- KIBOIS Community Action
- Haskell County Schools
- Interested citizens
- KIBOIS Head start

Major Outcomes:

- Partnership development
- Family OutReach University
- Community by-in and support
- Adolescent Health Conference

About Us....

The Haskell County Inter-agency Group decided that they wanted to do more in their community than network and share information. They had effectively served as a way for county agencies to meet and discuss their programs and what was going on in the community for years but wanted to do more.

They became the Haskell County Coalition in 2006, expanded their partner bases and priorities and begin to work on ways to impact the health in their county. They started projects such as FOR-U and an Adolescent Health Conference. They also began to look at additional partners to strengthen the partnership and invited them to get involved. Though this is a new comprehensive coalition, they are well on their way to bettering the health of the citizens of Haskell County.

Key Activities

- Partnership planning and development
- Community mobilization
- Family OutReach University
- Partnership and priority expansion
- County-wide Adolescent Health Conference
- Strengthening Families Program training
