1. Module pricing is an Annual License Fee plus a One Time Implementation Fee. The Annual License Fee can be set up 1) As an annual subscription payable in 12 equal monthly installments, or 2) As an annual subscription paid in 1st invoice of initial term and any renewal term. One Time Implementation Fee is \$15,000 payable in customer's first invoice. Implementation includes the following services: project management, data evaluation and testing, business requirements assessment model calibration, and end user training.
2. All pricing is per Identity. Annual License Fee includes Network Scoring and Device Assessment for Application and Log-In Transaction and unlimited Portal User. Pricing volumes are based on program adult; however, the Network will accept and analyze all program participants (entire household including minors) for analysis up to a volume cap of total adults x 5 (Volume Cap). Batch query transactions will be limited to one batch per day, not to exceed the total adult program population x 5 (Volume Cap).
3. If Customer exceeds the Volume Cap, Customer will pay a per identity overage fee defined in the Schedule A.
4. At each renewal term, a 5% increase will be applied to the Annual License Fee. The overage fee will also increase by 5% every 12 months.

**LexisNexis® AmplifyID: Master Person Index Module**

Master Person Index (MPI) allows agencies to improve their population data management with a cross-program, non-PII, HIPAA-compliant unique identifier. The MPI provides the capability to link identities at points where accuracy is mission critical. Leveraging the LexisNexis built-in referential data sets and linking technology, the MPI will resolve identities with precision, provide transparency through a data remediation platform, and enable data sharing for effective decision-making.

### LexisNexis® Phone Finder

LexisNexis® Phone Finder leverages a database of over 1,500 sources for phone content that includes a proprietary, aggregated database of wireless, unlisted, and listed landlines, gateway providers for additional phone content, Electronic Directory Assistance, and many others. The solution tells our customers whom a phone number belongs to as well as what additional phones numbers might be associated with an identity. When trying to authenticate an individual and/or prevent fraud, gaining a clear understanding of the associations between a phone number, an identity, and the risk with that phone number is a key step in several account opening and management processes. What are the best subjects for a phone number? What are the best phone numbers for a subject? Is there any risk in calling/contacting this person at a given phone number? Phone Finder will deliver relevant, rank-ordered connections between phones and identities. Phone Finder will also assess the risk of the phone number prior to our clients making a phone call to a client and/or prior to sending an OTP. This risk assessment will look at indicators such as dates of phone association, porting, forwarding, spoofing, high-risk carriers like prepaid/VOIP, OTP velocity and many others. Knowing there may be risk with a phone ahead of time allows our customers to adjust their authentication method to protect themselves and their customers. Phone Finder can help facilitate key authentication activities for high-risk, high-value transactions while helping you strengthen compliance, protect your agency, and improve the customer experience.

### LexisNexis® Socioeconomic Health Attributes and LexisNexis® Health Score

#### Product Overview

1. The LexisNexis® Socioeconomic Health Attributes product comprises over 400 data attributes that were selected based on statistical analysis of the predictive power of each attribute for specific healthcare targets and outcomes.
2. The LexisNexis® Socioeconomic Health Attributes are to be used by customers that have strong clinical modeling expertise to build their own predictive health risk models in order to more effectively manage their members/patients. They can also be used for developing care management programs and member/patient outreach initiatives.
3. The LexisNexis® Socioeconomic Health Score: Total Cost Risk Score product predicts the health risk for individuals over the next 12 months based on total cost. The score is particularly beneficial for customers who are trying to assess the risk of members/patients who have no claims or clinical data. Customers can use the score to stratify risk in their populations and to incorporate into their own health risk predictive models. The score is represented in three (3) ways: 1) an index relative to the customer's member/patient population; 2) a percentile ranking (1 – 100); and 3) a risk category (1 - 5).
