Primary Care Health Professional Shortage Areas (HPSAs) and Federally Qualified Health Centers (FQHCs)

Legend
- Federally Qualified Health Centers
- Co-Located FQHC Sites
- FQHC Services Sites
- Geographical Area HPSAs
- Low Income Population HPSAs
- Not Health Professional Shortage Areas

Notes (Health Professional Shortage Areas):
HPSAs demonstrate a critical shortage of primary care physicians, in accordance with the federal Health Resources & Services Administration (HRSA) Shortage Designation Branch guidelines. Each type of HPSA is further classified into one of the following categories: geographic, population group, facility, or automatic. Each HPSA is given a score by the Shortage Designation Branch based on certain specific criteria for each type of HPSA. This score indicates the degree of shortage. HPSA designations are updated every 3-4 years.*

Notes (Federally Qualified Health Centers):
FQHCs are private, non-profit health care organizations that serve medically underserved areas or populations. FQHC services sites provide care to specific sub-populations. Co-Located sites provide services in partnership with other organizations.
