CBCAP Fiscal Contact: Lytle C. Caldwell Jr. CPA Grants Reporting Officer OSDH (405) 271-4042 LytleC@health.ok.gov
SECTION 1 - STATEWIDE CHILD MALTREATMENT PREVENTION LEADERSHIP
ACTIVITIES CONDUCTED BY THE OSDH

THE ROLE OF THE OSDH AND ITS ACTIVITIES
The Oklahoma State Department of Health (OSDH), a public entity, served as the lead agency responsible for administering the CBCAP funds and providing oversight to funded programs. OSDH is comprised of 68 county health departments and one central office. It is responsible for protecting, maintaining and improving the public's health status. Because of its size and diverse programming, OSDH is in a unique position to seek innovative approaches to coordinating funding streams and other resources to enhance the CBCAP funded services and activities.

*The OSDH Mission:* The mission of the OSDH is “to protect and promote health, to prevent disease and injury, and to cultivate conditions by which Oklahomans can be healthy.” Through its system of local health services delivery, it is ultimately responsible for protecting and improving the public's health status through strategies that focus on preventing disease. Three major service branches (Community & Family Health Services, Office of the State Epidemiologist, and Protective Health Services) provide technical support and guidance to 68 county health departments as well as guidance and consultation to the two independent city-county health departments in Oklahoma City and Tulsa. (See the OSDH Organizational Chart, page 6.)

*The OSDH Structure and Activities:* In February of 2013, the OSDH was one of 11 public health departments (the first group in the nation), and one of only two state public health departments that was awarded five-year accreditation by the Public Health Accreditation Board (PHAB). This accreditation recognizes the OSDH as a high performing public health department that is able to achieve national standards that foster efficiency and effectiveness, and promote continuous quality improvement for public health.

*Community and Family Health Services (CFHS)* continues to be responsible for the oversight of the 68 local county health departments and partners with the two independent city-county health departments¹ in order to serve all 77 counties. Each county health department offers a variety of services such as immunizations, family planning, well-baby clinics, adolescent health clinics, nutrition services, child developmental services, environmental health, and early intervention.

CFHS is also responsible for the programmatic activities that support most of the local health department efforts including policy development, training and evaluation. The following supportive Services are located within CFHS:

---

¹ Oklahoma City and Tulsa
1) **Family Support and Prevention Service** – programs that promote the health, safety and well-being of children by educating the public, training professionals and providing direct services, including home visiting, to families;

2) **Child Guidance Service** – programs designed to promote optimal child development, and healthy interaction for children and those that care for them such as *Circle of Parents, Incredible Years* and direct interventions;

3) **Maternal and Child Health Service** – programs that provide state leadership to improve the physical and mental health of the Oklahoma maternal and child health population;

4) **SoonerStart** – Oklahoma’s Individuals with Disabilities Education Act Part C program designed to provide early intervention services to infants and children with disabilities and developmental delays;

5) **Women, Infants, and Children (WIC)** – a program providing nutrition education and food resources to low-income pregnant and postpartum women and their young children;

6) **Dental Service** – a service area providing leadership in oral disease prevention as well as mobilizing efforts that will help protect and promote good oral health;

7) **Nursing Service** – a service area dedicated to ensuring optimal public health nursing services, leadership, education, and advocacy;

8) **Community Evaluation and Epidemiology** – shared staff that provides analytical and evaluative support for CFHS programs as well as provides local communities support through survey development, implementation and data analysis; and

9) **Records Evaluation and Support Division** – a service area related to quality assurance chart reviews, technical support for OSDH developed software, and financial reporting software.

10) **Screening and Special Services** – a service area that provides statewide surveillance, screening, and specialized programs to protect the health of Oklahoma children and their families.
The Family Support and Prevention Service’s (FSPS) mission is to promote the health, safety and well-being of children and families by providing education.awareness to the public, training of professionals working within the field of prevention, and support to those providing direct services to families. FSPS programmatic efforts and activities include:

1) Nurse-Family Partnership – nurse home visitation\(^2\) services for first-time, low-income mothers (known in Oklahoma as Children First).

2) Healthy Families America\(^3\) – home visiting services provided to pregnant women and/or parents with young children (known in Oklahoma as Start Right); families are screened into the program utilizing the Kempe Family Stress Checklist.

3) Parents as Teachers – home visiting services provided to pregnant women and/or parents with children under age five years old; program focuses on parent-child interaction and school readiness.

4) Parents as Teachers Pilot – home visiting services incorporating nurses as well as social service specialists serving as parent educators; in addition, case managers are located on site to assist the parent educators; this version of PAT is being tested in four rural counties.

5) SafeCare – an Eco behavioral home visitation program that addresses parent-child bonding, home safety and cleanliness and child health.

6) The Office of Child Abuse Prevention – an office with the FSPS that is statutorily-charged with developing “The State Plan for the Prevention of Child Abuse and Neglect”, funding child abuse prevention services, and reporting on the effectiveness of those services.

7) The Community-Based Child Abuse Prevention Grant (CBCAP) – funds that allow community-based organizations to develop, operate and expand their services, support networks that work towards strengthening families, and foster understanding, appreciation and knowledge of diverse populations.

8) The Maternal, Infant and Early Childhood Home Visitation Grant (MIECHV) – funds that support home visiting efforts, strengthen and improve the quality and effectiveness, and improve coordination of services with the early childhood system. Unique features of the Oklahoma efforts include:

- **Community Connectors**: Individuals working within each MIECHV community that facilitate collaboration and coordination among evidence-based home visitation programs (EBHVPs) and other supportive services for families. They also promote EBHVPs to the community as well as potential referral sources. When appropriate, they directly recruit families into EBHVPs.

**parentPRO Referral System**: A centralized statewide referral system for home visitation services. The toll-free parentPRO phone line is answered by OSDH/FSPS staff trained to use a simple tool to assess a family’s needs and refer the family to the most appropriate home visiting program. Calls are answered in both English and Spanish. Callers are also invited to be immediately transferred to a specially trained nurse, behavioral specialist or child development specialist when any acute needs arise that can be addressed on the phone.

---

\(^2\) FSPS recognizes the work that the PEW Trust and others have done around the importance of language when promoting home visiting services. However, in this document the terms “home visiting services” and “home visitors” are used for the ease of the reviewer and to distinguish these services from other parenting programs.

\(^3\) The Healthy Families America Model was utilized during the beginning of FY 2017 with a transition to the Parents As Teachers Model in November 2016, which is the current model in place.
• **parentPRO Marketing:** A collective effort to market home visiting under one recognizable logo, regardless of model, and to simplify the enrollment process. Mediums include parentPRO radio and television commercials as well as a variety of print materials and mass transit advertising.

• **parentPRO Website:** A parentPRO website that allows potential home visiting participants to locate a variety of early childhood services as well as parenting information, and local family-friendly activities. The website is independent from any state agency and therefore easier for parents to access. Funding for the website was provided by the Potts Family Foundation.

9) **Training** – a coordinated effort to provide model-specific as well as additional trainings deemed necessary for home visitor success.

10) **Evaluation** – day-to-day evaluation of all FSPS efforts performed by in-house epidemiologists. Home visiting data since 1997 is available for analysis. Evaluation staff oversee the completion of CQI projects, provide programs with management/performance reports and craft annual reports to share with policymakers, funders and other interested parties.

**Other OSDH Related Activities:**

**OSDH Continuous Quality Improvement Efforts** – The OSDH has embraced Continuous Quality Improvement (CQI) as an agency. For this reason, the OSDH established the Partnerships for Health Improvements – Performance Management Service. Under their leadership, most OSDH Services staff has been trained in CQI and most have conducted and/or completed projects, including all MIECHV funded home visiting programs.

**Child Guidance Service:** The OSDH Child Guidance Service, a strong partner of FSPS, offers a continuum of services for children and their families to assist them in achieving optimal development. The program is uniquely positioned in public health settings to provide evidence-based programs that enhance protective factors and reduce risk factors for families. Child Guidance teams located in county health departments consist of master’s degree level clinicians in child development, behavioral health and speech/language pathology.

Through a multidisciplinary approach, the Child Guidance Service provides a continuum of services that supports development and parenting of children from birth to age 13 years. Each discipline provides a unique expertise in supporting families with young children. At the core of the Child Guidance Service are evidence-based programs that have been proven effective in changing behavior in the target population. The Child Guidance Service provides the following programs:

The Maternal and Child Health Service (MCH):

1) The Oklahoma Pregnancy Risk Assessment Monitoring System: The Pregnancy Risk Assessment Monitoring System (PRAMS) is an ongoing, statewide study that collects information about a woman’s behaviors and experiences before, during and after pregnancy. Oklahoma PRAMS is funded by the Centers for Disease Control and Prevention (CDC), the Title V Maternal and Child Health Block Grant and the Oklahoma State Department of Health. Fifty grantees conduct core PRAMS surveillance across the United States and Puerto Rico. Oklahoma has been a PRAMS participant since the CDC project began in 1988.

The purpose of PRAMS is to discover why some babies are born healthy and why others are not, in an effort to increase the number of babies in Oklahoma who are born healthy. The information is used to help guide programs and health policy in Oklahoma and to help make better use of limited resources.

On a monthly basis, Oklahoma PRAMS randomly samples between 250 and 300 new mothers from Oklahoma birth certificates. Mothers are sent as many as three mail questionnaires, with follow-up phone interviews for women who do not respond to the mailed surveys. All information is kept confidential.

Oklahoma currently collects PRAMS data on the following topics: health insurance, preconception health, prenatal care, breastfeeding, maternal smoking and secondhand smoke exposure, alcohol use, infant safe sleep practices, social support and family planning. The Director of FSPS has participated on the PRAMS/TOTS Steering Committee.

2) The Oklahoma Toddler Survey: The Oklahoma Toddler Survey (TOTS) is a two-year follow-back survey to the Oklahoma Pregnancy Risk Assessment Monitoring System (PRAMS), and was created by Oklahoma in 1994. TOTS re-surveys PRAMS respondents the month the child turns two years old. TOTS is funded by the Title V Maternal and Child Health Block Grant and the Oklahoma State Department of Health. Oklahoma was the first state to begin a follow-back survey to PRAMS. The purpose of TOTS is to learn about the health and well-being of Oklahoma’s toddler population and their health experiences from birth to age two.

The information is used to help guide programs and health policy in Oklahoma, and to help make better use of limited resources.
Similar to PRAMS, TOTS sends as many as three mail questionnaires to approximately 180 women each month, followed by phone contact for those mothers who have not responded by mail. All information is confidential. Currently, TOTS includes questions about health care and insurance, illness and injury, child care, safety, breastfeeding, subsequent pregnancy, maternal depression, secondhand smoke exposure, and family structure.

3) **Maternal Mortality Review Project (MMR):** Maternal death continues to be the international standard by which a nation’s commitment to women’s health status can be evaluated. Each year in the state of Oklahoma, women die of complications related to pregnancy. According to vital records provided by Health Care Information (HCI) and reviewed by MCH for years 2014-2016, the maternal mortality rate among women aged 10 – 59 years was 20.1 deaths per 100,000 live births. The goal of Healthy People 2020 is to reduce the maternal mortality rate to no more than 11.4 maternal deaths per 100,000 live births. Through appropriate interventions, prevention of risks, and reduction of racial disparities, these mortality rates can be dramatically decreased. A process must be in place, however, to determine why and how the deaths occur.

The MMR is an essential community process used to enhance and improve services to women, infants and their families. These qualitative, in-depth reviews investigate the causes and circumstances surrounding a maternal death. The MMR Committee includes individuals from varied organizations and occupations. Through communication and collaboration, the MMR serves as a continuous quality improvement system that will result in a comprehensive understanding of the maternal issues and provide a better future for women, infants and families. The overall goal of MMR is prevention through understanding of causes and risk factors.

The Oklahoma MMR operates through uniform procedures, defined processes and assigned responsibilities with goals to:

- Improve and enhance public health efforts to reduce and prevent maternal death in Oklahoma;
- Improve identification of maternal deaths in order to interpret trends, identify high-risk groups, and develop effective interventions;
- Utilize review information to identify health care system issues and gaps in service delivery and care; and
- Develop action plans and preventive strategies to implement recommendations in communities and provider networks.

Interventions, strategies and the development of systems that increase knowledge and decrease pregnancy-related mortality will serve not only to improve the health of women and children but will provide overwhelming benefits for all Oklahomans. To date, the MMR Committee has reviewed 97 cases. Most cases listed multiple health conditions possibly contributing to the maternal death, but the health conditions most often cited include:

- Obesity (BMI listed has high as 53.5)
- Hypertension
- Diabetes, not gestational diabetes
- Cardiac problems
- Asthma/Pulmonary

**The OSDH Injury Prevention Service:**

**Child Passenger Safety Program:** Since 2001, the Injury Prevention Service, Oklahoma Highway Safety Office, and Safe Kids Oklahoma have worked together to implement a car/booster seat program statewide through county health departments that include providing child passenger safety education, car seats and booster seats to eligible families. There are trained child passenger safety technicians located statewide, including the metropolitan areas as well as 62 of the county health department sites, who are available to install car seats. Families may contact a county health department to schedule an appointment to have any car or booster seat checked to determine if it is properly installed. Car seats and booster seats are provided at no cost to families eligible for WIC benefits, those who receive other state assistance such as Medicaid, Supplemental Nutrition Assistance Program, Temporary Assistance to Needy Families and those participating in home visiting programs.

**THE INTERDISCIPLINARY, COLLABORATIVE, PUBLIC-PRIVATE STRUCTURE**

The entities listed below comprise the diverse structure of the Oklahoma Child Abuse Prevention System. Each of these groups is multi-disciplinary, yet they have a singular leadership mission. Often, these groups work together to accomplish goals and objectives relating to the support of families.

**The Child Abuse Prevention Action Committee:** The Child Abuse Prevention (CAP) Action Committee celebrates twelve years of collaboration and is led by the CBCAP Grant Coordinator. The purpose of this group is to raise awareness about child abuse and promote child abuse prevention. The group consists of a wide variety of individuals from multiple agencies and programs that steer the prevention efforts in the state including the activities and campaign of National Child Abuse Prevention Month in April. A foundation of strong projects have grown into a mainstay every April (including the “Build a Blue Ribbon Tree for Kids” Campaign, “Wear Blue Day & Take a Selfie” and the “Happiness Project”). Each year, discussion includes how to incorporate one more layer into each project while also generating new ideas.

The participants that make up the committee create a diverse team with a multitude of talents, which enable the group to be creative, innovative and detailed in the ongoing challenge of tackling the issue of fighting child abuse. Social media is utilized and appreciated as a mechanism for assisting with these efforts, while also used as a method for being able to document some of the involvement during the peak period of campaigns. With that, an accompanying Facebook page and Twitter account are part of the Oklahoma Child Abuse Prevention tools used for various activities.

Individuals participating in the committee represent state agencies, non-profit programs, businesses, universities, foster parents, faith-based groups, concerned citizens, etc. The current email distribution list includes almost one thousand participants. The committee meets at the partner agency of the Oklahoma City-County Health Department Northeast
Regional Health and Wellness Campus in Oklahoma City. There were eight meetings scheduled during calendar year 2017.

The Home Visitation Leadership Advisory Coalition: Since the mid-1990s, a number of evidence-based home visiting programs have been implemented across the state. As the programs came into being, a competitive atmosphere began to develop at both the local and state levels. For that reason, the Home Visitation Leadership Advisory Coalition (HVLAC) was created in 2002. This dynamic group is open to all home-based services. Participants include staff from all levels ranging from direct service providers to supervisors and administrators. These stakeholders strive for a collaborative environment and routinely gather to share information, work collectively on projects and learn best practices. The HVLAC is supported by staff from the OSDH/FSPS – primarily the CBCAP Grant Coordinator.

There were six meetings attended by participants from across the state during FY 2017. Highlights of HVLAC activities during the year include:

1) Special presentations
   a. “Children with Prenatal Substance Exposure: Impact and Intervention” by Dr. Chelsea Klinkebiel with the University of Oklahoma Health Sciences Center at the Center on Child Abuse and Neglect.
   c. “Client Privacy and Social Media” by the HIPAA Privacy and Security Program, OSDH.
   d. “Lead Poisoning Prevention” by the Lead Poisoning Prevention Program, OSDH.
   f. Ongoing home visitation data updates and discussion with the FSPS Epidemiologist at the end of each meeting.

2. Updating, continued sharing and distribution of the Home Visitors Safety Guidelines Manual – This publication was a long-term project developed by several of the HVLAC group members with a focus on safety in home visitation. The manual continues to be distributed electronically to various agencies and child abuse prevention programs across the state and is currently under revision by several content experts. The publication has been replicated by several states outside of Oklahoma.

Oklahoma Health Improvement Plan (OHIP): In 2008, the Oklahoma Legislature directed the Board of Health to outline a plan for the “general improvement of the physical, social and mental well-being of all people in Oklahoma through a high-functioning public health system.” The current “Healthy Oklahoma 2020: Oklahoma’s Health Improvement Plan” (OHIP) was released on March 10, 2015 by OSDH. The updated OHIP is guided by four flagship issues –
reducing tobacco use, reducing obesity, improving the health of children and improving behavioral health. Each of the OHIP flagship issues has its own state plan with specific goals and objectives.

The Healthy Oklahoma 2020 – Children’s Health plan addresses issues ranging from prenatal care and preterm birth to childhood immunizations, teen pregnancy and home visitation. Specific objectives related to child abuse prevention include:

- Reduce the percentage of children 0 – 17 years experiencing two or more adverse family experiences from 32.9% to 30.6% by 2020.
- Increase the number of families served in evidence-based home visitation programs from 7,517 in SFY 2014 to 8,269 by 2020.

Healthy Oklahoma 2020 is designed to engage the entire state to work collaboratively to achieve progress on issues that can be achieved through private-public and tribal partnerships as well as commitment and involvement of individual Oklahomans. Progress towards OHIP goals are monitored through a quarterly reporting system. Timely children’s health topics such as ACEs, Neonatal Abstinence Syndrome and trauma informed intervention are presented and discussed at the quarterly meetings of The Children’s Health Group (TCHG). In addition, TCHG periodically assesses and monitors progress towards achieving the 2020 Children’s Health objectives. FSPS staff routinely provides data for reports and participate in the TCHG meetings.

**Smart Start Oklahoma (SSO)/Oklahoma Partnership for School Readiness (OPSR):** In 2007, federal law required the Governor of each state to create a new body or designate an existing body as the State's Early Childhood Advisory Council. This council serves in an advisory capacity to the Governor on early childhood system issues relating to workforce, higher education, quality of early childhood programs and services, access to early childhood programs and services, data systems, professional development, and special populations. Through a memorandum of understanding in 2008 and legislation in 2010, Governor Brad Henry appointed the OPSR as Oklahoma’s State Early Childhood Advisory Council. This 32 member council is comprised of agency heads, community volunteers, and early childhood professionals. SSO provides the staffing support and overall direction for this comprehensive collaborative.

In August 2016, the OPSR Board received notification of a reduction of one million dollars in state funding from the previous state fiscal year. As a result, the OPSR Board reconfigured the structure of the organization, and the previously adopted innovative structure for carrying out its work was discontinued. Instead the OPSR Board focused efforts on crafting a Request for Proposal from community organizations to conduct a needs assessment and improvement plan for early childhood based on the Oklahoma School Readiness Pathway. In May 2017, the Board received a presentation from seven community leaders who highlighted needs of families of young children that included barriers to access services due to hours, location and availability.
Home-based family support was cited as a gap or extremely limited in many of the community presentation.

Oklahoma Champions for Early Opportunities (known as the “OKCEOs”): This statewide network of over 60 business and community leaders is dedicated to advocating to Oklahoma’s business community and legislative leaders about the strong link between early childhood development and economic growth. The network was formed in late 2010 and continues to be sponsored by the Oklahoma Business Roundtable, Smart Start Oklahoma and the Potts Family Foundation.

Preparing for a Lifetime, It’s Everyone’s Responsibility Initiative: In 2007, Oklahoma ranked 46th in the U.S. regarding infant mortality. The Commissioner of Health responded by creating the Preparing for a Lifetime Initiative (PLI). Led by the Maternal and Child Health Service (MCH), PLI has identified the following areas for concentration and improvement: number of women receiving preconception care and prenatal care, identification/treatment of maternal infections, prevention and reduction of premature births, assessment and referral for maternal mood disorders, prevention and reduction of tobacco use, promotion of infant safe sleep practices, increase in breastfeeding initiation and duration rates, and prevention of infant injuries.

The PLI’s three main objectives are to 1) improve birth outcomes; 2) reduce infant deaths, and 3) decrease racial and ethnic disparities related to maternal and infant outcomes. Through national, state, and community level partnerships, strategies such as public education, policy changes and evidence-based programs are now being implemented. Numerous FSPS staff participate in the planning, implementation and evaluation of these activities.

The top three causes of infant mortality in Oklahoma are congenital defects, disorders related to low birth weight and short gestation and Sudden Infant Death Syndrome. Although child abuse and neglect may not be listed as one of the specific top three causes of infant death, some of the same positive parenting practices that often keep parents from being abusive or neglectful are the same behaviors that decrease the likelihood of a child dying during infancy from a variety of causes.

Preparing for a Lifetime - Injury Prevention Workgroup “Period of PURPLE Crying” – Hospital Project: The PLI Injury Prevention Workgroup works with the birthing hospitals in Oklahoma to offer the “Period of PURPLE Crying (PURPLE)” Program. This nationally recognized, researched program includes a short video about preventing abusive head trauma in infants for the parent to view after delivery, but before being discharged from the hospital. It also requires that a trained professional follow up the viewing with a brief educational encounter to reinforce the lessons from the video as well as answer any questions. The parent leaves with a copy of the video so that the infants’ other caregivers can watch and learn the information as well. Currently, the PLI has a PURPLE supply that should reach almost 90% of the births until approximately October 2018.
The Injury Prevention Workgroup has also collected data over the last few years from new mothers receiving the PURPLE education and from hospital staff delivering the education. The goals of collecting this data were to determine 1) if PURPLE was being delivered with fidelity; and 2) if not, what were the barriers to delivering PURPLE in accordance with the program model. One conclusion drawn from the data thus far is that hospital staff needs to be consistently trained in the PURPLE program. Because staff works around the clock, PURPLE training must be offered in a manner that is convenient for their particular schedules. For this reason, the Workgroup developed a PURPLE training webinar that could be easily accessed by hospital staff regardless of their work schedules over the implementation/fidelity barriers issues. Two of these training webinars were hosted and recorded over the summer and remains available for future viewing by any new hospital interested in PURPLE or hospital that experiences issues with implementation or that just wants a refresher.

Improving the hospital staff’s ability to discuss the lessons embedded in PURPLE should improve the likelihood that the program will be implemented with fidelity and ultimately reduce abusive head trauma incidents.

CLICK for Babies: Period of PURPLE Crying Caps Campaign:
The CAP Action committee took on CLICK as a special project during FY 2017, contributing in ways that surprised everyone with a tremendous response. “CLICK for Babies” is a grassroots public education campaign organized by the National Center on Shaken Baby Syndrome in partnership with hospitals, public health and child abuse prevention groups to create awareness of the leading trigger for infant abuse – frustration with infant crying. During 2017, the Oklahoma “CLICK for Babies” Project, with the help of the CAP Action Committee, collected over 62,000 hats and filled three offices with new caps arriving each day. A video communication was created to share the success of the project. These hats were provided to babies born at participating hospitals during the months of November, December and January. Surplus hats will be shared with other CLICK projects nationwide and stored for next year’s implementation. Many of the donors (individually and from groups) provided heartfelt letters on what compelled them to participate with this project; examples have been included in the Attachments Section with this report. (See Attachments, Folder 4.)

Safe Sleep “Crib” Project with Maternal and Child Health: Originally, the Maternal and Child Health Service (MCH) received grants from the Robert Woods Johnson Foundation and the Association of Maternal and Child Health Programs to provide portable cribs, sleep sacks, and culturally specific safe sleep information to families to reduce infant mortality. This successful intervention continued in to calendar year 2017 through Title V Maternal and Child Health Block Grant. An emphasis was placed on providing cribs to Black and American Indian families due to their high infant mortality rate in Oklahoma. MCH developed Memorandums of Understanding with four different entities: 1) the University of Oklahoma, Children’s Hospital,

6 https://www.facebook.com/oklahomahealth/videos/1187822731317641/
Neonatal Intensive Care Unit; 2) the OSDH Office of Minority Health; 3) the OSDH Family Support and Prevention Service; and 4) the Oklahoma City Indian Clinic. During calendar year 2017, FSPS distributed 94 portable cribs to families participating in home visiting services and meeting the requirements outlined in the MOU.

The Infant and Childhood Health Advisory Council: (See page 20.)

The Oklahoma Infant Mental Health Association:
The FSPS strongly encourages early childhood professionals to become involved with the association because of its longstanding commitment to infants, toddlers and their families in the Oklahoma community and its connection to the Alliance for the Advancement of Infant Mental Health, a national organization. The association provides training and advocacy opportunities; as well as, the Infant Mental Health Endorsement program so professionals can demonstrate their competency in serving this population. It is believed that such an association will assist early childhood professionals in delivering excellent quality, culturally sensitive, relationship-focused services to infants, toddlers, and their caregivers.

The Oklahoma Injury Prevention Advisory Committee (OIPAC): The Injury Prevention Service provides the staff support for this multidisciplinary advisory body. The past FSPS Director has held a designated seat and routinely participated in the OIPAC activities.

The purpose of the Committee is to:
- advise the Injury Prevention Service on issues related to injury surveillance and data linkage;
- make recommendations regarding the development or enhancement of specific injury prevention programs;
- review the state health department’s injury and violence-related objectives; and
- assist in developing and updating the strategic plan to increase safety behaviors and reduce preventable injuries in Oklahoma.

ACTIVITIES AND SERVICES FUNDED BY CBCAP
Oklahoma utilizes their CBCAP dollars to not only support evidence-based programs, but also to provide critical infrastructure for the home-visitation network in the state.

In FY 2017, the following activities and programs were supported and/or funded by CBCAP:

- **The Nurse-Family Partnership (NFP) Program (referred to as Children First in Oklahoma):** Over 58 percent of Oklahoma’s CBCAP funds were utilized to support the NFP Program, known as a “Well-Supported” program. (See Program Assessment Rating Tool, page 39.)

- **The Incredible Years and Parent-Child Interaction Therapy (PCIT) programs within the Child Guidance Service (OSDH):** As has been done the past several years, a portion of CBCAP funds were utilized for both of these “Well-Supported” programs. (See Program Assessment Rating Tool, page 39.)
Co-Sponsorship of “Bringing the Protective Factors to Life in Your Work” Train the Trainer Series led by the National Alliance of Children’s Trust and Prevention Funds: Forty scholarships were offered to various OSDH and Oklahoma State Department of Mental Health and Substance Abuse partners as co-sponsors of this event. The training was held February 13 – 15, 2017 in Oklahoma City, OK with a requirement that every person trained, lead (at a minimum) two trainings over the course of one year. Some outcomes from the training have been included in the Attachments. (See “Folder 4: Miscellaneous Attachments”.)

Infrastructure in Oklahoma could be described as support of all things prevention.... from co-sponsoring conferences and trainings to supporting home visitation coalitions and prevention task forces to assisting with bringing stakeholders together in coordination of the prevention network and the Oklahoma State Plan for the Prevention of Child Abuse and Neglect. CBCAP funds also support travel to some conferences and the annual CBCAP meeting as well as various contracts, the prevention commercials and other activities that support primary prevention. Some examples from last FY include:

- **Prevention Commercials.** CBCAP provided partial funding for two separate commercials that were aired during the spring of 2017, which also included the month of April. (See “Commercials”, page 46.)

- **Bringing the “Pay for Success” (PfS) program to Oklahoma.** Through CBCAP funds, a contract was developed with “The Children's Trust of South Carolina” and Sue Williams, the Chief Executive Officer. Presentations were provided to various groups structured by OSDH that included the Potts Family Foundation, the Inasmuch Foundation and the Kirkpatrick Foundation, providing technical assistance and consultation to OSDH partners and other interested stakeholders in the “Pay for Success” practices. Topics included funding mechanisms for the PfS initiatives, alternative funding as it related to their experience, the role of the investor, the financial structure, etc. Following the presentations, the Inasmuch Foundation took the lead while working with the Oklahoma Department of Mental Health and Substance Abuse to develop a PfS Program. (See “Folder 4: Miscellaneous Attachments”.)

- **Co-Sponsoring the 24th Annual Child Abuse and Neglect Conference:** Thirty scholarships were offered to various OSDH partners to attend this conference that took place on April 12 - 13, 2017. CBCAP funding helped OSDH co-sponsor the event and also enabled a prevention track with speakers from outside the state, known nationally.
For fun, a Prevention Photo Booth/Selfie Station was set up at the conference, bringing lots of laughter and good networking with snapshots included in a special video slideshow. (See “Oklahoma Conference on Child Abuse and Neglect”, page 55.)

- **Participation in the Oklahoma Institute for Child Advocacy KIDS COUNT Conference**: Along with approximately 250 other participants, FSPS staff attended the KIDS COUNT Conference in Edmond, OK November 2 – 3, 2016, bringing advocates together to discuss issues impacting the children of Oklahoma. Local experts presented on areas regarding poverty, healthcare, foster care and other topics involving young Oklahomans. (See “Oklahoma Institute for Child Advocacy”, page 38.)

- **Attendance at the First Annual Early Childhood Symposium hosted by Smart Start Oklahoma (Oklahoma Partnership for School Readiness Foundation)**: The FSPS staff attended the symposium in Edmond, OK, February 9, 2017. (See “Smart Start Oklahoma”, page 13.)

- **Attendance for one representative to travel and participate in the Parents as Teachers National Conference in St. Louis, MO, October 16 - 20, 2016.** (See Training section, page 53.)

- **Attendance for one representative to travel and participate in the annual CBCAP meeting in Washington, DC, August 10 – 11, 2017.**

- **Updated, printed and distributed the Oklahoma Child Abuse Reporting Hotline Cards** that include an encouraging message to both support parents/caregivers with also the mandate to report whenever child abuse or neglect is suspected. Created in both English and Spanish.

**DESCRIPTION OF HOW PROGRAMS AND ACTIVITIES WILL OPERATE**

The FSPS is the Oklahoma leader in the prevention of maltreatment and often serves as a catalyst or facilitator in collaborative efforts between private and public agencies and other stakeholders. Below is a description of the formal child abuse prevention system which was created in statute and placed within the public health arena.

**History**: In 1984, the Oklahoma Legislature passed the Child Abuse Prevention (CAP) Act. Prior to that time, the focus of child abuse and neglect efforts was on “after-the-fact” intervention (i.e. preventing the reoccurrence of child abuse and neglect in families). The Act declared that the prevention of child abuse and neglect was a priority in Oklahoma. The legislative intent was that:

---

7 https://youtu.be/BL0YBGQ6hJU
9 Title 63 Oklahoma Statutes 1-227.
• a comprehensive approach for the prevention of child abuse and neglect be developed for the state and used as a basis of funding programs and services statewide;  
• multi-disciplinary and discipline-specific ongoing training on child abuse and neglect and domestic violence be available to professionals in Oklahoma with responsibilities affecting children, youth, and families;\textsuperscript{10} and 
• the Office of Child Abuse Prevention (OCAP) within the OSDH be created for the purpose of establishing a comprehensive statewide approach towards the prevention of child abuse and neglect.

\textit{The Office of Child Abuse Prevention (OCAP):} The CAP Act created the Office of Child Abuse Prevention which is now part of the OSDH Family Support and Prevention Service. The Commissioner of Health has fiscal and administrative duties to facilitate the implementation of the CAP Act. The duties and responsibilities of the Director of the OCAP are outlined in the CAP Act and include: 1) preparing and implementing a comprehensive “State Plan for the Prevention of Child Abuse and Neglect”; 2) funding, monitoring, evaluating and reviewing the development and quality of services and programs for the prevention of child abuse and neglect; and 3) developing an annual report of its findings related to OCAP-funded programs.

\textit{Oklahoma State Plan for the Prevention of Child Abuse and Neglect:} Up until 2013, the OCAP and the statutorily mandated Interagency Child Abuse Prevention Task Force (ITF) were charged with the creation of Oklahoma’s State Plan for the Prevention of Child Abuse and Neglect (State Plan). The groundwork was laid for this current State Plan several years ago and is to serve for years 2014 through 2018.

The content of this multiyear State Plan is based on an analysis of 1) the most current national evidence regarding effective strategies; 2) accomplishments achieved during years 2010 through 2013; and 3) feedback from local and state partners as well as citizens in the community. The State Plan was informed by conducting an environmental scan of current prevention services across the state and seeking input from a variety of stakeholders.

Several activities took place to solicit ideas and input regarding the priorities of the State Plan. The process itself was an epigenetic transformation beginning with the last Plan (2010 – 2013) and continuing through to this current State Plan. The ITF, along with FSPS staff, was actively engaged in crafting the State Plan. They dedicated meeting time on each ITF agenda to the State Plan, brought in speakers that were consistent with the future directions of the State Plan, and participated in an annual retreat in order to fully develop the State Plan goals and objectives. During this retreat (held in October 2012), the vision and framework were set forth with the assistance of keynote speaker Dr. Jeff Linkenbach, who was the Director of the Center for Health and Safety Culture with Montana State University at that time.

In addition to input garnered from FSPS staff, subject-matter experts and ITF members, there was an effort to invoke comments from a more diverse and possibly hard-to-reach population from a public online survey. This survey was promoted through the OSDH Office of Communications via a press release during April to correspond with National Child Abuse

\textsuperscript{10} Activities related to training multi-disciplinary teams now provided by the Oklahoma Commission on Children and Youth.
Prevention Month. The media release was picked up by several television broadcasts and other media outlets which shared the link to the survey as well as information about the State Plan. A total of 448 surveys were collected and utilized in the shaping of the State Plan. (See “Single Attachments” for the State Plan.)

The Infant and Children’s Health Advisory Council: The Infant and Children’s Health Advisory Council (ICHAC) was created in statute in 2013 to streamline and consolidate multiple public health advisory boards, council and task forces related to children’s health including the Interagency Task Force on Child Abuse Prevention. The jurisdiction of the ICHAC is to advise the Board of Health and the State Department of Health on all issues that arise in the areas of health care for infants and children. The ICHAC consists of eight members appointed by the Governor, Senate Pro Tempore, the Speaker of the House of Representatives and the State Board of Health:

- One who works for the state or for a political subdivision on child abuse issues;
- One who is knowledgeable about childhood immunizations;
- One who is knowledgeable about newborn screening issues;
- One who is licensed by the state as an optometrist and has knowledge of vision screening for children;
- One who is a licensed ophthalmologist with knowledge in treating visual deficiencies in children;
- One who is licensed by the state as a physician and works as a pediatrician;
- One who is licensed by the state as a genetics counselor; and
- One who is a physician licensed by the state and specializes in the diagnosis and treatment of childhood injuries in a trauma setting.

The role of the ICHAC includes the following: 1) makes recommendations to the State Board of Health on rules on behalf of the Department; 2) makes nonbinding written recommendations to the State Board of Health and/or the Department; 3) provides a public forum for the discussion of issues; 4) provides guidance and approval for State Plans; and 5) cooperates with other advisory councils, the public, the State Board of Health, and OSDH to coordinate rules. At the August 7, 2017 meeting, the former FSPS Director presented an update on the award process for the Office of Child Abuse Prevention request for proposals for community-based child abuse prevention projects.

The Oklahoma Commission on Children and Youth: The goal of the Oklahoma Commission on Children and Youth (OCCY) is to help Oklahoma’s most vulnerable children and families navigate a path to safety and well-being by providing independent oversight of the child serving system; assist communities in improving services; testing models and demonstration programs; and providing professional education and training. The OCCY also supports the following entities:

- The state and regional Oklahoma Child Death Review Boards
- The state and local Post Adjudication Review Boards
- The free-standing Multidisciplinary Teams focusing on child abuse and neglect cases
- The Oklahoma Mentoring Children of Incarcerated Parents Program
- The Board of Child Abuse Examiners
• The Child Welfare Review Committee for Death and Near Death of Disabled Children
• The Forensic Evaluators determining Juvenile Competency

In addition to OCCY’s programmatic efforts, the OCCY provides staff support to the “Commission” – a statutorily created body consisting of agency leaders and other stakeholders interested in issues affecting infants, children and youth. The Commissioners meet to consider child specific issues, approve budgets, make appointments to councils and committees, and submit recommendations to the Governor, Legislature, Supreme Court and child-serving agencies.

The OCCY serves in a collaborative role with the OSDH – in particular, the FSPS and the OCAP. The OCCY Commissioners are statutorily-mandated 1) to review and approve the “Oklahoma State Plan for the Prevention of Child Abuse and Neglect”; and 2) to assure that the Requests for Proposals (RFPs) submitted to OSDH/FSPS/OCAP are in compliance with the State Plan prior to the Commissioner of Health granting contractual awards.

*The Child Abuse Prevention Fund:* The CAP Act created the Child Abuse Prevention Fund (CAP) as a mechanism for pooling state, federal and private funds for the provision of statewide child abuse prevention services. The CAP Fund was created in lieu of a state trust fund and generally is funded with state appropriations on an annual basis. All of the CAP Funds must be used for direct services. In addition to the provided state funds, a minimal amount of revenue is collected from the “Start Right” specialty license plates. All monies in the CAP Fund are to be distributed by a formula set in statute and via a competitive bid process utilizing RFPs. Proposals are submitted, scored, and presented to the Oklahoma Commission on Children and Youth (OCCY) Commissioners prior to the awards being made by the Commissioner of Health.

For more than 16 years, the CAP Funds have been used to support community-based organizations in providing Healthy Families America (HFA) and/or Parents As Teachers (PAT) home visiting services. Currently, 13 contractors have been awarded $2,546,014 to provide PAT services in 28 counties.

*Operationalizing the Prevention System:* The FSPS serves in a leadership role and has the responsibility for directing the prevention network and a wide continuum of prevention services and activities for children and families. The FSPS, along with its many partners and formal structure, continue to explore innovative ways to promote prevention, fund services, evaluate and research implemented strategies, and advocate for policies and practices to improve the lives of Oklahoma families.
SECTION 2 - OSDH’S ACTIONS TO ADVOCATE FOR SYSTEMIC CHANGE

THE OSDH’S INVOLVEMENT IN CHILD AND FAMILY SERVICE REVIEWS AND PROGRAM IMPROVEMENT PLANS

During FY 2017, attempts to connect specifically on the Child and Family Service Reviews (CFSR) and Program Improvement Plans (PIP) were without success. However, the FSPS did have several other successes in collaborating with Oklahoma Department of Human Services (DHS) colleagues in the following efforts:

- DHS staff is actively engaged with the FSPS and other home visitation partners in the revision of the Home Visitation Safety Manual - a useful tool for both home visitors and child welfare workers.
- DHS representatives participate on the CAP Action Committee throughout the year as well as the planning of the annual Child Abuse Prevention Day at the Capitol and Mini Conference.
- DHS staff was involved in the creation, implementation, review and update of the current Oklahoma State Plan for the Prevention of Child Abuse and Neglect, 2014 – 2018.

The Family Support Accountability Act: Legislation to create “The Family Support Accountability Act” was backed by early childhood advocates, home visitors, and additional stakeholders (including FSPS staff), but statewide leadership for the legislation came from Smart Start Oklahoma (SSO). SSO held stakeholder meetings to gather input and with assistance from Pew Trust, held strategy meetings and developed the legislation’s draft language. SSO secured authors for House Bill 2157: Representative Jon Echols and Senator A.J. Griffin. The bill passed with overwhelming bipartisan support and was signed into law by Governor Mary Fallin on April 28, 2015. The Act was designed to ensure that the state’s home visiting investments are supported with proven records of effectiveness. It requires monitoring and reporting of outcomes such as maternal and infant health, family self-sufficiency, and school readiness on an annual basis. SSO staff, along with assistance from FSPS, the Home Visitation Leadership Advisory Coalition (HVLAC) led by FSPS and others, developed “The Oklahoma Home Visiting Outcomes Measurement Plan” and submitted it to the Oklahoma Legislature in accordance with the Act on January 1, 2016. The first annual report was completed and turned in December 31, 2017, on data collected during the current fiscal year. The various groups met periodically to assure that the information that was needed was being collected. (See Attachments, Folder 2.)

Included below are the recommendations from the annual report.

Implement Targeted Quality Improvement Efforts:

Quality improvement efforts strategically targeted to improve outcomes in the following measures are needed to strengthen the state’s early childhood system:

11 Pew Trust had previously passed similar legislation in 10 other states and having them share their experiences helped Oklahoma avoid certain challenges.
• Increase the number of caregivers experiencing domestic violence who have an established safety plan in place within six months of reporting abuse.
• Increase the number of referrals given to program participants whose maternal depression screening indicated the need for additional services or treatment.
• Increase the number of children who receive follow-up evaluation and intervention services related to developmental milestones.
• Increase the number of caregivers enrolling in or completing education or vocational training.
• Increase the number of caregivers seeking employment who are working after six months.
• Decrease the number of caregivers using smoking tobacco.
• Decrease the number of caregivers abusing substances.

Such efforts should seek to understand the barriers to improving these outcomes and implement strategies to overcome identified barriers. Quality improvement initiatives should be informed by families’ experiences and respond to their needs. Efforts should also include the exploration of partnerships to improve the above listed outcomes. Examples of collaborative partnerships for quality improvement include training and consultation to increase the development of safety plans with victims of domestic violence, as well as the establishment of funding initiatives to decrease exposure of young children to secondhand smoke.

_Conversations about the report will continue to jointly address the following:_
• How might this report support home visitation programs in the future.
• What was omitted that should be included in the future.
• Given the quality improvement recommendations, what ideas are there to improve these outcomes.

**THE OSDH’S INVOLVEMENT WITH OTHER RELATED COLLABORATION ACTIVITIES**

_The following Collaborative Activities were discussed in detail in previous sections:_
• The Child Abuse Prevention Action Committee (See page 11.)
• Home Visitation Leadership Advisory Coalition (See page 12.)
• The Oklahoma Health Improvement Plan (See page 12.)
• Smart Start Oklahoma/The Oklahoma Partnership for School Readiness (See page 13.)
• Preparing for a Lifetime Initiative (See page 14.)

_Oklahoma Child Death Review Board (CDRB):_ The Oklahoma Child Death Review Board (CDRB) has statutory authority to conduct case reviews of all deaths and near deaths of children less than 18 years of age and has been reviewing deaths since 1993. The mission of the CDRB is to reduce the number of preventable deaths through a multidisciplinary approach to case review. The Board collects statistical data and system failure information through case review in order to develop recommendations to improve policies, procedures, and practices within and between the agencies that protect and serve the children of Oklahoma. These recommendations are mandated to be submitted to the Oklahoma Commission on Children and Youth who then decides what, if any, recommendations will be adopted into the Commission’s State Plan for Children’s Services. Case specific recommendations are made as
well, with those submitted directly to the identified agency/organization.

By statute, there are multiple OSDH positions named as members of CDRB: the Commissioner of Health, the Director of the Office of Child Abuse Prevention, the Director of the Maternal and Child Health Service, the Director of the Injury Prevention Service, and the State Epidemiologist.

Recent accomplishments of the CDRB, with the participation of the Family Support and Prevention Service/Office of Child Abuse Prevention, include:

- During calendar year 2017, there were 39 child maltreatment-related deaths and 65 child maltreatment-related near deaths reviewed and closed by the CDRB.

Additionally, the CDRB continued to see more deaths associated with an unsafe sleep environment (73 cases reviewed and closed in 2016) than vehicular deaths (35 cases reviewed and closed in 2015); an alarming trend first noted in 2013.

The CDRB also continued to collaborate with the Domestic Violence Fatality Review Board on cases that are specific to domestic violence/interpersonal violence/family annihilation situations.

While the budget crisis resulted in a loss of resources for the Child Death Review Board, staff was able to remain minimally active only in the Preparing For a Lifetime-Injury Prevention Work Group.

**Oklahoma Domestic Violence Fatality Review Board (DVFRB):** The mission of the Oklahoma DVFRB is to reduce the number of domestic violence-related deaths in Oklahoma. The DVFRB performs multi-disciplinary case reviews in order to make recommendations to improve policies, procedures and practices within the systems that serve victims of domestic abuse. The Commissioner of Health and the OSDH Chief of Injury Prevention Services are legislated members of DVFRB.

**Findings from the 2017 Oklahoma Domestic Violence Fatality Review Board Annual Report are shared below:**

- Between 1998 and 2016, the Review Board identified 1,615 victims in Oklahoma who were killed as a result of domestic violence. In 2016 alone, 105 people lost their lives. These deaths included domestic violence victims killed by intimate partners and ex-intimate partners, family members killed by family members, children killed by family members, roommates killed by roommates, and suicide deaths of perpetrators. Of the 105 people who died, 95 were identified as domestic violence homicide victims, and ten were identified as homicide perpetrators who died as a result of suicide, law enforcement intervention, or bystander intervention.
- In 2016, the number of domestic violence fatalities was greatest in Tulsa County for the third successive year with a rate of 4.19 homicides per 100,000 people. Oklahoma County experienced the second greatest number of fatalities with a rate of 2.93 homicides per 100,000 people. Tulsa County had 26 cases resulting in 27 victim deaths and Oklahoma County had 22 cases resulting in 23 victim deaths.
**MIECHV Innovation Grant**: In addition to FSPS’s ongoing MIECHV efforts, the FSPS submitted and was awarded an application for “The Maternal, Infant and Early Childhood Home Visiting Innovation Grant.” Partners for this application include the OUCCAN, the University of Kansas Center on Public Partnerships and Research, and the Cherokee Nation. The proposed purpose of this project was to test a suite of identified best practices for improving the number of visits completed, retention rates, and ultimately, the active engagement of clients. Oklahoma, like many states, has experienced a decline in home visiting recruitment, enrollment, and retention over the last half-decade. Continuous Quality Improvement (CQI) efforts have improved those conditions; however, descending rates of visit completion and program retention have persisted. This project would address engagement problems as well as the science of how engagement affects parent and child outcomes targeted by home visiting.

The proposal included the following goals and objectives:

- **Goal 1.** Using Home Visiting Collaborative Improvement and Innovation Network (CoIIN) methods, develop a local learning collaborative to focus on issues of client engagement. **Objective 1.a.** Establish and train a local planning group of faculty advisors. **Objective 1.b.** Create a local Key Drivers Diagram that blends knowledge from past CoIIN and Oklahoma CQI experiences/findings. **Objective 1.c.** Enroll six to eight MIECHV implementing agencies from Oklahoma and Tulsa Counties as well as the Cherokee Nation.

- **Goal 2.** Implement and test identified “change ideas” for improving the number of completed visits and client retention. **Objective 2.a.** Train providers on change ideas and implement them. **Objective 2.b.** Train providers in “Lemonade for Life,” a trauma-informed approach to addressing adverse childhood experiences and strengthening rapport with clients. **Objective 2.c.** Develop and activate CQI infrastructure and resources. **Objective 2.d.** Evaluate progress through rapid “Plan-Do-Study-Act” cycles and intermediate learning sessions.

- **Goal 3.** Capture and study the multi-dimensional nature of active client engagement. **Objective 3.a.** Gather ethnographic measures of engagement from a subsample of providers. **Objective 3.b.** Gather standardized, research-based measures of engagement from provider and client perspectives.

- **Goal 4.** Evaluate the impact of engagement on constructs associated with key MIECHV benchmarks. **Objective 4.a.** Evaluate the relationship between family engagement and the following MIECHV MCH constructs: prenatal and preconception care, parental substance use, inter-birth intervals, parental depression/well-being, breastfeeding, well-child visits, health insurance status, and child maltreatment. **Objective 4b.** Evaluate the relationship between family engagement and MIECHV parenting capacity and child development constructs by using observational and biomarker indicators relating to the parent-child relationship quality.

**Oklahoma State Plan for the Prevention of Child Abuse and Neglect, 2014 – 2018 (State Plan):**
The current State Plan is in its last year while planning is underway to start again with the 2018 – 2022 State Plan. The Plan is an opportunity to focus on efforts that prevent child
maltreatment. The current State Plan includes broad goals and needed strategies with measurable objectives. Innovative actions are necessary to sustain as well as enhance the service system. Partnerships were and will be critical again given state and federal fiscal challenges and changes. The OSDH and all prevention partners stand ready to employ the most current best practices to serve and support parents. See the next page, for the 2014 – 2018 State Plan “Executive Summary.”
## INFRASTRUCTURE

<table>
<thead>
<tr>
<th>Category</th>
<th>Goals</th>
<th>Strategies</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Leadership by Oklahoma Stakeholders</strong></td>
<td><strong>Goal 1</strong> Identify new key partners throughout the Prevention Plan for all activities within the prevention spectrum and who will serve as a prevention liaison as needed regarding the State Prevention Plan, reviewing the Start Right contracts, and represent their target group as it relates to prevention, etc.</td>
<td><strong>Strategy 1</strong> The OSDH will seek and engage new and existing stakeholder partners to work collaboratively within the various areas outlined in the State Prevention Plan. <strong>Strategy 2</strong> The OSDH will work with current ITF members to maintain relationships, striving to continue the work of the task force in an organized fashion on a voluntary basis while also recruiting new members/partners.</td>
</tr>
<tr>
<td><strong>Leadership by Oklahoma Service Providers</strong></td>
<td><strong>Goal 2</strong> Increase the capacity, ownership and leadership within the child abuse prevention professional community.</td>
<td><strong>Strategy 1</strong> The OSDH, Home Visitation Leadership Advisory Coalition (HVLAC) and stakeholder partners will work collaboratively, continuing to stay informed and grow in their knowledge of current best practice, policies and models that positively impact the field of child abuse prevention and enhance the landscape of Oklahoma’s children. <strong>Strategy 2</strong> The OSDH, HVLAC and partners will collaborate and provide technical assistance and training to professionals in related fields that have the ability to impact child abuse prevention.</td>
</tr>
<tr>
<td><strong>Parent Leadership</strong></td>
<td><strong>Goal 3</strong> Establish a Parent Advisory/Leadership Group.</td>
<td><strong>Strategy 1</strong> The OSDH with the support of the Family Resource Information, Education and Network Development Services (FRIENDS) will research, seek and secure speakers, training opportunities, technical assistance and information on the importance of a parent advisory leadership group (representative of different children’s ages, children with special needs and demographic variation), the process involved with creating such a group, and how best to collaborate with said group once it is achieved.</td>
</tr>
</tbody>
</table>
**Strategy 1**
The OSDH will work with programs in the child abuse prevention network (Appendix II), such as, Children First, Start Right, Child Guidance, Head Start, Parents as Teachers, Healthy Start, Family Expectations, etc., to take the necessary steps to institutionalize and put into operation a parent advisory/leadership group.

| Create a Culture of Change| **Goal 5** Create a culture of change that values the health, safety, and well-being of children. | **Strategy 1** The OSDH will work on a community development approach that builds on the *Positive Community Norms Framework* with experts using the “Science of the Positive” approach to educate and mobilize communities to shift community norms towards positive child development and family functioning so that child abuse and neglect is viewed as preventable and unacceptable. **Strategy 2** The OSDH, Smart Start Oklahoma and stakeholder partners will continue to seek and explore effective, creative Community Engagement Initiatives/Models, sharing them statewide as they are available with traditional and non-traditional target groups (i.e. faith-based population, libraries, businesses, etc.)  **Strategy 3** The OSDH will continue to seek training opportunities and technical support through the Community-Based Child Abuse Prevention Grant (CBCAP) as funds are available and the FRIENDS network related to community-building and community engagement, sharing professional talents of experts in the field with statewide stakeholders.  **Strategy 4** The OSDH will work with Smart Start Oklahoma and other stakeholder partners to support the implementation of quality early childhood programs.  **Strategy 5** The OSDH and Smart Start Oklahoma will collaborate to assure Strengthening Families Protective Factors are introduced, made
available, and integrated into all prevention programs serving children and families.

**Strategy 6**
The OSDH will generate a campaign focusing on the Adverse Childhood Experiences Study (ACES), including inviting participation of stakeholder partners, conducting preliminary research and gathering data to put measurable objectives in place, and creating a presentation package that will be made available statewide.

**Strategy 7**
The OSDH, the Child Abuse Prevention (CAP) Action Committee, and other stakeholder partners will engage non-traditional partners to get involved in and support general and/or all child abuse prevention efforts (i.e. business community, libraries, civic groups, faith-based groups, etc.).

<table>
<thead>
<tr>
<th>Supporting Parents</th>
<th><strong>Goal 6</strong></th>
<th><strong>Strategy 1</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Assure that general parent education and family support are universally available across the state.</td>
<td>The OSDH, Smart Start Oklahoma and other stakeholder partners will work collaboratively in seeking and implementing various vehicles for providing education information to parents and caregivers to assist them in providing safe, stable and nurturing environments for children.</td>
</tr>
</tbody>
</table>

**Strategy 1**
The OSDH and Bethesda, Inc. in Norman will work with partners across the state to implement community-based programs that emphasize adult education and responsibility in keeping children safe from sexual predators.

### TERTIARY PREVENTION

<table>
<thead>
<tr>
<th>Category</th>
<th>Goals</th>
<th>Strategies</th>
</tr>
</thead>
</table>
| Inclusion of Families known by Child Serving Agencies | **Goal 10**  
Include in the comprehensive system, prevention programs focused on serving families identified by the child welfare, mental health, substance abuse, and/or domestic violence systems. | **Strategy 1**  
The OSDH will support DHS, Child Welfare as they continue to implement the Pinnacle Plan emphasizing child safety.  
**Strategy 2**  
The OSDH will provide support when appropriate to collaborative partners in increasing the number and quality of mental health services available to both children and adults.  
**Strategy 3**  
The OSDH will work to identify new partners and provide support when appropriate to collaborative partners already in place in increasing the number and quality of substance abuse treatment services for both adults and children.  
**Strategy 4**  
The OSDH will work to identify new partners and provide support when appropriate for existing partners already in place in increasing the number and quality of domestic violence services.  
**Strategy 5**  
The OSDH will work to identify new partners and provide support when appropriate for existing agencies working in the field to continue to explore the overlap between child abuse and domestic violence incidents, investigations, as well as best practices for prevention and intervention. |
| Cultural Competence in System | **Goal 11**  
Promote and/or provide culturally appropriate services that maximize the participation of various cultural and ethnic populations. | **Strategy 1**  
The OSDH and state and local partners will seek and provide to interested partners best practice and evidence-based/evidence informed models on a continual basis to assure appropriate services are available to culturally diverse populations.  
**Strategy 2**  
The OSDH, state and local partners will continue to redefine the components needed for the comprehensive system as child abuse prevention programs’ populations evolve. |
INNOVATIVE FUNDING STREAMS

Nurse-Family Partnership: In 1995, the Oklahoma Legislature requested that the OCAP explore new approaches to strengthen families and reduce the incidents of child maltreatment. The OCAP staff invited Dr. David Olds of the University of Colorado to present data gathered from his clinical trials involving nurse visited families to members of the legislature. The legislators were impressed and provided $1.1 million in state appropriations for a pilot of what is now known as “Nurse-Family Partnership.” Since that time, funding of the program has peaked at $15 million in state appropriations to a current level of approximately $5.8 million.

Over the years, additional funding has been provided to NFP. By the late 1990s, NFP nurses were billing Medicaid for targeted case management services. Today the majority of Medicaid reimbursement is for nursing assessments. As state funding has been reduced, county health departments have secured local county millage to sustain the program in parts of Oklahoma. Lastly, CBCAP funds are often utilized to partially support NFP work contracted out to the Tulsa County Health Department and the Oklahoma City-County Health Department.

Training: The FSPS works to provide exceptional training for prevention professionals – particularly those working within the home visiting field. Efficiencies have been made in the delivery of the trainings including online opportunities, regional offerings and video conference participation. Trainings are supported by state appropriations, MIECHV funds, CBCAP funds and revenues generated from Oklahoma’s Heirloom Birth Certificates. A total of $37,579 is budgeted for prevention trainings per year with heirloom birth certificate funding.

Child Guidance Service: In SFY 2017, the Child Guidance Service’s annual budget was approximately $4.9 million. Funding for the program came from a variety of sources including state appropriations, county millage, federal funds and fee collection.

</table>
The OUCCAN Sustainability of Evidence-Based Home Visitation Program Committee: The University of Oklahoma’s Center on Child Abuse and Neglect was the awardee for the Administration for Children and Families’ “Evidence-Based Home Visiting” (EBHV) Grant more than six years ago. One of the requirements of that grant was to create a committee that would explore future funding opportunities that could sustain the EBHV grant-funded programs after the grant ended.

After OSDH was awarded the MIECHV Grant, the Sustainability Committee graciously took on a broader scope. All home visiting models and home visiting programs, regardless of funding source, are now invited to participate in the Sustainability Committee’s meetings and work. The Sustainability Committee includes members from multiple state agencies (e.g., OSDH, DHS, OCHA, OCCY), nonprofit agencies (e.g., NorthCare Center, Parent Child Center), tribes (Choctaw Tribe, Cherokee Tribe), the Oklahoma Institute on Child Advocacy, the University of Oklahoma Health Sciences Center, Oklahoma State University and the Business community. Also included in other areas of this report, the Sustainability Committee collaborated with the Potts Family Foundation to develop and maintain an independent “parentPRO” website dedicated to home visiting and parenting (www.parentpro.org) which is regularly updated with resources and services for families. Further, fact sheets on the home visitation programs and related topics have been developed and distributed. Members of the committee present to educate others about the programs in Oklahoma.
SECTION 3 - COLLABORATION AND COORDINATION

PARTNERSHIPS AND COLLABORATIONS IN PUBLIC HEALTH

Child Guidance Service: The missions of FSPS and the Child Guidance Service often overlap and the two Services find themselves collaborating perhaps more than any two other services within OSDH. Below are the past collaborative activities:

1) Introductions to Home Visited Families: All home visited families are provided written information and introduced to Child Guidance services by their home visitor during one of their first home visits. The goal of this partnership is to assure that families know about additional services that could either enhance their home visiting experience or at some point, perhaps replace home visiting once they have graduated from the program or no longer feel that home visiting is a good fit for them. This partnership became formalized with the implementation of the first Oklahoma MIECHV Grant by an internal Memorandum of Intra-agency Cooperation (MIC). (See Attachments, Folder 1.)

2) Multidisciplinary Teams Providing Individual Services: Each Child Guidance Service multidisciplinary team consists of the following disciplines:
   a. Child Development Specialists (CDS): The CDSSs are parent educators who focus on children birth to age eight years. They administer developmental screenings and assessments; provide parent consultation; teach parenting groups; provide early childhood mental health consultation to centers serving young children; and more.
   b. Speech Language Pathologists (SLP): The SLPs offer screening, diagnosis and treatment for children who are identified as exhibiting speech, language or hearing delays; educate parents on techniques to promote communication development; and consult and train other professionals about communication development.
   c. Behavioral Health Clinicians: These clinicians screen, assess and evaluate children in order to identify a child’s strengths, abilities, and potential needs and if necessary, provide a course of treatment. Treatment may be individual or family counseling. In addition, the clinicians provide consultation to other professionals serving children in a variety of settings such as schools, Head Start, foster care and adoption services.

3) Evidence-Based Programming: The following programs are partially supported with CBCAP funding and serves families with young children:
   a. Incredible Years - Parent Groups: These skill-based groups are designed to prevent and treat behavior problems in young children and promote social, emotional and academic competence. During Calendar Year 2015, 377 parents and/or caregivers participated in a total of 161 hours of Incredible Years activities (most current data available).
   b. Circle of Parents (COP) – These small parent groups are co-facilitated by a CDS and a Parent Leader. Parents who are participating in home visiting programs are highly encouraged to participate as a way to keep from feeling isolated. During State Fiscal Year 2017, a total of 259 parents participated in one of the 21 COP groups across the state.
   c. Parent-Child Interaction Therapy (PCIT) – This behavioral intervention serves children two to seven years of age and their parents. This model coaches parents in skills that will
improve the relationship with their child and in turn, increases the child’s social emotional abilities.

4) **Project LAUNCH (Linking Actions for Unmet Needs in Children’s Health):** The Child Guidance Service has been awarded a Project LAUNCH Grant from the Substance Abuse and Mental Health Services Administration. This Project is located in northeast Oklahoma in Rogers County. FSPS partners with Child Guidance by incorporating their PAT home visitor into the FSPS home visiting support system including opportunities for training, technical assistance by the FSPS PAT Consultant and program evaluator. The LAUNCH PAT home visitor is also utilizing the FSPS PAT data collection forms as well as the FSPS electronic case management system.

5) **Childcare Warmline:** Funded by DHS, the Child Guidance Service provides free phone consultation for those working in childcare. The callers can have their issues addressed by a public health nurse, child development or a behavioral health specialist. These same professionals also make themselves available to answer parents and caregivers questions when they call into “parentPRO”- the toll-free number to receive assistance in connecting with home visiting programs. Calls are answered Monday through Friday during work hours only.

**PREPARING FOR A LIFETIME Initiative:** The FSPS staff participates on the various PLI committees and activities that impact pregnant women and young children in an effort to reduce infant mortality. (See page 14.)

**PRAMS/TOTS:** FSPS staff participates on the PRAMS/TOTS Steering Committee and utilizes PRAMS/TOTS data in making programming decisions and writing grants. (See page 9.)

**SOONERSTART/EARLY INTERVENTION:** Oklahoma's Early Intervention program is a state and federally mandated program established to meet the needs of families with infants and toddlers that have developmental delays and/or disabilities between the ages of birth to three years old. SoonerStart services may include:

- Visits in the child’s natural environment (i.e. home, child care)
- Evaluations
- Case management
- Child Development/Special Instruction
- Psychological/Social Work services
- Nursing services
- Nutrition services
- Occupational Therapy
- Physical Therapy
- Speech-Language Pathology
- Vision services
- Hearing related services

Infants and toddlers, birth to three years of age may qualify for the SoonerStart program with a significant developmental delay. Infants and toddlers who have a diagnosed physical or mental
condition (such as Down syndrome, Cerebral Palsy, etc.) which will most likely cause a developmental delay are automatically eligible for SoonerStart services. SoonerStart is funded through various state and federal sources, therefore, services are offered at no cost to families.

All children participating in FSPS home visiting programs are screened for delays. When appropriate, children are referred to SoonerStart for individualized services and treatments. During the FY 2017, 196 clients were referred to SoonerStart by FSPS programs. While a family is NOT allowed to participate in two home visiting programs at the same time, it is allowed for a family to participate in a FSPS-funded home visiting program and SoonerStart. The two programs goals are not duplicative and complement each other. In addition, it is expected, when families give written permission, the professionals providing services will communicate and share information when necessary and in appropriate ways.

**INJURY PREVENTION SERVICE:** Staff from the FSPS has a strong relationship with the Injury Prevention Service and support the work of their Service (i.e. the previously mentioned car seat program). FSPS participates in several of the Injury Prevention Service grant-driven activities. Lastly, the former FSPS Director has served as an active member of their Oklahoma Injury Prevention Advisory Committee.

Some examples of 2017 accomplishments include:

- Distributed 637 car seats throughout Oklahoma City;
- Provided 78 official car seat checks;
- Taught one-day Child Passenger Safety Classes to 14 different childcare providers throughout the state and also locally to other target groups such as the Nurse-Family Partnership staff, C-1 Nurses, Oklahoma Department of Human Services Child Welfare workers, Perinatal Nurses and DHS Childcare Supervisors;
- Presented on Child Passenger Safety to three of the schools in Oklahoma County including one for teen mothers in the New Beginnings class;
- Assisted with two – three day CPS certification classes;
- Assisted with car seat checks at the Infant Crisis Services, Inc., Battiest Elementary School, OKC Indian Clinic and two Special Needs Seat Checks; and
- Made a CPS presentation at the Oklahoma Perinatal Nurses Forum.

**PARTNERSHIPS AND COLLABORATIONS WITH OTHERS**

_Smart Start Oklahoma (SSO):_ Established under the Oklahoma Partnership for School Readiness (OPSR) Act in 2003, SSO provides a structure for collaborative planning and decision-making to increase coordination between programs, maximize the use of public and private funding, and pursue policies for improving learning opportunities and environments for Oklahoma children under six years. SSO is a public-private partnership made up of two branches: the Oklahoma Partnership for School Readiness (OPSR) Board, and the OPSR Foundation. Additionally, the OPSR Board is the designated body that serves as Oklahoma’s State Early Childhood Advisory Council.

FSPS has partnered with SSO this past year in the following activities:
1) SSO worked tirelessly with FSPS, the Pew Charitable Trusts, policy consultants and early childhood advocates to draft and eventually pass the Family Support and Accountability Act. This year, data was collected through home visiting programs to prepare for the first accountability report due in December 2017. (See page 22.)

**Oklahoma Partnership for School Readiness (OPSR):** In 2007, federal law required the Governor of each state to create a new body or designate an existing body as the State’s Early Childhood Advisory Council. This council serves in an advisory capacity to the Governor on early childhood system issues relating to workforce, higher education, quality of early childhood programs and services, access to early childhood programs and services, data systems, professional development, and special populations. Through a memorandum of understanding in 2008 and legislation in 2010, Governor Brad Henry appointed the OPSR as Oklahoma’s State Early Childhood Advisory Council. This 32 member Council is comprised of agency heads, community volunteers, and early childhood professionals.

The OPSR has graciously served as the Advisory Council for the OSDH MIECHV Grant. Their diverse membership of early childhood experts and stakeholders make them the obvious choice to guide the MIECHV staff when developing new applications. In addition, their meetings provide an excellent space to share lessons learned, data analysis and more.

**Prevent Child Abuse America - Oklahoma Chapter:** The Prevent Child Abuse America - Oklahoma Chapter (PCAOK) collaborated with the FSPS staff on the CAP Action Committee and April prevention planning. They took the lead on advocacy components throughout the year by directing and leading advocates in common efforts to protect children from child abuse and neglect.

In addition, they added to the child abuse prevention activities during the month of April by bringing back the impactful “Field of Flags” sponsored by the Oklahoma City and Edmond chapters of the National Exchange Club. The “Field of Flags” was located on the south lawn of the Oklahoma State Capitol. Fifty-six Oklahoma state flags were planted, representing each of the children killed in Oklahoma in SFY 2015 as a result of child abuse or neglect. A few feet away, 1,100 American flags also were planted as a solemn reminder of the thousands of children in America that die each year from abuse or neglect. Along with the “Field of Flags”, PCA organized an accompanying ceremony that included legislators, prosecutors, prevention experts and various child-serving organizations. PCA’s participation in Child Abuse Prevention Month activities drew the attention of the media and the general citizenry.

**Home Visitation Leadership Advisory Coalition (HVLAC):** The FSPS coordinates the HVLAC by convening, and facilitating their meetings which serve as a networking opportunity for those providing home visiting services and those connected with home visiting in any capacity. Members from various agencies and programs working at all levels, from supervisory roles to the front lines, participate. Membership is comprised of representatives from state agencies, such as counterparts at the DHS and the Oklahoma State Department of Education, and others from the University of Oklahoma, public school districts, youth and family services agencies, PCAOK, parent-child centers and other private non-profits. This coalition allows members to
share information, work together to find solutions to common problems and disseminate best practices. Generally, each meeting includes a presentation from a relevant topical expert.

The University of Oklahoma Center on Child Abuse and Neglect (OUCCAN): The OUCCAN was established in the Department of Pediatrics, College of Medicine, at the University of Oklahoma Health Sciences Center (OUHSC) in 1992. Its purpose is to organize the OUHSC’s efforts in the treatment and prevention of child abuse and neglect. OUCCAN has 25 faculty and over 150 staff and students that focus on research, professional and public education, clinical services, and administrative programs in the field of child maltreatment. The Center directs research on child abuse fatalities, children with sexual behavioral problems, clinical interventions with parents/caregivers with drug-exposed infants, family preservation programs, parent-child interaction therapy and a research study in Russia on prevention of fetal alcohol syndrome. Administrative programs include the Oklahoma Advisory Task Force on Child Abuse and Neglect and the National Center on Sexual Behavior of Youth. In addition, the Center coordinates the University of Oklahoma’s Interdisciplinary Training Program on Child Abuse and Neglect.

OUCCAN was engaged in the following activities with the FSPS:

- Provided external evaluation for the MIECHV Grant;
- Directed CQI efforts for MIECHV home visiting programs;
- Received MIECHV funds and subcontracts for SafeCare direct services;
- Facilitated the Parent Partnership Board for home visiting;
- Provided external evaluation for the PAT Pilot; and
- Facilitated the Sustainability Committee (See page 32.)

Court Appointed Special Advocates for Children (CASA): The mission of the Oklahoma CASA Association is to provide a statewide voice for abused and neglected children by enhancing the growth and sustainability of CASA programs across Oklahoma. The Association provides technical assistance, training opportunities for both staff and volunteers, and program support to local CASA programs in Oklahoma.

The Oklahoma CASA Association has collaborated with the FSPS for almost a decade by participating in annual events, contributing to the CAP Action committee, and most importantly assisting with the development of child abuse prevention social marketing items including social media.

The Potts Family Foundation: The mission of the Potts Family Foundation is to provide support for childhood initiatives and nonprofit capacity building. They are a family foundation, organized as a private foundation with a majority of their board comprised of community leaders. The Potts Family Foundation is a key partner in many early childhood activities.

The Potts Family Foundation has collaborated with the FSPS by serving as conveners, supporters, advocates and cheerleaders for home visiting in particular. They provided funds for an independent, consumer-friendly website, parentPRO, to be developed that now provides information about home visiting programs and other early childhood services. It also includes an activities calendar, parenting tips, product recall information, coupons, and more. For more information, go to www.parentpro.org.
**Oklahoma Institute for Child Advocacy (OICA)**: The OICA is a state-wide nonprofit organization, established in 1983, working to deliver data-driven policy to impact the wellbeing of children in the state of Oklahoma. OICA is a partner with multiple state and national foundations and houses the OICA Statistical Daily Desktop Calendar. This publication delivers data points indicating the wellbeing of children in Oklahoma, along with highlighting children’s organizations doing good work in our state.

OICA’s annual Fall Forum, which FSPS participates, strives to educate key stakeholders, advocates and partners on current policy and topic areas affecting Oklahoma children. Out of the conference, OICA develops an advocacy agenda for the upcoming legislative session and for state agencies.

The work OICA does beneath the capitol dome, and in partnership with organizations and communities across the state, is supported by current data and research on children and families in Oklahoma.

OICA hosts direct service programs such as OK-LEAD, a youth development program pinpointing at-risk youth to attend a symposium to teach leadership and life skills. OICA also runs OK Foster Wishes, a program which partners with the Oklahoma State Department of Human Services (DHS) and several private partners to fulfill the wish lists for foster kids in all 77 counties in Oklahoma. For more information, go to [http://oica.org](http://oica.org).

**National Alliance of Children’s Trust and Prevention Funds (Alliance)**: The Alliance is a membership organization that provides training, technical assistance and peer consulting opportunities to organizations administering state children’s trust and prevention funds. Their overarching goal is to strengthen the effort related to child abuse prevention in these organizations. Oklahoma has a rich history of participation and collaboration with this organization. In the past, the FSPS staff has spent time serving on the Board of Directors and also in the capacity of member-at-large. In addition, Oklahoman and parent advocate Betty Hawkins-Emery continued service on the Alliance’s National Parent Partnership Council. Her term ended in November 2017.

DEMONSTRATE HOW OSDH HAS ASSESSED UNMET NEEDS

Generally, the FSPS relies upon the following four needs assessments or documents when making programmatic decisions:

1) The Title V Needs Assessment – (Highlights Only)

2) **Maternal Health:** In 2016, the Oklahoma population of childbearing age females (15-44 years) numbered 768,431, representing 20% of the total population and 39% of the total female population (1,979,658). The majority of reproductive age females were white (75%), followed by American Indian (12%) and African American (10%). Nearly 12% were of Hispanic origin. Approximately 17% of women of reproductive age were less than 20 years of age.

3) The MCH priority needs for Oklahoma’s Title V Block Grant cycle 2016-2020 specific to the maternal health population domain include: 1) reduction of infant mortality, 2) reduction of preterm and low birth weight infants; 3) reduction of unplanned pregnancy; 4) reduction in the prevalence of chronic health conditions among women of childbearing age, and 5) reduction of health disparities.

4) In addition, the Medicaid State Plan Amendment, SoonerPlan, provides access to reproductive health services for women and men at or below 133% of federal poverty level. Family Planning clinics within the state are focusing on providing information on the most effective method of contraception to prevent unintended pregnancies, assist with reproductive life planning and ensure healthy spacing of pregnancies.

5) **Perinatal/Infant Health:** In Oklahoma for years 2014-2016, there were a total of 159,025 births; 74.7% of the births were to White mothers, 10.3% to African American mothers, 11.6% to American Indian mothers, and 3.4% to Asian/Pacific Island mothers. Hispanics comprised 14.0% of total births during this time.

6) The MCH priority needs for the Title V Block Grant cycle 2016-2020 specific to perinatal and infant health include: 1) reduction of infant mortality, 2) reduction of preterm and low birth weight infants; 3) reduction of unplanned pregnancy; 4) reduction in the prevalence of chronic health conditions among women of childbearing age, and 5) reduction of health disparities.
7) **Child Health:** In 2016, approximately 18% (698,306) of the Oklahoma population was under 13 years of age. Fifty-one percent of the Oklahoma children in this age range were male. By race, 72% of the children were White, 14% were American Indian, 12% were African American and 17% were Hispanic. Child death rates have fallen significantly over the past two decades, decreasing from 51.0 per 100,000 in 1997 to 35.4 per 100,000 in 2016 for children ages one to four, down 31%; from 21.8 to 16.3 per 100,000 for children ages five to nine, down 25%; and from 28.8 to 16.9 per 100,000 children ages 10 to 14, down 70%. Unintentional injuries are the number one cause of death among children ages one to 14 years.

8) “The Title V Block Grant Cycle 2016-2020 includes the reduction in the incidence of unintentional injuries and reduction of health disparities as one of its priority needs.”

9) **MIECHV Statewide Needs Assessment:** The MCH Service and FSPS collaborated in creating Oklahoma’s comprehensive needs assessment in response to the second phase of the MIECHV Grant. The purpose of conducting the needs assessment was to identify “at-risk” communities across Oklahoma that could be positively impacted by providing home visiting services or expanded existing home visiting services. The variables used to calculate risk were dictated by the grant guidance and included at a minimum:

- Premature birth, low-birth weight infants, and infant mortality, including infant death due to neglect, or other indicators of at-risk prenatal, maternal, newborn, or child health;
- Poverty;
- Crime;
- Domestic violence;
- High rates of high-school dropouts;
- Substance abuse;
- Unemployment;
- Child maltreatment; and
- Domestic violence.

In addition to the individual indicators that were analyzed, the needs assessment also looked at the quality and capacity of existing home visiting programs and other relevant MCH services. The needs assessment also noted if a military base or tribal nation headquarters was located in a county. Furthermore, Oklahoma was interested in assessing the existence and availability of the following services in each county, believing that they needed to be present in order for home visiting to be a success:

- Substance abuse treatment services
- Mental health treatment services
- Domestic Violence Services
- Head Start Centers
- Educare Center
- Three Star Childcare Centers
- Public Pre-Kindergarten
- Child Guidance Service within a local county health department
- Smart Start Oklahoma Community
At the conclusion of the needs assessment, ten counties were identified as “at-risk.” However, it was decided that it would be best to concentrate on counties that had a total population greater than 10,000. Two counties in the initial list of at-risk counties did not have a population above 7,000 (Coal and Greer Counties). For this reason, the list of ten at-risk counties included: Kay, Garfield, Oklahoma, Muskogee, McCurtain, Carter, Adair, Comanche, McClain and Tulsa. Priority was given to counties that had the all or most of the above listed services. In the end, all counties except McCurtain, Adair, and McClain benefitted from MIECHV funding. With the recalculation of the latest MIECHV Formula Grant, MIECHV funding was restricted to Oklahoma, Tulsa, Muskogee and Carter Counties - beginning October 1, 2016. (See Attachments, Folder 1.)

10) **State Plan for the for the Prevention of Child Abuse and Neglect 2014 - 2018**  
(See Single Attachments.)

11) **The Oklahoma Child Abuse Prevention Network Inventory:** “The Oklahoma Child Abuse Prevention Network Inventory” is a scan of the prevention services in Oklahoma. Each program description includes funding source, numbers served, measurable outcomes, contact information, etc. The programs and services that were included are not inclusive of every child abuse prevention program or related program in the state; however, the inventory does represent a majority of the larger programs and services that are available. Please note: Information was gathered with due diligence from each of the program’s lead agencies. *(See Appendix A.)*

**PROVIDE THE INVENTORY AND DESCRIPTION OF SERVICES**  
*(See Appendix A.)*

**DEMONSTRATE DEVELOPMENT, OPERATION AND EXPANSION OF PROGRAMS AND ACTIVITIES**
During 2017, the following agreements were in place to provide programs and activities throughout Oklahoma:

**Memorandum of Intragency Collaboration:**
- FSPS and Child Guidance Service to assure that home visiting clients are made aware of Child Guidance programs
- FSPS and Injury Prevention Service to collaborate in order to prevent childhood injuries
- FSPS and Comanche, Carter, Garfield, Kay and Muskogee County Health Departments to provide Nurse-Family Partnership services
- FSPS and Comanche, Carter and Muskogee County Health Departments to provide Healthy Families America (HFA) and Parents as Teachers (PAT) services
- FSPS and Maternal and Child Health Service to reduce infant mortality and morbidity by providing safe sleep education and distributing portable cribs, sleep sacks and educational materials to families participating in home visiting services (Clients)
Contracts:

Nurse-Family Partnership for rights to utilize the NFP model
Healthy Families America for rights to utilize the HFA model*
Center for Children and Families, Inc. for HFA/PAT services*
Great Plains Youth and Family Service, Inc. for HFA/PAT services
Help-in-Crisis, Inc. for HFA/PAT services*
Latino Community Development Agency for HFA/PAT services*
McClain-Garvin Youth and Family Center for HFA/PAT services*
McCurtain County Health Department for HFA/PAT services*
Northern Oklahoma Youth Services for HFA/PAT services*
Northwest Family Services, Inc. for HFA/PAT services*
Parent Child Center of Tulsa for HFA/PAT services*
Parent Promise for HFA/PAT services*
Youth & Family Services for Hughes & Seminole Counties for HFA/PAT services*
Parents as Teachers National Center for rights to utilize the PAT model
Bethany Public Schools for PAT services
Community Action Project of Tulsa for PAT services
Latino Community Development Agency for PAT services
Oklahoma City Public Schools for PAT services
Parent Child Center of Tulsa for PAT services
Smart Start Oklahoma for Community Connectors
Numerous contracts with trainers, content experts, etc.

Interagency Agreements:

Oklahoma City-County Health Department for NFP services
Tulsa Health Department for NFP services
Tulsa Health Department for Community Connector
OUCCAN for external evaluation of MIECHV Grant activities
OUCCAN for SafeCare services
OUCCAN for external evaluation of PAT Pilot

*Statement of Transition:
The Healthy Families America Model was utilized during the beginning of FY 2017 with a quick change in program models shortly thereafter (November 2016) to the Parents As Teachers Model. The contractors successfully made the transition to the Parents as Teachers Model, which has universal access and broad enrollment criteria based on the age of the child allowing families to access the program during the prenatal period through kindergarten completion. By implementing the PAT model, contractors were able to serve the same population, with less administration costs.

SUCCESS STORIES
The following pages include just two examples of families that have benefitted from services.
“I was a Children First (C1) client from 2005 through 2008. My nurse was there for me during a vulnerable time in life. I became pregnant with my first son when I was a junior in high school, marrying my husband just prior to the birth of our son. I was nervous and scared how becoming a mother at a young age would impact my relationship with my husband and parents. I was also nervous because I had never had to take care of a newborn. Fortunately, I had a C1 nurse who was there to support me during my first pregnancy and help ease my transition into motherhood.

While my nurse didn’t replace my doctor visits, she was there to offer guidance and support as well as connect me to available community resources during my pregnancy. My nurse monitored me throughout our visits and was even the first to tell me that my blood pressure was elevated. My nurse counseled me on risk factors associated with high blood pressure and encouraged me to discuss my blood pressure with my doctor. Thankfully, I took her advice seriously and discussed these issues with my doctor. I was diagnosed with pregnancy-induced hypertension and pre-eclampsia later in my pregnancy. It was nice to have someone looking after me and providing the education that my doctor’s office didn’t seem to have time to provide adequately. I was also thankful to have a nurse to discuss my fears and concerns related to the labor and delivery process.

As if being a pregnant teen wasn’t scary enough, my nurse was there once again to help me transition to motherhood. “Children do not come with instruction manuals”, as I have been told by many, but my nurse helped to guide me and to instill confidence in me as a new mother. My nurse provided evidence-based information about child safety, such as car seat and crib safety guidelines, which helped me to keep my child safe. My nurse monitored my child for developmental delays and reminded me when his immunizations were due. My nurse also provided me with positive feedback regarding my abilities to parent my child, which boosted my confidence.

When I got pregnant at age seventeen, I felt like my life as I knew it had ended. I was worried that I had disappointed my family and feared I would never realize my dream of going to college. Not only was I a young mother, but I was also a young wife. Getting married and becoming a parent at a young age were trying at times, but my nurse offered a listening ear and helped guide me toward solutions that worked well for me and my family. Because of my nurse, I not only had support transitioning into my role as a mother, but I had guidance during times when my relationships with my husband and parents became strained due to the added responsibilities of raising a child. I feel like my nurse helped me to communicate my feelings more effectively, which in turn, preserved the relationships with my husband and parents.

Through the C-1 program I gained a mentor, someone who believed in me and provided guidance, which in turn made me believe in myself. My nurse taught me about goal setting, and helped me to prioritize and focus on personal goals. She gave me the tools that I needed to thrive not only as a mother, but as a person. My nurse provided encouragement, which motivated me to finish high school. I was so moved by the way that she believed in me, that I would tell her that I wanted a job like hers, a job where I could make a difference in the lives of young mothers. I knew then that I wanted to pay it forward in some way and I later became a nurse.

My son and I were discharged from the program after he turned two years old. The graduation ceremony was not only symbolic of my little boy growing up, but also symbolized the beginning of another chapter in my life. This next chapter would be all about putting my skills and restored confidence to good use. Since completion of the program, I have completed both an Associate Degree of Science and an Associate Degree of Applied Science in Nursing. I graduated from Northern Oklahoma College’s nursing program in 2011. I currently work in a public health setting, which serves a vulnerable population, including young and first time mothers. I am a member of Teen Engagement, Advocacy, and Mentorship (TEAM), a coalition designed to prevent teen pregnancy. I am actively pursuing my Bachelor of Science in Nursing through Northeastern State University with an anticipatory graduation date of May 2018. My husband and I have now been married for eleven years and have two precious sons, Braden (age 11 years) and Blake (age 3 years). Braden, my little C-1 graduate, is doing well. He is in Chisholm Elementary School in the Gifted and Talented Education Program and has made the Superintendent’s Honor Roll. The C1 program had a positive impact on my family, and I am forever grateful to my nurse who believed in me and gave me tools I needed to become a successful mother.”

Nurse-Family Partnership/Children First Family
Louetta, Blake and Braden Germundson, Enid, OK
In August of 2016, the parentPRO hotline received a call seeking services for a parent who just had an emergency C-section at 35 weeks gestation and desperately needed support. The parentPRO referral staff took quick action and connected the family to Parent Promise (OKC) where she was enrolled. The parent was close to 40 years old and diagnosed with Cerebral Palsy (the pregnancy was high risk). Her baby weighed four pounds, nine ounces and spent 14 days in the Neonatal Intensive Care Unit. Upon arriving home, the family was able to access continued support through home-based parenting services.

As trust built with the parent educator, the walls began to break down. The parent confided in her worker that she had two children who were raised by her mom and family members. She shared that earlier in life she was young and wild and when her children were born, she took her mom up on the offer to care for them. The parent also had concerns about having another baby at almost 40 years of age until realizing that this was an opportunity to be the mother she longed to be and a perfect second chance.

The Cerebral Palsy affects the mother’s right side of her body, leaving her with little to no function as well as a speech impediment that makes it difficult for her to communicate clearly. She struggled to care for her baby, but with the help and support of the parent educator, she knew she could do it. The parent reported knowing very little about how babies develop when her older children were born. Activities to promote bonding attachment and healthy development were provided at each home visit. The parent educator shared information about development, prematurity, Sudden Infant Death Syndrome (SIDS) and Shaken Baby Syndrome and also administered the Ages & Stages Questionnaire (ASQ) to help the mother understand more about her child’s developmental milestones. The result showed the child was at or above the normal range on the ASQ. But even though all was well, the parent still had concerns in the area of speech due to her own challenges with being unable to speak clearly to her child. The parent educator read, talked, and sang to the child at every visit in order for him to get opportunities to hear clear and precise language regularly. Books were left each time with the parent educator discussing ways to share books with the child that encouraged language skills.

The parent continued to face difficulties even sharing with her worker that her own mother and other family members doubted her abilities to care for her child so much that they encouraged her to give her child to one of the other family members to raise. In part, they worried that raising her child might be too much for her. The staff member encouraged the mother’s abilities and instilled confidence in her capacity to parent.

The mother persevered and her confidence did grow, despite her disabilities and concerns of family members. The mother looked forward to her parent educator visiting each week and eventually a SoonerStart Early Intervention referral was made to ensure that the child would receive additional support to develop language skills.

The parent educator shared, “I look forward to supporting this family and can see a bright future that may not have been possible without Parent Promise.”

- Number of adults with disabilities: 124

**PUBLIC AWARENESS**

*Blue Ribbon Tree*: For the ninth year, blue ribbon trees were the backdrop for much of the landscape across Oklahoma. Participants were encouraged to complete an official “Tree Registry” application along with a photo. All photos were compiled into a video slideshow presentation, coupled with brief clips of either 1) live action adorning the trees with blue ribbons by various groups; or 2) individuals answering

* Most current data available at the time of this report.
the question, “Who Stepped Up in Your Life”? The 2017 CAP Blue Ribbon Slideshow was showcased during a special poster session at the 24th Oklahoma Child Abuse and Neglect Conference and the link is also available online at the OSDH/FSPS website.

**Facebook Page:** The following information regarding the “Oklahoma Child Abuse Prevention” Facebook page, facilitated by the CAP ACTION Committee, was available from the “Insights” section and reflects activity during April 2017:

**The OCAP Facebook page:**
- Had increased “likes” from 794 to 916.
- Was accessed by an average of approximately 1,500 people per week.
- Had a maximum daily total of 612 people and a weekly total impression of 4,723.
- During National Child Abuse Prevention Month, the number of impressions seen with any content associated with the FB Page was 12,032 during a 28 day period.

**“Happiest Day” Coloring Challenge:** OSDH/FSPS and the CAP Action Committee continued to expand their social media campaign with the tagline, “Picture a Brighter Future for Oklahoma Kids!” now in its third year. Associated with this campaign (also in its third year) was the “coloring challenge” which invites children and families to draw, share and upload their “Happiest Day” picture on any social media platform as well as post it on the Brighter Future website. Advocates encouraged participants to take the challenge and send their pictures to legislators in addition to posting on social media. A total of 271 coloring pages were submitted and/or posted on a website specifically built to be utilized as a landing page for all “happy” pictures.

**Commercials:** The FSPS arranged for two separate commercials to be aired during the spring in 2017, which also included the month of April. Air time was purchased on 15 stations covering the Oklahoma City, Tulsa and surrounding markets. In order to reach the far corners of the state, time was even purchased in Wichita Falls, Texas.

- **Keep Your Cool Commercial:** This commercial, purchased from our partnering state of West Virginia, was designed to remind men of the dangers of shaking a young child and ways to prevent abusive head trauma. The commercial ran in English and Spanish on television and radio.
- **parentPRO:** MIECHV funds were used to create and purchase airtime (which included in part CBCAP funding for the airtime) for this commercial that promotes home visiting under the one umbrella name “parentPRO.” The commercial features actual Oklahoma home visitors and clients. (See below section for more details about the entire “parentPRO” campaign.)

13 https://youtu.be/GH_e5_crmI  
14 https://vimeo.com/user10001181/review/91752183/706eba609e
**parentPRO Marketing:** The “parentPRO” umbrella brand was developed with MIECHV funding in order to increase the number of families being recruited into home visiting and to normalize the idea that all families need support from time to time. A variety of mediums in addition to the commercials were used and include the following:

**McDonald’s Tray Liners:** In celebration of “National Family Month” (June), the FSPS continued to partner with Moroch and Associates (a public relations firm for the statewide McDonalds Restaurants in Oklahoma) to promote components of child abuse prevention. Artwork promoting the “parentPRO” website was once again utilized for the tray liners. In 2017, 157,500 tray liners were printed and disseminated through 105 different area McDonald’s locations at no cost to OSDH.

**Bus Bench Advertising and Interior Bus Cards:** Members of the Parent Partnership Board encouraged FSPS to purchase these two items in the metropolitan areas. They said that those who utilize public transportation spend a great deal of time waiting for buses and then actually riding the buses. They said that they noticed and often acted on the advertisements placed on the benches and inside the bus.

**Rack Cards and Tear-off Posters:** Written promotional material was developed to inform potential clients about home visiting services. The rack cards and posters featured a single baby (various versions with babies representing different races and ethnicities) and the text was written at a sixth grade level. Following the advice of the Parent Partnership Board members, the word “free” was included as well as the idea that the services were designed, in part, to reduce parents’ stress. [Later we learned that mothers in particular would appreciate promotional material that would feature the parent without a picture of child. Mothers told us that they would like to think that home visitors would concentrate on their needs. They expressed the notion that often they know what they need to be doing with or for their child and if someone would support them, they would perhaps have more energy to devote to their child. For this reason, future printed material will also include some versions with just parents – including teen mothers and single fathers.]
SECTION 5 – OUTREACH ACTIVITIES FOR SPECIAL POPULATIONS

DESCRIPTION OF OUTREACH ACTIVITIES

Parents of Racial and Ethnic Minorities: Of the 3.9 million Oklahomans, almost 10 percent are of Hispanic, Latino or Spanish origin. Spanish is the second most commonly spoken language in the state with 245,483 speakers estimated in the 2012-2016 American Community Survey 5-Year Estimates. The Hispanic population grew an astonishing 89.3% in Oklahoma County over the past ten years. About a fifth of all births in Oklahoma County are to Hispanic women. For this reason, many of the FSPS funded programs strive to employ bilingual providers and work to recruit families from these cultures.

While many of the FSPS funded programs serve Hispanic families, FSPS provided funding to the Latino Community Development Agency (LCDA) so that they can exclusively provide home visiting services to Spanish speaking families. The LCDA was founded in 1991 as a community response to the needs of Hispanic people. The mission of the agency is “to enhance the quality of life of the Latino community through education, leadership, services and advocacy.” Services offered at LCDA are focused on social, educational and economic needs of the community. LCDA serves as a point of contact for and with a number of agencies and Hispanic individuals in need of services. In 2017, LCDA offered three different home visiting programs: HFA, PAT and SafeCare. In total, these three programs served 236 families within Oklahoma County.

Children and Adults with Disabilities: Home visiting programs funded by FSPS provided routine, standardized child development screenings and assessments for participating children. When a possible developmental delay was detected, the families were most often referred to SoonerStart or Child Guidance for further assessment and intervention.

SoonerStart is Oklahoma’s state and federally funded early intervention program for infants and toddlers birth to 36 months who have developmental delays, disabilities or both. SoonerStart provides developmental screenings, evaluation, assessment and early intervention services. Participation in the SoonerStart program is voluntary, and services are provided at no direct cost to the family. Early intervention services are designed to meet the developmental needs of each eligible child and the needs of the family related to enhancing the child’s development.

The Child Guidance Service teams consist of speech-language pathologists, child development specialists and behavioral health clinicians. Services were provided through 15 county health departments and the one metropolitan health department in Tulsa (Oklahoma City services not available at this time). A total of 4,809 children received 21,268 individual services from October 1, 2016 to September 30, 2017.

Homeless Youth and Families: The FSPS funded home visiting programs served “couch homeless” as well as families located in shelters, crisis centers and group homes throughout

---

15 Persons without a permanent residence, but living with an acquaintance, friend or relative who cannot provide a private space for the guest.
the state. Completed visits include: 27 visits to three mothers by NFP; 837 visits to 52 families by State PAT; 526 visits to 40 families by MIECHV PAT; and 125 visits to 6 families by SafeCare.

Below are examples of the ways in which some of the programs served this special population during SFY 2017:

The Center for Children and Families (CCFI) in Norman, Oklahoma collaborates with Bridges, a nonprofit organization that assists high school students who live alone due to homelessness. CCFI partners with the social workers at Bridges to ensure that the needs of these teen parents are provided by connecting them with community resources. CCFI also collaborates with the Food and Shelter for Friends, providing home-based parenting services for families who are homeless. Formula, coats for the family and other items are provided when resources are available.

Parent Promise in Oklahoma City, Oklahoma serves many families who are classified as “couch homeless”, working with the family to find permanent housing and employment, if necessary.

The Latino Community Development Agency (LCDA) in Oklahoma City, Oklahoma serves homeless families, specifically “couch homeless.” One family enrolled lived with extended family in a very small home with no space for a crib or playpen. Due to lack of space, the baby co-sleeps with her parents. The Parent Educator (PE) has shared the dangers of co-sleeping and has given the parents several written resources about safe sleep. The father participates in home-based parenting services and has mentioned that his goal is to move to their own place in order to have a space for baby’s room. During the last home visit, the father was really excited because he had been given more steady work which will allow the family to move soon. In the meantime, the PE has helped the family obtain a pack and play to ensure the baby has a safe sleep surface.

Those Struggling with Substance Abuse: Many of the FSPS funded programs struggle to connect parents with addiction issues to the services they need – particularly in rural Oklahoma.

- The Center for Children and Families (CCFI) in Norman served many families who had serious substance abuse and mental illness, who struggled to stay away from drugs and alcohol or who have not managed their mental health issues successfully. Staff connected families to Systems of Care, Central Oklahoma Community Mental Health Services and other local treatment facilities, including assisting with accessing inpatient care.

- The Latino Community Development Agency (LCDA) in Oklahoma City did not serve any primary caregivers (PCG) that are involved with substance abuse, however, many of the PCG’s are in a relationship with a partner who has substance abuse issues. Parent Educators (PE’s) provide substance abuse referrals from drug use, to alcohol abuse. One PCG confided with her PE that her partner is verbally abusive when he drinks. She is afraid that the situation will escalate and get worse. The PE worked
with the PCG to develop a safety plan along with referring her to several resources for counseling, domestic violence services at LCDA and Al-anon services. The PE invites any family who is dealing with substance abuse to participate in the "Celebrating Families Program" at LCDA that deals with substance abuse issues for the entire family.

- The McClain-Garvin Youth and Family Center staff in Purcell refers their families who are dealing with substance abuse issues to the Norman Addiction Information and Counseling, Grace Home (mentoring program), Mental Health and the agency counselors at the Youth and Family Center. Staff assures clients have available transportation so appointments can be kept.

- The Northwest Substance Abuse Treatment Center for Women in Waynoka, Oklahoma is designed to serve women who are either pregnant or have children under the age of 12 and have a substance abuse problem. During 2017, Northwest Family Services collaborated with the treatment center to provide HFA/PAT to 30 of their residents. In addition, Northwest Family Services provided parent education classes to all the residents on a weekly basis.

**Victims of Violence:** According to the 2010 National Intimate Partner and Sexual Violence Survey (NISVS), 49% of Oklahoma women have experienced intimate partner violence at some time in their lives. Below is an example of how a FSPS funded program assisted such victims:

- The Center for Children and Families (CCFI) in Norman refers families who have suffered domestic abuse to the Women’s Resource Center (Norman), to Legal Aide for legal services and also connects with them with divorce and parenting classes offered at CCFI.

- During SFY 2016, the Latino Community Development Agency (LCDA) had two families enrolled who experienced domestic violence. In both cases the Parent Educator’s (PE’s) worked with the primary caregiver (PCG) to develop a safety plan and referred them to the domestic violence program at LCDA. The families enrolled and participated in the Latinas Unidas Support Group. The program helped one of them to obtain a Victim Protective Order (VPO) and accommodated some of the home visits at LCDA per mom's petition. The other PE took PCG to the YWCA in order receive shelter services, but instead she asked her partner to move out of the house and he agreed. Recently, the family reinitiated their relationship and is working towards resolving their domestic violence issues.

**Children in Foster Care:** Between the years 2012 and 2015, the percentage of foster children receiving Child Guidance services doubled from 5% to 10%. If the population of grandparents raising grandchildren is included, the percentage nearly tripled.

**Fathers:** The OSDH programs continued to strive for improvement in engaging fathers. Some of the programs successfully implemented the following practices:
Scheduled home visits during a time when the father can be present.
Supplemented the curriculum with father-focused resources such as “24/7 Dads,” “On My Shoulders,” and educational materials developed specifically for fathers.
Referred couples to programs that focus on relationship building or communication.
Provided opportunities for fathers to come together in group settings to create informal networks of support.
Provided workshops on topics that might appeal to fathers such as family planning and tobacco cessation.

Below are examples of HFA programs focused on father involvement.

- The Center for Children and Families (CCFI) in Norman invites all fathers to participate in home visits and offer father friendly materials to encourage involvement. CCFI had several families enrolled where both mom and dad were present. In addition, CCFI partners Norman Schools and offers a Dad’s Class for any student enrolled who is a parent.
- The Latino Community Development Agency (LCDA) works to involve fathers in different ways. The Parent Educators (PE’S) ask the mothers to share the information in the Parents as Teachers handouts provided during the home visits with the fathers and to also practice the child interactions with the fathers. There were some fathers who participated in the visits regularly and some that were always involved. One father in particular starts the home visits as the mother arrives after the appointment has begun due to her work schedule. The LCDA has also scheduled their group connections in the afternoon and on Saturdays in order to increase the likelihood that the entire family will be able to attend these groups.
- The McClain-Garvin Youth and Family Center staff utilizes handouts that are male friendly.

**ACTIVITIES TO PROMOTE CULTURALLY COMPETENT AND RELEVANT PROGRAMS**
The OSDH is committed to ensuring access to quality care for all consumers and works to implement strategies for recruiting and retaining a diverse staff. During the process of hiring service providers, consideration is given to education and experience, and also candidate’s ability to be supportive, nonjudgmental, and sensitive to other cultures, values and beliefs. An effort is made to hire staff that is bilingual should that skill be relevant for that community.

The OSDH has in place policies, practices, structures, procedures and specific resources to support culturally and linguistically competent services. As part of the performance management system, employees are required to attend annual training in cultural competence. Although policies and procedures are implemented throughout the agency, three divisions work closely with programs to ensure that information, materials and services are delivered in a manner that meets the needs of diverse consumers:
1) **The Oklahoma Health Equity Campaign** works collaboratively with communities to develop “upstream” policies to improve health status for Oklahomans;

2) **The Office of Minority Health** helps develop recommendations for OSDH and other health agencies to eliminate health disparities among Oklahoma’s minority and underserved populations. They also develop standards and training for interpreters, provide telephone language services, and assistance in developing educational materials for minority populations as well as interpretation/translation services; and

3) **The Office of Communications** provides services to OSDH programs to help develop educational materials that convey information in a manner that is easily understood by diverse audiences and persons with low literacy skills.
SECTION 6 – OSDH’S PLAN TO ENSURE PARENT LEADERSHIP AND INVOLVEMENT

OSDH’S ACTIVITIES, INCLUDING TRAINING AND TECHNICAL ASSISTANCE, TO ENSURE PARENT LEADERSHIP AND INVOLVEMENT

Training: CBCAP funding supported a representative from OSDH to attend the Parents as Teachers (PAT) National Conference, October 16 - October 20, 2016 with the theme, “Leave Your Footprint”. The conference included information about engaging with families and increasing the impact of PAT work through knowledge and strengthening connections to families, the communities served and a collaborative network.

Circle of Parents Poster Presentation: The OSDH Circle of Parents (COP) lead staff presented information on the program via a poster presentation at the 78th Annual Oklahoma Public Health Association (OPHA) Conference in Tulsa, OK, September 27 – 28, 2017. (See Attachments, Folder 1.)

Services: Coordination of efforts continue to support Child Development Specialists working within various populations (including some high-risk) such as those experiencing homelessness, Hispanic and teen groups, keeping in mind the model’s standards and promoting the philosophy of parent leadership within each Circle of Parents group. These supports have allowed opportunities for the CDS to provide a variety of topics. The topics of most interest to participants have included:

Technical Assistance: The FSPS acknowledges and embraces the importance of parent leadership and involvement. During 2017, the FSPS and Child Guidance supported and/or provided technical assistance to the Circle of Parents groups.

Activities: The following activities were conducted by OSDH in order to ensure parent leadership and involvement:

- PAT Advisory Council: The PAT national model requires that implementing agencies have a PAT advisory board affiliated with their services. These councils are highly encouraged, if not required, to recruit parents as members of the local councils. However, most councils have struggled to have consistent participation by parents and to truly integrate parents in a purposeful way. For this reason, the FSPS will continue to strive for
improvement in this area with an effort to develop new opportunities for parents.

- **The OUCCAN Parent Partnership Board**: When OUCCAN was awarded the Evidence-Based Home Visiting (EBHV) Grant more than six years ago, they were required to establish a parent advisory group. Years later that group, the Parent Partnership Board, is thriving. Comprised exclusively of parents who are or were SafeCare participants, these parents have been integral in the development of marketing and educational materials. They influenced the design of the parentPRO logo – including the name, colors, look and tag line. They have provided feedback about the parentPRO website and asked that certain features such as coupons and a calendar of activities be included. Because of their invaluable assistance, the MIECHV Grant now provides a small amount of funding to partially cover the time and expenses of the staff that support the Board’s work. The Parent Partnership Board provides feedback to home visitation programs and service programs in the community for families to address parent engagement and strategies to better meet the needs of young children in Oklahoma.

- **The National Alliance of Children’s Trust and Prevention Funds’ National Parent Partnership Council (Council)**: The goal of the Alliance’s National Parent Partnership Council is to expand and advance the meaningful and authentic roles of parent leaders in their respective states and across the nation. The Council works to ensure that strong parent voices are heard when shaping programs, policies and strategies that will impact families and communities.

**EVALUATION AND ASSESSMENT OF PARENT LEADERSHIP ACTIVITIES (if applicable)**

Not applicable.
SECTION 7 – TRAINING, TECHNICAL ASSISTANCE AND EVALUATION ASSISTANCE CONDUCTED BY OSDH

TRAINING

The Annual Oklahoma Child Abuse and Neglect Conference: This two-day conference is organized by the University of Oklahoma's Center on Child Abuse and Neglect. OSDH utilizes this conference to provide training to staff that work in various family support programs and multidisciplinary teams, as well as local task forces. In 2017, the conference was held on April 12 – 13 at the Marriott NCED in Norman, OK and OSHD was a co-sponsor for the event. Utilizing CBCAP funds, OSHD sponsored a prevention track during the conference that covered a variety of topics and provided scholarships for 30 OSDH employees to attend. During 2017, the Center on Child Abuse and Neglect also collaborated with the Oklahoma Drug Endangered Children, Oklahoma CJA Advisory Task Force on Child Abuse and Neglect, and the Oklahoma District Attorney’s Office. Approximately 300 participants registered for the conference with 281 attending all or part of the conference, along with 61 speakers, and 40 volunteers and staff. A variety of continuing education credits were offered for attorneys, social workers, psychologists, counselors, law enforcement and other disciplines. Attendees included prevention specialists, child development specialists, mental health professionals, multidisciplinary teams, attorneys, child welfare workers, psychologists, counselors, law enforcement and more. (See Attachment, Folder 3.)

Professional Development for Home Visitors: The FSPS learned years ago that training and continuous professional development is critical to a successful home visitor. All home visitors are trained according to the model requirements in order to meet affiliation/accreditation requirements and maintain model fidelity. Additional trainings, primarily focusing on psycho-social topics, are also contractually required. This training regimen was developed in response to home visitors’ needs. With the exception of model-specific trainings, trainings have been consolidated for efficiency and offered to any home visitor free of charge. When appropriate, trainings are offered online. (See page 56.)

Lemonade for Life Trainings: The FSPS (with Innovation Grant funding) sponsored four Lemonade for Life (L4L) trainings in the summer of 2017, two each in Oklahoma City, OK (June 27th and 28th) and Tulsa, OK (July 11th and 12th). The L4L target group included professionals working with parents and caregivers and the training was focused on the use of the ACE’s Questionnaire with a goal of helping prevent future exposure to ACE’s while promoting resiliency and hope.

16 SafeCare trainings conducted and monitored by OUCCAN. They participate in the “Additional Trainings“ at the bottom of the table.
**Continuing Education for Home Visitors:** Home visitors are required to complete a certain number of hours of continuing education annually. Continuing education requirements during the first twelve months are dictated by national model requirements as well as additional OSDH FSPS requirements. After the first year of employment, continuing education requirements are fulfilled based on model requirements and can be from twelve to twenty hours. Training is provided by OSDH staff in some cases or home visitors can attend pre-approved trainings offered in their local communities. The trainings focus on maternal and child engagement, environmental factors such as home safety, or professional growth topics such as motivational interviewing.

**TECHNICAL ASSISTANCE**

**Home Visiting Technical Assistance:** Over the years, FSPS has developed a routine business operation that supports the efforts of a quality evidence-based home visiting system. Consultants, employees of FSPS with model-specific expertise, provide an array of supports to program administrators, supervisors, and home visitors, including:

- Establishing and maintaining relationships with national model developers
- Developing and distributing policies and program guidelines
- Developing “Oklahoma specific” educational materials to be included with model lesson plans and used during home visits
- Assuring that home visitors are trained in their respective model as well as additional trainings on adoption, substance abuse, domestic violence, etc.
- Providing technical assistance to home visitors upon request
- Training home visitors in agency processes such as charting, record keeping, making child abuse/neglect reports, etc.
- Developing and distributing quarterly performance measurement tools and reports
- Assisting with CQI projects
- Conducting annual site visits to assure fidelity to the model and quality of services; site visits include the sharing of data; auditing records; meetings with staff and external partners; and developing correction plans if necessary
- Assisting program evaluators in analyzing programmatic data and producing annual reports
- Ensuring program alignment with federal, state and agency desired outcomes

**EVALUATION ASSISTANCE**

**Program Evaluation Training:** During FY 2017, individual consultation, technical assistance and quarterly training was provided regarding the new “Efforts to Outcomes” (ETO) database utilized by home visitors. Using MIECHV funding, the FSPS was able to have Social Solutions create a customized version of ETO that would serve as the collective database for three home visiting models (NFP, PAT and SafeCare).
**SECTION 8 – EVALUATION DATA FOR CBCAP-FUNDED PROGRAMS**

**DEMONSTRATION OF THE HIGH LEVEL OF SATISFACTION AMONG FAMILIES WHO HAVE USED CBCAP PROGRAMS**

*Child Guidance services or activities funded by CBCAP:*

**Circle of Parents** – On a monthly basis, participants are asked to voluntarily complete survey information regarding their perspective when participating in the local COP group facilitated by a CDS. The following information represents the data collected from 506 respondents that participated in COP during 2016. (See Attachments, Folder 1.)

The Incredible Years* – The following information represents the qualitative data collected from respondents that participated in “The Incredible Years” during 2016 (See Attachments, Folder 1.)

What part of the program was most helpful to you?
Child directed play and positive comments.
Ignoring and positive rewards.
All of it.
I found almost all of it helpful.
Focus on play.
Play!
Group lessons, handouts.
Getting tools we can use from now on.

What did you like most about the program?
Everything especially the group interactions.
Group discussions.
Learning that I was doing some things correctly.

* Most current information available.
The instructors were amazing.
The videos.
All of it. Everything I learned was good.

FSPS services or activities funded by CBCAP:
Nurse-Family Partnership (known as Children First in Oklahoma) – Below is a sampling of SFY 2017 outcomes for the state-funded NFP programs. (See Attachments, Folder 1.)

- 88% of NFP babies were born at normal birth weight (more than 5.5 lbs.)
- 89% of NFP babies were carried to term (more than 37 weeks gestation)
- 90% of NFP children were fully immunized at 24 months
- 90% of NFP mothers initiated breast feeding
- 92% of NFP mothers attended 10 or more prenatal care visits
- 93% of NFP clients did not smoke and never began smoking between intake and 36 weeks of pregnancy
- 15 referrals to early intervention services were made to NFP mothers whose children screened positive for developmental delays on regularly administered Ages & Stages questionnaires
- 3,057 Edinburgh Postnatal Depression Scale Screenings or Patient Health Questionnaires were administered to 1,414 mothers; approximately 11% of the screenings indicated signs of depression and required immediate attention by a healthcare or mental health professional
- 96% of NFP fathers spent time with their child
- 86% of NFP clients served in SFY 2017 had at least one working smoke detector in the home
- 96% reported always traveling with their child in a car seat
- 98% of NFP children had never had a confirmed child maltreatment case

Nurse-Family Partnership – Below are statistics for the client satisfaction surveys received in SFY 2017. (see Attachments, Folder 1.)

- 99% of clients agree or strongly agree that they are satisfied with the activities in which they participate
- 95% of clients agree or strongly agree that they believe their life has been improved by this program

Nurse-Family Partnership - Continuous Quality Improvement (CQI) Projects:
In 2017, the NFP program continued implementing CQI to strengthen and advance the quality of the program. Examples are included in the attachment section. (See Attachments, Folder 1.)

Healthy Families America (HFA): Below is a sampling of 2016 outcomes for the state–funded HFA programs. (See Attachments, Folder 1.)

- 81% of HFA parents reported that their children were up-to-date on immunizations
• Of the mothers that delivered after enrolling in HFA, 61% initiated breastfeeding
• Of the HFA parents who smoked, 56% either did not increase or reduced smoking between enrollment and the end of SFY 2016
• 334 Edinburgh Postnatal Depression Scale screenings were administered to new HFA mothers; 70% indicated some signs of depression; 13% indicated the need for immediate referral to a healthcare professional
• 75% of HFA fathers spent time with their child
• 93% of HFA households had at least one working smoke detector
• 97% of HFA parents reported always traveling with their child appropriately restrained in a car seat
• Of the 726 HFA children that received at least one home visit during SFY 2016, 566 (78%) had never been named as a potential victim in a child welfare report after enrolling in HFA. Furthermore, 674 (93%) had never been named as a victim in a confirmed child maltreatment case.

*Parents as Teachers (PAT) - Continuous Quality Improvement (CQI):* PAT contractors implement CQI projects in order to improve services and evaluate current practices. CQI provides a process for responding to information that comes from monitoring fidelity and quality, evaluation, and the Quality Endorsement and Improvement Process. Through CQI, staff can build on identified strengths and address issues to continually improve program operations and services to families. Examples are included in the attachment section. *(See Attachments, Folder 1.)*

**“Efforts to Outcomes” (ETO) Evaluation**

*FSPS Referrals by the numbers:*

A total of 5,576 referrals were sent to the parentPRO programs in FFY 2017, routing through the ETO system. From those referrals, 2,061 did not enroll in services for various reasons as indicated below:

• 1,459 of the clients could not be located
• 671 were not interested in or felt a need to be in the program
• The other reasons listed were miscellaneous (i.e. ineligible to participate, individual was too busy, etc.)

**EVALUATION DATA ON THE EFFECTIVENESS OF FUNDED PROGRAMS, OSDH AND THE NETWORK**

In addition to the evaluations associated with the above described CBCAP-funded programs, the following evaluations have been conducted or in part funded or participated in by the FSPS:

*The 24th Annual Oklahoma Conference on Child Abuse and Neglect:* This two day conference was moved from its typical time of the year from September to April with hopes of promoting April as National Child Abuse Prevention Month, having the potential to collaborate with some of the already planned activities hosted by FSPS and the CAP Action Committee and also to capture a new target audience. The OSDH co-sponsored this event that included evaluation results (found in the attachments section). The Oklahoma University of Health Sciences Center reported that 2017 broke records in attendance with positive feedback in general. *(See Attachments, Folder 3.)*
SECTION 9 – CHILD ABUSE PREVENTION MONTH AND AWARENESS ACTIVITIES

The following CAP Month and awareness activities were discussed in detail in previous sections:

- The Happiest Day Coloring Challenge: (See page 46.)
- The Brighter Future Website: (See page 46.)
- Blue Ribbon Tree Campaign: (See page 45.)
- April Child Abuse and Neglect Prevention Conference: (See page 55.)
- Keep Your Cool Commercial: (See page 46.)
- parentPRO Commercial: (See page 46.)
- McDonald’s Tray Liners: (See page 47.)

**OSDH Diaper Drive**: The FSPS staff coordinated an internal OSDH Diaper Drive for National Child Abuse Prevention Month, raising 2,582 diapers that were donated to the Catholic Charities of Archdiocese of Oklahoma City.

**Child Abuse Prevention (CAP) Action Committee 1st Annual ZumbaThon**

The participants in the CAP Action group were excited to launch the first ever CAP ZumbaThon on November 4, 2017. Forty Zumba enthusiasts showed up for the two hours of dance, which was sponsored by Parent Promise/Prevent Child Abuse (Oklahoma Chapter) who received over $200 in donations.

**Linking with Libraries**: For the eleventh year, the Oklahoma Department of Libraries (ODL) joined efforts with FSPS to prevent child abuse during the month of April. Staff at all local libraries were encouraged to get involved by creating bulletin boards devoted to prevention, hosting parenting groups, setting up display tables with useful information for parents and more.

**Community Resource Guides**: Hundreds of the Community Resource Guides from the Children’s Bureau’s Office on Child Abuse and Neglect (co-sponsored by Child Welfare Information Gateway and the FRIENDS National Resource Center for Community-Based Child Abuse Prevention) were disseminated to networking partners across the state such as school counselors, home-based parenting programs, libraries, schools, county health departments, local task forces and others upon request.

**Child Abuse Prevention Awards**: The annual Outstanding Child Abuse Prevention Awards were presented on Tuesday, April 11, 2017 in the Governor’s Blue Room at the Oklahoma State Capitol to a standing room only crowd. A compilation of the event was added to a video slideshow. The below awards recognized outstanding commitment and dedication for particular aspects of child abuse prevention:

---

17 [https://youtu.be/OR8KZQzcemc](https://youtu.be/OR8KZQzcemc)
18 [https://youtu.be/1PhN6i-k_pc](https://youtu.be/1PhN6i-k_pc)
1) The Marion Jacewitz Award, given to an individual in Oklahoma who has made significant contributions to the prevention of child abuse on a statewide level, was awarded to Suzy Gibson with OSDH/FSPS, Oklahoma City, Oklahoma.

2) The Outstanding Child Abuse Prevention Program Award, given to an exceptional community program that has an emphasis on child abuse prevention, was awarded to The Parent Child Center of Tulsa Adult Treatment Program, Tulsa, Oklahoma.

3) The Mary Ellen Wilson Award, given to an individual who has demonstrated outstanding commitment and dedication to child abuse prevention activities in his or her community, was awarded to Desiree Doherty, Tulsa, Oklahoma.

4) The Julie L. Bonner Award, given to an outstanding nurse, was awarded to Nichelle Gaines, Registered Nurse with Children First at the Muskogee County Health Department, Muskogee, Oklahoma.

5) The Outstanding Home Visitor Award (new award in 2017), given to a parent educator who has demonstrated outstanding commitment and dedication to child abuse prevention activities in his or her community, was awarded to Marina Montoya-Zorilla, Parent Educator at the Latino Community Development Agency, Oklahoma City, Oklahoma.

(See Attachments, Folder 3.)
SECTION 10 – CHALLENGES AND BARRIERS

The state of Oklahoma continues to experience budget shortfalls mostly due to revenue collections coming in well below projections. These fiscal limitations have caused reductions in services and staff across the child abuse prevention spectrum. However, dedicated professionals continue to carry out their mission every day. Knowing the limitations, the following challenges/barriers are anticipated:

- The “State Plan for the Prevention of Child Abuse and Neglect” will need to be reviewed by stakeholders and modified to reflect the changes in the prevention service system.
- The current “State Plan for the Prevention of Child Abuse and Neglect” will end in 2018. A “plan for the Plan” needs to be developed in order to gather broad input from consumers, prevention professionals, funders and the public at large.
- Fewer staff means that time for collaboration and creativity is reduced. Implementing strategies to meet virtually or share work electronically will be critical.
- Less funding generally means that travels must be restricted – travel for staff to provide direct service, attend meetings, and attend trainings.
