**SYMPTOMS INCLUDE**

- Itching
- Erythema
- Yellowish blisters
- Flu-like symptoms
- Delayed eye irritation

**INDICATIVE LAB TESTS**

- Thiodiglycol present in urine

---

**SYMPTOMS INCLUDE**

- Vertigo
- Tachycardia
- Tachypnea
- Cyanosis
- Flu-like symptoms
- Nonspecific neurological symptoms

**INDICATIVE LAB TESTS**

- Increased anion gap
- Metabolic acidosis
- Narrow pO\textsubscript{2} difference between arterial and venous samples

---

**SYMPTOMS INCLUDE**

- Diarrhea, diaphoresis
- Urination
- Miosis
- Bradycardia, bronchospasm, bronchorrhea
- Emesis
- Lacrimation
- Salivation

**INDICATIVE LAB TESTS**

- Decreased cholinesterase
- Increased anion gap
- Metabolic acidosis

---

**SYMPTOMS INCLUDE**

- Upper respiratory tract irritation
- Rhinitis
- Coughing
- Choking
- Delayed pulmonary edema

**INDICATIVE LAB TESTS**

- Decreased pO\textsubscript{2}
- Decreased pCO\textsubscript{2}

---

**SYMPTOMS INCLUDE**

- Cough
- Metallic taste
- CNS effects
- Shortness of breath
- Flu-like symptoms
- Visual disturbances

**INDICATIVE LAB TESTS**

- Proteinuria
- Blood mercury
- Urine mercury
