

Canadian County Community Health Action Team

Canadian County

2007

Coalition Priorities:

1. Public awareness on issues relating to children
2. Increase usage of EPSDT screenings
3. Parent Education
4. Improving access to health care

About Us...

The Canadian County Coalition for Children and Families was organized in September, 1996 and has always had great vision and partnerships the coalition provides a forum for networking, sharing of information, professional training and public awareness on issues relating to children. We strive to support and participate in a variety of different programs and committees and look forward to increasing participation.

We are very excited about the continuing endeavors with our Access to HealthCare Committee. This Committee is looking and expanding the way children are seen and referred in the healthcare system, by increasing the EPSDT screenings. We are excited about the possibilities that this will bring to our children and the community. This year our committee has been researching transportation issues that are affecting our families.
