- Carl Albert Community Mental Health Centers

## Major Outcomes:

- Partnership development
- Drug education and prevention efforts
- Community by-in and support

## About Us....

The LeFlore County CEDE Coalition has been addressing substance abuse for some time. They decided after looking at the health issues related to substance abuse to expand the partnership and coalition priorities.

They became the LeFlore County Coalition for Healthy Living in 2006, expanded their partner bases and priorities and begin to work on ways to impact the health in their county. They have started working on needs assessments, bylaws and strategic planning for a comprehensive health initiative. They also began to look at additional partners to strengthen the partnership and invited them to get involved. Though this is a new comprehensive coalition, they are well on their way to bettering the health of the citizens of LeFlore County.

## Key Activities

- Community mobilization
- Partnership and priority expansion
- Strengthening Families Program training
- Coalition program expansion
- Initial strategic planning
