Overview of Courses:

**IRTB** - This four-hour course designed to prepare emergency responders to perform effectively and safely during bombing incidents, principally in support roles within the warm and cold zones of the incident scene. The course includes a familiarization with improvised explosive devices (IEDs) and explosive materials, and detailed training on critical response actions during pre- and post-detonation operations. In addition, the course addresses actions that emergency responders can take to prevent and/or deter bombing attacks against targets in their communities course.

**PRSBI** - This four-hour course addresses some of the major issues a jurisdiction is required to answer when creating plans, procedures, and tactics to prevent and respond to suicide bombing incidents. Upon completion of this course, participants will understand the suicide bombing threat, their role in community situational awareness, use of deadly force, and personal protection issues.

Participant Audience:
The participant audience includes Emergency Medical Services, Fire Services, Law Enforcement, Public Safety Communications and Public Works.
Participant must be a U.S. Citizen

Date and Location:
April 4, 2013
8:00 a.m. – 5:00 p.m.
