

LABORATORY PROCEDURES FOR FAMILY PLANNING

Public health nurses may obtain the following specimens from clients enrolled in Family Planning Services in conjunction with program guidelines (see manual).

I. FAMILY PLANNING

- Chlamydia test
- Gonorrhea test
- Hemoglobin
- HIV
- Pregnancy test
- RPR/TPPA
- Repeat liquid based pap test
- Dip stick urinalysis

II. Abnormal test results are to be managed using the appropriate PHYSICIAN APPROVED PROTOCOL or referred to APRN or primary provider for management.
