HEALTH SYSTEMS

In order for Oklahoma to achieve demonstrated improvement in health outcomes, systems that support health must be high quality, accessible and value-based. These systems should create an environment in which the healthy choice is the easy choice for Oklahomans. OHIP 2020 addresses health systems through two major focus areas – Health Transformation and Health Education.

HEALTH TRANSFORMATION

Efforts are focused on creating a high-functioning health system that improves population health, health quality and access to care while bending the healthcare cost curve.

HEALTH EDUCATION

Efforts are focused on empowering people to take action by increasing knowledge and skills, while also focusing on systems, environments and policies that affect health.

CALL TO ACTION

All Oklahomans are asked to do their part and participate in creating a culture of health through the following actions:

Adopt recommended healthy lifestyle changes and encourage your friends and family.

Get connected with a local Turning Point or other community partnership to plan and implement local community health improvement efforts.

Encourage local businesses, schools, communities, and congregations to apply for and achieve Certified Healthy Oklahoma recognition.

Visit www.health.ok.gov for a complete listing of Turning Point Coalitions in Oklahoma.
