

About Us...

The Health Planning Committee is a sub-committee of the Enid Metropolitan Area Human Service Commission. The priorities of the Health Planning Committee include the following: MAPP (Mobilizing for Action through Planning and Partnerships), Dental Assistance, Mental Health Issues, Tobacco Control, and Physical Fitness and Nutrition.

The Coalition has been focusing on the completion of the Community Health Improvement Plan (CHIP) in order to plan strategically around the needs of the community.

The top five elements of health were identified for Garfield County. They include:

- Access to Healthcare and Mental Health
- Childhood Health and Infant Mortality
- Tobacco, Alcohol and Other Drugs
- Chronic Disease
- Physical Activity and Nutrition (Obesity)

The Coalition, along with the community,

has been working throughout the year to address these issues already.

This year the coalition and partners in Garfield County was instrumental in the planning stages of OKMOM and actually getting it to be housed this year in Enid. This event brought several thousands of dollars in dental care to the area at no cost to the citizens. It was all voluntary and was a great show of community partnerships.

To continue their efforts around dental care the Coalition was also instrumental in getting the dental van and providers to Enid every 3 months to provide the necessary dental care to those that needed it. Every time the van was in Enid this year it severed around 30 people each time. Being able to provide the necessary dental care to these patients is not only beneficial to their dental health but also their overall health as well.

This year, Garfield County Health Planning Committee became a Certified Health Improvement Organization (CHIO). This will give the coalition the opportunity to apply for grant funding to work specifically with primary care providers on prevention efforts in the community. The grant

will help with academic detailing with providers around prescription drug abuse, the PMP system, and follow up to preventive care. This has not been done yet with this group so we look forward to the impact that it can bring to Garfield County.

The Health Planning Committee chair Janet Cordell was instrumental in getting the Community Clinic up and going several years ago. Since then the clinic has grown and taken on different projects and partnerships. One of those projects is to help women in the need of mammograms get the care that they need for early detection. Through a partnership with Oklahoma Project Woman, the clinic has referred over 30 women from Garfield County to the program where they are provided free mammograms, diagnostic procedures and surgical services for Oklahomans of any age with no health insurance and limited financial resources.

Through partnerships in Garfield County, the coalition has worked toward making Garfield healthier, other projects the coalition was involved in this year were:

- Certified Healthy Oklahoma
- Tobacco Prevention Policies and efforts
- Garfield County Walk this Way & Couch to 5K
- Love the Bump

Partnership Priorities

- Enid Community Clinic
- Dental assistance
- Access to mental health services
- Tobacco prevention/cessation
- MAPP (Mobilizing for Action through Planning and Partnerships) Community Assessment and Community Health Improvement Plan
- Decreasing obesity and tobacco use, increasing physical activity
- CHIO
