

General Medical Hospitals and Critical Access Hospitals in Rural Areas

Legend

Hospital Type

-  Critical Access Hospital
-  General Medical Surgical Hospital
-  General / Long Term Acute Care Hospital

Census Tracts

Rural/Urban Census Tracts

-  Urban (RUCA 1-3)
-  Rural (RUCA 4 - 10)

Notes (Rural Hospitals):

The map displays census tracts according to a range of Rural-Urban Commuting Area (RUCA) codes. Codes range from 1-10: 1 is the most urban, while 10 is the most rural.

Notes (General Hospitals):

General Medical Hospitals include institutions capable of diagnosis and treatment of medical conditions in an inpatient setting. GHs provide a wide variety of laboratory, diagnostic and surgical services related to the treatment of medical conditions. General / Long Term Acute Care hospitals provide additional long-term and rehabilitative services.

Notes: Critical Access Hospitals:

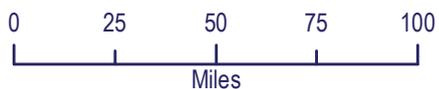

Critical Access Hospitals (CAHs) are limited service hospitals located in rural areas. CAH is a special Medicare designation for payment that is limited to hospitals with 25 beds or less and an average length of stay less than four days. Critical Access Hospitals receive payments for providing care to underserved populations.
