150,000 Fewer Tobacco Users by 2022

Oklahoma State Plan for Tobacco Use Prevention & Cessation

TOBACCO STOPS WITH ME.
TOBACCO KILLS MORE OKLAHOMANS THAN...

alcohol, auto accidents, suicides, murders, and illegal drugs COMBINED.¹

IN THE UNITED STATES, SMOKING CAUSES²

87 percent of lung cancer deaths.
79 percent of chronic obstructive pulmonary disease (COPD) cases.
32 percent of heart disease deaths.

Each year, secondhand smoke exposure causes more than 8,000 deaths from stroke.

SMOKING DURING PREGNANCY CAUSES

low birth weight babies, miscarriages, premature birth, and stillbirth.³

EXPOSURE TO SECONDHAND SMOKE CAUSES

heart disease, cancers, sudden infant death syndrome (SIDS), asthma attacks, bronchitis, and pneumonia.⁴

SPIT (SMOKELESS) TOBACCO CONTAINS

28 cancer-causing agents (carcinogens).

ANNUAL DEATHS from smoking compared with selected other causes in the United States⁵

Secondhand smoke is composed of sidestream smoke (the smoke released from the burning end of a cigarette) and exhaled mainstream smoke (the smoke exhaled by the smoker). Since sidestream smoke is generated at lower temperatures and under different conditions than mainstream smoke, it contains higher concentrations of many of the toxins found in inhaled cigarette smoke. Secondhand smoke contains at least 250 toxic chemicals.⁶

Partial listing of toxic chemicals in secondhand smoke:

- 2-naphthylamine
- 4-aminobiphenyl
- Aldehydes (such as formaldehyde)
- Ammonia
- Aromatic amines (such as 4-aminobiphenyl)
- Arsenic
- Benzene
- Beryllium
- Butane
- Cadmium
- Carbon monoxide
- Chromium
- Ethylene oxide
- Hydrogen cyanide
- Lead
- N-Nitrosamines
- Nickel compounds
- Polynuclear aromatic hydrocarbons (such as Benzo[a]pyrene)
- Radioactive polonium-210
- Toluene
- Vinyl chloride

DISEASES CAUSED BY TOBACCO USE

Tobacco use is the single most preventable cause of death and disease in the United States. For every person who dies because of smoking, at least 30 people live with a serious smoking-related illness. Smoking harms nearly every organ of the body.6

DISEASES CAUSED BY EXPOSURE TO SECONDHAND SMOKE

EFFECTS ON REPRODUCTIVE HEALTH3,7

• Smoking harms many aspects and every phase of reproduction.
• Women who smoke are at an increased risk for cervical cancer and infertility.
• Men who smoke are at an increased risk for erectile dysfunction.
• Once pregnant, women who smoke are about twice as likely to experience complications.
• Smoking during pregnancy causes health problems for both mothers and babies, such as pregnancy complications, premature birth, low birth weight infants, stillbirth, and infant death. Low birth weight is a leading cause of infant deaths.

HEALTH & ECONOMIC TOLL OF SMOKING IN OKLAHOMA

Deaths in Oklahoma caused by smoking

- Number of Oklahoma smokers who die each year as a result of smoking: 7,500
- Youth aged 0–17, alive today, who will die from smoking in the future: 88,000
- Number of Oklahoma non-smokers who die each year from secondhand smoke: 700

Annual costs incurred in Oklahoma from smoking*

- Total medical: $1.62 billion
- Total Medicaid: $264 million
- Lost productivity from premature death: $2.1 billion

Absenteeism can cost businesses an average of $517 per year per employee that smokes.10

Funding for Tobacco Control11

The CDC recommends that Oklahoma invest a minimum of $42.3 million annually in a comprehensive tobacco control program.
The Oklahoma Tobacco Settlement Endowment Trust (TSET) was established through a constitutional amendment overwhelmingly approved by Oklahoma voters. While most state governments have failed to keep their promise to use tobacco settlement funds for tobacco prevention and other programs to improve health, Oklahomans have created an endowment to assure that funds will be available for these purposes for generations to come. The top priority of the TSET Board of Directors is to help accomplish this State Plan.

**OKLAHOMA TOBACCO CONTROL PROGRAM**

**VISION**
All Oklahomans living in a tobacco-free society.

**MISSION**
To reduce sickness and death and alleviate the social and economic burden caused by tobacco use in Oklahoma.

**GOAL**
To reduce the state smoking prevalence to the national average by 2022. When this goal is accomplished, there will be 150,000 fewer tobacco users in Oklahoma.
In the epidemiology model of disease, the host (the tobacco user or susceptible user and the nonuser exposed to secondhand smoke) interacts with the agent (the cigarette or other tobacco product), delivered through a vector (the tobacco companies, wholesalers, distributors and retailers), in a supportive and reinforcing environment that includes social, cultural, historical, political and marketing facilitators and influencers.

For tobacco, all these factors work together to create addiction, disease, and premature death.

To reduce tobacco use and the addiction, disease, and premature death it causes, Oklahomans must intervene on all these fronts by:

- Dismantling the environmental structures that support and promote tobacco use
- Preventing the susceptible host from initiating tobacco use
- Motivating the user to quit
- Protecting the nonuser from secondhand smoke
- Modifying the agent and constraining the vector areas we will have to address in order to make additional progress

**FACTORS FOR CHANGE**

**Environment**
- Social
- Political
- Historical
- Cultural
- Marketing

**Vector**
- Tobacco Companies
- Tobacco Wholesalers
- Tobacco Distributors
- Tobacco Retailers

**Host**
- Tobacco User
- Potential User
- Nonuser exposed to secondhand smoke

**Agent**
- Tobacco Products

**Addiction Disease Death**

When young people don’t start tobacco use, addiction will gradually decline, eventually eliminating the problem. Adults must first set a good example for youth.

**PREVENTION**

When young people don’t start tobacco use, addiction will gradually decline, eventually eliminating the problem. Adults must first set a good example for youth.

**PROTECTION**

There is no safe level of exposure to secondhand smoke, but there are immediate and long-term health benefits from 100% smokefree, healthy environments. Every Oklahoman deserves a smokefree workplace.

**CESSATION**

To effectively curtail tobacco use, we must provide cessation resources and an environment supportive to quitting for good. Most tobacco users want to quit and have attempted to quit many times.
TARGET OUTCOMES

PREVENTION

Reduce tobacco use by high school students.

CHALLENGES & OPPORTUNITIES

Raising Prices to Reduce Use
The single most effective way to reduce cigarette consumption, prevent youth initiation and help individuals quit using tobacco is to increase the price of tobacco products. During the recent legislative sessions (2016 and 2017) Oklahoma partners have advocated for a price increase of cigarettes, with several bills being introduced. The cigarette tax increase has yet to be achieved to fall behind other states (ranking 36th as of December 2017), and Oklahoma continues to fall behind other states (ranked 38th) for state excise tax rates among all states.12

Protecting ALL Workers
Oklahoma’s state laws to protect workers from secondhand tobacco smoke exposure have fallen far behind other places, and they do not yet apply to electronic cigarettes and similar products. The exemptions for certain restaurants and bars, plus other business venues singled out to allow smoking, should be removed. Decades of solid studies disprove the false economic arguments of the past against smokefree policies in these venues. It’s time for Oklahoma to strengthen its laws and protect ALL workers from exposure to secondhand smoke.

</tbody>
</table>

Focusing on Key Policy Initiatives
Oklahoma must be more creative with the messaging related to the effect tobacco has on all Oklahomans. Oklahoma must keep policymakers centered on the health issues related to tobacco and utilize data, personal stories, and expertise to reinforce the message. Policy initiatives should continue to be a focus for those messages including the price of tobacco products, clean indoor air and the repeal of preemption to allow local government to make laws stronger than the state law.

Discouraging ALL Tobacco Use
“Spit” or smokeless tobacco is not a safe alternative to smoking despite increasing messages coming from the tobacco industry encouraging smokers to use these products when they can’t smoke. These messages are intended to keep people from fully recovering from addiction to nicotine and to hamper cessation efforts. These and other “alternative products” must be addressed.

Electronic cigarettes, often referred to as vapor products, have become increasingly popular over the past five years. Between 2013 and 2015, Oklahoma has seen a 201 percent increase in e-cigarette use among high school students. However, there was an 8.2 percent decrease in adult usage from 2015 to 2016. It is important that Oklahoma continue to research and use evidence when addressing new and emerging tobacco products.

Staying Alert & Fighting Back
All of our goals and objectives must challenge tobacco industry strategies. When they up the stakes, we have to respond. The tobacco industry is increasing its efforts, targeting more youth, young adults, and minorities. We must realize that the tobacco industry, to protect its livelihood, will find new ways to target the population and change its social image. They are constantly creating new, more clever ways to target young people.

Recognizing Communities as Leaders
As a state, it is important that local communities are empowered to lead the way in addressing the negative impact tobacco has on Oklahoma. The 1987 tobacco industry strategy that took away or “preempted” local control over tobacco policy in Oklahoma communities is holding the state of Oklahoma back and must be repealed.

Engaging and utilizing local and state policymakers, health systems and local community members will make Oklahoma a united force - a force that can make even more progress in improving the health of every Oklahoman. It is important that Oklahoma utilizes grassroots efforts to push forward every aspect of tobacco control to ensure consistent strategies that can and will impact the health of all Oklahomans.

Tribal nations are sovereign governments, recognized in the U.S. Constitution and by the State of Oklahoma. The tobacco plant is considered a sacred gift with traditional uses specific to each tribe, each very different from commercial tobacco use.

Collaboration with Tribal Nations

This State Plan would not be complete without acknowledging the special relationship between the State of Oklahoma and American Indians. Traditional use of sacred tobacco must be recognized and addressed when shaping meaningful, culturally appropriate tobacco control programs and policies in American Indian communities.

It is critical to the success of the State Plan for the State of Oklahoma and local governments to work collaboratively with Oklahoma’s tribal nations. While the State of Oklahoma recognizes the sovereign status of Oklahoma’s tribal nations, the State Plan provides a unique reference tool to identify areas of potential cooperation to address tobacco control within tribal jurisdictions.

COMMUNITY ACTION IS KEY

The TSET Healthy Living Program (HLP) consists of 50 organizations working in 63 counties to prevent and reduce tobacco use among other health initiatives. Using a comprehensive approach, the grantees work with businesses, city governments, community organizations and schools to create meaningful opportunities to encourage Oklahomans to be tobacco free. The TSET HLP supports the prevention and reduction of tobacco use in an effort to lessen the burden of unhealthy behaviors before they take root.

The TSET HLP and other statewide community partners are key players who bring about community support and resources that are needed to bring forth change in Oklahoma.

Communities Lead the Way

Community partners:

- Educate government officials and policymakers at the state and local levels to increase the visibility of tobacco control successes, build support for tobacco control action and increase knowledge about evidence-based tobacco control strategies.
- Advocate with organizations and institutions, including tobacco retailers, health care organizations, school boards, and parks and recreation officials to adopt policies and resolutions to prevent and reduce tobacco use and promote the tobacco-free norm.
- Educate health care administrators and providers, insurers and employers, and government officials and policymakers to increase provision of and coverage for tobacco dependence treatment.
- Encourage local news coverage of tobacco prevention events, support efforts to advance tobacco control by educating the community and key community members, and keep the tobacco problem on the public agenda.
KEY ACTIVITIES

- Increase the number of counties with comprehensive, community-based tobacco prevention programs
- Reduce youth access to tobacco by ensuring compliance with laws/ordinances/tribal policies
- Advance tobacco-free policies and reduce social acceptability of tobacco use among Oklahomans
- Strengthen public and private policies to counter tobacco industry marketing tactics
- Enact key public policy measures to increase prices on tobacco products

NEEDS OF SPECIFIC POPULATIONS

- Reduce smoking rates among American Indians and multi-racial Non-Hispanics, low socioeconomic communities, LGBTQ populations, consumers of mental health/substance abuse services, and post-deployment military personnel
- Increase Oklahoma Tobacco Helpline calls from men, Hispanics, and veterans
- Increase accessibility to Oklahoma Tobacco Helpline services for the deaf and hard of hearing

PREVENTION

- Increase compliance with secondhand smoke laws
- Educate the public and employers about the health effects of secondhand smoke
- Increase the number of voluntary smokefree policies for multi-unit housing and for specifically exempted venues such as stand-alone bars
- Generate support of restoring local rights for cities and counties to adopt stronger smoking ordinances
- Encourage voluntary adoption of home and auto smokefree policies

PROTECTION

- Reduce secondhand smoke exposure among pregnant women
- Increase the proportion of residents of multi-unit housing with access to smokefree buildings
- Reduce the proportion of children whose parents or caregivers smoke in homes or cars
- Reduce the number of bar, hotel, and restaurant workers exposed to secondhand smoke in the workplace

CESSATION

- Decrease initiation of electronic cigarette use among youth
- Reduce initiation of tobacco use among high school boys and young adults
- Reduce spit tobacco use among high school girls and young adults
- Strengthen protective factors among high-risk youth, including opportunities for youth participation/leadership and interaction with adult role models

- Decrease initiation of electronic cigarette use among youth
- Reduce the proportion of children whose parents or caregivers smoke in homes or cars
- Reduce secondhand smoke exposure among pregnant women
- Increase the proportion of residents of multi-unit housing with access to smokefree buildings

- Decrease initiation of tobacco use among high school girls and young adults
- Reduce spit tobacco use among high school boys and young adults
- Strengthen protective factors among high-risk youth, including opportunities for youth participation/leadership and interaction with adult role models

- Increase the proportion of residents of multi-unit housing with access to smokefree buildings
- Reduce the proportion of children whose parents or caregivers smoke in homes or cars
- Reduce secondhand smoke exposure among pregnant women
- Increase the proportion of residents of multi-unit housing with access to smokefree buildings
EVERY OKLAHOMAN CAN MAKE A DIFFERENCE

Smokers and Non-Smokers
- Make your homes and cars tobacco-free
- Refuse tobacco industry sponsorship of events and refuse tobacco industry-sponsored materials or magazines in your offices or classrooms
- Call the Oklahoma Tobacco Helpline at 1-800-QUIT-NOW and encourage your loved ones to call
- Encourage your elected officials to support strong public policy that will protect the public and workers from secondhand smoke, and prevent initiation of tobacco use
- Join a coalition and make a difference in your community

Health Care Professionals
- Ask your patients about tobacco use
- Advise them to quit
- Refer them for coaching and support
- Prescribe or recommend cessation medications
- Follow-up at subsequent visits

Business Owners and Managers
- Become an Oklahoma Certified Healthy Business
- Establish a tobacco-free property policy for your business, indoors and outdoors
- Offer smoking cessation to your employees through insurance coverage or wellness programs
- Promote the Oklahoma Tobacco Helpline 1-800-QUIT-NOW
- Sponsor a local coalition’s activities or events

School Boards, Faculty and Staff, Parents and Students
- Incorporate electronic cigarettes as prohibited products with school district tobacco-free policies
- Support a Students Working Against Tobacco (SWAT) team by sponsoring activities, becoming an adult facilitator, or joining up and getting your friends involved

City Councils, Community Leaders, and Concerned Citizens
- Join together to pass strong local ordinances and voluntary policies to protect the public and workers from secondhand smoke, and prevent initiation of tobacco use
- Sponsor a local coalition’s activities or events

STATE & LOCAL POLICY NEEDS

State-Level
- Extend state law to eliminate smoking in all indoor public places and workplaces.
- Return the rights of Oklahoma communities to adopt tobacco-related ordinances stronger than state law, as allowed in all neighboring states.
- Protect funding for tobacco control programs. Reject any proposal to limit the current constitutional authority of the Oklahoma Tobacco Settlement Endowment Trust.
- Prohibit all free sampling of tobacco products.
- Increase the state excise taxes on tobacco products.
- Collaborate with tribal nations on tobacco control policy to address secondhand smoke exposure within casinos in a manner that recognizes the sovereign status of tribes.

Local-Level
- Adopt prevention of youth access to tobacco ordinances that most effectively utilize the limited local powers permitted under current state law.
- Adopt clean indoor air ordinances that most effectively utilize the limited local powers permitted under current state law.
- Seek voluntary smokefree/tobacco-free policies.
- Collaborate on tobacco control policy with tribal nations in a manner that recognizes the sovereign status of tribes.

STATE & LOCAL POLICY NEEDS

State-Level
- Extend state law to eliminate smoking in all indoor public places and workplaces.
- Return the rights of Oklahoma communities to adopt tobacco-related ordinances stronger than state law, as allowed in all neighboring states.
- Protect funding for tobacco control programs. Reject any proposal to limit the current constitutional authority of the Oklahoma Tobacco Settlement Endowment Trust.
- Prohibit all free sampling of tobacco products.
- Increase the state excise taxes on tobacco products.
- Collaborate with tribal nations on tobacco control policy to address secondhand smoke exposure within casinos in a manner that recognizes the sovereign status of tribes.

Local-Level
- Adopt prevention of youth access to tobacco ordinances that most effectively utilize the limited local powers permitted under current state law.
- Adopt clean indoor air ordinances that most effectively utilize the limited local powers permitted under current state law.
- Seek voluntary smokefree/tobacco-free policies.
- Collaborate on tobacco control policy with tribal nations in a manner that recognizes the sovereign status of tribes.
The Advancement of Wellness Advisory Council wishes to thank the multitude of community and state partners for their commitment and dedication to reduce death and disease caused by tobacco use.

This State Plan, last revised in December 2017, is hereby respectfully submitted to state leaders and to all the people of the Great State of Oklahoma.
