The Oklahoma Office of Homeland Security in conjunction with the Oklahoma Communications Unit Committee will be hosting the 2016 Interoperable Communications Black Box Rodeo on Thursday, October 20, 2016 in Tulsa, Oklahoma.

Description:

The IOC Black Box Rodeo is a radio communications drill designed to test the interoperability of mobile command and communications assets. This drill is an opportunity for local, state, tribal, and federal public safety and government agencies to verify their communications assets are functioning properly by performing tests using other agency assets and personnel. This event also allows agencies to demonstrate their assets to Communications Unit Personnel, public safety stakeholders, and the media.

Objectives:

- Agency Demonstrations of Mobile Communications Assets
- Testing of Communications Capabilities on each Asset
- Networking Opportunity to Develop Mutual Aid Partnerships

Registration:

Local, State, Tribal, and Federal Public Safety and Government Agencies are invited to participate in the 2016 IOC Black Box Rodeo. Agencies that would like to demonstrate their mobile command and communications assets should provide contact information and details regarding the space requirements and dimensions of their asset to IOC@okohs.ok.gov no later than close of business on October 10, 2016. Public Safety Stakeholders that will not be demonstrating an asset will not need to register.

*A Working Lunch will be provided to all Black Box Rodeo Participants.
