

# TRAFFIC SAFETY

## PRODUCT BULLETIN

Date: February 28, 2025

Subject: Traffic Safety – Mapping Category Discontinuance

To: Traffic Safety Crash Scene Mapping Customers

Please let this bulletin serve as formal notice that Laser Technology, Inc. (LTI) will be discontinuing the category of Accident Mapping from its' Traffic Safety catalog of products.

We understand the importance of informing our customers in a timely manner and the reasoning behind the discontinuation.

### **Last Time Buy Conditions.**

LTI will be selling the remaining Traffic Safety Mapping Packages on a first-come, first-serve basis ***until inventory has been depleted or by June 30, 2025, whichever comes first.*** Once we are out of inventory, the products will be discontinued.

### **Mapping Kits Parts Being Discontinued**

7035070	TruAngle® Accessory Package
7035165	QuickMap®3D Android Data Collector Basic Package
7036169	Total Pro Accident Investigation Kit

Laser Tech is committed to supporting the systems as noted below.

### **Warranties**

Laser Tech will provide warranty or replacement on the following serialized products that are part of the mapping kits as follows:

- TruSpeed® SXB (Standard 4-year warranty)
- TruPulse® 200X (Standard 2-year warranty)
- TruAngle® (Standard 2-year warranty)

### **Continued Support**

Repair service and support for the serialized products will continue for an additional two years following the above warranty timeframes. End-of-service life all depends on part availability and demand for service. While we will make every attempt to fulfill this obligation, because of circumstances beyond our control, such as obsolescence of a part for a particular product, the serviceability of a product may not be possible.

### **Celebrating Over 3 Decades of Innovation**

# TRAFFIC SAFETY

## PRODUCT BULLETIN

Note: The TruSpeed® SXB will remain an active product for speed enforcement and the TruPulse® 200X will remain active within our Professional Measurement division. As far as all ancillary and accessory items, such as bracketry and Android rugged tablet, these will carry the warranty that has been deemed by the manufacturer.

### **LaserSoft® QuickMap® 3D Support**

Laser Tech will make every effort to support, within a reasonable period, LaserSoft® Quickmap® 3D for the recent CT8X2 Android tablets containing operating version 10. Please remember that the tablet version we sell is locked, therefore, there will be a time when support to the app will not be possible. Again, LTI will make every effort to support your efforts.

### **Reasoning**

LTI's Executive Management team did not make the decision to exit accident mapping lightly and is doing so to concentrate our efforts on LIDAR speed enforcement products.

We would like to take this time to thank all our loyal customers, and express gratitude for the years we have spent with you in the accident mapping arena. Many of you are also long-time customers of our speed enforcement products and we look forward to that continued relationship.

Respectfully,

Laser Technology, Inc.
