RECOVERY ORIENTED SYSTEMS OF CARE

“A Recovery Oriented System of Care is a coordinated network of community-based services and supports that is person-centered and builds on the strengths and resiliencies of individuals, families, and communities to achieve abstinence and improved health, wellness, and quality of life for those with or at risk of alcohol and drug problems.”

SAMHSA 2010

RECOVERY ORIENTED SYSTEMS OF CARE

A Recovery Oriented System of Care is a relatively new concept for the substance use disorder treatment field

RECOVERY ORIENTED SYSTEMS OF CARE

The Recovery Oriented System of Care model is evolving, adapting to the changes in the current health care delivery system

RECOVERY ORIENTED SYSTEMS OF CARE

The central focus of a Recovery Oriented System of Care is to create an infrastructure or “system of care” with the resources to effectively address the full range of substance use problems within communities.

RECOVERY ORIENTED SYSTEMS OF CARE

The specialty substance use disorder field provides the full continuum of care (prevention, early intervention, treatment, continuing care and recovery) in partnership with other disciplines, such as mental health and primary care, in a Recovery Oriented System of Care.

RECOVERY ORIENTED SYSTEMS OF CARE

A ROSC encompasses a complete menu of individualized, person-centered, and strength-based services within a self-defined network.

RECOVERY ORIENTED SYSTEMS OF CARE

By design, a Recovery Oriented System of Care provides individuals and families with more options with which to make informed decisions regarding their care.

RECOVERY ORIENTED SYSTEMS OF CARE

Services are designed to be accessible, welcoming, and easy to navigate.

RECOVERY ORIENTED SYSTEMS OF CARE

A fundamental value of a Recovery Oriented System of Care is the involvement of people in recovery, their families, and the community to continually improve access to and quality of services.

RECOVERY ORIENTED SYSTEMS OF CARE

A Recovery Oriented System of Care is a public health model that provides support through offering prevention, screening, early intervention, treatment, and recovery, integrated within the primary health care system.
