Dental Health Professional Shortage Areas (HPSAs)

Total: Counties Designated as a HPSA: 65*

Legend
- Geographical Area HPSAs (7 Counties)
- Population Group HPSAs (58 Counties)
- Not Health Professional Shortage Areas (12 Counties)

*1 Dental HPSA is not a full county: North Tulsa County is a partial county HPSA.

Dentist Definition:
Dentists are DDS or DMDs that practice in general or pediatric dentistry. The number of dentists in a HPSA is determined by the number of DDS or DMDs practicing in the above specialties that:
1) have an active Oklahoma license and
2) a verifiable practice address in the state.

Note: Federal criteria exclude residents and dentists not working in direct primary care. Dentists working at federal or inpatient-only facilities are also excluded from HPSA calculations.

Notes on Health Professional Shortage Areas:
HPSAs demonstrate a critical shortage of dentists, in accordance with the federal Health Resources & Services Administration (HRSA) Shortage Designation Branch guidelines. Each type of HPSA is further classified into one of the following categories: geographic, population group, facility, or automatic. Each HPSA is given a score by the Shortage Designation Branch based on certain specific criteria for each type of HPSA. This score indicates the degree of shortage. HPSA designations are updated every 3-4 years.*
