Social Media Toolkits

As a part of CCC technical assistance efforts, the GW Cancer Center develops social media toolkits for cancer awareness months to help CCC programs, coalitions and other stakeholders strengthen their communication efforts.

The toolkits each contain evidence-informed communication strategies, pre-written Tweets and Facebook posts, as well as other social media and cancer awareness-related tools and resources.

Don't have the time or capacity to implement these toolkits? Don't fret! You can still engage your audience by retweeting messages from @GWCancer.

"Talk to Someone" Simulation

Staying healthy after cancer treatment can be challenging. Linda, a cancer survivor, gives advice on four different topics. You can choose different options to get answers to your questions about making healthy choices.

Best viewed in Google Chrome or Microsoft Edge browsers.

Talk to Someone ALCOHOL

Talk to Someone: Alcohol is an interactive conversation about how alcohol can affect your health as a cancer survivor.

Talk to Someone TOBACCO

Talk to Someone: Tobacco explains how smoking affects the body, especially as a cancer survivor, and gives advice about quitting.

Talk to Someone ANXIETY & DISTRESS

Talk to Someone: Anxiety and Distress talks about common stresses and concerns for cancer survivors, and how to find support.

Talk to Someone PHYSICAL ACTIVITY & NUTRITION

Talk to Someone: Physical Activity and Nutrition gives tips for cancer survivors to improve physical activity and healthy eating.

Introduction for Health Care Providers

After completing cancer treatment, survivors need information about healthy habits for recovery. In **Talk to Someone: Health Care Providers**, Dr. Wei explains how Linda provides information approved by CDC's medical experts to encourage healthy behaviors in an empathetic way. Linda builds a foundation of knowledge and motivation so the conversations you have with survivors are more targeted and efficient.
