About Us...

The Westside Community Coalition was established on March 14, 2007. The coalition had several meetings inviting West Tulsa citizens and agencies. They gathered previous community assessments and listened to community citizens on the health issues. WCC is working with the City of Tulsa to improve local mass transportation options. The coalition identified the need to address poverty and ways to overcome generational poverty. One of the main concerns for West Tulsa is the placement of a grocery store. They want nutrition affordable foods. They would like to help provide West Tulsa with a farmer's market and to allow citizens with food stamps to be able to purchase as well.

Key Activities:

- Transportation support with InCog
- Grocery Store Establishment/
Farmer's Market
- West Tulsa Events

Significant Outcome:

- ◆ Identified priorities on the issues of West Tulsa and developed working groups to address those areas.
