Playskool Chase 'n Go Ball Popper – Pink

Product Description

Get little ones moving and giggling with air-powered, unpredictable fun! With its slim design and ball storage, the Chase 'n Go Ball Popper toy packs whole-body play into a compact size. This active toy for babies and toddlers features multiple ways to play and helps encourage a variety of developmental benefits. Kids can practice their gross motor skills by sitting or standing to place the balls in the toy. Pressing the big button to start the 6 tunes and ball popping can help them explore cause and effect. When it's time to change things up, switch the poppin' fun with an easy turn of the elephant's trunk. When the trunk faces toward the elephant, the balls will continuously cycle through the toy, which can help encourage baby's eye tracking. Turn the trunk away from the elephant to help encourage gross motor skills through race 'n chase fun as the balls launch around the room! Kids can practice making predictions as they figure out where the balls will land next, and the music is sure to keep them moving and grooving again and again! Playskool and all related properties are trademarks of Hasbro.

Features

Toddlers can get active with air-powered, unpredictable fun
Adjustable to cycle balls continuously or launch them around the room
Kids can practice motor skills, eye tracking, and making predictions
They can also explore cause and effect by pressing the button to hear the 6 tunes
Includes 4 colorful, easy-to-grasp balls
Includes Chase 'n Go Ball Popper toy, 4 balls and instructions
Ages over 9 months
4 D batteries required; Not included

Imaginarium Wooden Block Set - 150 Piece

Product Description

The Imaginarium 150-Piece Wooden Block Set includes 74 natural and 76 colored blocks
Extend your child's science content knowledge and math skills with these engaging STEM Learning Tips.

1. Ask your child to stack and count mid-sized blocks of the same size and shape until the tower tips over. Then, do the same with all smaller and then all larger-sized blocks. Which tower was the tallest before it tipped over? Guide your child to see that the height of a tower of blocks and the width of the base affects its stability. Ask your child to notice the direction in which the blocks fall (downward) and understand that the blocks fall downward because of a force (a push or a pull) called gravity.
2. Identifying shapes is a math concept that children learn in their early years. Help your child recognize, name, and sort the shapes of the blocks. Then, go around the house to find objects that are the same shapes.
