% | \$4,250.00  |
| LNIP11      | Integration for IBM Notes              | Allows an IBM Notes user to interact with an OnBase system through the familiar Notes client. Provides users the ability to save e-mails and/or any associated attachments by simply dragging the e-mail to the "OnBase" folder. Users can also retrieve documents from the interface.          | \$5,000.00  | 15% | \$4,250.00  |
| SGIPW1      | Gateway Caching Server                 | Enables an organization with distributed locations to manage file caching geographically, providing increased retrieval times for documents such as PDF, OLE, and CAD drawings at the remote locations.   | \$5,000.00  | 15% | \$4,250.00  |
| OSIP11      | eCommerce Application                  | Provides the ability to search for and purchase documents from a web interface.   | \$15,000.00 | 15% | \$12,750.00 |

|        |  |   |        |     |        |
|--------|--|---|--------|-----|--------|
| GWIP11 | Public Sector Constituency Web Access (Workflow) | Provides constituents of a particular government agency web-based document viewing, and limited Workflow routing. Standard Client functionality will be restricted. This license is only for use by constituents in the public sector market. This license can NOT be used by any employee of any agency or anyone on that agency's internal network. Standard Client licenses must be purchased for agency employees. This license is required for each instance of an OnBase database within the agency. Constituent counts are determined by the most recent official Census results. Hyland reserves the right to increase license fees if the agency's constituent base increases. Pricing is per 500 constituents, per system/database. | \$5.00 | 15% | \$4.25 |
|--------|--|---|--------|-----|--------|

### Document and Content Capture Solutions

|        |  |  |            |     |            |
|--------|--|--|------------|-----|------------|
| ELIPI2 | Image-Only Multi-User Server             | Provides utilities, OnBase Configuration, Print Servers, and a License to use the copyrighted OnBase Database in a single instance, multi-user environment for only image documents.                 | \$2,000.00 | 15% | \$1,700.00 |
| ELIPC2 | Image-Only Concurrent Client             | Provides retrieval, viewing, printing, and management of image documents. Concurrent Clients have a minimum connection (lease) time of five (5) minutes.   | \$600.00   | 15% | \$510.00   |
| ELIPW2 | Image-Only Workstation Client            | Provides retrieval, viewing, printing, and management of image documents. The OnBase Web Client cannot use this license.   | \$300.00   | 15% | \$255.00   |
| ELIPN2 | Image-Only Named User Client             | Provides retrieval, viewing, printing, and management of image documents for a single named user. Either the OnBase Client or OnBase Web Client can use this license.                                | \$300.00   | 15% | \$255.00   |

| FOIPW1 | Front Office Scanning Module                   | Provides a simple and configurable scanning interface from within the OnBase Client or as a standalone scanning application. In a standalone installation, documents and index data are uploaded to OnBase via a connection to an OnBase Application Server or the OnBase Desktop. Indexing can be performed using Application Enabler (not included), HL7 datasets, or by manual entry. | \$1,000.00 | 15% | \$850.00   |

|          |   |  |             |     |             |
|----------|---|--|-------------|-----|-------------|
| ESIPW1   | Express Scanning                            | Simplifies the task of document scanning for any department. All options, scanner settings, and default index values are pre-designated. Supports any TWAIN, ISIS or Kofax compatible scanner as well as sweep functionality. Documents are imported or sent to a scan queue for further processing. | \$1,000.00  | 15% | \$850.00    |
| WSIPN1   | Web Scanning Named User                     | Provides low-volume, ad-hoc, and TWAIN based document scanning capability to the Web Client.   | \$500.00    | 15% | \$425.00    |
| IAIPW1   | Advanced Capture                            | Enables the automatic classification and indexing of scanned documents. Supports multiple languages and the processing of bi-tonal, grayscale and color images. Enables batch processing and also ad-hoc Automated Indexing from a select list.  | \$25,000.00 | 15% | \$21,250.00 |
| AZIPW1   | Ad-hoc Advanced Capture                     | Enables the automatic classification and indexing of scanned documents. Permits Automated Indexing of an individual document or group of documents from an OnBase select list.   | \$5,000.00  | 15% | \$4,250.00  |
| ICIPW4   | Intelligent Capture for AP                  | Evaluates invoice images using OCR technology to automatically identify documents and extract necessary data, eliminating the need for templates.  | \$7,500.00  | 15% | \$6,375.00  |
| ICAP50K  | Intelligent Capture for AP Volume Licensing | Price Per Image License, 50,000-99,999 Volume Level  | \$0.2000    | 15% | \$0.17      |
| ICAP100K | Intelligent Capture for AP Volume Licensing | Price Per Image License, 100,000-199,999 Volume Level  | \$0.1900    | 15% | \$0.16      |
| ICAP200K | Intelligent Capture for AP Volume Licensing | Price Per Image License, 200,000-299,999 Volume Level  | \$0.1500    | 15% | \$0.13      |
| ICAP300K | Intelligent Capture for AP Volume Licensing | Price Per Image License, 300,000-399,999 Volume Level  | \$0.1100    | 15% | \$0.09      |
| ICAP400K | Intelligent Capture for AP Volume Licensing | Price Per Image License, 400,000-499,999 Volume Level  | \$0.0908    | 15% | \$0.08      |
| ICAP500K | Intelligent Capture for AP Volume Licensing | Price Per Image License, 500,000-599,999 Volume Level  | \$0.0817    | 15% | \$0.07      |
| ICAP600K | Intelligent Capture for AP Volume Licensing | Price Per Image License, 600,000-699,999 Volume Level  | \$0.0783    | 15% | \$0.07      |
| ICAP700K | Intelligent Capture for AP Volume Licensing | Price Per Image License, 700,000-799,999 Volume Level  | \$0.0755    | 15% | \$0.06      |
| ICAP800K | Intelligent Capture for AP Volume Licensing | Price Per Image License, 800,000-899,999 Volume Level  | \$0.0731    | 15% | \$0.06      |
| ICAP900K | Intelligent Capture for AP Volume Licensing | Price Per Image License, 900,000-999,999 Volume Level  | \$0.0711    | 15% | \$0.06      |

| ICAP20000K | Intelligent Capture for AP Volume Licensing | Price Per Image License, 20,000,000-24,999,999 Volume Level   | \$0.0314    | 15% | \$0.03      |
| ICAP25000K | Intelligent Capture for AP Volume Licensing | Price Per Image License, 25,000,000+ Volume Level   | \$0.0306    | 15% | \$0.03      |
| ARIPW1     | Automated Redaction                         | Utilizes OCR character and pattern analysis or configured templates to evaluate document contents for information or areas on the document that need to be obscured and made unreadable. Documents are placed for review before being permanently redacted so that private or confidential information cannot be viewed on the image documents. | \$20,000.00 | 15% | \$17,000.00 |
| BSIPW1     | Bar Code Recognition Server                 | Enables centralized bar code recognition, by allowing a single workstation to perform bar code processing on image batches that were scanned at many scanning workstations.   | \$5,000.00  | 15% | \$4,250.00  |

|        |                                    |  |             |     |             |
|--------|------------------------------------|--|-------------|-----|-------------|
| BCIPI1 | Bar Code Generator                 | Generates 3-of-9 bar code sheets from manual keyword entry (in standalone mode) or from keyword and document type information scraped from the line-of-business application screen (when used with Application Enabler). In standalone mode, the Bar Code Generator connects to the OnBase database and allows the user to select a Document Type, at which point a keyword list is displayed for manual entry. At completion of manual entry, the user can trigger the printing of a 3-of-9 bar code sheet with the Document Type and Keywords encoded on it. | \$2,000.00  | 15% | \$1,700.00  |
| MTIPI1 | Merchant Capture                   | Enables corporate and/or public sector organizations to benefit from The Check Clearing for the 21st Century Act (Check 21), in conjunction with their depository financial institution, by automating the paper-based, physical deposit process.  | \$10,000.00 | 15% | \$8,500.00  |
| EBIPI1 | Image Segment Archiver             | Provides the ability to divide an image in a scan queue into multiple OnBase documents by allowing the user to select sections of the image and archive each selected section to a separate OnBase document.   | \$4,000.00  | 15% | \$3,400.00  |
| PTIPC1 | Virtual Print Driver               | Provides a method to capture, index and store the print stream from any printable application and store the information as a TIFF image within the OnBase document repository. This is a single instance license.  | \$5,000.00  | 15% | \$4,250.00  |
| CLIPW1 | COLD/ERM                           | Processes, indexes, and stores host/legacy application generated text files. Supports ASCII, PCL, AFP, PDF and DJDE natively.  | \$10,000.00 | 15% | \$8,500.00  |
| ACIPW1 | Advanced COLD/ERM                  | Processes, indexes, and stores host/legacy application generated text files. Supports ASCII, PCL, AFP and DJDE natively. Uses multi-threaded technology with specific hardware requirements to maximize processing speeds.   | \$35,000.00 | 15% | \$29,750.00 |
| DPIPW1 | Document Import Processor          | Imports documents (scanned or other) and their respective index information. This module is often used in conjunction with third party forms processing software as well as data conversion utilities.   | \$5,000.00  | 15% | \$4,250.00  |
| ADIPW1 | Advanced Document Import Processor | Imports documents (scanned or other) and their respective index information. This module is often used in conjunction with third party forms processing software as well as data conversions utilities. Uses multi-threaded technology with specific hardware requirements to maximize processing speeds.  | \$20,000.00 | 15% | \$17,000.00 |

|        |                                       |  |             |     |             |
|--------|---------------------------------------|--|-------------|-----|-------------|
| TYIPI1 | Directory Import Processor            | Allows users to import documents residing in a network directory structure. The processor uses a configurable XML file to determine the document types and keyword values for the documents residing in the process directories. Could be utilized to archive documents that are scanned by a MFP device into network directories.                                     | \$5,000.00  | 15% | \$4,250.00  |
| DXIPW1 | XML Index Document Import Processor   | Imports documents (scanned or other) and their respective index information via an XML Index file.   | \$5,000.00  | 15% | \$4,250.00  |
| XMIPW1 | XML Tag Import Processor              | Processes, indexes, and stores XML format files.   | \$7,000.00  | 15% | \$5,950.00  |
| RPIPW1 | Remittance Processor                  | Provides the ability to identify remittance information (check images, remittance slips, and financial information) from a remittance text file and store the information within the OnBase document repository.   | \$20,000.00 | 15% | \$17,000.00 |
| APIPW1 | Advanced Remittance Processor         | Provides the ability to identify remittance information (check images, remittance slips, and financial information) from a remittance text file and store the information within the OnBase document repository. Uses multi-threaded technology with specific hardware requirements to maximize processing speeds.   | \$40,000.00 | 15% | \$34,000.00 |
| PCIPW1 | PCL Input Filter                      | Works in conjunction with OnBase COLD / ERM to process and store PCL data streams, enabling stored documents to retain original formatting features.   | \$3,000.00  | 15% | \$2,550.00  |
| AFIPW1 | AFP Input Filter                      | Works in conjunction with OnBase COLD / ERM to process and store AFP data streams, enabling stored documents to retain original formatting features.   | \$10,000.00 | 15% | \$8,500.00  |
| DJIPW1 | DJDE Input Filter                     | Works in conjunction with OnBase COLD / ERM to process and store DJDE data streams, enabling stored documents to retain original formatting features.  | \$5,000.00  | 15% | \$4,250.00  |
| PIIPW1 | PDF Input Filter                      | Processes, indexes, and stores PDF documents. Allows for the extraction of index data from the PDF. Allows for the option of converting and storing the PDF as a TIFF (multi-page TIFF when applicable). Due to the variety of PDF formats, Hyland Software must verify that a PDF document can be processed prior to selling this module. Please make no assumptions. | \$7,500.00  | 15% | \$6,375.00  |
| EAIPI1 | E-mail Archive for Microsoft Exchange | E-mail Archive captures and stores all e-mail sent or received in a Microsoft Exchange environment; utilizing the native message journaling capability. Users with the appropriate permissions can search for an e-mail correspondence in the archive based on metadata or perform a full-text search on content.  | \$25.00     | 15% | \$21.25     |

|           |   |   |             |     |             |
|-----------|---|---|-------------|-----|-------------|
| SSIPW1    | Mailbox Importer                                      | Allows configuration of OnBase to automatically import new messages from an email server that supports the IMAP or POP3 protocol. Through the definition of conditions and rules, email messages become documents and each document is associated with a Document Type. | \$10,000.00 | 15% | \$8,500.00  |
| MAIPI1    | Archive Services for Microsoft SharePoint             | Allows users to archive documents from SharePoint document libraries to OnBase. Archival can be ad-hoc, event-driven, or scheduled based on pre-defined rules.  | \$5,000.00  | 15% | \$4,250.00  |
| FOIPI1    | 132 Column Font (1 - 100 Workstations)                | Provides the ability to view a complete 132-character wide COLD report in 800 x 600 screen resolution without having to scroll right and left to find the information.  | \$2,000.00  | 15% | \$1,700.00  |
| FOIPI2    | 132 Column Font (101+ Workstations)                   | Provides the ability to view a complete 132-character wide COLD report in 800 x 600 screen resolution without having to scroll right and left to find the information.  | \$5,000.00  | 15% | \$4,250.00  |
| FSIPI1-RF | Integration for SoftLinx Replifax                     | Provides the ability to specify how fax documents are configured for automatic import into OnBase upon receipt at the ReplixFax Server.   | \$6,000.00  | 15% | \$5,100.00  |
| FSIPI1-BF | Integration for Biscom FAXCOM                         | Provides the ability to specify how fax documents are configured for automatic import into OnBase upon receipt at the FAXCOM Server.  | \$6,000.00  | 15% | \$5,100.00  |
| FSIPI1-EF | Integration for Esker Fax                             | Provides the ability to specify how fax documents are configured for automatic import into OnBase upon receipt at the Esker Fax Server.   | \$6,000.00  | 15% | \$5,100.00  |
| RFIPW1    | Integration for OpenText Fax Server, RightFax Edition | Provides the ability to specify how fax documents are configured for automatic import into OnBase upon receipt at the RightFax Server.  | \$6,000.00  | 15% | \$5,100.00  |
| ECIPW1    | Integration for eCopy ShareScan                       | Enables an organization to use a choice of supported eCopy networked scanners or digital copiers to capture document images from eCopy ShareScan OP and route them directly into the OnBase system. Contact eCopy for the most current list of supported devices.       | \$1,200.00  | 15% | \$1,020.00  |
| EEIPI1    | Enterprise Integration for eCopy ShareScan            | Integration for eCopy Site License  | \$50,000.00 | 15% | \$42,500.00 |
| HPIPW1    | Integration for HP Connect (1 - 10)                   | Enables an organization to use a choice of supported HP MFP devices to capture document images and route them directly into the OnBase system. Contact HP for the most current list of supported devices.   | \$400.00    | 15% | \$340.00    |
| HPIPW2    | Integration for HP Connect (11 - 50)                  | Enables an organization to use a choice of supported HP MFP devices to capture document images and route them directly into the OnBase system. Contact HP for the most current list of supported devices.   | \$350.00    | 15% | \$297.50    |

|        |   |   |             |     |             |
|--------|---|---|-------------|-----|-------------|
| HPIPW3 | Integration for HP Connect (51 - 100)                 | Enables an organization to use a choice of supported HP MFP devices to capture document images and route them directly into the OnBase system. Contact HP for the most current list of supported devices.                     | \$300.00    | 15% | \$255.00    |
| HPIPW4 | Integration for HP Connect (101+)                     | Enables an organization to use a choice of supported HP MFP devices to capture document images and route them directly into the OnBase system. Contact HP for the most current list of supported devices.                     | \$250.00    | 15% | \$212.50    |
| HPIPWE | Integration for HP Connect (Enterprise)               | Enables an organization to use a choice of supported HP MFP devices to capture document images and route them directly into the OnBase system. Contact HP for the most current list of supported devices.                     | \$50,000.00 | 15% | \$42,500.00 |
| OSIPW1 | Integration for Sharp MFP (1 - 10)                    | Enables an organization to use a choice of supported Sharp MFP devices to capture document images and route them directly into the OnBase system. Contact Sharp for the most current list of supported devices.               | \$400.00    | 15% | \$340.00    |
| OSIPW2 | Integration for Sharp MFP (11 - 50)                   | Enables an organization to use a choice of supported Sharp MFP devices to capture document images and route them directly into the OnBase system. Contact Sharp for the most current list of supported devices.               | \$300.00    | 15% | \$255.00    |
| OSIPW3 | Integration for Sharp MFP (unlimited)                 | Enables an organization to use a choice of supported Sharp MFP devices to capture document images and route them directly into the OnBase system. Contact Sharp for the most current list of supported devices.               | \$25,000.00 | 15% | \$21,250.00 |
| KCIPW1 | Integration for KYOCERA (1 - 10)                      | Enables an organization to use a choice of supported KYOCERA MFP devices to capture document images and route them directly into the OnBase system. Contact KYOCERA for the most current list of supported devices.           | \$400.00    | 15% | \$340.00    |
| KCIPW2 | Integration for KYOCERA (11 - 50)                     | Enables an organization to use a choice of supported KYOCERA MFP devices to capture document images and route them directly into the OnBase system. Contact KYOCERA for the most current list of supported devices.           | \$300.00    | 15% | \$255.00    |
| KCIPWE | Integration for KYOCERA (unlimited)                   | Enables an organization to use a choice of supported KYOCERA MFP devices to capture document images and route them directly into the OnBase system. Contact KYOCERA for the most current list of supported devices.           | \$25,000.00 | 15% | \$21,250.00 |
| KMIPW1 | Integration for Konica Minolta bizhub MarketPlace MFP | Enables an organization to use a choice of supported Konica Minolta devices to capture document images and route them directly into the OnBase system. Contact Konica Minolta for the most current list of supported devices. | \$200.00    | 15% | \$170.00    |

|        |  |   |             |     |             |
|--------|--|---|-------------|-----|-------------|
| KDIPW1 | Integration for Konica Minolta Dispatcher Phoenix      | Provides the ability to archive documents into OnBase from any networked Dispatcher Phoenix enabled multifunction scan device. Enables a user to assign documents into OnBase Document Types, assign OnBase Keywords and route the documents to the OnBase system.  | \$750.00    | 15% | \$637.50    |
| NSIPW2 | Integration for the ScanSnap Network fi-6010N iScanner | Provides a complete solution for scanning documents across the internet, directly into a destination OnBase system. This provides a simple and easy to use touch screen interface that provides distributed scanning and indexing of critical business documents. Documents arrive at their intended destination faster and are already imaged and indexed. | \$2,000.00  | 15% | \$1,700.00  |
| EKIPI1 | Connector for Esker DeliveryWare                       | Allows users to utilize the OnBase repository for storing documents captured with Esker DeliveryWare by creating a Universal Output Connector to which Esker DeliveryWare can route business documents.   | \$15,000.00 | 15% | \$12,750.00 |
| ELIPI1 | COLD/ERM-Only Multi-User Server                        | Provides utilities, OnBase Configuration, Basic Text Search and Print Servers, and a License to use the copyrighted OnBase Database in a single instance, multi-user environment for only COLD (text) documents.  | \$2,000.00  | 15% | \$1,700.00  |
| ELIPC1 | COLD/ERM-Only Concurrent Client                        | Provides retrieval, viewing, printing, and management of COLD documents. Concurrent Clients have a minimum connection (lease) time of five (5) minutes. Either the OnBase Client or OnBase Web Client can use this license.   | \$600.00    | 15% | \$510.00    |
| ELIPW1 | COLD/ERM-Only Workstation Client                       | Provides retrieval, viewing, printing, and management of documents. The OnBase Web Client cannot use this license.  | \$300.00    | 15% | \$255.00    |
| ELIPN1 | COLD/ERM-Only Named User Client                        | Provides retrieval, viewing, printing, and management of documents for a single named user. Either the OnBase Client or OnBase Web Client can use this license.   | \$300.00    | 15% | \$255.00    |
| DIIPW1 | Production Document Imaging (Kofax or TWAIN)           | Scans (digitizes) paper documents using Kofax or TWAIN compatible devices. Advanced features include distributed capture and indexing, image enhancement, bar code recognition (Kofax), blank page separation and auto-enabled indexing.  | \$5,000.00  | 15% | \$4,250.00  |
| DIIPW2 | Production Document Imaging (Kofax or TWAIN) (2+)      | Scans (digitizes) paper documents using Kofax or TWAIN compatible devices. Advanced features include distributed capture and indexing, image enhancement, bar code recognition (Kofax), blank page separation and auto-enabled indexing.  | \$3,000.00  | 15% | \$2,550.00  |

| WVIPI1-13 | WorkView Integration for Microsoft Outlook 2013     | Enables users to view WorkView data related to a selected e-mail within Microsoft Outlook, execute WorkView filters, and full-text search WorkView objects/data (with the Context Search Framework license) in order to gather additional context and information related to a message.  | \$10,000.00 | 15% | \$8,500.00 |
| WVIPI1    | WorkView Integration for Microsoft Outlook 2010     | Enables users to view WorkView data related to a selected e-mail within Microsoft Outlook, execute WorkView filters, and full-text search WorkView objects/data (with the Context Search Framework license) in order to gather additional context and information related to a message.  | \$10,000.00 | 15% | \$8,500.00 |
| WOIPI1    | WorkView Integration for Microsoft Outlook 2007     | Enables users to view WorkView data related to a selected e-mail within Microsoft Outlook, execute WorkView filters, and full-text search WorkView objects/data (with the Context Search Framework license) in order to gather additional context and information related to a message.  | \$10,000.00 | 15% | \$8,500.00 |
| CFIPI1    | Context Search Framework                            | Context Search Framework provides a simple interface that makes it easy to full-text search across the data stored in one or more of your WorkView   Case Manager business applications. Administrators can define search scopes that can include one or more record types (classes) and assign them to specific OnBase user groups. End users can then perform simple to advanced searches on data values to quickly and easily locate relevant data records (objects). | \$10,000.00 | 15% | \$8,500.00 |

|        |   |   |             |     |             |
|--------|---|---|-------------|-----|-------------|
| CHIP11 | OnBase Checklists for Process Control   | Provides automatic generation of electronic checklists and assignment of tasks to specific individuals. Allows users to share feedback and flag checklists for review. Provides visibility into checklist status to ensure consistent and timely process completion.  | \$30,000.00 | 15% | \$25,500.00 |
| FMIP11 | E-Forms                                 | Provides the ability to complete, index, and store HTML based documents (forms) from the OnBase Client interface using an HTML form template.   | \$10,000.00 | 15% | \$8,500.00  |
| FFIP11 | Integration for FormFast                | Captures and saves data from FormFast directly into OnBase, and allows pre-population of FormFast generated forms with data stored in OnBase.   | \$10,000.00 | 15% | \$8,500.00  |
| FFIP12 | Integration for FormFast Enterprise     | Captures and saves data from FormFast directly into OnBase, and allows pre-population of FormFast generated forms with data stored in OnBase.   | \$35,000.00 | 15% | \$29,750.00 |
| AXIP11 | Integration for Access Forms            | Captures and saves data from Access Forms directly into OnBase, and allows pre-population of Access Forms generated forms with data stored in OnBase.   | \$10,000.00 | 15% | \$8,500.00  |
| AXIP12 | Integration for Access Forms Enterprise | Captures and saves data from Access Forms directly into OnBase, and allows pre-population of Access Forms generated forms with data stored in OnBase.   | \$35,000.00 | 15% | \$29,750.00 |
| BRIP11 | Business Rules Engine                   | Allows organizations to react quickly to changing business conditions, adjusting their approach to markets or adding new lines of business. The Business Rules Engine is designed to allow managers to create business rules which can contain parameterized values. This allows shift supervisors to adjust threshold values as needed to account for dynamic business environments.                                 | \$20,000.00 | 15% | \$17,000.00 |
| BMIP11 | Business Process Modeling               | Used to import existing Workflow life cycles or create entirely new ones to identify potential bottlenecks, analyze actual or expected productivity and run what-if scenarios to test proposed modifications.   | \$10,000.00 | 15% | \$8,500.00  |
| TLIP11 | BPM Tools Suite                         | Provides users with BPM tools at a bundled price. Includes: Business Process Modeling (BMIP11), Business Activity Monitoring (BAIP11), Report Services (RPIP11), Extractor for Data Warehouse (XTIP11).   | \$65,000.00 | 15% | \$55,250.00 |
| BNIP11 | BPNM Modeler                            | Allows technical and/or business analysts to model business processes, end to end, including all interactions with humans, systems and content. Utilizes the Business Process Model and Notation (BPMN) standard. Provides output of process documentation and generates XML according to the Business Process Execution Language (BPEL) standard, which can be exported and executed by a BPEL Orchestration Engine. | \$5,000.00  | 15% | \$4,250.00  |

| PDFIPI1                              | PDF Framework   | Enables PDF features for dependent products as referenced in the OnBase Requirements section for that product.  | \$3,000.00  | 15% | \$2,550.00 |
| WTIPI1-AS                            | Conversion Framework for Aspose                         | Enables users who do not have Microsoft Office to view required documents and convert Word documents to non-editable Tiff images or PDF files.  | \$3,000.00  | 15% | \$2,550.00 |
| WTIPI1                               | Conversion from Microsoft Office to Image Framework     | Enables users who do not have Microsoft Office to view required documents and convert Word documents to non-editable Tiff images or PDF files.  | \$3,000.00  | 15% | \$2,550.00 |
| OCR Searching and Indexing Solutions |   |   |             |     |            |
| IDIPI1                               | Full-Text Indexing Server for Autonomy IDOL             | Provides integration with Autonomy IDOL to provide advanced Full-Text searches for words or phrases that exist within documents stored in OnBase. These words or phrases can exist in COLD documents, text renditions of image documents (OCR'd images), and many 3rd party application documents. Can perform fuzzy searches, wildcard searches, stemming searches, thesaurus searches, and searches combining full-text and keywords on document types. | \$10,000.00 | 15% | \$8,500.00 |
| IDIPC1                               | Full-Text Indexing Concurrent Client for Autonomy IDOL  | Provides the ability to retrieve full-text data stored in Autonomy IDOL Full-Text collections. Autonomy IDOL Full-Text can index OCR images, COLD text documents, Adobe PDF documents, Microsoft Office documents, WordPerfect documents, HTML documents and many others.   | \$300.00    | 15% | \$255.00   |
| IDIPW1                               | Full-Text Indexing Workstation Client for Autonomy IDOL | Provides the ability to retrieve full-text data stored in Autonomy IDOL Full-Text collections. Autonomy IDOL Full-Text can index OCR images, COLD text documents, Adobe PDF documents, Microsoft Office documents, WordPerfect documents, HTML documents and many others.   | \$150.00    | 15% | \$127.50   |
| IDIPN1                               | Full-Text Indexing Named User Client for Autonomy IDOL  | Provides the ability to retrieve full-text data stored in Autonomy IDOL Full-Text collections. Autonomy IDOL Full-Text can index OCR images, COLD text documents, Adobe PDF documents, Microsoft Office documents, WordPerfect documents, HTML documents and many others. Valid for a single named user logged into one workstation at a time.  | \$150.00    | 15% | \$127.50   |

| FPIPW1                                 | Full-Page OCR                                    | Provides server-based conversion of images to text. OCR on the Data Capture Server allows for multi-threaded processing with the licensing of multiple cores. Supports multiple languages, processing of bi-tonal, grayscale and color images, and creation of multiple output formats (ASCII text, Adobe PDF, HTML or Microsoft Word). Enables batch processing and ad-hoc document OCR. | \$1,500.00  | 15% | \$1,275.00  |
| OCIPW1                                 | Batch OCR  | Converts images to text in order to facilitate text searching and/or full text indexing. Supports multiple languages, processing of bi-tonal, grayscale and color images, and creation of multiple output formats (ASCII text, Adobe PDF, HTML or Microsoft Word). Enables batch processing and also ad-hoc document OCR from a select list.  | \$1,500.00  | 15% | \$1,275.00  |
| ALOIPW1                                | Asian Language OCR                               | Provides the ability to OCR Asian language material.  | \$1,000.00  | 15% | \$850.00    |
| AOIPW1                                 | Ad-hoc Document OCR                              | Converts images to text in order to facilitate text searching and/or full-text indexing. Permits OCR of an individual document or group of documents from an OnBase select list.  | \$500.00    | 15% | \$425.00    |
| IRIPI1                                 | ICR Support for OCR and Advanced Capture         | Enables the recognition/extraction of handwritten numerals, text and punctuation characters in conjunction with the Batch OCR or Automated Indexing products.   | \$5,000.00  | 15% | \$4,250.00  |
| AHIPW1                                 | ACH Generator                                    | Creates an Automated Clearing House (ACH) file that conforms to the NACHA format for Electronic Funds Transfer (EFT). Also, includes a pre-note test file feature and a check consolidation feature that combines multiple payments into a single transaction.  | \$20,000.00 | 15% | \$17,000.00 |
| OMIPI1                                 | OMR Marks Generator                              | Custom DLL to generate OMR marks for automatic mail stuffing machinery to be used with the OnBase Image Statements module.  | \$3,000.00  | 15% | \$2,550.00  |
| <b>Electronic Signatures Solutions</b> |  |   |             |     |             |
| DXIPI1                                 | Integration for DocuSign eSignature              | Allows OnBase users to upload documents directly to DocuSign, to be securely sent to recipients and signed electronically from any device. Email notifications alert recipients of documents requiring their signatures. Once completed, signed documents are imported back into OnBase to be stored.   | \$15,000.00 | 15% | \$12,750.00 |
| NCIPI1                                 | Integration for CIC SignatureOne Ceremony Server | Allows OnBase users to upload documents to the CIC system and send email notifications inviting the signers to electronically sign the documents. Users sign with a click of the mouse, signature pad or mobile device. Once  | \$15,000.00 | 15% | \$12,750.00 |

|                             |                                 |  |             |     |             |
|-----------------------------|---------------------------------|--|-------------|-----|-------------|
|                             |                                 | completed, the signed document is imported back into OnBase to be stored.  |             |     |             |
| PWIP11                      | Signature Pad Interface (TWAIN) | Allows the real-time signing of TIFF images and OnBase E-Forms within the OnBase Client. The original image is altered with the signature that is scratched on a Topaz signature pad device.   | \$6,000.00  | 15% | \$5,100.00  |
| DGIPN1                      | Digital Signatures              | Allows users to digitally approve documents within the OnBase system via certificate-based signing. Also, allows signed documents to be routed in Workflow based on the presence or absence of signatures.   | \$200.00    | 15% | \$170.00    |
| DCIPW1                      | Digital Signing Server          | Allows server-based digital approval of documents within OnBase via a single certificate-based signature.  | \$25,000.00 | 15% | \$21,250.00 |
| Document Management Modules |                                 |  |             |     |             |
| DMIP11                      | EDM Services                    | Provides the ability to store and manage revisions of documents generated by Microsoft Office and other file formats. Includes multiple file import, revision control, version control, document commenting, checkin/checkout, automatic upload and synchronization of revisions, document templates, and the Briefcase. | \$5,000.00  | 15% | \$4,250.00  |
| ADIPI1                      | Document Composition            | Allows for Ad-hoc creation of form letters using Microsoft Word templates. The content of the created document is a combination of merged data form templates, E-Forms, Workflow properties, web services, database queries and nested sub-templates.  | \$20,000.00 | 15% | \$17,000.00 |
| BDIP11                      | Enterprise Document Composition | Allows for Batch and Ad-Hoc creation of form letters using Microsoft Word templates. The content of the created document is a combination of merged data form templates, E-Forms, Workflow properties, web services, database queries and nested sub-templates.  | \$50,000.00 | 15% | \$42,500.00 |
| SCIPW1                      | Statement Composition           | Provides customers the ability to create better looking, more functional and customer data-specific statements. Through a point-and-click, menu-driven configuration, the user defines what data to include, the data layout and formatting options, and graphical elements-logos, pictures, charts and messaging.       | \$10,000.00 | 15% | \$8,500.00  |

|--------|---|---|-------------|-----|-------------|
| ISIP1  | Image Statements (Per Block, 1-10,000 Statements per Month Sold in blocks of 1,000).      | Prints primary documents (usually statements) with supporting documents in a batch process or on an ad hoc basis. The number of statements processed in a month determines the required licensing. Sold in blocks of 1,000.Example: Customer purchases 15,000 statements. The first 10,000 statements are purchased from tier 1. The next 5,000 statements are purchased at tier 2. Future licenses purchased by Customer begin at the tier where their last purchase was made. | \$1,500.00  | 15% | \$1,275.00  |
| ISIP2  | Image Statements (Per Block, 10,000-50,000 Statements per Month Sold in blocks of 1,000). | Prints primary documents (usually statements) with supporting documents in a batch process or on an ad hoc basis. The number of statements processed in a month determines the required licensing. Sold in blocks of 1,000.Example: Customer purchases 15,000 statements. The first 10,000 statements are purchased from tier 1. The next 5,000 statements are purchased at tier 2. Future licenses purchased by Customer begin at the tier where their last purchase was made. | \$1,000.00  | 15% | \$850.00    |
| ISIP3  | Image Statements (Per Block, 50,001+ Statements per Month Sold in blocks of 1,000).       | Prints primary documents (usually statements) with supporting documents in a batch process or on an ad hoc basis. The number of statements processed in a month determines the required licensing. Sold in blocks of 1,000.Example: Customer purchases 15,000 statements. The first 10,000 statements are purchased from tier 1. The next 5,000 statements are purchased at tier 2. Future licenses purchased by Customer begin at the tier where their last purchase was made. | \$500.00    | 15% | \$425.00    |
| PDIPW1 | Print Distribution  | Provides scheduled print back services for remote locations.  | \$3,000.00  | 15% | \$2,550.00  |
| DDIP1  | Document Distribution   | Automatically delivers previously rendered Image Statements electronically to designated recipients via fax, e-mail, and CD or web presentment. Sold in blocks of 250 with a minimum initial purchase of 4 blocks (1,000).To determine price: Recipients x Fee = Price Note: Price is not a monthly fee or annual fee. The formula determines the perpetual cost of the license.  | \$1,000.00  | 15% | \$850.00    |
| COIP1  | Collaboration   | Provides a common workspace for users and teams to share documents and WorkView objects, and allows for threaded discussions around that information. Synchronous collaboration is provided through integration with Citrix GoTo Meeting.   | \$10,000.00 | 15% | \$8,500.00  |
| DKTIP1 | Document Knowledge Transfer & Compliance  | Provides the ability for organizations to distribute required reading documents to the workforce and assess employee comprehension for compliance and regulatory  | \$16,000.00 | 15% | \$13,600.00 |

|                                  |  |   |             |     |             |

| OIIPW3-10 | Office Business Application for 2010 (201 - 400)              | Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.  | \$30.00     | 15% | \$25.50     |
| OIIPW4-10 | Office Business Application for 2010 (site license 401+)      | Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.  | \$15,000.00 | 15% | \$12,750.00 |
| OIIPC1-10 | Office Business Application for 2010 (Concurrent) (1 - 100)   | Intended for users in a Citrix or Terminal Services environment. Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content. | \$100.00    | 15% | \$85.00     |
| OIIPC2-10 | Office Business Application for 2010 (Concurrent) (101 - 200) | Intended for users in a Citrix or Terminal Services environment. Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content. | \$80.00     | 15% | \$68.00     |
| OIIPC3-10 | Office Business Application for 2010 (Concurrent) (201 - 400) | Intended for users in a Citrix or Terminal Services environment. Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content. | \$60.00     | 15% | \$51.00     |
| OIIPW1-07 | Office Business Application for 2007 (1 - 100)                | Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.  | \$50.00     | 15% | \$42.50     |
| OIIPW2-07 | Office Business Application for 2007 (101 - 200)              | Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.  | \$40.00     | 15% | \$34.00     |

|           |   |   |             |     |             |

| WSPIPI1   | Web Services Publishing                                       | Allows for point and click creation of standard web services tailored for an organization's OnBase solution, providing a Web API for use by external users or third party applications. In addition to this license, which allows users to publish web services, Web Services Publishing requires a \$0.10 fee Per Executed Web Service Call. A built-in reporting mechanism will relay monthly usage data to Hyland for translation into a monthly billing amount. | \$5,000.00  | 15% | \$4,250.00  |
| WSPIPI1-C | Web Services Publishing Executed Web Service Call             | Web Services Publishing requires a \$0.10 fee Per Executed Web Service Call. A built-in reporting mechanism will relay monthly usage data to Hyland for translation into a monthly billing amount for the sum of  | \$0.10      | 15% | \$0.09      |

|        |  |  |             |     |            |
|--------|--|--|-------------|-----|------------|
|        |  | all Executed Web Service Calls within the given month.   |             |     |            |
| UIPI1  | Unity Integration Toolkit  | Provides an object-oriented API that exposes key OnBase functionality. Unity contains functionality to query, store, retrieve and modify documents and metadata as well as other document-centric features such as notes. The Unity Integration Toolkit is only for integration to OnBase from external applications or custom applications that exist outside of OnBase Automation. A separate OnBase Automation license is required for automation integrations. In addition to the Unity Integration Toolkit, a Unity Automation license is granted to any customer or partner that has at least one person with a current OnBase API Certification. The Unity Automation allows access to Unity through OnBase Automation configured through the OnBase Configuration module. OnBase Automation is any extension to OnBase configured through OnBase Configuration such as Workflow or WorkView scripting, but includes any automation code configured through the Configuration module. | \$10,000.00 | 15% | \$8,500.00 |
| APIPQ1 | Query API (Initial 500 queries/hour) (Thick Client)                  | Provides the ability to query for documents within the OnBase repository from third party applications. Note: This is NOT Web Server Client licensing. Query API is only for External User Access. Access for Internal Users should be granted through the purchase of standard client Licensing. If you purchase the initial tier of either OnBase Client or OnBase Core you enjoy the second tier of either on any additional purchase.  | \$10,000.00 | 15% | \$8,500.00 |
| APIPQ2 | Query API (2+) (Additional block of 500 queries/hour) (Thick Client) | Provides the ability to query for documents within the OnBase repository from third party applications. Note: This is NOT Web Server Client licensing. Query API is only for External User Access. Access for Internal Users should be granted through the purchase of standard client Licensing. If you purchase the initial tier of either OnBase Client or OnBase Core you enjoy the second tier of either on any additional purchase.  | \$8,000.00  | 15% | \$6,800.00 |
| APIPQ3 | Query API (Initial 500 queries/hour) (Core)                          | Provides the ability to query for documents within the OnBase repository from third party applications. Note: This is NOT Web Server Client licensing. Query API is only for External User Access. Access for Internal Users should be granted through the purchase of standard client   | \$10,000.00 | 15% | \$8,500.00 |

|        |  |   |             |     |             |
|--------|--|---|-------------|-----|-------------|
|        |  | Licensing. If you purchase the initial tier of either OnBase Client or OnBase Core you enjoy the second tier of either on any additional purchase.  |             |     |             |
| APIPQ4 | Query API (2+) (Additional block of 500 queries/hour) (Core) | Provides the ability to query for documents within the OnBase repository from third party applications. Note: This is NOT Web Server Client licensing. Query API is only for External User Access. Access for Internal Users should be granted through the purchase of standard client Licensing. If you purchase the initial tier of either OnBase Client or OnBase Core you enjoy the second tier of either on any additional purchase.   | \$8,000.00  | 15% | \$6,800.00  |
| ARIP11 | Archival API   | Provides the ability to archive documents from third party systems into the OnBase system.  | \$5,000.00  | 15% | \$4,250.00  |
| ITIP11 | Integration for Trinisys                                     | Allows for the archiving of data and documents in to the OnBase system through the Trinisys platform.   | \$5,000.00  | 15% | \$4,250.00  |
| RVIP11 | Reverse API  | Provides the ability for OnBase to retrieve information or documents from third party applications.   | \$10,000.00 | 15% | \$8,500.00  |
| SAIP11 | Connector for Use with SAP ArchiveLink                       | The HTTP Content Server interface allows an SAP system to perform content management functions against the OnBase system. Using this interface, SAP systems may use OnBase as its repository for storage and retrieval of archived documents. This base component is required in order to use: Bar Code Import for use with SAP ArchiveLink, Print List and Data Archive for use with SAP ArchiveLink, Business Indexing Connector for use with SAP ArchiveLink, Imaging iViews for use with SAP ArchiveLink. | \$30,000.00 | 15% | \$25,500.00 |
| SBIP11 | Bar Code Import for use with SAP ArchiveLink                 | The Bar Code component of SAP ArchiveLink allows an OnBase scanning application to register scanned documents with SAP software for later storage linking of inbound documents via barcode.'  | \$10,000.00 | 15% | \$8,500.00  |
| SDIP11 | Print List and Data Archive for use with SAP ArchiveLink     | Uses SAP ArchiveLink to import SAP ArchiveLink print lists, data archive files and imaging documents. Archiving data contained in the SAP system will reduce the storage requirements of the SAP system, improve response times and reduce the time to backup, recover and upgrade the SAP system.  | \$10,000.00 | 15% | \$8,500.00  |
| SIIP11 | Business Indexing Connector for use with SAP ArchiveLink     | Used to automatically index OnBase documents in OnBase that have been related to business objects in a SAP system. This makes it possible to use OnBase to search for the documents related to any business object in a SAP system. This module also keeps the keywords   | \$15,000.00 | 15% | \$12,750.00 |

|                                  |   |   |             |     |            |
|----------------------------------|---|---|-------------|-----|------------|
|                                  |   | on documents in OnBase synchronized with the SAP system.  |             |     |            |
| IVIPI1                           | Imaging iViews for use with SAP ArchiveLink         | Used to extend SAP ArchiveLink functionality to applications that are powered by SAP NetWeaver Portal. Functionality includes the ability to insert an iView into an SAP NetWeaver Portal application to attach or retrieve documents linked with the Connector for use with SAP ArchiveLink.           | \$10,000.00 | 15% | \$8,500.00 |
| XIIP11                           | Integration for SAP Exchange Infrastructure (XI)    | Provides support for the OnBase Integration for SAP ArchiveLink and associated products through the SAP Exchange Infrastructure.  | \$5,000.00  | 15% | \$4,250.00 |
| SharePoint Integration Solutions |   |   |             |     |            |
| SPIPI1                           | Web Parts for Microsoft SharePoint                  | Enables Microsoft SharePoint users to configure, view, and interact with all available StatusView objects from within a SharePoint web page.  | \$5,000.00  | 15% | \$4,250.00 |
| SLIPI1                           | Content Connector - Microsoft SharePoint            | Enables the automatic linking of documents, batch processed into OnBase, to related items and records managed in SharePoint. Based upon rules defined by a SharePoint site owner, relevant OnBase content is made accessible as item list attachments and document library items.                       | \$3,000.00  | 15% | \$2,550.00 |
| SSIPI1                           | Ad-Hoc Scanning Server - SharePoint                 | Enables users to scan document images directly through SharePoint as item list attachments and document library items. Documents are automatically indexed, managed and stored in OnBase, while still linked and accessible from the related items and records managed by users in SharePoint.          | \$5,000.00  | 15% | \$4,250.00 |
| SSIPN1                           | Ad-Hoc Scanning Named User for Microsoft SharePoint | Enables a user to utilize the Ad-Hoc Scanning Server for Microsoft SharePoint.  | \$50.00     | 15% | \$42.50    |
| PMIPI1                           | Site Provisioning for Microsoft SharePoint          | Allows users to submit a request to provision a new SharePoint site. Additionally allows the association of custom workflows with the new site requests, asking for approval prior to site creation and the use of custom site profiles to add pre-configured OnBase and SharePoint integration points. | \$5,000.00  | 15% | \$4,250.00 |

## ESRI Integration Solutions

|        |                                     |  |             |     |            |
|--------|-------------------------------------|--|-------------|-----|------------|
| EGIP11 | Integration for ESRI                | Allows users of ArcGIS Server based web applications to link OnBase documents to features on web based maps. The integration provides a set of easy-to-use web links in the map application for query, point-and-click retrieval and archiving of OnBase documents related to map features. The integration is based on ESRI's ArcGIS Server task framework and allows GIS administrators to easily imbed the OnBase web links into new or existing .Net based ArcGIS Server applications. | \$10,000.00 | 15% | \$8,500.00 |
| AGIP11 | Integration for ESRI ArcGIS Desktop | Allows ESRI ArcInfo, ArcEditor and ArcView users the ability to link OnBase documents to features on maps. The integration provides an easy-to-use toolbar in the ArcGIS Desktop environment for query, point-and-click retrieval and archiving of OnBase documents related to map features.   | \$7,000.00  | 15% | \$5,950.00 |

## Modular Conversion Tools

|        |                                    |   |             |     |            |
|--------|------------------------------------|---|-------------|-----|------------|
| IXIP11 | Conversion Tool for IXOS           | Utilized to migrate data from the IXOS repository to OnBase. The tool reads the IXOS repository and creates the necessary Document Import Processor index files to process the data into OnBase.            | \$10,000.00 | 15% | \$8,500.00 |
| RCIP11 | Conversion Tool for Ricoh eCabinet | Utilized to migrate data from the Ricoh eCabinet repository to OnBase. The tool reads the Ricoh eCabinet repository and creates the necessary Import Processor index files to process the data into OnBase. | \$5,000.00  | 15% | \$4,250.00 |

## Reporting Solutions

|        |                      |   |             |     |            |
|--------|----------------------|---|-------------|-----|------------|
| RHIP11 | Reporting Dashboards | Graphically displays data returned from a configured data provider, allowing users to quickly identify relevant information and trends surrounding the data managed by the data provider. Available dashboard items include basic pie, chart and bar graphs, or more advanced displays such as gauges, pivot tables and maps. | \$10,000.00 | 15% | \$8,500.00 |
| RPIP11 | Report Services      | Provides the ability to closely monitor critical performance aspects of an OnBase implementation. Designed to be customizable to allow nearly any element   | \$5,000.00  | 15% | \$4,250.00 |

|                                     |  |  |             |     |             |
|-------------------------------------|--|--|-------------|-----|-------------|
|                                     |  | within the OnBase system to be audited for business and IT statistics.   |             |     |             |
| ERIP11                              | Exception Reports  | Creates reports that can identify missing or aged documents.   | \$4,000.00  | 15% | \$3,400.00  |
| RXIP11                              | Report Mining  | Provides the ability to extract historic trend data already in OnBase as well as current trend data for analysis and reporting.  | \$15,000.00 | 15% | \$12,750.00 |
| MNIP11                              | Report Mining Integration for Datawatch Modeler              | Allows for the easy extraction and analysis of data that is contained within COLD/ERM and PDF reports stored in OnBase. Business intelligence contained within existing reports can be tapped without IT involvement or re-keying data. Report extract formats include Microsoft Excel, among others.  | \$5,000.00  | 15% | \$4,250.00  |
| MNIP12                              | Report Mining Integration for Datawatch Report Mining Server | Allows for the easy extraction and analysis of data that is contained within COLD / ERM (text) reports stored in OnBase. Integrated with Datawatch software, the business intelligence contained within existing reports can be tapped without IT involvement or re-keying of the data. Report extract formats include Excel, PDF, and text. | \$5,000.00  | 15% | \$4,250.00  |
| BAIP1                               | Business Activity Monitoring                                 | Provide real-time snapshots of Workflow processes. Available through the StatusView interface of the OnBase Web Server or a SharePoint Web site, these portlets are configurable by business users who have the appropriate rights.  | \$10,000.00 | 15% | \$8,500.00  |
| XTIPI1                              | Extractor for Data Warehouse                                 | Allows users to take a snapshot of the workflow documents and their keywords at the point in time that that the snapshot is taken. This data can then be used for statistical analysis within a data warehouse.  | \$50,000.00 | 15% | \$42,500.00 |
| <b>Records Management Solutions</b> |  |  |             |     |             |
| DRIP11                              | Document Retention   | Manages the retention and disposition of stored documents according to pre-defined business rules, involving the passage of time, allowing for automatic destruction and/or removal from the OnBase document repository.   | \$10,000.00 | 15% | \$8,500.00  |
| RIIP11                              | Records Management   | Manages the retention, disposition, and destruction of managed record folders according to an organization's business rules, based on the occurrence of an event in  | \$20,000.00 | 15% | \$17,000.00 |

|        |                                     |   |             |     |             |
|--------|-------------------------------------|---|-------------|-----|-------------|
|        |                                     | accordance with external regulations or compliance laws. This includes Document Retention (DRIP1).  |             |     |             |
| PRIP1  | Physical Records Management         | Enables organizations to manage the tracking, locating and access of physical records using OnBase as the single interface.   | \$15,000.00 | 15% | \$12,750.00 |
| DTIP1  | Document Transfer                   | Facilitates the movement of documents between multiple OnBase systems, allowing users to interact with information across distributed organizational structures and geographies.  | \$7,000.00  | 15% | \$5,950.00  |
| DSIP1  | Distributed Disk Services           | Regulates public access to a server through middleware software that acts as a proxy for accessing Disk Groups. Because communications with the OnBase Client are handled through TCP/IP, administrators are not required to use Windows Shares or UNC paths for Disk Group access. | \$5,000.00  | 15% | \$4,250.00  |
| CTIP1  | Storage Integration for EMC Centera | Provides the ability to configure secondary OnBase Disk Group copies to store files to the Centera platform as an alternative to standard UNC paths.  | \$20,000.00 | 15% | \$17,000.00 |
| TVIP1  | Storage Integration for IBM Tivoli  | Provides the ability to configure secondary OnBase Disk Group copies to store files to the Tivoli platform (using standard file servers or the TotalStorage DR550 hardware) as an alternative to standard UNC paths.  | \$20,000.00 | 15% | \$17,000.00 |
| KOIP1  | Integration for KOMpliance          | Provides the ability to configure secondary OnBase Disk Group copies to store files to the KOMpliance platform as an alternative to standard UNC paths.   | \$4,000.00  | 15% | \$3,400.00  |
| CDIPW1 | CD Authoring                        | Provides the ability to utilize CD-R storage for data backups or document exporting/publishing.   | \$1,000.00  | 15% | \$850.00    |
| DVIPW1 | DVD Authoring                       | Provides the ability to utilize DVD storage for data backups or document exporting/publishing.  | \$2,000.00  | 15% | \$1,700.00  |
| BAIPW1 | Blu-ray Authoring                   | Provides the ability to utilize Blu-ray storage for data backups or document exporting/publishing.  | \$4,000.00  | 15% | \$3,400.00  |
| AAIPW1 | Automated CD Authoring              | Provides the ability to automatically create backup CD-Rs from OnBase using the Rimage system.  | \$5,000.00  | 15% | \$4,250.00  |
| AVIPW1 | Automated DVD Authoring             | Provides the ability to automatically create backup DVDs or from OnBase using the Rimage system.  | \$8,000.00  | 15% | \$6,800.00  |
| PBIA1  | Publishing                          | Allows an end user to distribute OnBase runtime units in order to retrieve exported OnBase documents, creating a self-contained OnBase system for distribution. This is a renewable annual license.   | \$2,000.00  | 15% | \$1,700.00  |

|        |                               |  |             |     |            |
|--------|-------------------------------|--|-------------|-----|------------|
| PBIP11 | Aggregate Publishing          | Allows customers receiving published CDs/DVDs to have a database that contains index/pointer information for multiple published CDs/DVDs. When they receive a new published CD/DVD, they will update the aggregate database with the new index/pointer information. In order to properly license the above scenarios, the company that produces the published CD/DVD will have to acquire an Aggregate Publishing license for each customer that takes advantage of this functionality.  | \$1,000.00  | 15% | \$850.00   |
| ADIPC1 | Automated CD/DVD Publishing   | Extends Export/Publishing to a "lights-out" operation. Instead of having people dedicated to launching Export or Publishing jobs directly through the Client, they can now define the jobs in advance and have the OnBase system produce CD-R or DVD output for them at pre-determined intervals throughout the year. If you are publishing information for 500 institutions, you would buy 1 of the first tier and 4 of the second tier. The number of CD/DVDs created per year for an institution is not relevant. (For example, twelve monthly CDs or DVDs sent to an institution, each containing the same set of document types, would equate to a single license). | \$5,000.00  | 15% | \$4,250.00 |
| ADIPC2 | Automated CD/DVD Publishing   | Extends Export/Publishing to a "lights-out" operation. Instead of having people dedicated to launching Export or Publishing jobs directly through the Client, they can now define the jobs in advance and have the OnBase system produce CD-R or DVD output for them at pre-determined intervals throughout the year. If you are publishing information for 500 institutions, you would buy 1 of the first tier and 4 of the second tier. The number of CD/DVDs created per year for an institution is not relevant. (For example, twelve monthly CDs or DVDs sent to an institution, each containing the same set of document types, would equate to a single license). | \$4,000.00  | 15% | \$3,400.00 |
| EPIP11 | Encrypted CD / DVD Publishing | Allows users to produce a CD/DVD with encrypted contents. This eliminates the ability for someone to casually browse the document files or database that comes on the media.   | \$5,000.00  | 15% | \$4,250.00 |
| EXIPC1 | Export                        | Exports documents and their respective indexes out of an OnBase system. These documents and indexes can be imported into another OnBase system or used in conjunction with the OnBase Publishing module.   | \$5,000.00  | 15% | \$4,250.00 |
| AKIP11 | Encrypted Alpha Keywords      | Enables storage of sensitive alpha-numeric keywords in an encrypted format.  | \$10,000.00 | 15% | \$8,500.00 |

|                          |   |  |             |     |             |
|--------------------------|---|--|-------------|-----|-------------|
| EHIPI1                   | Encrypted Disk Groups                                 | Enables organizations to encrypt documents as they are imported into OnBase and stored on a file server. If viewed outside of OnBase, documents will be unreadable.  | \$10,000.00 | 15% | \$8,500.00  |
| Single Sign-on Solutions |   |  |             |     |             |
| SNIP11                   | Single Sign-On for Microsoft Active Directory Service | Allows OnBase to be configured to use authentication credentials from selected single sign-on service vendors. Single sign-on services centralize authentication and authorization across multiple applications. | \$0.00      | 15% | \$0.00      |
| SNIP12                   | Single Sign-On for CA eTrust SiteMinder               | Allows OnBase to be configured to use authentication credentials from selected single sign-on service vendors. Single sign-on services centralize authentication and authorization across multiple applications. | \$20,000.00 | 15% | \$17,000.00 |
| SNIP13                   | Single Sign-On for IBM Tivoli Access Manager          | Allows OnBase to be configured to use authentication credentials from selected single sign-on service vendors. Single sign-on services centralize authentication and authorization across multiple applications. | \$25,000.00 | 15% | \$21,250.00 |
| SNIP15                   | Single Sign-On for RSA Sign-On Manager                | Allows OnBase to be configured to use authentication credentials from selected single sign-on service vendors. Single sign-on services centralize authentication and authorization across multiple applications. | \$30,000.00 | 15% | \$25,500.00 |
| SNIP16                   | Single Sign-On for SAP Enterprise Portal              | Allows OnBase to be configured to use authentication credentials from selected single sign-on service vendors. Single sign-on services centralize authentication and authorization across multiple applications. | \$35,000.00 | 15% | \$29,750.00 |
| SNIP18                   | Single Sign-On for PeopleSoft Enterprise              | Allows OnBase to be configured to use authentication credentials from selected single sign-on service vendors. Single sign-on services centralize authentication and authorization across multiple applications. | \$5,000.00  | 15% | \$4,250.00  |
| SNIP12                   | Single Sign-On for OnBase Entrust                     | Allows OnBase to be configured to use authentication credentials from selected single sign-on service vendors. Single sign-on services centralize authentication and authorization across multiple applications. | \$15,000.00 | 15% | \$12,750.00 |
| SNIP13                   | Single Sign-On for RSA Access Manager                 | Allows OnBase to be configured to use authentication credentials from selected single sign-on service vendors. Single sign-on services centralize authentication and authorization across multiple applications. | \$30,000.00 | 15% | \$25,500.00 |
| SNIP14                   | Single Sign-On for SAML                               | Allows OnBase to be configured to use authentication credentials from selected single sign-on service vendors.   | \$10,000.00 | 15% | \$8,500.00  |

| SNIP15                                  | Single Sign-On for Microsoft Active Directory Federation Services | Allows OnBase to be configured to use authentication credentials from selected single sign-on service vendors. Single sign-on services centralize authentication and authorization across multiple applications.  | \$2,000.00  | 15% | \$1,700.00 |
| Treasury and Banking Specific Solutions |   |   |             |     |            |
| PTIP11                                  | Ad-Hoc IRD Printing   | Allows a Client workstation to generate a true substitute check ("replacement in lieu of" IRD) with data captured by the Check Import and Image Cash Letter Import processes. Authorized users have the option to print either a standard substitute check or a return substitute check with additional fields for document the return and other information.                               | \$5,000.00  | 15% | \$4,250.00 |
| P9IPW1                                  | Image Cash Letter Generator (X9.37)                               | Enables financial institutions to generate both forward and return electronic image cash letters in the DSTU X9.37-2003 file format from check image documents stored in OnBase. One file is created for each pocket of the transport where the items were captured, allowing synchronization with the sorter sort pattern.   | \$10,000.00 | 15% | \$8,500.00 |
| P9IPW1-9100                             | Image Cash Letter Generator (X9.100)                              | Enables financial institutions to generate both forward and return electronic image cash letters in the DSTU X9.100-187 file format from check image documents stored in OnBase. One file is created for each pocket of the transport where the items were captured, allowing synchronization with the sorter sort pattern  | \$10,000.00 | 15% | \$8,500.00 |
| PFIPW1                                  | Posting File Generator  | Enables financial institutions to import an electronic image cash letter in DSTU X9.37-2003 file format and create a posting file for the core banking application to post the transactions.  | \$5,000.00  | 15% | \$4,250.00 |
| RGIPW1                                  | NSF File Processor  | Enables financial institutions to import a return file generated from a core business application. Items included in the file will be pulled from OnBase and will be available for the Image Cash Letter Generator to create a Return X9.37 file in the DSTU X9.37-2003 format consisting of check data and images that are to be returned to the Federal Reserve or a partner institution. | \$5,000.00  | 15% | \$4,250.00 |
| BRIPW1                                  | Branch Capture (For each branch 1-5)                              | Allows financial institution branches to remotely capture and balance check images and upload them to the central OnBase system.  | \$3,000.00  | 15% | \$2,550.00 |

|        |   |   |             |     |            |
|--------|---|---|-------------|-----|------------|
| BRIPW2 | Branch Capture (For each branch 6+)   | Allows financial institution branches to remotely capture and balance check images and upload them to the central OnBase system.  | \$1,500.00  | 15% | \$1,275.00 |
| EGIPW1 | eMortgage Delivery for Chase  | Provides lenders with the ability to send digitized loan documents and index information from OnBase to Chase in Chase's preferred image transfer format.   | \$5,000.00  | 15% | \$4,250.00 |
| FNIPW1 | Signature / ID Client   | Offers a simple Visual Basic application limited to the retrieval and display of Signature Cards and Photo ID's for use by financial institution teller workstations.   | \$200.00    | 15% | \$170.00   |
| CRIPW1 | Integration for A2IA CAR/LAR - 1-10 Blocks, Sold in blocks of 100,000 checks processed annually.    | Enables the OnBase Check 21 solution to read the courtesy amount and legal amount from the check image, streamline the balancing process prior to the images being imported into OnBase. Sold in Blocks of 100,000 checks processed annually. | \$1,600.00  | 15% | \$1,360.00 |
| CRIPW2 | Integration for A2IA CAR/LAR - 11-25 Blocks, Sold in blocks of 100,000 checks processed annually.   | Enables the OnBase Check 21 solution to read the courtesy amount and legal amount from the check image, streamline the balancing process prior to the images being imported into OnBase. Sold in Blocks of 100,000 checks processed annually. | \$1,400.00  | 15% | \$1,190.00 |
| CRIPW3 | Integration for A2IA CAR/LAR - 25 - 50 Blocks, Sold in blocks of 100,000 checks processed annually. | Enables the OnBase Check 21 solution to read the courtesy amount and legal amount from the check image, streamline the balancing process prior to the images being imported into OnBase. Sold in Blocks of 100,000 checks processed annually. | \$1,200.00  | 15% | \$1,020.00 |
| CRIPW4 | Integration for A2IA CAR/LAR - 50 - 75 Blocks, Sold in blocks of 100,000 checks processed annually. | Enables the OnBase Check 21 solution to read the courtesy amount and legal amount from the check image, streamline the balancing process prior to the images being imported into OnBase. Sold in Blocks of 100,000 checks processed annually. | \$1,000.00  | 15% | \$850.00   |
| CRIPW5 | Integration for A2IA CAR/LAR - 75+ Blocks, Sold in blocks of 100,000 checks processed annually.     | Enables the OnBase Check 21 solution to read the courtesy amount and legal amount from the check image, streamline the balancing process prior to the images being imported into OnBase. Sold in Blocks of 100,000 checks processed annually. | \$800.00    | 15% | \$680.00   |
| VYIP11 | Integration for Mitek Validify  | Provides integration to Mitek Validify for statistical analysis/heuristics on signature cards.  | \$2,000.00  | 15% | \$1,700.00 |
| GDIPW1 | Integration for Goldleaf  | Archives and indexes items into OnBase that were captured by the merchant capture Goldleaf solution.  | \$5,000.00  | 15% | \$4,250.00 |
| Q2IPW1 | Integration with Q2 Software  | Allows the Q2 home banking product to query for OnBase documents and retrieve them for display to credit union customers.   | \$10,000.00 | 15% | \$8,500.00 |
| TEIP11 | Integration for Teres Solutions SAIL  | Provides the ability to archive and retrieve documents to and from OnBase from within Teres' SAIL loan origination application.   | \$10,000.00 | 15% | \$8,500.00 |

|  |  |  |             |     |             |
|--|--|--|-------------|-----|-------------|
| CLIP11                                     | Integration for Misys FusionBanking Credit Management Enterprise | Allows a Misys FusionBanking Credit Management Enterprise user to interact with an OnBase system through the familiar FusionBanking Credit Management Enterprise client. Provides a user the ability to upload documents directly into OnBase and retrieve documents from the interface.   | \$10,000.00 | 15% | \$8,500.00  |

| GV-B-MU2-DSIPW1    | Local Government Disconnected Scanning                   | Provides users with a robust document capture solution that is used while disconnected from OnBase. Supports Kofax, ISIS, and TWAIN scanning.   | \$2,000.00 | 0% | \$2,000.00 |
| GV-B-MU2-DSIPW2    | Local Government Disconnected Scanning (2+)              | Provides users with a robust document capture solution that is used while disconnected from OnBase. Supports Kofax, ISIS, and TWAIN scanning.   | \$800.00   | 0% | \$800.00   |
| GV-B-MU2-OLIP11-13 | Local Government Integration for Microsoft Outlook 2013  | Allows a Microsoft Outlook user to interact with an OnBase system through the familiar Outlook client. Provides users the ability to save e-mails and/or any associated attachments by simply dragging the e-mail to the "OnBase" folder. Users can also retrieve documents from the interface. | \$2,000.00 | 0% | \$2,000.00 |
| GV-B-MU2-OLIP11-10 | Local Government Integration for Microsoft Outlook 2010  | Allows a Microsoft Outlook user to interact with an OnBase system through the familiar Outlook client. Provides users the ability to save e-mails and/or any associated attachments by simply dragging the e-mail to the "OnBase" folder. Users can also retrieve documents from the interface. | \$2,000.00 | 0% | \$2,000.00 |
| GV-B-MU2-OLIP11-07 | Local Government Integration for Microsoft Outlook 2007  | Allows a Microsoft Outlook user to interact with an OnBase system through the familiar Outlook client. Provides users the ability to save e-mails and/or any associated attachments by simply dragging the e-mail to the "OnBase" folder. Users can also retrieve documents from the interface. | \$2,000.00 | 0% | \$2,000.00 |
| GV-B-MU2-OIIPW1-13 | Local Government Office Business Application for 2013    | Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.                         | \$40.00    | 0% | \$40.00    |
| GV-B-MU2-OIIPW1-10 | Local Government Office Business Application for 2010    | Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.                         | \$40.00    | 0% | \$40.00    |

|                    |  |   |            |    |            |
|--------------------|--|---|------------|----|------------|
| GV-B-MU2-OIIPW1-07 | Local Government Office Business Application for 2007                    | Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.   | \$40.00    | 0% | \$40.00    |
| GV-B-MU2-IDIP11    | Local Government Full-Text Indexing Server for Autonomy IDOL             | Provides integration with Autonomy IDOL to provide advanced Full-Text searches for words or phrases that exist within documents stored in OnBase. These words or phrases can exist in COLD documents, text renditions of image documents (OCR'd images), and many 3rd party application documents. Can perform fuzzy searches, wildcard searches, stemming searches, thesaurus searches, and searches combining full-text and keywords on document types. | \$7,000.00 | 0% | \$7,000.00 |
| GV-B-MU2-IDIPC1    | Local Government Full-Text Indexing Concurrent Client for Autonomy IDOL  | Provides the ability to retrieve full-text data stored in Autonomy IDOL Full-Text collections. Autonomy IDOL Full-Text can index OCR images, COLD text documents, Adobe PDF documents, Microsoft Office documents, WordPerfect documents, HTML documents and many others.   | \$120.00   | 0% | \$120.00   |
| GV-B-MU2-IDIPN1    | Local Government Full-Text Indexing Named User Client for Autonomy IDOL  | Provides the ability to retrieve full-text data stored in Autonomy IDOL Full-Text collections. Autonomy IDOL Full-Text can index OCR images, COLD text documents, Adobe PDF documents, Microsoft Office documents, WordPerfect documents, HTML documents and many others. Valid for a single named user logged into one workstation at a time.  | \$60.00    | 0% | \$60.00    |
| GV-B-MU2-IDIPW1    | Local Government Full-Text Indexing Workstation Client for Autonomy IDOL | Provides the ability to retrieve full-text data stored in Autonomy IDOL Full-Text collections. Autonomy IDOL Full-Text can index OCR images, COLD text documents, Adobe PDF documents, Microsoft Office documents, WordPerfect documents, HTML documents and many others.   | \$60.00    | 0% | \$60.00    |
| GV-B-MU2-RIIP11    | Local Government Records Management                                      | Manages the retention, disposition, and destruction of managed record folders according to an organization's business rules, based on the occurrence of an event in accordance with external regulations or compliance laws. This includes Document Retention (DRIP11).   | \$8,000.00 | 0% | \$8,000.00 |
| GV-B-MU2-DRIP11    | Local Government Document Retention                                      | Manages the retention and disposition of stored documents according to pre-defined business rules, involving the passage of time, allowing for automatic destruction and/or removal from the OnBase document repository.  | \$4,000.00 | 0% | \$4,000.00 |

|                               |  |  |             |     |             |
|-------------------------------|--|--|-------------|-----|-------------|
| GV-B-MU2-DSIPI1               | Local Government Distributed Disk Service                  | Regulates public access to a server through middleware software that acts as a proxy for accessing Disk Groups. Because communications with the OnBase Client are handled through TCP/IP, administrators are not required to use Windows Shares or UNC paths for Disk Group access.  | \$2,000.00  | 0%  | \$2,000.00  |
| GV-B-MU2-ITDIPI1              | Local Government Integration for Tempest Development Group | Enables users of OnBase Plan Review to integrate with the Tempest Development Group products for permitting to include electronic plan review in the overall permitting process.   | \$6,000.00  | 0%  | \$6,000.00  |
| GV-B-MU2-IMSIP1               | Local Government Integration for Meritage Systems          | Enables users of OnBase Plan Review to integrate with the Meritage Systems products for permitting to include electronic plan review in the overall permitting process.  | \$6,000.00  | 0%  | \$6,000.00  |
| GV-B-MU2-ACWIPI1              | Local Government Integration for Azteca Cityworks          | Offers a seamless integration with Azteca Cityworks, providing users ECM capabilities within the Cityworks product. Allows users to associate documents to a Cityworks Server object, view the associated documents and archive new Cityworks-related documents directly in to OnBase.   | \$6,000.00  | 0%  | \$6,000.00  |
| Government Specific Solutions |  |  |             |     |             |
| AMIPW1                        | Agenda Management  | Allows organizations to electronically create and manage meeting templates, meeting dates and times as well as agenda, agenda packet and minutes documents. The module can be used in conjunction with pre-configured E-Forms and workflows to improve review processes provide for collaboration and reduce the amount of time needed to produce timely and complete agendas, agenda packets and minutes.   | \$5,000.00  | 15% | \$4,250.00  |
| PLIPN1                        | Plan Review Named User                                     | Enables government agencies and other organizations to perform plan review processes related to community development, such as commercial buildings, private residence work, roads, bridges and other infrastructure projects. A submittal web site allows electronic upload of plan sheets and related documents. Plan revisions can be re-submitted, and finalized plans can be approved, stamped and returned to submitters, with collected comments and markups. Plan Review supports 2D drawing formats only. | \$2,500.00  | 15% | \$2,125.00  |
| ITDIPI1                       | Integration for Tempest Development Group                  | Enables users of OnBase Plan Review to integrate with the Tempest Development Group products for permitting  | \$15,000.00 | 15% | \$12,750.00 |

|         |                                       |   |             |     |             |
|---------|---------------------------------------|---|-------------|-----|-------------|
|         |                                       | to include electronic plan review in the overall permitting process.  |             |     |             |
| IMSIP11 | Integration for Meritage Systems      | Enables users of OnBase Plan Review to integrate with the Meritage Systems products for permitting to include electronic plan review in the overall permitting process.   | \$15,000.00 | 15% | \$12,750.00 |
| ACWIPI1 | Integration for Azteca Cityworks      | Offers a seamless integration with Azteca Cityworks, providing users ECM capabilities within the Cityworks product. Allows users to associate documents to a Cityworks Server object, view the associated documents and archive new Cityworks-related documents directly in to OnBase.  | \$15,000.00 | 15% | \$12,750.00 |
| AAIPI1  | Integration for Accela                | Offers a seamless integration with Accela Automation through the standard Accela EDMS interface. Features include the ability to associate documents to an Accela CAP object, view and download associated documents, and archive new Accela related documents through the Accela product directly into OnBase.   | \$10,000.00 | 15% | \$8,500.00  |
| PSIPI1  | Public Sector Constituency Web Access | Provides constituents of a particular government agency web-based document viewing, and limited Workflow routing. Standard Client functionality will be restricted. This license is only for use by constituents in the public sector market. This license can NOT be used by any employee of any agency or anyone on that agency's internal network. Standard Client licenses must be purchased for agency employees. This license is required for each instance of an OnBase database within the agency. Constituent counts are determined by the most recent official Census results. Hyland reserves the right to increase license fees if the agency's constituent base increases. Pricing is per 100 constituents, per system/database. | \$5.00      | 15% | \$4.25      |
| ICIPI1  | Integration for CourtView             | Enables users to archive and retrieve images through the CourtView interface.   | \$15,000.00 | 15% | \$12,750.00 |
| TKIPI1  | Integration for DTS TrakRecord        | Enables storage and retrieval of document images in connection with the DTS TrakRecord system.  | \$10,000.00 | 15% | \$8,500.00  |

| OMEIPW3-ANDR | OnBase Mobile eCapture for Android Point of Registration - Each, Qty 101+   | Enables the use of OnBase Mobile eCapture for Android at a specific point of registration.   | \$800.00    | 15% | \$680.00    |
| USCIPW1      | Universal Scope Capture   | Allows physicians and clinicians to electronically capture patient data and images during any type of medical procedure and store the data and images within OnBase, where they can be accessed, reviewed and annotated.   | \$2,000.00  | 15% | \$1,700.00  |
| MRIP11       | Medical Records Management Solution   | Enables HIM departments to manage the deficiency process for their documents. Controls and monitors the distribution of charts and corresponding documents through the coding, analysis and physician completion process. Provides easy, web-based access to the patient information and physician completion from any location based on security. The OnBase Report Services module can add robust reporting capabilities for stock HIM productivity metrics as well as the ability to build custom reports. Optional modules sold separately are: Document Imaging, COLD/ERM, and Report Services. | \$25,000.00 | 15% | \$21,250.00 |
| MGIP11       | Medical Records Coding Interface  | Provides the ability to configure and automate the assignment of work for Medical Coders to allow for an efficient completion of coding on a medical chart.  | \$20,000.00 | 15% | \$17,000.00 |
| MOIP11       | Medical Records Transcription Interface                                     | Provides the ability within the deficiency management process to create, edit and complete transcriptions within the OnBase Medical Records Completion solution.   | \$10,000.00 | 15% | \$8,500.00  |
| MRIPC1       | MRMS Chart Completion Concurrent Client                                     | Provides Medical Records Management Solution access based on signer configuration. Grants access to all staff and clinical delivery via the Medical Records Management interface ONLY.   | \$3,000.00  | 15% | \$2,550.00  |
| PCIP11       | MRMS Physical Chart Tracking  | Provides chart tracking solutions for identifying the location of paper medical records during the request/retrieval/storage processes.  | \$20,000.00 | 15% | \$17,000.00 |
| RUIP11       | Release of Information  | Aggregates data and documents from different locations and electronically provides all necessary patient information and supporting documents in a single patient record.  | \$50.00     | 15% | \$42.50     |
| INIP11       | Medical Records Release of Information                                      | Allows medical records departments to process requests for medical records. The module performs accounting actions including creating invoices for fees, reports on revenues received and outstanding accounts. By tracking when each document was released and to whom, the   | \$20,000.00 | 15% | \$17,000.00 |

|        |   | Medical Records Release of Information module also assists in HIPAA compliance.  |             |     |             |
| REIPI1 | Medical Records Release of Information for GE Centricity - Per Physician, 1-20  | Allows medical records departments to process requests for medical records. The module performs accounting actions including creating invoices for fees, reports on revenues received and outstanding accounts. By tracking when each document was released and to whom, the Medical Records Release of Information for GE Centricity EMR module also assists in HIPAA compliance. | \$500.00    | 15% | \$425.00    |
| REIPI2 | Medical Records Release of Information for GE Centricity - Per Physician, 21-50 | Allows medical records departments to process requests for medical records. The module performs accounting actions including creating invoices for fees, reports on revenues received and outstanding accounts. By tracking when each document was released and to whom, the Medical Records Release of Information for GE Centricity EMR module also assists in HIPAA compliance. | \$400.00    | 15% | \$340.00    |
| REIPI3 | Medical Records Release of Information for GE Centricity - Per Physician, 51+   | Allows medical records departments to process requests for medical records. The module performs accounting actions including creating invoices for fees, reports on revenues received and outstanding accounts. By tracking when each document was released and to whom, the Medical Records Release of Information for GE Centricity EMR module also assists in HIPAA compliance. | \$300.00    | 15% | \$255.00    |
| RSIPI1 | Medical Records Release of Information (Standalone)                             | Allows medical records departments to process requests for medical records. The module performs accounting actions including creating invoices for fees, reports on revenues received and outstanding accounts. By tracking when each document was released and to whom, the Medical Records Release of Information module also assists in HIPAA compliance.                       | \$20,000.00 | 15% | \$17,000.00 |
| OPIPI1 | Integration for Optum CAC   | Provides access to transcribed and scanned documents that are necessary to support the coding process in Optum CAC.  | \$30,000.00 | 15% | \$25,500.00 |
| 3MIPI1 | Integration for 3M CAC  | Provides access to transcribed and scanned documents that are necessary to support the coding process in 3M CAC.   | \$30,000.00 | 15% | \$25,500.00 |
| NUIPI1 | Integration for Nuance CAC  | Provides access to transcribed and scanned documents that are necessary to support the coding process in   | \$30,000.00 | 15% | \$25,500.00 |

|             |                                    |  |             |     |             |
|-------------|------------------------------------|--|-------------|-----|-------------|
|             |                                    | Nuance CAC.  |             |     |             |
| P1IPW1      | EDI 810 EOB Processor              | Converts Invoices in versions 4010 of the 810 EDI format to XML. The processor also extracts a list of keywords from each Invoice to index the document as they are imported into OnBase.  | \$10,000.00 | 15% | \$8,500.00  |
| P5IPW1-5010 | EDI 835 EOB Processor (HIPAA 5010) | Converts EOB statements in versions 5010 of the 835 EDI format to XML or PCL format for import into OnBase. The processor also extracts a fixed list of keywords from each EOB to index the documents as they are imported into OnBase. The 835 file is separated into a single document for each claim.   | \$15,000.00 | 15% | \$12,750.00 |
| P7IPW1-5010 | EDI 837 Processor (HIPAA 5010)     | Converts individual healthcare claims in version 5010 of the 837 Professional EDI format to HCFA-1500 forms and UB-92 in XML format. This processor does not process Dental 837 documents.   | \$15,000.00 | 15% | \$12,750.00 |
| HLIPW1      | HL7 Module                         | Sends and receives HL7 data streams. It can send OnBase information from COLD, the Document Import Processor, and scan processes to any application that has can accept HL7 formatted data. It can also receive HL7 messages via TCP/IP or batch files to create documents such as E-Forms and add Autofill Keyword Sets.  | \$25,000.00 | 15% | \$21,250.00 |
| PAIPW1      | Document Imaging for PACS          | Provides the ability to scan via a stand-alone capture module and index documents in conjunction with DICOM work lists. Documents are stored into a PACS system in a DICOM format.   | \$1,500.00  | 15% | \$1,275.00  |
| MCIP11      | Signature Deficiencies for Epic    | Provides the ability to electronically sign deficiencies on documents stored in OnBase that are retrieved from within the Epic user interface.   | \$20,000.00 | 15% | \$17,000.00 |
| DEIP11      | Signature Deficiencies for EMRs    | Provides the ability to electronically sign deficiencies on documents stored in OnBase. OnBase will be initiated from the EMR displaying clinical documents requiring the Physician Signature.   | \$20,000.00 | 15% | \$17,000.00 |
| GEIP11      | Integration for GE Centricity      | Designed to integrate with GE's Centricity product. Key elements include: HL7 synchronization between OnBase and Centricity, document retrieval capability from the Centricity user interface, batch scanning from OnBase linking documents with Centricity, and storage of structured data (transcription, photos, XML documents) to complement the HIS system. | \$25,000.00 | 15% | \$21,250.00 |

|        |  |   |             |     |             |
|--------|--|---|-------------|-----|-------------|
| CNIPI3 | Integration for Cerner Millennium                        | Designed to integrate with the Millennium product. Key elements include: HL7 synchronization between OnBase and Millennium, document retrieval capability from the Millennium user interface, batch scanning from OnBase linking documents with Millennium, and storage of structured data (transcription, photos, XML documents) to complement the HIS system.                     | \$50,000.00 | 15% | \$42,500.00 |
| EYIPI3 | Integration for Allscripts Sunrise Acute Care            | Designed to integrate with Sunrise Acute Care. Key elements include: HL7 synchronization between OnBase and Sunrise Acute Care, document retrieval capability from the Sunrise Acute Care user interface, batch scanning from OnBase linking documents with Sunrise Acute Care, and storage of structured data (transcription, photos, XML documents) to complement the HIS system. | \$50,000.00 | 15% | \$42,500.00 |
| KGIP11 | EKG Integration for GE Muse                              | Provides the ability to import EKGs directly from the GE Muse system into OnBase without the need to print and scan.  | \$15,000.00 | 15% | \$12,750.00 |
| SVIPI1 | Integration for Sentillion Vergence                      | Enables the necessary functionality required for OnBase to listen for Sentillion CCOW messages to switch user or switch patient records.  | \$20,000.00 | 15% | \$17,000.00 |
| WDIPI1 | Integration for OPUS (CSC Common Web Desktop)            | Provides integration to OPUS (CSC Common Web Desktop) enabling patient information, from OnBase and other systems integrated through the Common Web Desktop, to be presented through a common portal interface.   | \$5,000.00  | 15% | \$4,250.00  |
| EFIPI1 | Integration for Effica EMR                               | Captures ECG content utilizing HL7 technology and displays results using API integration with Effica EMR solution.  | \$10,000.00 | 15% | \$8,500.00  |
| ALIPI1 | Integration for Allscripts Homecare (Existing Customers) | Enables visiting nurses to view images that support the visit and to archive new content captured during the visits.  | \$5,000.00  | 15% | \$4,250.00  |
| ALIPW1 | Workstation Client for AllScripts Homecare Integration   | Enables visiting nurses to view images that support the visit and to archive new content captured during the visits.  | \$200.00    | 15% | \$170.00    |
| DGIPI1 | DICOM Integration for GE                                 | Provides an integration that brings together the data centric capabilities of EMRs, the document- and transaction-centric features of OnBase, and the imaging- and DICOM-centric advantages of GE. Physicians and staff can access medical images and other digital clinical data without toggling between multiple logins, systems and viewers.                                    | \$15,000.00 | 15% | \$12,750.00 |

|        |  |  |             |     |             |
|--------|--|--|-------------|-----|-------------|
| TMIP11 | DICOM Integration for Teramedica                   | Provides an integration that brings together the data centric capabilities of EMRs, the document- and transaction-centric features of OnBase, and the imaging- and DICOM-centric advantages of TeraMedica. Physicians and staff can access medical images and other digital clinical data without toggling between multiple logins, systems and viewers.   | \$15,000.00 | 15% | \$12,750.00 |
| GMIP11 | Multi-User Server for GE Centricity (Clinical)     | For users of the GE centricity system; Provides utilities, OnBase Configuration, Basic Text Search and Print Servers, three-tier OnBase Broker and a License to use the copyrighted OnBase Database in conjunction with a supported SQL Database Management System (DBMS) in a single institution, multi-user environment.   | \$5,500.00  | 15% | \$4,675.00  |
| GCIPC1 | Clinical Concurrent Client for GE Centricity       | The client provides the ability to access documents from OnBase. Multiple concurrent clients may be included in a solution. Provides retrieval, viewing, printing, and management of documents. Provides retrieval, viewing, printing, and management of documents. Concurrent Clients have a minimum connection (lease) time of five (5) minutes. Either the OnBase Client or OnBase Web Client can use this license. | \$800.00    | 15% | \$680.00    |
| GUIPW1 | Document Imaging for GE Centricity (Unlimited)     | Allows for the scan capture of documents through OnBase and places a link to the documents in the patient clinical record.   | \$3,300.00  | 15% | \$2,805.00  |
| GIIPW1 | Clinical Indexing Workstation for GE Centricity    | Allows for the indexing of documents from standalone indexing stations outside of the OnBase client. Multiple stations maybe included in a solution.   | \$1,000.00  | 15% | \$850.00    |
| GSIPW1 | Disconnected Scanning for GE Centricity (Clinical) | See description in the Document Imaging section of this document.  | \$500.00    | 15% | \$425.00    |
| DSIPC1 | Healthcare Disconnected Scanning for Citrix        | Provides users with a robust document capture solution that is used while disconnected from OnBase. Supports Kofax, ISIS, and TWAIN scanning.  | \$6,000.00  | 15% | \$5,100.00  |
| DSIPC2 | Healthcare Disconnected Scanning for Citrix        | Provides users with a robust document capture solution that is used while disconnected from OnBase. Supports Kofax, ISIS, and TWAIN scanning.  | \$2,400.00  | 15% | \$2,040.00  |
| EIPIC1 | Healthcare Express Scanning for Citrix             | Simplifies the task of document scanning for any department. All options, scanner settings, and default index values are pre-designated. Supports any TWAIN, ISIS or Kofax compatible scanner as well as sweep functionality. Documents are imported or sent to a scan queue for further processing.   | \$1,200.00  | 15% | \$1,020.00  |

|         |   |  |             |     |             |
|---------|---|--|-------------|-----|-------------|
| FOIPC1  | Healthcare Front Office Scanning for Citrix | Provides a simple and configurable scanning interface from within the OnBase Client or as a standalone scanning application. In a standalone installation, documents and index data are uploaded to OnBase via a connection to an OnBase Application Server or the OnBase Desktop.   | \$1,200.00  | 15% | \$1,020.00  |
| EIIPW1  | Integrated Scanning for Epic                | None.  | \$1,000.00  | 15% | \$850.00    |
| IBIPI1  | Integration for GE Centricity Image Broker  | Enables the archiving and retrieval of images for GE Centricity.   | \$25,000.00 | 15% | \$21,250.00 |
| GLIPI1  | General Ledger Journal Entry and Export     | Allows for the uploading of transaction details or summary data to the G/L system. Supports A/R to G/L and G/L to G/L transfers.   | \$15,000.00 | 15% | \$12,750.00 |
| POSIPI1 | Point of Service (POS) Cash Receipt         | The Point-of-Service collections module with Data Ingestion interfaces with other systems, (Registration, Billing, and Document Imaging) to provide guarantor collections at patient presentation for service. This cash drawer concept can also integrate with OnBase's patient portal and kiosk solutions to help manage and reconcile guarantor collections throughout the healthcare organization. | \$20,000.00 | 15% | \$17,000.00 |
| POSIPC1 | POS Concurrent Client - Each, Qty 1-50      | Enables each Client workstation to access the POS Cash Receipts elements of the system in conjunction with the Base POS Licenses above. Licensing is per each concurrent workstation (cash drawer) needed per shift.   | \$500.00    | 15% | \$425.00    |
| POSIPC2 | POS Concurrent Client - Each, Qty 51-100    | Enables each Client workstation to access the POS Cash Receipts elements of the system in conjunction with the Base POS Licenses above. Licensing is per each concurrent workstation (cash drawer) needed per shift.   | \$450.00    | 15% | \$382.50    |
| POSIPC3 | POS Concurrent Client - Each, Qty 101-250   | Enables each Client workstation to access the POS Cash Receipts elements of the system in conjunction with the Base POS Licenses above. Licensing is per each concurrent workstation (cash drawer) needed per shift.   | \$400.00    | 15% | \$340.00    |
| POSIPC4 | POS Concurrent Client - Each, Qty 251-500   | Enables each Client workstation to access the POS Cash Receipts elements of the system in conjunction with the Base POS Licenses above. Licensing is per each concurrent workstation (cash drawer) needed per shift.   | \$375.00    | 15% | \$318.75    |
| POSIPC5 | POS Concurrent Client - Each, Qty 501-1000  | Enables each Client workstation to access the POS Cash Receipts elements of the system in conjunction with the Base POS Licenses above. Licensing is per each concurrent workstation (cash drawer) needed per shift.   | \$350.00    | 15% | \$297.50    |
| POSIPC6 | POS Concurrent Client - Each, Qty 1001+     | Enables each Client workstation to access the POS Cash Receipts elements of the system in conjunction with the Base POS Licenses above. Licensing is per each  | \$325.00    | 15% | \$276.25    |

|         |                                       |  |             |     |             |
|---------|---------------------------------------|--|-------------|-----|-------------|
|         |                                       | concurrent workstation (cash drawer) needed per shift.   |             |     |             |
| CPIPI1  | Charge Processing Base License        | Charge Processing with data ingestion assists the operator in capturing paper-based charge record data including; patient identification, date of service, procedure codes, diagnosis codes, and quantities. Validation routines are provided that enable the solution to "scrub encounter data" prior to interfacing with the LOB application.  | \$45,000.00 | 15% | \$38,250.00 |
| CGIPI1  | Claims Processing                     | Provides end-to-end claims workflow and data validation for health insurance products, including UB04 (CMS-1450) and HCFA 1500's. Works in conjunction with OnBase Capture to ingest converted OCR data and provides data scrubbing, error correction and normalization of ANSI 837 output.  | \$45,000.00 | 15% | \$38,250.00 |
| PPRIPI1 | Payment Processing                    | Provides the server side license for Remittance Processing. Includes data capture of all paper-based payment data including; payments, adjustments, remark codes, comments and other data elements. Validation routines are provided that enable the solution to "scrub remittance data" prior to interfacing with the LOB application. AutoCOB is provided for printing of EOBs for secondary billing purposes. | \$45,000.00 | 15% | \$38,250.00 |
| PPAIPI1 | Payment Processing Automated Plug-ins | Enables the entry of information into the LOB system, in conjunction with the HPI Plug-in Linker. These automated transactions can vary based upon business need and LOB system capabilities. This Plug-in allows for the transfer of funds between (or application of adjustments to) accounts in the LOB system.   | \$5,000.00  | 15% | \$4,250.00  |
| ARMIPI1 | AR Management                         | Analyzes and aggregates information captured from disparate billing systems through AR data feeds, identifying open accounts that require additional action for payment follow-up and collections. Accounts are categorized and work-listed by payor and classification to ensure priority handling of unpaid claims.  | \$25,000.00 | 15% | \$21,250.00 |
| DENIPI1 | Denial Management                     | Enables organizations to isolate medical claim denials and defects and prevent future recurrence. Works in conjunction with Payment Processing to capture paper and electronic denial and remark code data from remittances and can be used as a standalone solution with ingestion of denial data through 3rd party data feeds.   | \$40,000.00 | 15% | \$34,000.00 |

|         |  |   |             |     |             |
|---------|--|---|-------------|-----|-------------|
| HPIIPI1 | Additional Host Posting Interface        | Takes all validated data that has been processed through either the Charge or Payment Processing workflow and automatically posts it to your Line of Business (LOB) application. May require additional ADE licenses depending on transaction volumes.  | \$27,500.00 | 15% | \$23,375.00 |
| PWLIPI1 | Payment Worklists                        | Includes Server-Side license for Payment Follow-up Qualification application, HPI Plug-in Linker to (1) Host Billing System, (1) ADE Station License, Standard Payment Processing follow-up defect types include; bypass, credit balance, pseudo/pass-thru, Payment Variance). Standardized follow-up actions (user notes, route to user/group, correspondence generation). | \$22,500.00 | 15% | \$19,125.00 |
| HPIIPW1 | Additional ADE or Validation License     | Enable the import, validation or the posting process to the LOB system. Additional licenses may be required to accommodate higher transaction volumes. Ability to support multi-session on a single workstation is dependent on the integration methodology and LOB capabilities.   | \$1,500.00  | 15% | \$1,275.00  |
| EDIPI1  | ANSI X 12 EDI Toolkit                    | Provides the Server side license for processing of ANSI X12 Data. Allows separation, splitting, capture and translation for 270, 271, 276, 277, 810, 820, 835 and 837 formats. When paired with either Charge or Payment Processing Modules, transactions can be automatically applied to the host LOB system.  | \$25,000.00 | 15% | \$21,250.00 |
| EDIIPW1 | Additional EDI Processing Station        | Provides an additional station license for processing of ANSI X12 Data. Allows separation, splitting, capture and translation for 270, 271, 276, 277, 810, 820, 835 and 837 formats.  | \$10,000.00 | 15% | \$8,500.00  |
| DARIPI1 | Data Analytics Report Manager            | Enables users to dynamically create customized reports.   | \$20,000.00 | 15% | \$17,000.00 |
| TWRIPI1 | Treasury Workstation Reconciliation      | Enables matching of bank, finance, Payment Processing and LOB host system for cash reconciliation.  | \$25,000.00 | 15% | \$21,250.00 |
| RMAIPI1 | Receivables Management Automated Plugins | Enables the entry of information into the LOB system, in conjunction with the HPI Plug-in Linker. These automated transactions can vary based upon business need and LOB system capabilities. This Plug-in allows for the transfer of funds between (or application of adjustments to) accounts in the LOB system.  | \$7,500.00  | 15% | \$6,375.00  |
| AAHIPI1 | Additional AutoLink to Host System       | Interface created with a Line of Business System that can be activated to provide users with one-click access to patient and/or claim information on the respective host system (i.e. billing, medical records, and utilization review).  | \$7,500.00  | 15% | \$6,375.00  |

|         |  |  |            |     |            |
|---------|--|--|------------|-----|------------|
| RCMIPC1 | RCM Concurrent Client - Each, Qty 1-10     | Provides base document imaging functions including: Scan, Rescan, Indexing and Routing, Inquiry, Output and Archive. | \$2,500.00 | 15% | \$2,125.00 |
| RCMIPC2 | RCM Concurrent Client - Each, Qty 11 - 25  | Provides base document imaging functions including: Scan, Rescan, Indexing and Routing, Inquiry, Output and Archive. | \$2,100.00 | 15% | \$1,785.00 |
| RCMIPC3 | RCM Concurrent Client - Each, Qty 26 - 50  | Provides base document imaging functions including: Scan, Rescan, Indexing and Routing, Inquiry, Output and Archive. | \$1,800.00 | 15% | \$1,530.00 |
| RCMIPC4 | RCM Concurrent Client - Each, Qty 51 - 100 | Provides base document imaging functions including: Scan, Rescan, Indexing and Routing, Inquiry, Output and Archive. | \$1,500.00 | 15% | \$1,275.00 |
| RCMIPC5 | RCM Concurrent Client - Each, Qty 101-250  | Provides base document imaging functions including: Scan, Rescan, Indexing and Routing, Inquiry, Output and Archive. | \$1,300.00 | 15% | \$1,105.00 |
| RCMIPC6 | RCM Concurrent Client - Each, Qty 251-500  | Provides base document imaging functions including: Scan, Rescan, Indexing and Routing, Inquiry, Output and Archive. | \$1,100.00 | 15% | \$935.00   |
| RCMIPC7 | RCM Concurrent Client - Each, Qty 501-1000 | Provides base document imaging functions including: Scan, Rescan, Indexing and Routing, Inquiry, Output and Archive. | \$1,000.00 | 15% | \$850.00   |
| RCMIPC8 | RCM Concurrent Client - Each, Qty 1001+    | Provides base document imaging functions including: Scan, Rescan, Indexing and Routing, Inquiry, Output and Archive. | \$950.00   | 15% | \$807.50   |
| RCMIPW1 | RCM Workstation Client - Each, Qty 1-10    | Provides base document imaging functions including: Scan, Rescan, Indexing and Routing, Inquiry, Output and Archive. | \$1,250.00 | 15% | \$1,062.50 |
| RCMIPW2 | RCM Workstation Client - Each, Qty 11-25   | Provides base document imaging functions including: Scan, Rescan, Indexing and Routing, Inquiry, Output and Archive. | \$1,050.00 | 15% | \$892.50   |
| RCMIPW3 | RCM Workstation Client - Each, Qty 26-50   | Provides base document imaging functions including: Scan, Rescan, Indexing and Routing, Inquiry, Output and Archive. | \$900.00   | 15% | \$765.00   |
| RCMIPW4 | RCM Workstation Client - Each, Qty 51-100  | Provides base document imaging functions including: Scan, Rescan, Indexing and Routing, Inquiry, Output and Archive. | \$750.00   | 15% | \$637.50   |
| RCMIPW5 | RCM Workstation Client - Each, Qty 101-250 | Provides base document imaging functions including: Scan, Rescan, Indexing and Routing, Inquiry, Output and Archive. | \$650.00   | 15% | \$552.50   |
| RCMIPW6 | RCM Workstation Client - Each, Qty 251-500 | Provides base document imaging functions including: Scan, Rescan, Indexing and Routing, Inquiry, Output and Archive. | \$550.00   | 15% | \$467.50   |

| HS-AUISI3 | Audit Compliance Administration for Hospitals - Subscription 11 - 20 Hospitals   | Enables management and compliance with the RAC audit requirements by providing business process management, records management and trending capabilities in a single application. Includes associated clinics.                               | \$3,600.00  | 15% | \$3,060.00  |
| HS-AUISI4 | Audit Compliance Administration for Hospitals - Subscription - 20+ Per Hospital  | Enables management and compliance with the RAC audit requirements by providing business process management, records management and trending capabilities in a single application. Includes associated clinics.                               | \$300.00    | 15% | \$255.00    |
| CA-AUIPI1 | Audit Compliance Administration - Critical Access Hospital - Critical Access Hospitals Operating <50 Beds.             | Enables management and compliance with the RAC audit requirements by providing business process management, records management and trending capabilities in a single application.  | \$5,000.00  | 15% | \$4,250.00  |
| CA-AUISI1 | Audit Compliance Administration - Critical Access Hospital - Per Month, Critical Access Hospitals Operating < 50 Beds. | Enables management and compliance with the RAC audit requirements by providing business process management, records management and trending capabilities in a single application.  | \$236.00    | 15% | \$200.60    |
| SA-AUIPI1 | Audit Compliance Administration for Stand Alone Outpatient Facilities  | Enables management and compliance with the RAC audit requirements by providing business process management, records management and trending capabilities in a single application.  | \$5,000.00  | 15% | \$4,250.00  |
| SA-AUISI1 | Audit Compliance Administration for Stand Alone Outpatient Facilities - Subscription                                   | Enables management and compliance with the RAC audit requirements by providing business process management, records management and trending capabilities in a single application.  | \$236.00    | 15% | \$200.60    |
| FAIPN1    | OnBase Insurance Field Adjuster App  | Provides insurance claims adjusters instant access to necessary data and documents from a Windows 8 device. Enables signature capture on electronic forms, and uses native device camera to capture photos to streamline the claims process. | \$500.00    | 15% | \$425.00    |
| ACIPI1    | Integration for ACORD  | Enables OnBase Workflow and BPM applications to support and share ACORD standards-based XML data with other systems without the need for complex custom coding.  | \$15,000.00 | 15% | \$12,750.00 |

## Higher Education Specific Solutions

|        |                                    |   |             |     |            |
|--------|------------------------------------|---|-------------|-----|------------|
| AYIPI1 | Integration for EMT Apply Yourself | Enables the storage of documents originating from EMT Apply Yourself into the OnBase system.                                | \$10,000.00 | 15% | \$8,500.00 |
| T1IPW1 | EDI TS 130 Processor               | Processes EDI 130 (4010) Student Educational Records data streams into individual documents and provides ability to import. | \$10,000.00 | 15% | \$8,500.00 |

## User Training and Technical Training

|                    |                                 |  |            |    |            |
|--------------------|---------------------------------|--|------------|----|------------|
| User Training      | OnBase Train the Trainer Class  | Preparing trainers to deliver to end users. Delivering by role, by task with teach backs, coaching, and feedback. Sold per Day. Requires curriculum preparation and development time plus training days.         | \$3,600.00 | 0% | \$3,600.00 |
| User Training      | OnBase Customized User Training | Delivering by role, by task to end users directly. Sold per Day. Requires curriculum preparation and development time plus training days.  | \$3,600.00 | 0% | \$3,600.00 |
| User Training      | OnBase Custom Training Services | Sold per hour. Requires quote for professional services for the production of video assets, customized tests, production of customized eBooks, and reporting of test results in support of learning initiatives. | \$250.00   | 0% | \$250.00   |
| Technical Training | Solution Specific Training      | Informal technical training to cover aspects that are specific to a particular solution. Sold per hour. Includes travel costs.   | \$250.00   | 0% | \$250.00   |
| Technical Training | Spotlight Class                 | Per attendee tuition for online delivery of a particular technical concept. Travel is not included in this rate.   | \$600.00   | 0% | \$600.00   |
| Technical Training | OnBase System Administration    | 5 day - OnBase System Administration class. Offered on-line, or at DataBank Training Facility. Travel to the class location is not included. Certification: OnBase Certified system Administrator                | \$2,800.00 | 0% | \$2,800.00 |

|  |                                |   |            |    |            |
|--|--------------------------------|---|------------|----|------------|
| Technical Training                                       | Introduction to Workflow       | 5 day - Introduction to Workflow class. Offered on-line, or at DataBank Training Facility. Travel to the class location is not included. Pre-requisite: OnBase System Administration. Certification: OnBase Certified Workflow Administrator    | \$2,800.00 | 0% | \$2,800.00 |
| Technical Training                                       | Advanced System Administration | 5 day - Advanced System Administration class. Offered on-line, or at DataBank Training Facility. Travel to the class location is not included. Pre-requisite: OnBase System Administration. Certification: OnBase Advanced System Administrator | \$2,800.00 | 0% | \$2,800.00 |
| Technical Training                                       | Workflow Design                | 5 day - Workflow Design class. Offered on-line, or at DataBank Training Facility. Travel to the class location is not included. Pre-requisite: Introduction to Workflow. Certification: OnBase Certified Advanced Workflow Administrator        | \$2,800.00 | 0% | \$2,800.00 |
