- Assists in the planning and coordination of activities performed in an infirmary unit or ward; supervises lower level staff and acts as a clinical supervisor in a major institution. Serves as health administrator in the administrator's absence.
- Develops and implements facility/unit medical policies and procedures. Assists in interviewing prospective employees; in determining training needs for all employees; and in determining staffing needs.
- Performs complete physical examinations; takes vital signs and examines specified problem areas; and orders radiological laboratory or clinical tests to pathophysiologic processes.
- Makes diagnosis determinations and decisions regarding treatment plan; prescribes medication for the treatment of the diagnosis.
- Makes rounds of infirmary units or wards, examining patients' conditions, reviewing patient charts, and conferring with other patient care personnel. Counsels with

PHYSICIAN'S ASSISTANT/NURSE PRACTITIONER

patient and family as to preventive care, medical problems, and use of prescribed treatment of drugs.

Knowledge, Skills, and Abilities:

Knowledge of the theory, principles, and practices of medicine; of health care delivery systems; of ambulatory care; of the languages used in pharmacy prescription writing; of human anatomy, physiology, and chemistry; of methods and procedures of laboratory and X-ray and other diagnosis techniques; of pharmaceutical agents, their usage, and contraindications; of minor surgical procedures and techniques; of safety and sanitation practices; of medical management techniques; and of the uses of medicines of illness. Ability to establish and maintain effective working relationships; to instruct clients; to interview and obtain relevant medical information; to exercise initiative and work independently; to exercise sound, independent judgement; to analyze complex situations and adopt an appropriate course of action; to develop therapeutic programs; to plan and evaluate training activities to meet training needs and priorities; to apply emergency and first aid measures; and to successfully diagnose and treat patients.

Education and Experience:

Statutorily Required: N/A

Minimum Qualifications: Unrestricted certification as a physician's assistant by the Oklahoma State Board of Medical Licensure and Supervision and national certification as a physician's assistant by the National Commission for Certification of Physician's Assistant or three (3) years of experience as a physician's assistant.

DENTIST

Basic Purpose:

Under general direction, performs professional dental treatment in the planning and execution of a comprehensive program of preventive dentistry and by developing and administering a dental care and treatment program, including diagnostic, prosthetic, surgical, endodontic, periodontal, preventive, and restorative dentistry, for a state correctional institution or facility.

Typical Functions:

- Develops and administers a program of preventive dentistry within the institution; participates in the integration of the dental program with other programs of the institution.
- Determines the oral health of the patient and the adjacent structures through the use of visual, digital, and x-ray examinations. If pathology exists, a treatment plan is recommended and followed through with the necessary operative procedures to eliminate or control such pathology within the guidelines of the Department of Corrections.
- Evaluates oral pathology and makes appropriate referrals to oral surgery referral clinic.
- Supervises and/or administers prophylaxis and instruction in oral hygiene.
- Supervises and instructs dental assistants or other dental personnel in records and maintenance and care of equipment and quarters.

Knowledge, Skills, and Abilities:

Knowledge of the principles and practices of modern dentistry and oral hygiene, and of state legislation regarding the provision of dental services. Ability to establish and maintain effective working relationships; to develop programs within policy limits; to communicate effectively, both orally and in writing; to apply improved techniques and procedures in all phases of the dental program; and to prepare and present educational programs.

Education and Experience:

Statutorily Required: N/A

Minimum Qualifications:

Licensure to practice dentistry in the state of Oklahoma and minimum of one (1) year experience in general dentistry.

OPTOMETRIST

Basic Purpose:

Under general direction, performs professional work as an optometrist by examining and testing eyes and prescribing lenses and treatment as necessary for the resident population at a state correctional institution or facility.

Typical Functions:

- Develops and administers a program of optometry services within the institution; participates in the integration of the optometry program with other programs of the institution.
- Examines patients' eyes for vision problems, disease, and other abnormal conditions and prescribes lenses and treatment as necessary.
- Fits patients with frames; fills out lab forms, and sends prescriptions to contracting laboratory; verifies prescription when it returns from laboratory; fits, adjusts, and dispenses eyeglasses or contact lenses to patient.
- Assists patients with prescriptions for eyeglasses from sources outside the institution; performs eyeglass repairs and re-examinations as necessary.

Knowledge, Skills, and Abilities:

Knowledge of the principles and practices of optometry; of current literature and recent developments in the field of optometry; and of the laws, regulations, and policies affecting the practice of optometry. Ability to establish and maintain effective working relationships; to gain the confidence and cooperation of patients; to communicate effectively, both orally and in writing; and to apply principles of self-discipline necessary to serve the needs of the patient population.

Education and Experience:

Statutorily Required: N/A

Minimum Qualifications: Licensure to practice optometry in the state of Oklahoma.

PSYCHIATRIST

Basic Purpose:

Under general direction, performs professional work in the diagnosis and treatment of mental health patients in a correctional facility.

Typical Functions:

- Responsible for the psychiatric medical management of the inmates at the institution assigned; examines diagnoses, and treats all inmates who present signs and symptoms of mental illness; routinely re-evaluates and re-examines all inmates on psychotropic medication on a regular appropriately timed basis.
- Gives appropriate medical orders to the paraprofessional staff of health care providers and mental health personnel.
- Evaluates existing treatment programs and makes recommendation of revisions of programs.
- Assists in developing and implementing mental health policies and procedures to be used at the assigned institution; developing standards of care compatible with the standards recommended for mental health services by the American Correctional Association.
- Assists wardens, administrative, and correctional staff in the understanding and supervision of those inmates with mental health problems; and provides in-service education for other health care personnel, psychology personnel, and correctional custody officials as needed.
- Keeps abreast of modern developments in mental health treatment and remains able to set the course for a health care team.

Knowledge, Skills, and Abilities:

Knowledge of principles and practices of applied psychiatry and of the use of psychopharmacologic medications. Ability to establish and maintain effective working relationships; to exercise independent judgement; to analyze a situation and adopt an effective course of action; to successfully diagnose, clarify, and treat patients in an acceptable manner; and to interpret complex instructions, both oral and written.

PSYCHIATRIST

Education and Experience:

Statutorily Required: N/A

Minimum Qualifications: Licensure to practice medicine in the state of Oklahoma and be eligible or certified to practice psychiatry.

PSYCHOLOGIST

Basic Purpose:

Under general direction, performs professional work in the psychological diagnosis and/or treatment of patients in a state correctional facility.

Typical Functions:

- Identifies and monitors the mental health status of seriously mentally ill inmates.
- Provides group and individual counseling or psychotherapy with inmates; provides crisis and suicide intervention.
- Evaluates mental health service delivery needs and makes recommendations for needed changes to include needs assessment of assigned cases.
- Selects and administers a variety of psychological tests, including intelligence, personality, aptitude, and related tests; and interprets test findings to physicians, nurses, offenders, and other appropriate staff.
- Provides special evaluation, counseling, and therapy to a selected inmate population, e.g., mental retardation, sex offender, substance abuser.
- Attends conferences with psychiatrists, social workers, and other staff members for diagnosis and treatment of patients.
- Prepares reports on findings, and interviews, including diagnostic opinions for use by the medical staff.
- Supervises and assists in developing training programs for the recognition and handling of problems involving psychological, social, or personality adjustments; conducts in-service training programs for staff members and other professionals in the prevention, recognition, and management of psychological problems in mental, emotional, and social development and adjustment; trains designated correctional staff to administer departmental approved psycho-educational programs (e.g. Rational Behavior Training (RBT) and Interpersonal Communication Skills (IPCS), etc.)
- Participates in psychological research projects to evaluate objectives, methods, and results of mental health interventions.

PSYCHOLOGIST

- Participates as a representative of the agency in both lay and professional conferences and meetings.

Knowledge, Skills, and Abilities:

Knowledge of psychological theory; of methods of psychological counseling, psychotherapeutic methods, case assessment methods, individual and group counseling and testing; of projective techniques, statistical methods, and research design; of community problems; and of special education of individuals with mental, emotional, and social problems and mental retardation. Ability to establish and maintain effective working relationships; to direct the work of others; to serve as a consultant and/or function in an administrative capacity; to work with community groups and agencies in developing programs and services; to exercise good judgement in analyzing situations and making decisions; and to prepare special funding grants.

Education and Experience:

Statutorily Required: N/A

Minimum Qualifications: Completion of the curriculum requirements for a doctorate in psychology (Ph.D., Ed.D., or Psy.D.) from an accredited college or university with a specialty in clinical or counseling psychology or related area. This program shall include one (1) calendar year of full-time or two (2) years part-time pre-doctoral internship in a clinical setting. One (1) year of post-doctoral clinical experience may be substituted if the work is supervised by a licensed psychologist. Course work should include training in psychological testing in both projective and objective techniques.
