

- **Relevant Information:** Cloud Architects design and manage cloud infrastructure, ensuring scalability, cost-effectiveness, and security.

15. Artificial Intelligence/Machine Learning Engineer

- **Methodologies:** CRISP-DM (Cross-Industry Standard Process for Data Mining).
- **Technologies:** Python, TensorFlow, PyTorch, scikit-learn.
- **Relevant Information:** AI/ML Engineers develop algorithms and models, focusing on data analysis and machine learning to solve complex problems.

Section Nine: Offer of Value-Added Products and/or Services

These products and services provide comprehensive support to clients, ensuring high-quality outcomes and satisfaction across all engagements. Here's the list of value-added products and services:

- ❖ Training workshops and health assessments to enhance project success and stakeholder communication.
- ❖ Customized software and API development, along with coding standards documentation.
- ❖ 24/7 support, user training programs, and maintenance contracts for ongoing application performance.
- ❖ Implementation of testing frameworks, test case management tools, and comprehensive testing reports.
- ❖ Architecture assessments, technology roadmaps, and proof of concept projects for enhanced system performance.
- ❖ Workshops for process enhancements, standardized requirements documentation, and business analysis training.
- ❖ Database optimization, data migration assistance, and training on best practices for database management.
- ❖ Network security assessments, infrastructure optimization, and training on networking best practices.
