AT A GLANCE:
Major changes made to the 2010 version of the Hospital Inpatient Data Manual

1. **Beginning with data year 2009, XML will be the only format accepted.**
2. A new interactive web submission method is available with the 2009 data. Detailed information related to this method will be sent to each facility.
3. Address field will be edited for text that does not indicate an address.
4. The option to report either CMS-DRG (Ver. 24) or the MS-DRG is still available under the DRG field.
5. The Present-on-Admission indicator is made a critical field and errors will be counted in conjunction with the diagnosis. The only exemption to report POA is the CMS-exempt hospital types.

NOTICE

This Oklahoma Inpatient Discharge Data Reporting Manual, issued in November 2009, supersedes and replaces all previous versions. The XML format described in this manual will be the required format for data submissions for calendar year 2010 and forward. Please note that this manual reflects the changes associated with the UB-04 format. All major changes are listed on the front cover of this manual.

If you have any questions regarding submission of this data, please contact:

Lou Ann Sanders at (405) 271-6225 or louanns@health.ok.gov

If you would like to schedule a site visit at your facility, please contact Lou Ann Sanders and she will schedule a visit at your convenience.
Introduction

The Oklahoma Health Care Information System Act, defined in 63 O.S. (Supp. 1994) § 1-115 et seq., established the Division of Health Care Information ("Division") in the Oklahoma State Department of Health. In accordance with the Act, the Division’s purpose is to develop and operate a system for collecting, processing and disseminating health care data. An integral component of the activities of the Division is the collection of inpatient discharge data. All facilities or related institutions that are licensed pursuant to Title 63 Section 1-701 et seq. of the Oklahoma Statutes are required to report information on inpatient discharge encounters.

This manual defines the data that facilities are required by statute to submit to the Division. It specifies the technical requirements for data submission, defines the data elements to be submitted, and outlines the data editing procedure. In order to ensure the integrity of the database, data must be received in usable formats from all facilities. The Division will provide technical consultation and assistance upon request. This consultation or assistance is limited to activities that specifically enable the facility to submit data that will meet the requirements. The following sections provide a definition of the reporting source, the submission schedule, the preferred transfer method, the format and description of data elements to be transferred, and, finally, information about the editing/validation/error processing of the submitted data.

Data Confidentiality

Inpatient discharge data furnished to the Division are considered confidential under State law and are not public records as defined by the Open Records Act, Title 51 § 24A.1 et seq. Patient identifying information will not be disclosed. It will be used only for the creation and maintenance of anonymous medical case histories for statistical analysis and reports. The Division is prohibited from identifying, either directly or indirectly, any individual in its reports. The Division will not disclose individual patient identities in any manner, except as directed by a court of competent jurisdiction after an application showing good cause.

Data Reporting Sources and Definitions

Licensed hospital facilities are the source for inpatient discharge data.

For each single inpatient hospital stay, a single discharge data record should be submitted. Each discharge record should consist of billing, medical, and personal information describing a patient, services received by the patient, and charges billed for the patient. The specific fields required are described in detail in the Description of Data Elements section of this manual. Only one discharge record should be submitted for each discharge. For a given patient, separate records for each bill generated should not be submitted, unless each bill represents a distinct hospital stay.

Discharge records should be submitted for persons discharged from all hospital beds, including acute medical/surgical care, swing, rehabilitation, psychiatric, and skilled nursing beds. Outpatient surgical care, observation, respite, hospice and nursing home care should NOT be included in this submission. If a patient is discharged from one type of bed, readmitted to another, and discharged
again, then a record for each discharge should be submitted; however, each record must contain information in the 'type of bill' field that accurately depicts the type of bed utilized prior to discharge.

A facility may submit inpatient discharge data to the Division or designate a submitting intermediary. Please note that each facility is responsible for the quality and completeness of its yearly submission, regardless of the utilization of a submitting intermediary. The Division will contact the facility directly for any necessary corrections or additional information. **When an intermediary is designated, the facility must still ensure the correct information is submitted in a timely manner. If a designated intermediary handles only a subset of a facility’s discharges, then the facility must make separate arrangements to submit its other records (i.e., those not handled by the intermediary).**

For the purpose of communication and problem solving, each facility shall supply the Division with the name, telephone number, and job title of the person responsible for data submission and data corrections from each facility.

**Data Submission Schedule**

For each calendar year of data collected, the Division must receive all inpatient data records by May 1st following the close of that calendar year (e.g. calendar year 2010 data must be submitted by May 1, 2011). Facilities may submit on a monthly, quarterly, or semi-annual basis, if they prefer, as long as the Division is notified of their proposed schedule. **In all cases, data must be received by May 1st following each calendar year.**

The data elements to be submitted are based on inpatient discharges occurring in a calendar year. A patient must be discharged within the calendar year to be included in the calendar year data set.

**Follow-Up for Non-Compliance**

Submitting inpatient data is required and is a condition of the facility’s license as defined in Title 63 Section 1-701 et seq. Noncompliance, including incomplete reporting of required fields, will be referred to the Oklahoma State Department of Health Medical Facilities Division for follow-up and will be published as noncompliant in HCI reports.
Data Transfer Media

Secure Website Data Transfer

The preferred method of data submission is through the Division's secure website. The website is accessible with a login and password.

The URL is: https://www.phin.state.ok.us/chi-data/

Instructions for submitting files on the website can be obtained from the Division.

Alternate Data Transfer Media

Data can also be submitted by U S mail on CD-ROM or IBM compatible 3.5” disk or by email to:

Oklahoma State Department of Health
Health Care Information Division, Room 807
1000 NE 10th Street
Oklahoma City, Oklahoma 73117-1299
chsadmin@health.ok.gov

Files submitted electronically must be HIPAA compliant.

Editing and Validation

The Division will perform a variety of edits for quality assurance purposes and compliance with the specifications set forth in this submission manual. Data submissions not meeting a 2% error tolerance level will be rejected.

Before the deadline facilities can resubmit data until the files passes the criteria. Table 1 gives a list of the data fields and a tolerance level for each field. Facilities are encouraged to review the data records for accuracy and completeness to the corresponding edit criteria prior to submission.

Facility Contacts

Facilities are encouraged to provide contact information for the following individuals:

Administrator
Data submission contact
Error correction contact
Vendor contact
Corporate contact (if applicable)
DATA TRANSFER FORMAT

Table 1 lists the data elements and the error tolerance level for each element. Table 2 describes the hierarchy of the data elements.

The headings used under Descriptions of Data Elements are:

**Descriptive Data Element Name:** Names commonly used to describe the fields.

**XSD Data Type:** Indicates field type such as string, positive integer, and date.

**Element Name:** The name that needs to be used for each field in the submitted file.

**Accepts Null values:** This line indicates whether null values are accepted.

**Required in XSD:** Indicates whether the field is required per the XML Schema Definition (XSD).

**Minimum Constraint:** Minimum number of characters allowed for the field.

**Maximum Constraint:** Maximum number of characters allowed for the field.

**Definition:** The definition specified for each data element is in general agreement with the definition specified for the field entry in the UB-04 manual. Facilities using data sources other than uniform billing should evaluate definitions and coding systems for agreement with those specified in this manual.

**General Comments:** Used in a similar manner as the UB-04 manual to provide additional information and guidelines for the reporting of the data element.

**Edit:** The criteria used by the Division to determine acceptability of the information provided.

**UB-04 Form:** Where applicable, this line identifies the document where the data elements can be found.

**Locator:** The location of the data element on the UB04 form.

The data elements for each patient discharge are stored in a single record. No fillers are to be used between data fields.

**Oklahoma Law (36 chapter 2 § 6581) has mandated that all hospital inpatient billing and claims submission use the UB-04 form.**

<th>Comments</th>
</tr>
</thead>
</table>
| reporting_year | xs:string     | reporting_year | No                  | Yes             | 4                  | 4                | The calendar year in which the patients were discharged. | Use the four-digit year format YYYY  
E.g. 2010 |
| reporting_type | xs:string     | reporting_type | No                  | Yes             | 1                  | 1                | The portion of time that will cover the data submitted. | This field needs to have one of the following entries:  
1 – Yearly  
2 – Quarterly  
3 – Monthly |

**Descriptive Data Element Name:** Reporting Year

**Descriptive Data Element Name:** Reporting Type

**Edit:** A valid year must be present

**Edit:** Reporting type needs to be valid.

**Not a UB-04 field**
Descriptive Data Element Name: Reporting Period

XSD Data Type: xs:string
Element Name: reporting_period
Accepts Null values: No
Required in XSD: Yes
Minimum Constraint: 1
Maximum Constraint: 2
Definition: The period for which the patients were discharged.

Comments: Complete this field, if submitting data annually, quarterly or monthly.

For Reporting Type=1, Use 1 for Reporting Period, if submitting annually

For Reporting Type=2
Use the following numbers for Reporting Period
1 for First quarter (Jan, Feb and March)
2 for Second quarter (April, May and June)
3 for third quarter (July, Aug and Sept)
4 for quarter (Oct, Nov and Dec)

For Reporting Type=3
Use the following numbers for Reporting Period
1,2,3…12 to denote Jan, Feb, Mar… Dec.

If submitting multiple months or quarters a separate file for each period must be submitted.

Edit: The period needs to be valid.

Not a UB-04 field

Descriptive Data Element Name: Medicare Provider Number

XSD Data Type: xs:string
Element Name: medicare_provider_no
Accepts Null values: No
Required in XSD: Yes
Minimum Constraint: 6
Maximum Constraint: 15
Definition: The number assigned to the facility by Center for Medicare and Medicaid Services. Tax ID number can be used if the facility does not have a Medicare ID.

Edit: Number must be valid.

Currently not a UB-04 field.
Descriptive Data Element Name: Type of Data Submission

XSD Data Type: xs: string
Element Name: submission_type
Accepts Null values: No
Required in XSD: Yes
Minimum Constraint: 1
Maximum Constraint: 1

Definition: Indicates the type of data submitted.

Comments: Use the following to indicate the types of data:
I - Hospital Inpatient Data
O - Hospital Outpatient Surgery Data
A - Ambulatory Surgery Center Data

Edit: Must be a valid entry

Not a UB-04 field

Descriptive Data Element Name: Name of the Hospital

XSD Data Type: xs: string
Element Name: org_name
Accepts Null values: No
Required in XSD: Yes
Minimum Constraint: 5
Maximum Constraint: 25

Definition: The name of the facility for which the data is submitted.

Comments: The name must be abbreviated if length more than 25 characters.

Edit: Must be a valid entry

UB-04 FL 1
Data Elements

Total Elements: 7

Element Name: name, phone, email, street, city, state, zip

### Descriptive Data Element Name: Name of the Data Submission Contact

**XSD Data Type:** xs: string  
**Element Name:** name  
**Accepts Null values:** No  
**Required in XSD:** Yes  
**Minimum Constraint:** 5  
**Maximum Constraint:** 25

**Definition:** Name of the person submitting the data.

**Edit:** Must be a valid entry.

*Not a UB-04 field*

### Descriptive Data Element Name: Phone Number

**XSD Data Type:** xs: string  
**Element Name:** phone  
**Accepts Null values:** No  
**Required in XSD:** Yes  
**Minimum Constraint:** 12  
**Maximum Constraint:** 12

**Definition:** Telephone number of the data submission contact.

**Comments:** The phone number must be in the following format:
111-222-3333

**Edit:** Must be a valid phone number.

*Not a UB-04 field*
Descriptive Data Element Name: Email
XSD Data Type: xs: string
Element Name: email
Accepts Null values: No
Required in XSD: Yes
Minimum Constraint: 5
Maximum Constraint: 50

Definition: Email address of the data submission contact.

Edit: Must be a valid email address.

Not a UB-04 field

Descriptive Data Element Name: Street
XSD Data Type: xs: string
Element Name: street
Accepts Null values: No
Required in XSD: Yes
Minimum Constraint: 5
Maximum Constraint: 70

Definition: The street address of the data submission contact.

Comment:
- Use mailing address if different than physical address.
- Address can be that of the hospital, corporation location etc.

Edit: Must be a valid address.

Not a UB-04 field

Descriptive Data Element Name: City
XSD Data Type: xs: string
Element Name: city
Accepts Null values: No
Required in XSD: Yes
Minimum Constraint: 5
Maximum Constraint: 25

Definition: The city of the data submission contact’s street address.

Edit: Must be a valid city

Not a UB-04 field

For questions please call: 405-271-6225
Descriptive Data Element Name: State

XSD Data Type: xs: string

Element Name: state

Accepts Null values: No

Required in XSD: Yes

Minimum Constraint: 2

Maximum Constraint: 2

Definition: The State of the data submission contact’s address.

Comments: Use standard Post Office state abbreviations (e.g. OK for Oklahoma, TX for Texas).

Edit: State abbreviation must be present and valid

Not a UB-04 field

Descriptive Data Element Name: Zip

XSD Data Type: xs: string

Element Name: zip

Accepts Null values: No

Required in XSD: Yes

Minimum Constraint: 5

Maximum Constraint: 10

Definition: The zip code of the data submission contact’s address

Comments: Nine-digit zip codes are encouraged in the form XXXXX-YYYY or XXXXXYYYY

Edit: Must be a valid zip code.

Not a UB-04 field

Required in XSD: Yes
Minimum Constraint: 1
Maximum Constraint: 6
Definition: A sequential record number generated for each record in the file beginning with one (1).
Comments: Should reflect the count of all records submitted.
Edit: Must be valid.

Not a UB-04 field

Descriptive Data Element Name: Patient Name
XSD Data Type: xs:string
Element Name: pat_name
Accepts Null values: No
Required in XSD: Yes
Minimum Constraint: 2
Maximum Constraint: 30
Definition: Last name, first name, and middle initial of the patient.
Comments: Use a comma and one space to separate last and first names. No space should be left between a prefix and a name (e.g. McCauley, DeClair, or VonFeldt). Titles such as Sir, Msgr., and Dr. should not be recorded. No special characters (e.g. () *, **, / ) should be included in the name. Record hyphenated names with the hyphen (e.g. Smith-Jones, Rebecca). To record a suffix of a name, write the last name, leave a space, and then write the suffix. Follow the suffix with a comma and a first name. For example: Jones II, Robert or Adams Jr., Fred. The middle initial should include only one character. Comments such as ‘deceased’, ‘test’ are not valid names and should not be reported as such.
Edit: Name must have a comma and space separating the last name from the first.

UB-04 FL 8
Descriptive Data Element Name: Patient Street Address

XSD Data Type: xs:string
Element Name: pat_address
Accepts Null values: No
Required in XSD: Yes
Minimum Constraint: 5
Maximum Constraint: 70

Definition: The Street address of the patient's residence. P.O. Boxes and Rural Routes should only be used when the physical address is not available.

Comments: The street address should include the following where applicable:

- Street number
- Street direction e.g. N, NW, SW, SE etc.
- Street name
- Street type e.g. Avenue, St, Rd, Road, CT, etc. Refer to the link for commonly used street suffixes http://www.usps.com/ncsc/lookups/abbr_suffix.txt
- Apartment number
- Homeless patient’s address should be reported “Homeless”.
- Out-of Country patient's address should indicate the Country of Origin

Edit: Street address must be present. Comments such as ‘DHS custody’, ‘return mail’, ‘deceased’, ‘Estate of’, names of Nursing homes etc. are not valid addresses and should not be reported in the data as such.

UB-04 FL9a

Descriptive Data Element Name: Patient City

XSD Data Type: xs:string
Element Name: pat_city
Accepts Null values: No
Required in XSD: Yes
Minimum Constraint: 3
Maximum Constraint: 25

Definition: The city of the patient's street address.

Comments: The city of the patient should include the following where applicable

- Abbreviations are not accepted.
- City must be spelled out in full e.g. Saint Louis, Fort Gibson etc.
- Homeless patient’s city should be reported as “City of Hospital”.
- Out-of Country patient’s city should be reported as “Out of Country”

Edit: Valid city must be present.

UB-04 FL9b
Descriptive Data Element Name: Patient State
XSD Data Type: xs:string
Element Name: pat_state
Accepts Null values: No
Required in XSD: Yes
Minimum Constraint: 2
Maximum Constraint: 2
Definition: The state of the patient's address.

Comments: The state of the patient address should include the following where applicable
- Use standard Post Office state abbreviations (e.g., OK for Oklahoma, TX for Texas).
- Homeless patient’s state should be reported as “ZZ”.
- Out-of Country patient’s state should be reported as “XX”.

Edit: State abbreviation must be present and valid.

UB-04 FL 9c

Descriptive Data Element Name: Patient Address Postal Code
XSD Data Type: xs:string
Element Name: pat_zip
Accepts Null values: No
Required in XSD: Yes
Minimum Constraint: 5
Maximum Constraint: 10
Definition: The zip code of the patient's address.

Comments: The zip code of the patient should include the following where applicable
- Nine-digit zip codes are encouraged in the form XXXXXX-YYYY or XXXXXXYYYY.
- Homeless patient’s zip code should be reported as “99990”.
- Out-of Country patient’s zip code should be reported as “99999”.

Edit: Postal zip code must be present and valid and consistent with patient’s state.

UB-04 FL 9d
Descriptive Data Element Name: Patient Gender

XSD Data Type: xs:string
Element Name: pat_gender
Accepts Null values: No
Required in XSD: Yes
Minimum Constraint: 1
Maximum Constraint: 1
Definition: Patient gender as recorded at the time of admission or start of care.
Comments: This is a one-character code:

M = Male
F = Female
U = Unknown

Edit: Code must be valid and consistent with diagnosis and procedure codes.
UB-04 FL 11

Descriptive Data Element Name: Patient Race

XSD Data Type: xs:positiveInteger
Element Name: pat_race
Accepts Null values: No
Required in XSD: Yes
Minimum Constraint: 1
Maximum Constraint: 1
Definition: This item gives the race of the patient. The information is based on self-identification and is to be obtained from the patient, a relative, or a friend. The facility is not to categorize the patient based on observation or personal judgment.
Comments: If the patient chooses not to answer, the facility should enter the code for unknown. If the facility fails to request the information the hospital should enter the code for unknown.

1 = American Indian or Alaskan Native
Definition: A person having origins in any of the original peoples of North and South America (including Central America or other Spanish cultural origin), and who maintains tribal affiliation or community attachment.

2 = Asian or Pacific Islander
Definition: A person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent, Hawaii, Guam, Samoa, or other Pacific Islands (including Central America or other Spanish cultural origin), including, for example, Bangladesh, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Sri Lanka, Thailand, and Vietnam

3 = Black
Definition: A person having origins in any of the black racial groups of Africa (including Central America or other Spanish cultural origin). It includes people who indicate their race as ‘Black, African American, Afro American, Kenyan, Nigerian, or Haitian

4 = White
Definition: A person having origins in any of the original Caucasian peoples of Europe, North Africa or the Middle East (including Central America or other Spanish cultural origin). It includes people who indicate their race as ‘White’ or report entries such as Irish, German, Italian, Lebanese, Near Easterner, Arab, or Polish

5 = Other
Definition: Any possible options not covered in the above categories.
6 = Unknown
Definition: A person who chooses not to answer the question or the hospital fails to request the information.

Edit: Code must be valid.
Currently not a UB-04 field

Descriptive Data Element Name: Patient Ethnicity
XSD Data Type: xs: positiveInteger
Element Name: pat_ethnicity
Accepts Null values: No
Required in XSD: Yes
Minimum Constraint: 1
Maximum Constraint: 1

Definition: This item gives the Patient's answer to the question “Are you Hispanic?” The information is based on self-identification and is to be obtained from the patient, a relative or a friend. The facility is not to categorize the patient based on observation or personal judgment.

Comments: If the patient chooses not to answer, the facility should enter the code for unknown. If the facility fails to request the information, the hospital should enter the code for unknown.

1 = Hispanic origin or Latino
Definition: A person of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish cultural origin, regardless of race.

2 = Not of Hispanic origin or Latino
Definition: A person who is not classified in 1.

6 = Unknown
Definition: A person who chooses not to respond to the inquiry.

Edit: Code must be valid.
Currently not a UB-04 field.

Descriptive Data Element Name: Patient Marital Status
XSD Data Type: xs: string
Element Name: pat_marital_stat
Accepts Null values: No
Required in XSD: Yes
Minimum Constraint: 1
Maximum Constraint: 1

Definition: The marital status of the patient at date of admission.

Comments: One-character code, where:

S = Single
M = Married
P = Life Partner
X = Legally separated
D = Divorced
W = Widowed
U = Unknown

Edit: Code must be valid.
Currently not a UB-04 field.
Descriptive Data Element Name: Patient Date of Birth

XSD Data Type: xs:date

Element Name: pat_birth_date

Accepts Null values: No

Required in XSD: Yes

Minimum Constraint: 10

Maximum Constraint: 10

Definition: The date of birth of the patient.

Comments: Use the ten-digit format YYYY-MM-DD where:
- MM is the month in two digits ranging from 01 to 12
- DD is the day in two digits ranging from 01 to 31
- YYYY is the year of birth in four digits.

Edit: Date of birth must be:
- Present
- A valid date- not occurring after admit or discharge date
- Equal to admit date for hospital newborns
  (Principal diagnosis V30-V39 except V30.1)
- Consistent with diagnosis
- Age calculated from date of birth and discharge and must be less than 125 years

UB-04 FL 10

Descriptive Data Element Name: Patient Social Security Number

XSD Data Type: xs:string

Element Name: pat_ssn

Accepts Null values: No

Required in XSD: Yes

Minimum Constraint: 3

Maximum Constraint: 12

Definition: The last 4 digits of the Social Security Number of the patient receiving care.

Comments: If reporting the complete SSN hyphens can be used but not required. If a patient does not have a Social Security Number, use the following codes:

- Mother’s last 4 digits of SSN + 100 (e.g., 6789100) for a newborn who has not obtained a SSN. For multiple births, use 101 for the first baby and 102 for the second baby, etc.
- 200 for a patient who has no SSN
- 300 for a patient who chooses not to provide his/her SSN.

Edit: Entry must be a valid SSN, or 200 or 300.
Descriptive Data Element Name:  Patient Control Number

XSD Data Type:  xs: string
Element Name:  pat_control_no
Accepts Null values:  No
Required in XSD:  Yes
Minimum Constraint:  2
Maximum Constraint:  17
Definition:  A code assigned by the facility uniquely identifying individual discharge events.

Comments:
- This code will be used for reference in correspondence, problem solving, edit corrections and return of grouped data.
- The PCN identifies a single facility visit for a patient and maybe called or defined as an account number.
- The PCN is different from the medical record number, which identifies an individual patient and remains the same through multiple facility visits.

Edit:  PCN code must be present and should be unique within a facility.

UB-04 FL 3a

Descriptive Data Element Name:  Patient Medical Record Number

XSD Data Type:  xs: string
Element Name:  pat_medical_rec_no
Accepts Null values:  No
Required in XSD:  Yes
Minimum Constraint:  2
Maximum Constraint:  17
Definition:  A unique identifier assigned by the facility to the patient's medical/health record at the first admission and used for all subsequent admissions.

Edit:  MRN code must be present and should represent a unique patient.

UB-04 FL 3b

Descriptive Data Element Name:  National Provider Number

XSD Data Type:  xs: string
Element Name:  national_provider_no
Accepts Null values:  No
Required in XSD:  Yes
Minimum Constraint:  10
Maximum Constraint:  10
Definition:  The ten-digit number assigned to the facility as a result of HIPAA’s National Provider Identifier (NPI) regulations.

Edit:  Number must be valid and match the CMS national provider list.

Currently not a UB-04 field.
Descriptive Data Element Name: Admission Date

XSD Data Type: xs:date
Element Name: admit_date
Accepts Null values: No
Required in XSD: Yes
Minimum Constraint: 10
Maximum Constraint: 10
Definition: The date the patient was admitted to the facility.

Comments: Admission date has a 10 digit format YYYYY-MM-DD where:
- MM is the month in two digits ranging from 01 to 12
- DD is the day in two digits ranging from 01 to 31
- YYYY is the year in four digits (e.g. 2010)

Edit: Admission date must be:
- Present and valid.
- No earlier than the date of birth.
- No later than discharge date.

UB-04 FL 12

Descriptive Data Element Name: Discharge Date

XSD Data Type: xs:date
Element Name: disch_date
Accepts Null values: No
Required in XSD: Yes
Minimum Constraint: 10
Maximum Constraint: 10
Definition: The date the patient was discharged from the facility.

Comments: Discharge date is in a ten digit format YYYYY-MM-DD where:
- MM is the month in two digits ranging from 01 to 12
- DD is the day in two digits ranging from 01 to 31
- YYYY is the year of discharge (e.g. 2010)

Edit: Discharge date must be:
- Present
- Valid
- No earlier than admission date
- No earlier than date of birth

UB-04 FL 12
Descriptive Data Element Name: Point of Origin (Previously Source of Admission)

XSD Data Type: xs: string

Element Name: admit_source

Accepts Null values: No

Required in XSD: Yes

Minimum Constraint: 1

Maximum Constraint: 1

Definition: A code indicating the point of patient origin for the admission.

Comments: This single digit code depends on the code entered for Type of Admission. If Type of Admission is 1 (emergency), 2 (urgent), 3 (elective) or 5 (trauma center), points of origin codes have different meanings than when Type of Admission is 4, (newborn).

Point of origin codes for Type of Admission = Emergency (1), Urgent (2), Elective (3), or Trauma Center (5)

1 = Nonhealthcare Facility Point of Origin

Definition: The patient was admitted to this facility upon the order of a physician.

2 = Clinic

Definition: The patient was admitted to this facility as a transfer from a freestanding or non-freestanding clinic.

4 = Transfer from a hospital

Definition: The patient was admitted to this facility as a transfer from an acute care facility where he or she was an inpatient or outpatient.

5 = Transfer from a skilled nursing facility or Intermediate care facility

Definition: The patient was admitted to this facility as a transfer from a skilled nursing facility or ICF where he or she was an inpatient.

6 = Transfer from another health care facility

Definition: The patient was admitted to this facility as a transfer from another type of health care facility other than an acute care facility or skilled nursing facility. This includes transfers from nursing homes, long term care facilities and skilled nursing facility patients that are at a non-skilled level of care.

7 = Emergency Room

Definition: The patient was admitted to this facility upon the recommendation of this facility’s emergency room physician.

8 = Court/Law enforcement

Definition: The patient was admitted to this facility upon the direction of a court of law, or upon the request of a law enforcement agency representative.

9 = Information not available

Definition: The means by which the patient was admitted to this hospital is not known.

B = Transfer from another home health agency

C = Readmission to same home health agency

D = Transfer from one distinct unit of the hospital to another distinct unit of the same hospital resulting in a separate claim to the payer
Definition: The patient was admitted to this facility as a transfer from hospital inpatient within this facility resulting in a separate claim to the payer.

E= Transfer from Ambulatory Surgery Center

F= Transfer from hospice and is under a hospice plan of care or enrolled in one

Point of origin codes for Type of Admission = Newborn (4)

5 = Born inside this hospital
6 = Born outside of this hospital

Edit: The code must be present, valid, and in agreement with the Type of Admission code:
When Type of Admission code = 1, 2, 3, or 5, valid Point of origin codes = 1 to 9 or B through F.
When Type of Admission code = 4, valid Point of origin codes = 5 or 6.

UB-04 FL 15

Descriptive Data Element Name: Type (Priority) of Admission

XSD Data Type: xs:positiveInteger

Element Name: admit_type

Accepts Null values: No

Required in XSD: Yes

Minimum Constraint: 1

Maximum Constraint: 1

Definition: A code indicating the priority of the admission.

Comments: This code is a one-digit code between 1 through 5, or 9

1= Emergency
Definition: The patient requires immediate medical intervention as a result of severe, life threatening or potentially disabling conditions. Generally, the patient is admitted through the emergency room.

2= Urgent
Definition: The patient requires immediate attention for the care and treatment of a physical or mental disorder. Generally, the patient is admitted to the first available and suitable accommodation.

3= Elective
Definition: The patient condition permits adequate time to schedule the availability of a suitable accommodation. An elective admission can be delayed without substantial risk to the health of the individual.

4= Newborn
Definition: Generally, the child is born within the facility.

5= Trauma center
Definition: This code is for a visit to a trauma center/hospital as licensed or designated by the state or local government authorized to do so, or as verified by the American College of Surgeons and involving trauma activation.

9= Information is not available
Edit: The field must be:

- Present and valid
- Between 1 through 5, or 9

If Type of Admission = 4 (newborn):
- Point of origin codes must be 5 or 6
- Date of Birth must equal date of admission
- Diagnosis must be consistent with newborn

UB-04 FL 14

Descriptive Data Element Name: Patient Discharge Status
XSD Data Type: xs: string
Element Name: pat_disch_status
Accepts Null values: No
Required in XSD: Yes
Minimum Constraint: 2
Maximum Constraint: 2
Definition: A code indicating patient status at the time of discharge.

Comments: Codes for this two-digit field are:

- 01 = Discharged to home or self-care (routine discharge)
- 02 = Discharge/transferred to another short-term general hospital for inpatient care
- 03 = Discharged/transferred to skilled nursing facility (SNF) with Medicare Certification in Anticipation of Skilled Care
- 04 = Discharged/transferred to an intermediate care facility (ICF)
- 05 = Discharge/Transferred to a designated cancer center or children's hospital. Effective 04-1-2008
- 06 = Discharged/transferred to home under care of organized home health service organization
- 07 = Left against medical advice or discontinued care
- 20 = Expired
- 21 = Discharge/transferred to court/law enforcement effective 10-01-09
- 43 = Discharged/transferred to a federal health are facility.
- 50 = Discharged to Hospice—home
- 51 = Discharged to Hospice—medical facility
- 61 = Discharged/transferred to a hospital-based Medicare approved swing bed.
- 62 = Discharged/transferred to an inpatient rehabilitation facility (IRF) including distinct part units of a hospital.
- 63 = Discharged/transferred to a long term care hospital (LTCH).
- 64 = Discharged/transferred to a nursing facility certified under Medicaid but not certified under Medicare.
- 65 = Discharged/transferred to a Psychiatric hospital or Psychiatric Distinct Part Unit of a Hospital.
- 66 = Discharged/transferred to a Critical Access Hospital (CAH)
- 70 = Discharged/transferred to another Type of Health Care Institution not defined elsewhere in this Code List.

Edit: Discharge status code must be present and valid.

UB-04 FL 17
Descriptive Data Element Name: Birth Weight

XSD Data Type: xs:positiveInteger

Element Name: birth_weight

Accepts Null values: Yes

Required in XSD: No

Minimum Constraint: 3

Maximum Constraint: 4

Definition: The birth weight of the newborn in grams. It is obtained from the amount field of Value Code 54.

Comments: Must reflect the actual birth weight or weight at time of admission for an extramural birth. Report birth weight as a whole number.

Edit: Required on all claims with Type of Admission of 4 and on other claims as required by state law. Must be a positive whole number.

UB-04 FL 39-41

Descriptive Data Element Name: External Cause of Injury Code (E-code) (up to 3 E-codes)

XSD Data Type: xs: string

Element Name: ecode

Accepts Null values: Yes

Required in XSD: No

Minimum Constraint: 4

Maximum Constraint: 8

Definition: The ICD-9-CM code for the external cause of an injury, poisoning, or adverse effect.

Comments: Required whenever there is any diagnosis (primary, secondary) of an injury, poisoning, or adverse effect (ICD-9-CM codes 800-999) and it is the initial treatment for that condition. Present on admission should be reported for all E-codes that occurred prior to inpatient admission but not those that occurred during an inpatient hospitalization. See PRINCIPAL Diagnosis for definition and further description of the Present on Admission Indicator.

The priorities for assigning an E-code are:

- Initial treatment of the injury or poisoning.
- Principal diagnosis of an injury or poisoning.
- Other diagnosis of an injury, poisoning or adverse effect directly related to the principal diagnosis.
- Other diagnosis with an external cause.
- Place of occurrence is not required.

Entries:

- Are without a decimal. If a decimal is included, the fifth digit is lost, which will result in an inaccurate E-code.
- Start with an uppercase E

Edit: If any diagnosis is ICD-9-CM code from 800 through 999 excluding 995.9x, there must be a valid E-Code, between E800 to E999.

UB-04 FL 72a-c
Descriptive Data Element Name:  Attending Physician Identifier

XSD Data Type:  xs: string

Element Name: attending_phy_id
Accepts Null values:  No
Required in XSD:  Yes
Minimum Constraint:  10
Maximum Constraint:  10

Definition:  The ten-digit National Provider Identifier Number (NPI) of the physician who certified and re-certified the medical necessity of the service rendered or who has primary responsibility for the patient’s medical care and treatment.

Edit:  Entry must be a valid NPI number.

UB-04 FL 76

Descriptive Data Element Name:  Primary Payer Identifier – not required at this time

XSD Data Type:  xs: string

Element Name: prim_payer_id
Accepts Null values:  No
Required in XSD:  Yes
Minimum Constraint:  15
Maximum Constraint:  15

Definition:  National Health Plan Identifier identifying the primary payer for this bill.

Comments:  This field is to contain the National Health Plan Identifier of the primary payer organization.

Edit:  The identifier must be that of a licensed health insurer or self-pay.

UB-04 FL 51a

Descriptive Data Element Name:  Primary Payer Name

XSD Data Type:  xs: string

Element Name: prim_payer_name
Accepts Null values:  No
Required in XSD:  Yes
Minimum Constraint:  2
Maximum Constraint:  25

Definition:  Payer name identifying the primary payer for this bill.

Comments:  This field is to contain the name of the primary payer, spelled out as completely as space allows. If a name has more than 25 characters, use abbreviations that can be used to uniquely identify the payer. If the patient paid for or was responsible for the hospital stay, primary payer should indicate self-pay.

Edit:  The name must be present and that of a health insurer or self-pay.

UB-04 FL 50A
**Descriptive Data Element Name:** Secondary Payer Identifier – not required at this time

- **XSD Data Type:** `xs: string`
- **Element Name:** `second_payer_id`
- **Accepts Null values:** Yes
- **Required in XSD:** No
- **Minimum Constraint:** 15
- **Maximum Constraint:** 15
- **Definition:** National Health Plan Identifier identifying the secondary payer for this bill.
- **Comments:** This field is to contain the National Health Plan Identifier of the secondary payer organization.
- **Edit:** The identifier must be that of a licensed health insurer or self-pay.

UB-04 FL 51B

---

**Descriptive Data Element Name:** Secondary Payer Name

- **XSD Data Type:** `xs: string`
- **Element Name:** `second_payer_name`
- **Accepts Null values:** Yes
- **Required in XSD:** No
- **Minimum Constraint:** 2
- **Maximum Constraint:** 25
- **Definition:** Payer name identifying the secondary payer for this bill.
- **Comments:** This field is to contain the name of the secondary payer, spelled out as completely as space allows. If a name has more than 25 characters, use abbreviations that can be used to uniquely identify the payer. If the patient paid for or was responsible for part of the hospital stay, secondary payer should indicate self-pay.
- **Edit:** The name must be that of a licensed health insurer or self-pay

UB-04 FL 50B
Descriptive Data Element Name: Primary Payer Classification

XSD Data Type: xs: positiveInteger

Element Name: prim_payer_class

Accepts Null values: No

Required in XSD: Yes

Minimum Constraint: 1

Maximum Constraint: 1

Definition: This field indicates the payer group.

Comments: The payer group should be classified as:

1. Commercial - Includes HMO, PPO, POS, Indemnity, BCBS, Aetna, HealthChoice etc.
2. Medicare - Including HMO and insurance managed Medicare
3. Medicaid - Including Medicaid pending
4. Veterans affairs / Military - Includes Champus, ChampVA and Tricare.
5. Workers Compensation
6. Uninsured/ Self-pay
7. Others - Payers not in any of the above groups and including charity, Indian Health, auto-liability, DOC inmate.

Edit: The code must be present and valid.

Currently not a UB-04 field.

Descriptive Data Element Name: Total Charges

XSD Data Type: xs: string

Element Name: total_charges

Accepts Null values: No

Required in XSD: Yes

Minimum Constraint: 3

Maximum Constraint: 7

Definition: The total charges for all revenue codes associated with the inpatient stay.

Comments: This entry is:

* Rounded to nearest whole dollar
* A maximum of seven digits

Edit: This field must be present and valid. The field should equal the sum of subtotals of charges by revenue code fields.

UB-04 FL 47; Rev Code 0001
**Descriptive Data Element Name:** Type of Bill

**XSD Data Type:** xs: string

**Element Name:** bill_type

**Accepts Null values:** No

**Required in XSD:** Yes

**Minimum Constraint:** 3

**Maximum Constraint:** 4

**Definition:** A code indicating the specific type of bill. The first digit is a leading zero and the fourth digit defines the frequency of the bill.

**Comments:** The leading zero is not included on electronic claims. Even though all bill types are included in the table below, only inpatient bill types should be reported for inpatient data.

**Edit:** Type of Bill Code must be present and valid.

**UB-04 FL 04**
Descriptive Data Element Name: DRG (Diagnosis Related Group)

XSD Data Type: xs:string

Element Name: drg

Accepts Null values: No

Required in XSD: Yes

Minimum Constraint: 4

Maximum Constraint: 4

Definition: The PPS code assigned to the claim to identify the DRG based on the grouper software called for under contract with the primary payer. This represents an inpatient classification scheme to categorize patients that are medically related with respect to diagnosis and treatment and who are statistically similar in their lengths of stay.

Comments: To accommodate other types of DRGs, prefix the DRG with “M” to indicate MS-DRG (Latest Version) and “C” to indicate CMS_DRG (Ver 24). When DRG is unknown or not available use 9999.

Edit: A DRG must be:

• Present
• Valid
• Consistent with sex and age
• The first position need to include either M, C or 9

Total Elements: 1

Attribute Name: princ_diag, admit_diag  
Data Element Name: oth_diag_code

**Descriptive Data Element Name:** Principal Diagnosis

**XSD Data Type:** xs: string

**Attribute Name:** princ_diag  
**Accepts Null values:** No  
**Required in XSD:** Yes  
**Minimum Constraint:** 3  
**Maximum Constraint:** 8

**Definition:** Principal Diagnosis:  
The ICD-9-CM code describing the condition established after study to be chiefly responsible for occasioning the admission of the patient for care.

**Definition:** Present on Admission Indicator:  
Present on admission is defined as present at the time the order for inpatient admission occurs. Conditions that develop during an outpatient encounter, including emergency department, are considered as present on admission. The POA should be included at the 8th position of the ICD9 code with spaces in between if necessary.

**Comments:** The principal diagnosis must:  
• Use an ICD-9-CM code without decimal point in first 5 positions.  
• Enter all three, four, and 5 digits or to the highest level of specificity.  
• Enter the “V” prefix as appropriate (newborns).

**Comments:** The Present on Admission Indicator:  
• Should be included at the 8th position of the diagnosis code.  
• Is based not only on the conditions known at the time of admission, but also include those conditions that were clearly present, but not diagnosed, until after the admission took place.  
• Is applied to the principal diagnosis as well as all secondary diagnoses that are reported.  
• Applies to the diagnosis codes for claims involving inpatient admissions to general acute-care hospitals or other facilities, as required by law or regulation for public health reporting.

**Edit:** A principal diagnosis must be:  
• Present  
• Valid  
• Consistent with sex and age  
• Consistent with a valid DRG  
• An “E” code should NOT be entered as the principal diagnosis.

**Edit:** Present on Admission Indicator must be:  
• Y-Yes (present at the time of inpatient admission)  
• N – No (not present at the time of inpatient admission)  
• U- Unknown (documentation is insufficient to determine if condition is present at time of inpatient admission)  
• W - Clinically Undetermined  
• 1 – Unreported/Not used – Exempt from POA reporting
• Must be present if the diagnosis requires a POA

Descriptive Data Element Name:       Admitting diagnosis Code

XSD Data Type:            xs: string
Attribute Name:           admit_diag
Accepts Null values:      No
Required in XSD:          Yes
Minimum Constraint:      3
Maximum Constraint:      7
Definition:               The ICD-9-CM code describing the patient’s diagnosis at the time of admission.

Comments:                The admitting diagnosis must:
• Use an ICD-9-CM code without a decimal point.
• Enter all three, four, and 5 digits or to the highest level of specificity.

Edit:                    Admitting diagnosis must be:
• Present
• Valid
• Consistent with sex and age

Descriptive Data Element Name:       Other Diagnosis Codes (1 to 17)

XSD Data Type:            xs: string
Element Name:             oth_diag_code
Accepts Null values:      Yes
Required in XSD:          No
Minimum Constraint:      3
Maximum Constraint:      8
Definition:               The ICD-9-CM codes describing other diagnoses corresponding to additional conditions that co-exist at the time of admission or develop subsequently, and which have an effect on the treatment received or the length of stay.

Comments:                Up to 17 secondary diagnoses may be recorded in the first 7 positions of each secondary diagnosis. Enter the present on admission indicator in the 8th position of the secondary diagnosis fields. See comments for the principal diagnosis for definition and further description of POA Indicator. Additional “E” codes may be entered as ‘other diagnosis codes’ after the E-code fields have been completed. All codes must be entered without decimal points. Include POA as applicable as described in principal diagnosis element.

Edit:                    If other diagnoses are present they must be valid. When diagnosis is age or sex dependent, the age and sex must be consistent with the code entered. If the diagnosis code is ICD-9-CM 800 through 999 there must be a valid E-Code entered in the External Cause of Injury Code (E-Code) fields if it is the initial treatment for the condition reported. Present-on-admission indicator must be valid.

Total Elements: 1

Attribute Name: princ_proc, princ_proc_phys_id,
Data Element Name: proc

Descriptive Data Element Name: Principal Procedure Code
XSD Data Type: xs: string
Attribute Name: princ_proc
Accepts Null values: Yes
Required in XSD: No
Minimum Constraint: 3
Maximum Constraint: 4
Definition: The ICD-9-CM code that identifies the principal procedure performed during the inpatient hospital stay covered by this discharge data record. The principal procedure is one that is performed for definitive treatment rather than for diagnostic or exploratory purposes, or is necessary as a result of complications. The principal procedure is that procedure most related to the principal diagnosis.
Comments: The coding method used should be ICD9-CM. Entries must include all digits without a decimal.
Edit: Principal Procedure field if provided must be:
  • Present if other procedures are present
  • Valid
  • Without decimals
  • Consistent with patient’s sex and age
  • Consistent with a valid DRG

XSD Data Type: xs: string
Attribute Name: princ_proc_phys_id
Accepts Null values: Yes
Required in XSD: No
Minimum Constraint: 10
Maximum Constraint: 10
Definition: The ten-digit National Provider Identifier (NPI) of the physician performing the principal procedure.
Edit: Field must contain a valid NPI.

UB-04 FL 77
Data Elements

Total Elements: 2

Data Element Name: oth_proc_code, oth_proc_phys_id

Descriptive Data Element Name: Other Procedure Codes (1-15)

XSD Data Type: xs: string
Element Name: oth_proc_code
Accepts Null values: Yes
Required in XSD: No
Minimum Constraint: 3
Maximum Constraint: 4
Definition: The ICD-9-CM code(s) that identifies all significant procedures other than the principal procedure performed during the patient’s inpatient hospital stay covered by this discharge record. Report those that are most important for the episode of care and specifically any therapeutic procedures closely related to the principal diagnosis.

Comments: Up to 15 other procedure codes may be recorded. Enter codes in descending order of importance.

To code other Procedure codes:
- Enter all digits
- Do not enter a decimal

Edit: Other Procedure field, if provided, must be:
- Present only if a principal procedure is present
- Valid
- Consistent with patient’s sex and age
- Consistent with valid DRG

Table 3 - Revenue Codes and Units of Service

This section defines valid revenue codes representing services provided to a patient, and the unit of measure associated with each revenue service. Only these codes are valid. The source of the codes and definitions is the published manual of the National Uniform Billing Committee.

Revenue Code: The revenue code is a four-digit code and identifies a specific accommodation, ancillary service or billing calculation.  
Subcategory: The fourth digit denotes a subcategory number. The subcategory number provides a more detailed list generally ranging from 0 – 9. When reporting the revenue code the fourth position must include one of the numeric choices available in that category.

Units of Service: The units used to measure the patient services in each revenue category, such as number of accommodation days, miles, pints, or treatments.

Clinical Claims editor

Clinical claims editing (CCE) will be applied to the hospital’s discharge records submitted. The edit process checks for potential problems in a record identifying highly improbable clinical situations, which in most cases, prove to be in error. The CCE will flag records when any of the following conditions are detected.

Clinically unreasonable length-of-stay (high or low) - From a clinical perspective, it is highly improbable that patients with certain diagnoses and procedures could legitimately have length-of-stays less than or greater than a specific number of days. Such clinically unreasonable high and low length-of-stays are identified by the CCE for specific diagnoses and procedures.

Age conflict - The CCE detects inconsistencies between a patient’s age and any diagnosis on the patient’s claim. Examples of such conflicts are a 5-year-old patient with benign prostatic hypertrophy, or a 78 year old delivery. In such cases either the diagnosis or the age is presumed to be incorrect.

Sex conflict - The CCE detects inconsistencies between a patient’s sex and any diagnosis or procedure on the patient’s record. Examples of such conflicts are a male patient with cervical cancer, or a male patient with a hysterectomy. In such case either the patient’s diagnosis, procedure or sex is incorrect.

E-Code as principal diagnosis - E-codes describe the circumstances that caused an injury, not the nature of the injury. An E-code should not be used as a principal diagnosis.

Manifestation code as principal diagnosis - Manifestation codes describe the manifestation of an underlying disease, not the disease itself. A manifestation code should not be used as a principal diagnosis.

Unacceptable principal diagnosis - Selected “V” codes describe a circumstances which influences an individual’s health status but is not a current illness or injury. These V codes are considered unacceptable as a principal diagnosis. For example, a family history of ischemic heart disease (V173) would be an unacceptable principal diagnosis.

Duplicate of principal diagnosis - Whenever a secondary diagnosis is coded the same as the principal diagnosis, the secondary diagnosis is identified by the CCE as a duplicate of the principal diagnosis.

Invalid diagnosis or procedure code - The CCE checks each diagnosis and procedure code entered in the record against a table of valid ICD-9-CM codes. If a code is not found in the table the record is flagged as an error.

Invalid 4th or 5th digit - The CCE identifies any diagnosis or procedure code that requires a 4th or 5th digit. The code entered may have the 4th or 5th digit missing or not be valid for the code in question.

Duplicate code - When the CCE detects the same ICD-9-CM diagnosis or procedure code more than once in a record, the record is flagged as a possible error.

Maternal and fetal/newborn edit - A maternal diagnosis code and a fetal/newborn diagnosis code should not appear on the same discharge record. When the CCE detects a maternal diagnosis code and a fetal/newborn diagnosis code the record is flagged as in error.

Invalid or unknown age - CCE allows entry of patient age from 0 through 124 years. Any other entry is considered an error.
