ANALYSIS:

These rules update references to building and fire safety codes that are incorporated by reference as the minimum standard of installation for the fire extinguisher industry in Oklahoma. These codes are consensus standards adopted by the International Code Council, the Oklahoma Uniform Building Code Commission, and the National Fire Protection Association with the participation of state, county and municipal code officials and fire officials, architects, engineers, builders, contractors, elected officials, manufacturers and others in the construction industry. These codes are updated by these bodies periodically. These changes update the references to more recent versions of the codes. The result of this change will be to apply current building and fire codes to the fire extinguisher industry.
