

Primary Care Health Professional Shortage Areas (HPSAs) and Federally Qualified Health Centers (FQHCs)

- Legend**
- Federally Qualified Health Centers
 - Geographical Area HPSA
 - Low Income Population HPSA

Notes (Health Professional Shortage Areas):
 HPSAs demonstrate a critical shortage of primary care physicians, in accordance with the federal Health Resources & Services Administration (HRSA) Shortage Designation Branch guidelines. Each type of HPSA is further classified into one of the following categories: geographic, population group, facility, or automatic. Each HPSA is given a score by the Shortage Designation Branch based on certain specific criteria for each type of HPSA. This score indicates the degree of shortage. HPSA designations are updated every 3-4 years.*

Notes (Federally Qualified Health Centers):
 FQHCs are private, non-profit health care organizations that serve medically underserved areas or populations. New FQHC Locations are FQHCs sites awarded New Access Point funds from HRSA in 2015.
