

# Interagency and Community Coalition

Grady County  
2008

## Coalition Priorities:

1. Improve quality of life for all Grady County residents.
2. Promote Healthy Lifestyles.
3. Work through government, private citizens, business, and social service agencies.

## About Us...

The interagency and Community Coalition has worked on several activities over the past year. The main focus for the coalition this year was the Health Fair. The Interagency was approached by the Women's Health Forum about combining efforts for this year's Health Fair and Forum, which created a larger event to impact more residents of Grady County. At the Health Fair and Forum there was around 100 attendees from the community. The agency is in the process of doing a community resource guide for the local business. Each member of the agency is doing their part to help out with the resource guide book. The Interagency has worked on educating the public about Insure Oklahoma. The agency has also started working on underage drinking prevention education, and is also working towards getting the social host ordinance passed in Grady County. The Interagency has partnered with the systems of care coalition to help serve the family's in need. The agency is also a big supporter of the Oklahoma Certified Healthy Business program. And encourages local businesses to apply.

## Partners:
