

About Us...

Beaver County Partner's in Progress (BPIP), located in Beaver, a rural community in the Oklahoma panhandle, began in 2002 with a specific goal of establishing a Wellness Center in their community. The Beaver River Wellness Corporation was established, became a 501c3 and land was donated for the center. However due to the enormity of the project and lack of funding, progress has been halted. The coalition meets monthly on the third Tuesday of the

month at noon. The coalition is working through the Mobilizing for Action through Planning and Partnerships(MAPP) process and have completed all the assessments. We completed the Local Public Health System Assessment in May and it proved to very beneficial for those attending. Beaver County citizens were able to bring out and discuss county specific issues in their self-assessment. This assessment as well as the others will be used

to develop the strategic issues for the county.

BPIP has made strides this year in the development of soccer fields on the donated land. Once completed there will be five new soccer fields.

The coalition also continues to work with the Systems of Care team and with the Regional Prevention Coordinators on substance abuse initiatives.
