

OVERVIEW

We are Guidehouse

Advisory | Technology | Managed Services

Complex journeys demand a trusted guide. **That's us.**

At Guidehouse, complexity is an opportunity. To take a different path forward. To embrace new perspectives. And make a lasting impact for good.

As a global AI-led professional services firm, we deliver advisory, technology, and managed services to help leaders across the commercial and public sectors meaningfully shape the future. We're purpose-built to navigate complex challenges across industries and geographies with a unique model that breaks down siloes.

Our integrated business technology approach positions organizations for efficiency, resilience, and growth. With exacting standards and a relentless pursuit of client success, our experts collaborate with leaders to achieve lasting changes that impact communities worldwide.

Who we guide

Commercial and public sectors

Communities, Energy & Infrastructure

Applying our deep, data-led industry expertise and innovative technologies, we help energy providers, state and local governments, and public sector civilian agencies strengthen communities and shape a secure, resilient future for all.

Defense & Security

Backed by proven success in helping clients compete, deter, and win, we deliver mission-critical optimization, technology modernization, and financial management solutions to U.S. diplomatic, intelligence, law enforcement, homeland security, and defense agencies.

Financial Services

With demonstrated expertise in protecting enterprises and enabling efficiency, agility, and growth, we help financial services businesses and government agencies of all sizes mitigate risks, navigate regulations, adapt to shifting markets, and remain resilient in the face of earnings pressures and scarce resources.

Health

Bolstered by our proven efforts to modernize and innovate healthcare services, finances, and operations, we deliver a comprehensive approach to solving interrelated industry challenges faced by providers, government agencies, life sciences companies, payers, and other healthcare organizations.

How we guide

Lines of service

Advisory

From vision to action, we guide clients through complex challenges by applying deep industry expertise and the latest technologies. Our transformative, tailored services are built to meet the demands of today and tomorrow.

Technology

We help clients turn challenges into opportunities through customized, integrated solutions that harness AI, big data, analytics, cybersecurity, automation, cloud computing, and other emerging technologies.

Managed Services

Our tech-enabled global teams serve as an extension of client workforces, helping them overcome their most demanding operational challenges through supplemental staffing support for grants and revenue cycle management, financial services, compliance, and other outsourcing needs.

Key services

- AI & Data
- Finance & Revenue
- Financial Crimes, Risk & Compliance
- Mission & Growth
- Operations
- People, Organization & Change
- Resilience & Sustainability

Guiding futures forward

We design, build, and manage cutting-edge solutions that help organizations stay ahead of the curve. Our unwavering commitment to exceptional service delivery—whether we're enhancing public health, improving care delivery, safeguarding against cyber threats, or accelerating disaster relief—has consistently empowered our clients to embrace a secure, future-ready vision that unlocks long-term value.
